

Comparative ninth edition Anatomy of the **VERTEBRATES**

George C. Kent
Robert K. Carr

A photograph of two zebras in a savanna landscape. One zebra is in the foreground, facing left, and the other is slightly behind it, also facing left. The background shows a grassy plain with some trees under a bright sky.

Preface, xv

1 INTRODUCTION, 1

The Phylum Chordata: The Big Four, 2

The Craniate Body: General Plan, 2

Regional Differentiation, 2

Bilateral Symmetry and Anatomic Planes, 3

Metamerism, 4

Craniate Characteristics, 5

Vertebrate Characteristics, 5

Structures Common to Craniates, 5

Notochord and Vertebral Column, 5

Pharynx, 6

Pharyngeal Pouches and Slits, 6

Pharyngeal Arches, 7

Dorsal Hollow Central Nervous System, 8

Other Vertebrate Characteristics, 9

Integument, 9

Respiratory Mechanisms, 9

Coelom, 9

Digestive System, 10

Urogenital Organs, 10

Circulatory System, 10

Skeleton, 10

Muscles, 11

Sense Organs, 11

2 CONCEPTS, PREMISES, AND PIONEERS, 13

Pattern and Process, 14

Homology and Homoplasy, 14

Serial Homology, 15

Analogy, 15

Adaptation, 16

Speciation, 16

Evolutionary Convergence, 16

Development, 17

Ontogeny and Phylogeny, 17

von Baer's Law, 17

Metamorphosis and Heterochrony, 19

Systematics and Taxonomy, 20

Organic Evolution and Evolutionary Selection, 22

Anatomy from Galen to Darwin, 23

Words to Ponder, 24

3 PROTOCHORDATES AND THE ORIGIN OF CRANIATES, 29

Protochordates, 30

Basal Deuterostomes (Echinoderms and Hemichordates), 31

Echinoderms, 31

Hemichordates, 31

Urochordates, 32

Ascidians, 32

Larvaceans, 34

Thaliaceans, 34

Cephalochordates, 34

Locomotor Musculature and Skin, 35

Pharyngeal Slits, 35

Notochord, 35

Nervous System and Sense Organs, 35

Food Processing, 37

Coelom, 37

Circulatory System, 38

Elimination of Metabolic Wastes, 38

Gonads, 39

Amphioxus and the Craniates Contrasted, 39

The Origin of Craniates, 39

The Ammocoete: A Vertebrate Larva, 40

Heterochrony and the Relationship between Amphioxus and Vertebrates, 42

4 PARADE OF THE CRANIATES IN TIME AND TAXA, 45

Craniata Taxa, 46

Agnatha, 47

Ostracoderms, 47

Living Agnathans, 49
Hagfishes, 50
Lampreys, 50
Gnathostomes: Placoderms, 51
Chondrichthyes (Cartilaginous Fishes), 52
Elasmobranchs, 52
Holocephalans, 53
Acanthodians and Osteichthyans (Spiny Fishes and Bony Fishes), 53
Acanthodians, 53
Osteichthyans, 53
Actinopterygii (Ray-Finned Fishes), 54
Basal Actinopterygians, 54
Neopterygians, 54
Sarcopterygii (Lobe-Finned Fishes), 54
Actinistians, 55
Rhipidistians, 55
Dipnoans, 56
Amphibia, 57
Labyrinthodonts, 57
Temnospondyls, 58
Microsaurs, 58
Lissamphibians, 58
Apodans, 58
Urodeles, 59
Anurans, 59
Anthracosaur, 60
Amniotes (Reptiles and Synapsids), 60
Reptilia (Sauropsida), 60
Anapsids, 63
Diapsids, 63
Lepidosaur, 63
Archosaurs, 64
Synapsids, 67
Mammalia, 67
Monotremata, 68
Marsupialia, 68
Insectivora, 69
Xenarthra, 70
Tubulidentata, 70
Pholidota, 71
Chiroptera, 71
Primates, 71
Prosimians, 72
Anthropoids, 73
Lagomorpha, 74
Rodentia, 74
Carnivora (Fissipedia), 76
Pinnipedia, 78

Ungulates and Subungulates, 79
Perissodactyla, 79
Artiodactyla, 79
Hyracoidea, 80
Proboscidea, 80
Sirenia, 80
Cetacea, 81
Variation among Individuals, 82

5 EARLY CRANIATE MORPHOGENESIS, 86

Craniate Eggs, 87
Egg Types, 87
Oviparity and Viviparity, 87
Internal and External Fertilization, 88
Early Development of Representative Chordates, 88
Cleavage and the Blastula, 88
Gastrulation: Formation of the Germ Layers and Coelom, 89
Amphioxus, 89
Frog, 90
Chick, 92
Placental Mammals, 93
Neurulation, 93
Induction of Differentiation: Morphogens, 96
Mesenchyme, 96
Fate of the Ectoderm, 97
Stomodeum and Proctodeum, 97
Neural Crest, 97
Ectodermal Placodes, 98
Fate of the Endoderm, 98
Fate of the Mesoderm, 99
Dorsal Mesoderm (Epimere), 99
Lateral-Plate Mesoderm (Hypomere), 99
Intermediate Mesoderm (Mesomere), 99
Significance of the Germ Layers, 100
Extraembryonic Membranes, 100
Yolk Sac, 100
Amnion and Chorion, 100
Allantois, 101
Placentas, 101
