

FOURTH EDITION

Electronic Moviemaking

Lynne S. Gross
Larry W. Ward

Contents

part one

Preproduction 1

chapter one

- Developing the Script 2
- The Writer's Role 2
- Script Terminology 2
 - Scripting Stages 3
- Other Script Forms 11
- Computer Programs for Scriptwriting 15
- Copyright and Clearances 16
- Notes 17

chapter two

The Process of Preproduction 20

- Preproduction Planning 20
 - Script Breakdown 20
 - Shooting Schedule 26
 - Stripboards 27
 - Production Schedule 27
 - The Budget 28
 - Daily Call Sheets 33
- Preproduction Responsibilities 35
 - Hiring Behind-the-Scenes Personnel 35
 - Casting 37
 - Finding Locations 38
 - Designing and Building Sets 38
 - Planning Costumes, Wardrobe, Makeup, and Hairstyling 43
 - Preparing Props, Effects, and Supplies 44
 - Acquiring and Checking Equipment 44
 - Obtaining Rights 45
 - Arranging Transportation, Lodging, and Meals 45
 - Obtaining Insurance 47
- Notes 47

part two

Production 49

chapter three

- The Process of Production 50
- Production Responsibilities 50
 - Directing 50
 - Acting 52
 - Organizing and Record Keeping 53
 - Lighting and Camera Operation 57
 - Recording the Picture and Sound 60
 - Supporting the Production 60
- The Stages of Production 60
 - Setting Up 61
 - Rehearsing 62
 - Shooting 63
 - Striking 65
- Notes 65

chapter four

- Cameras and Lenses 68
- Formats 68
 - Film Formats 68
 - Video Formats 68
- Aspect Ratio 71
- Choosing a Film or Tape Stock 73
- The Camera 74
 - Imaging Devices 74
 - Color Video 75
 - Evaluating Camera Performance 76
 - Basic Camera Features 77
- Video Recording 78
- Video Connectors 80
- Monitoring the Recording 80
- Supporting the Camera 81

Hand-Held Cameras	82
Tripods	82
Dollies	82
Cranes	83
Moving the Camera	83
Lenses	84
Focal Length	84
Focus	86
Aperture	86
Depth of Field	87
Care of Equipment	88
Notes	89
chapter five	
Approaches to Image Making	92
Shot Determination	92
The Basic Shots	92
Subjective Shots	93
Lens Selection	95
Focal Length Characteristics	95
Depth of Field	95
Camera Angle	96
Composing Within the Static Frame	97
Manipulating the Mise-en-Scène	97
Balance	99
Rule of Thirds	99
Creating Depth	100
On-Screen/Off-Screen Space	100
The Edge of the Frame	100
The Moving Frame	101
Camera Movements	101
Zooming	103
Reframing	103
Time	103
Color and Tonality	104
Film Color	104
Video Color	104
Black-and-White or Color	104
Color Considerations	105
Shooting to Edit	105
Shot Selection	106
Shot Duration	107
The Long Shot, Medium Shot, Close-Up	
Pattern	107
Shooting for Continuity	107
Notes	109

chapter six	
Lights and Filters	110
Measuring the Light	110
Incident Meters	110
Reflected Light Meters	110
Automatic Metering Systems	111
Getting Correct Exposure	111
Problems with Automatic Metering	
Systems	112
Footcandles, F-Stops, and EI	112
Contrast Range	113
Using a Monitor to Evaluate Exposure	113
Using a Waveform Monitor to Evaluate Exposure	114
The Color of Light	115
The Electromagnetic Spectrum	115
The Kelvin Scale	116
Tungsten and Daylight-Balanced Light	116
Small-Scale Color Corrections	117
The Vectorscope	117
Filters for Film and Video	118
Using Filters	119
Mounting Filters	119
Compensating for Filters	119
Care of Filters	120
Artificial Lighting	120
Types of Lamps	120
Basic Lighting Instruments	122
Mounting Equipment	124
Controlling the Light	125
Electric Power Requirements	129
Lighting Safety	131
Notes	132
chapter seven	
Lighting Approaches	134
Lighting Styles	134
Basic Three-Point Lighting	134
Film Versus Video Lighting	136
Preparing to Light	137
Outdoor Lighting	138
Contrast Reduction	139
Maintaining Continuity in Changing Light	140

Shooting at Night	140
Adapting to Weather Conditions	141
Indoor Lighting	142
Shooting in Available Light and Low Light	142
Bounce Lighting	142
Mixed Lighting	143
Fluorescent Lighting	144
Lighting for Movement	145
Variations in Lighting	147
Notes	150

chapter eight

Microphones and Recorders 152

The Nature of Sound	152
Pitch and Frequency	152
Loudness and Amplitude	153
Timbre	154
Duration	154
Velocity	154
Microphones	154
Directionality	155
Construction	157
Impedance	158
Positioning	158
Cables and Connectors	159
Balanced and Unbalanced Cables	160
Connector Types	160
Recorders	161
Double System and Single System Sound Recording	162
Types of Recorders	163
Recording Methods	165
Features of Sound Recorders	166
Care of Audio Equipment	167
Notes	168

chapter nine

Approaches to Sound Recording 170

Elements of Microphone Pickup	170
Presence	170
Perspective	171
Balance	171
Continuity	172
Eliminating Unwanted Noises	172

Miking Dialogue	173
Selecting the Mic	173
Setting Up the Mics	173
Special Dialogue Situations	174
Miking Voice-Overs	175
Miking Sound Effects	175
Miking Ambient Sounds	176
Miking Music	177
Recording Techniques	178
Notes	179

part three

Postproduction 181

chapter ten

The Process of Postproduction 182

Film Editing	183
Workprints	183
Film Editing Equipment	183
Film Editing Stages	185
The Role of the Laboratory in Film Postproduction	187
Video Editing	188
Linear and Nonlinear Editing	189
Off-Line and On-Line Editing	190
Postproduction Responsibilities	191
General Overseeing	192
Transferring Film to Video	192
Organizing Footage	193
Picture and Dialogue Editing	197
Sound Building	197
Incorporating Graphics	198
Incorporating Elaborate Special Effects	198
Preparing the Movie for Distribution	199
Notes	200

chapter eleven

Picture and Dialogue Editing 202

Nonlinear Editing	202
Hardware	203
Software	204
Digitizing and Importing	205
Editing	207

- Adding Graphics and Effects 208
- Outputting 210
- A Nonlinear Example 212
 - Transferring Picture and Sound 212
 - Off-Line Editing 212
 - Lock Down and Final Cut Assembly 212
 - Sound Building 213
 - Layback 214
- Cuts-Only Linear Editing 214
 - Control Track Editing 214
 - Time Code Editing 215
 - Equipment 215
 - Insert and Assemble Modes 217
- More Advanced Linear Editing 219
 - Equipment for Effects 219
 - Equipment for Control and Measurement 220
 - Equipment for Graphics 221
- Notes 221
- chapter twelve
- Editing Approaches 224
 - Conventional Hollywood Patterns 224
 - Editing in the Service of the Story 224
 - The Continuity System 226
 - The Master Shot Method 226
 - Ensuring a Consistent Screen Direction 232
 - Finding the Cutting Point 233
 - Other Editing Concerns 233
 - Other Transitions 236
 - Alternatives in Time and Space 237
 - Montage Editing 237
 - Notes 238
- chapter thirteen
- Structuring Sound 240
 - Variations in Structuring Sound 240
 - Magnetic Film Stock Systems 240
 - Magnetic Tape Systems 241
 - Computer Systems 242
 - Dialogue 244
 - Automatic Dialogue Replacement 245
 - Voice-Over 246
 - Sound Effects 247
 - Foley 249
 - Ambient Sounds 252
 - Music 252
 - Original Music 252
 - Previously Composed Music 255
 - Mixing 256
 - Limited Mixing 256
 - Professional-Level Multitrack Mixing 256
 - Computer-Based Mixing 259
 - Laybacks and Dubs 261
 - Notes 262
- chapter fourteen
- Approaches to Structuring 264
 - The Evolution of Sound 264
 - The Relationship of Sound to Image 264
 - The Functions of Sound 265
 - Supplying Information 266
 - Enhancing Reality and Fantasy 269
 - Establishing Time, Place, and Character 270
 - Creating Mood and Emotion 271
 - Giving a Sense of Rhythm 272
 - Directing Attention 273
 - Layering Sound 274
 - Notes 275
- Glossary 276
- Suggested Readings and Web Sites 288
- Index 289
