

COLD-FORMED STEEL DESIGN

T H I R D E D I T I O N

Wei-Wen Yu

CONTENTS

Preface

ix

1. Introduction

1

- 1.1 General Remarks 1
- 1.2 Types of Cold-Formed Steel Sections and Their Applications 3
- 1.3 Standardized Metal Buildings and Industrialized Housing 9
- 1.4 Methods of Forming 15
- 1.5 Research and Design Specifications 22
- 1.6 General Design Considerations of Cold-Formed Steel Construction 28
- 1.7 Economic Design and Optimum Properties 37

2. Materials Used in Cold-Formed Steel Construction

39

- 2.1 General Remarks 39
- 2.2 Yield Point, Tensile Strength, and Stress-Strain Curve 40
- 2.3 Modulus of Elasticity, Tangent Modulus, and Shear Modulus 41
- 2.4 Ductility 50
- 2.5 Weldability 53
- 2.6 Fatigue Strength and Toughness 54
- 2.7 Influence of Cold Work on Mechanical Properties of Steel 54
- 2.8 Utilization of Cold Work of Forming 58
- 2.9 Effect of Temperature on Mechanical Properties of Steel 65
- 2.10 Testing of Full Sections and Flat Elements 66
- 2.11 Residual Stresses Due to Cold Forming 67
- 2.12 Effect of Strain Rate on Mechanical Properties 68

3. Strength of Thin Elements and Design Criteria

71

- 3.1 General Remarks 71

3.2	Definitions of General Terms	71	
3.3	Design Basis	80	
3.4	Serviceability	88	
3.5	Structural Behavior of Compression Elements and Design Criteria	89	
3.6	Structural Behavior of Perforated Elements	139	
3.7	Plate Buckling of Structural Shapes	143	
3.8	Additional Information	145	
4.	Flexural Members		146
4.1	General Remarks	146	
4.2	Bending Strength and Deflection	147	
4.3	Design of Beam Webs	252	
4.4	Bracing Requirements of Beams	297	
4.5	Torsional Analysis of Beams	310	
4.6	Additional Information on Purlins	311	
5.	Compression Members		312
5.1	General Remarks	312	
5.2	Yielding	313	
5.3	Flexural Column Buckling	313	
5.4	Torsional Buckling and Torsional-Flexural Buckling	317	
5.5	Effect of Local Buckling on Column Strength	329	
5.6	Effect of Cold Work on Column Buckling	333	
5.7	AISI Design Formulas for Concentrically Loaded Compression Members	334	
5.8	Effective Length Factor K	342	
5.9	Design Examples	346	
5.10	Wall Studs	357	
5.11	Additional Information on Compression Members	359	
6.	Combined Axial Load and Bending		360
6.1	General Remarks	360	
6.2	Combined Tensile Axial Load and Bending	361	
6.3	Combined Compressive Axial Load and Bending (Beam-Columns)	365	
6.4	AISI Design Criteria	376	
6.5	Additional Information on Beam-Columns	407	
7.	Cylindrical Tubular Members		408
7.1	General Remarks	408	

7.2	Types of Cylindrical Tubes	408
7.3	Flexural Column Buckling	409
7.4	Local Buckling	410
7.5	AISI Design Criteria	417
7.6	Design Examples	423
8.	Connections	430
8.1	General Remarks	430
8.2	Types of Connectors	430
8.3	Welded Connections	430
8.4	Bolted Connections	466
8.5	Screw Connections	502
8.6	Other Fasteners	507
8.7	Rupture Failure of Connections	510
8.8	I- or Box-Shaped Compression Members Made by Connecting Two C-Sections	512
8.9	I-Beams Made by Connecting Two C-Sections	514
8.10	Spacing of Connections in Compression Elements	521
9.	Steel Shear Diaphragms and Shell Roof Structures	526
9.1	General Remarks	526
9.2	Steel Shear Diaphragms	526
9.3	Structural Members Braced by Diaphragms	546
9.4	Shell Roof Structures	567
10.	Corrugated Sheets	588
10.1	General Remarks	588
10.2	Applications	588
10.3	Sectional Properties and Design of Arc-and-Tangent-Type Corrugated Sheets	589
10.4	Sectional Properties and Design of Trapezoidal-Type Corrugated Sheets	599
11.	Composite Design	600
11.1	General Remarks	600
11.2	Steel-Deck-Reinforced Composite Slabs	601
11.3	Composite Beams or Girders with Cold-Formed Steel Deck	602
12.	Introduction to Stainless Steel Design	607
12.1	General Remarks	607

12.2 Differences between the Specifications for Carbon Steels and Stainless Steels 610

13. Computer-Aided Design 615

13.1 General Remarks 615
13.2 Computer Programs for the Design of Cold-Formed Steel Structures 615

14. Residential Construction 619

14.1 General Remarks 619
14.2 Prescriptive Method 619
14.3 AISI Residential Manual 620
14.4 Framing Standards 621

Appendix A. Thickness of Base Metal 622

Appendix B. Torsion 625

Appendix C. Formulas for Computing Cross-Sectional Property β_y 644

Nomenclature 646

Acronyms and Abbreviations 664

Conversion Table 666

References 667
