

A Volume in the Wiley Series on
Adaptive and Learning Systems for Signal Processing, Communications, and Control
Simon Haykin, Series Editor

Control-Oriented System Identification

An $\mathcal{H}_\infty$ Approach

Jie Chen and Guoxiang Gu

Contents

Preface	xiii
Nomenclature	xvii
1 Introduction	1
1.1 Least Squares Methods	2
1.2 Set Membership Formulation	4
1.3 Control-Oriented Identification	5
1.4 Summary	9
1.5 Outline of the Text	11
2 Mathematical Background	15
2.1 Function Spaces and Signals	15
2.1.1 Banach and Hilbert Spaces	15
2.1.2 Signal Norms and Spaces	19
2.1.3 Fourier Transform and Frequency Response	21
2.1.4 System and Operator Norms	24
2.2 Harmonic Analysis	30
2.2.1 Uniform Convergence	30
2.2.2 Discrete Fourier Transform	34
2.3 Analytic Function Approximation	36

2.3.1	Hankel Norm Approximation	36
2.3.2	Nevanlinna-Pick Interpolation	41
2.3.3	The Carathéodory-Fejér Problem	44
2.3.4	Nevanlinna-Pick Problem on the Right Half Plane	46
2.4	Tangential Interpolation	48
2.4.1	Nudelman Problem	48
2.4.2	Tangential Interpolation Problems	50
2.5	n -Width Polynomial Approximation	52
	Exercises	57
3	$\mathcal{H}_\infty$ Control and Identification	63
3.1	$\mathcal{H}_\infty$ Control	64
3.1.1	$\mathcal{H}_\infty$ Optimal Control	64
3.1.2	Robust Stability and Robust Stabilization	67
3.1.3	Structured Singular Value	72
3.1.4	Robust Performance	76
3.2	$\mathcal{H}_\infty$ Identification	78
3.2.1	An $\mathcal{H}_\infty$ Identification Problem	79
3.2.2	Intrinsic and Optimal Properties	81
3.2.3	Experiment Design	85
3.3	Summary	90
	Exercises	92
4	Linear Algorithms	97
4.1	Untuned Linear Algorithms	97
4.1.1	Rectangular Window	105
4.1.2	Triangular Window	111
4.2	Divergence of Untuned Linear Algorithms	117
4.3	Tuned Linear Algorithms	123
4.4	Generalizations	129
4.5	Summary	131
	Exercises	133
5	Two-Stage Nonlinear Algorithms	137
5.1	The Two-Stage Structure	138
5.2	Convergence Properties	144
5.2.1	Time Domain Analysis	144
5.2.2	Frequency Domain Characterization	151

5.3	Error Bounds	154
5.4	Nonuniformly Spaced Data	164
5.5	Summary	166
	Exercises	168
6	Nonlinear Interpolatory Algorithms	171
6.1	Interpolatory Class	171
6.1.1	IBC Characterization	173
6.1.2	Consistency of Information	176
6.1.3	Interpolatory Algorithms	182
6.2	Error Bounds	186
6.3	Other Suboptimal Algorithms	193
6.4	Summary	199
	Exercises	201
7	Time Domain Algorithms	207
7.1	Time Domain Formulation	208
7.2	Time Domain Interpolatory Algorithms	210
7.2.1	The Consistency Problem	210
7.2.2	Interpolatory Algorithms	214
7.2.3	Error Bounds	216
7.3	Nearly Interpolatory Algorithms	222
7.3.1	n -Width Approximation	222
7.3.2	Approximation via Linear Programs	231
7.4	Divergence and Complexity Issues	236
7.4.1	Untuned Linear Algorithms	236
7.4.2	Sample Complexity	240
7.5	Mixed Time/Frequency Domain Algorithms	243
7.5.1	Interpolatory Approach	244
7.5.2	Intrinsic Error Bounds	247
7.6	Summary	249
	Exercises	251
8	$\mathcal{H}_\infty$ Identification of Continuous-Time Systems	255
8.1	Continuous-Time $\mathcal{H}_\infty$ Identification Problem	256
8.2	Continuous-Time Two-Stage Algorithms	260
8.2.1	Approximation via Trigonometric Polynomials	261
8.2.2	Two-Stage Algorithms	267

8.3	Continuous-Time Interpolatory Algorithms	276
8.3.1	Interpolatory Algorithms	277
8.3.2	Intrinsic Error Bounds	282
8.4	Summary	288
	Exercises	289
9	Time Domain Model Validation	293
9.1	Time Domain Formulation	295
9.2	Time Domain Tests	298
9.2.1	Unstructured Uncertainty	298
9.2.2	Structured Uncertainties	301
9.3	Computational Complexity	307
9.4	Extensions	310
9.4.1	Exponentially Stable Uncertainty	310
9.4.2	Mixed Parametric/Nonparametric Uncertainty	312
9.4.3	Input Disturbance	314
9.5	Continuous-Time Systems	317
9.5.1	The Lifting Procedure	317
9.5.2	Invalidation of Continuous-Time Models	320
9.6	Summary	330
	Exercises	333
10	Frequency Domain Model Validation	337
10.1	Frequency Domain Approach: Input-Output Data	338
10.1.1	Frequency Domain Tests: Unstructured Uncertainties	340
10.1.2	Structured Uncertainties	342
10.2	Frequency Domain Approach: Frequency Response Data	344
10.3	Extensions	355
10.3.1	Exponentially Stable Uncertainty	355
10.3.2	Mixed Time and Frequency Domain Tests	358
10.4	An Illustrative Example	361
10.5	Summary	366
	Exercises	368
	Appendix A: Information-Based Complexity	371

A.1	Information Measures	372
A.2	Optimal Algorithms	375
Appendix B: Convex and LMI Programming		381
B.1	Convex and LMI Optimization	382
B.2	Interior Point Methods	384
Appendix C: Computational Complexity		389
C.1	Classes P and NP	390
C.2	NP-Complete and NP-Hard Problems	395
References		399
