

TOXICOLOGY OF THE HUMAN ENVIRONMENT

The critical role of free radicals

edited by CHRISTOPHER J. RHODES

Contents

<i>List of contributors</i>	xi
<i>List of abbreviations</i>	xiv
1 Introduction	1
CHRISTOPHER J. RHODES	
PART I	
Spin-trapping	5
2 Chemistry of spin-trapping	7
RHEAL A. TOWNER	
2.1 <i>Introduction</i>	7
2.2 <i>Types of spin-trap</i>	11
2.3 <i>Selection criteria</i>	15
2.4 <i>Structural assignment considerations</i>	17
2.5 <i>Conclusions</i>	19
3 Spin-trapping: problems and artefacts	25
LENNART EBERSON	
3.1 <i>Introduction</i>	25
3.2 <i>The redox reactivity of spin-traps and reagents involved in the radical cation mechanism; inverted spin-trapping</i>	26
3.3 <i>The Forrester-Hepburn mechanism; nucleophilic addition-oxidation</i>	31
3.4 <i>Detection of spin adducts in biochemical/biological systems</i>	40
3.5 <i>Cycloaddition as a possible cause of artefacts</i>	41
4 In vivo spin-trapping – from chemistry to toxicology	49
RONALD P. MASON	
5 Ex vivo detection of free radicals	71
ALDO TOMASI, ANNA IANNONE, MARCO FERRARI AND VALENTINA QUARESIMA	

- 5.1 Background 71
- 5.2 Ex vivo spin-trapping of short-lived free radicals 72
- 5.3 Nitrogen monoxide (nitric oxide, NO[•], NO) 78
- 5.4 Conclusion 82

PART II

Nitroxides

89

6 The metabolism of nitroxides in cells and tissues 91

HAROLD M. SWARTZ AND GRAHAM S. TIMMINS

- 6.1 Introduction and overview 91
- 6.2 Reduction of nitroxides in mammalian cells 93
- 6.3 Cellular oxidation of hydroxylamines 99
- 6.4 The toxicity of nitroxides 99
- 6.5 Applications of the metabolism of nitroxides 100

7 Clinical uses of nitroxides as superoxide-dismutase mimics 113

JAMES B. MITCHELL, MURALI C. KRISHNA, AMRAM SAMUNI, PERIANNAN KUPPUSAMY, STEPHEN M. HAHN, AND ANGELO RUSSO

- 7.1 Introduction 113
- 7.2 Structural features and chemical properties of nitroxides 114
- 7.3 In vitro and in vivo toxicity 118
- 7.4 In vitro radioprotection by nitroxides 122
- 7.5 In vivo radioprotection by nitroxides 124
- 7.6 Protection against redox-cycling chemotherapy drugs 128
- 7.7 Nitroxides as functional imaging probes 131
- 7.8 Summary 132

8 Nitroxide skin toxicity 139

JÜRGEN FUCHS

Abstract 139

- 8.1 Introduction 140
- 8.2 Materials and methods 141
- 8.3 Results 145
- 8.4 Discussion 147
- 8.5 Conclusion 148

PART III

Toxic role of specific agents

153

9 Biological oxidations catalyzed by iron released from ferritin 155

CHRISTOPHER A. REILLY AND STEVEN D. AUST

- 9.1 Introduction 155
- 9.2 Iron-catalyzed oxidations 155
- 9.3 Biological sources of catalytic iron 164

9.4	<i>Antioxidant defences for iron-mediated toxicity</i>	174
9.5	<i>Conclusions</i>	181
10	The toxicology of iron	191
	RODNEY BILTON	
10.1	<i>Introduction</i>	191
10.2	<i>Human conditions and diseases involving iron toxicity</i>	197
10.3	<i>From oxygen via iron to the hydroxyl radical</i>	201
11	The role of free radicals in the toxicology of airborne particulate pollutants	209
	PETER EVANS	
11.1	<i>Introduction</i>	209
11.2	<i>Silica toxicity</i>	210
11.3	<i>Coal</i>	211
11.4	<i>Asbestos</i>	212
11.5	<i>Man-made mineral fibres</i>	215
11.6	<i>Zeolites</i>	216
11.7	<i>Smoke</i>	217
11.8	<i>Traffic air pollution</i>	219
11.9	<i>Nutritional and physiological antioxidants</i>	222
11.10	<i>Pharmacological antioxidants</i>	223
11.11	<i>Conclusion</i>	224
12	Free radical mechanisms of ethanol toxicity	235
	EMANUELE ALBANO	
12.1	<i>Introduction</i>	235
12.2	<i>Mechanisms involved in causing oxidative damage by alcohol</i>	236
12.3	<i>Free radical-mediated processes in organ damage by alcohol</i>	244
12.4	<i>Role of free radical-mediated mechanisms in alcohol toxicity</i>	248
12.5	<i>Conclusions</i>	252
13	The role of cytokines in the inflammatory response	265
	CARMEN M. ARROYO	
13.1	<i>Introduction</i>	265
13.2	<i>Activation of TNF-α by THP-1 exposed to H-MG</i>	266
13.3	<i>Nitrosyl chloride in keratinocytes exposed to HD</i>	273
14	Duplicity of thiols and thiol radicals: protector and foe	285
	CHRISTOPHER J. RHODES	
	<i>Abstract</i>	285
14.1	<i>Introduction</i>	285

14.2	<i>Background to the muon spectroscopy technique</i>	286
14.3	<i>Experimental section</i>	287
14.4	<i>Structural studies of thiyl radicals</i>	287
14.5	<i>Reactivity of thiyl radicals</i>	290
14.6	<i>Evidence for actual biological significance of thiyl radicals</i>	293
14.7	<i>Conclusions</i>	296
15	Synergistic effect of carbon tetrachloride and 1,2-dibromoethane	301
	GIUSEPPE POLI, MANUELA ARAGNO, ELENA CHIARPOTTO, SIMONETTA CAMANDOLA AND OLIVIERO DANNI	
15.1	<i>Introduction</i>	301
15.2	<i>Carbon tetrachloride and 1,2-dibromoethane interactions</i>	301
15.3	<i>Conclusions</i>	306
16	Reactive oxygen species in physiology and toxicology	311
	NALINI KAUL AND HENRY JAY FORMAN	
	<i>Abstract</i>	311
16.1	<i>Production of free radicals</i>	312
16.2	<i>Biological sources of free radicals</i>	314
16.3	<i>Toxicity of reactive oxygen species</i>	316
16.4	<i>Oxidant stress and signaling</i>	320
16.5	<i>Oxidative stress and inflammation</i>	325
16.6	<i>Oxidative stress in apoptosis, necrosis and cell growth</i>	327
16.7	<i>Oxidative stress and carcinogenesis</i>	328
PART IV		
Free radicals in specific disease states		337
17	The role of free radicals in chemical carcinogenesis	339
	JOSEPH R. LANDOLPH	
	<i>Abstract</i>	339
17.1	<i>Introduction</i>	340
17.2	<i>Stimulation of the arachidonic acid cascade, oxygen radical generation, and chemical carcinogenesis</i>	342
17.3	<i>Metabolism of polycyclic aromatic hydrocarbons, free radicals, and chemical carcinogenesis</i>	346
17.4	<i>Metal-induced free radical generation and metal salt carcinogenesis</i>	347
17.5	<i>Endogenous oxygen radical generation and carcinogenesis</i>	353
17.6	<i>Conclusions</i>	354
18	Free radical involvement in cardiovascular and respiratory diseases	363
	FRANK J. KELLY	
	<i>Abstract</i>	363
18.1	<i>Heart disease</i>	363
18.2	<i>Lung diseases</i>	365

PART V		
Free radicals in the diet		371
19	NMR evaluation of thermally-induced peroxidation in culinary oils	373
	MARTIN GROOTVELD, CHRISTOPHER J.L. SILWOOD AND ANDREW W.D. CLAXSON	
	19.1 <i>Introduction</i> 373	
	19.2 <i>Materials and methods</i> 375	
	19.3 <i>Results</i> 378	
	19.4 <i>Discussion</i> 390	
PART VI		
Chemical models		395
20	The structure and electronic properties of oxy intermediates in the enzymatic cycle of cytochrome P450s	397
	DAN HARRIS	
	20.1 <i>Introduction</i> 397	
	20.2 <i>Theoretical and technical aspects</i> 402	
	20.3 <i>Results and discussion</i> 404	
	20.4 <i>Conclusions</i> 414	
21	Spin-trapping – applications to photochemical and photobiological problems	421
	COLIN F. CHIGNELL	
	21.1 <i>Introduction</i> 421	
	21.2 <i>Photochemistry of photosensitizers</i> 421	
	21.3 <i>Free radical and EPR</i> 423	
	21.4 <i>Spin-trapping in photochemical systems</i> 429	
	21.5 <i>Spin-trapping of oxygen-centered radicals</i> 431	
	21.6 <i>Spin-trapping of radicals from photosensitizing chemicals</i> 433	
22	Thermodynamic considerations of free radical reactions	437
	JOHN BUTLER	
	22.1 <i>Introduction</i> 437	
	22.2 <i>Reduction</i> 437	
	22.3 <i>Oxidation</i> 438	
	22.4 <i>pH dependence of reduction potentials</i> 438	
	22.5 <i>Measurement of reduction potentials</i> 441	
	22.6 <i>Redox enzymes</i> 442	
	22.7 <i>Drugs, oxygen and metals</i> 444	
23	The use of QSAR for the prediction of free radical toxicity	453
	MARK T.D. CRONIN AND THUY T. TRAN	
	23.1 <i>Introduction</i> 453	
	23.2 <i>Identification of compounds likely to form free radicals</i> 454
