

Modern Experimental
BIOCHEMISTRY

Third Edition

Rodney Boyer

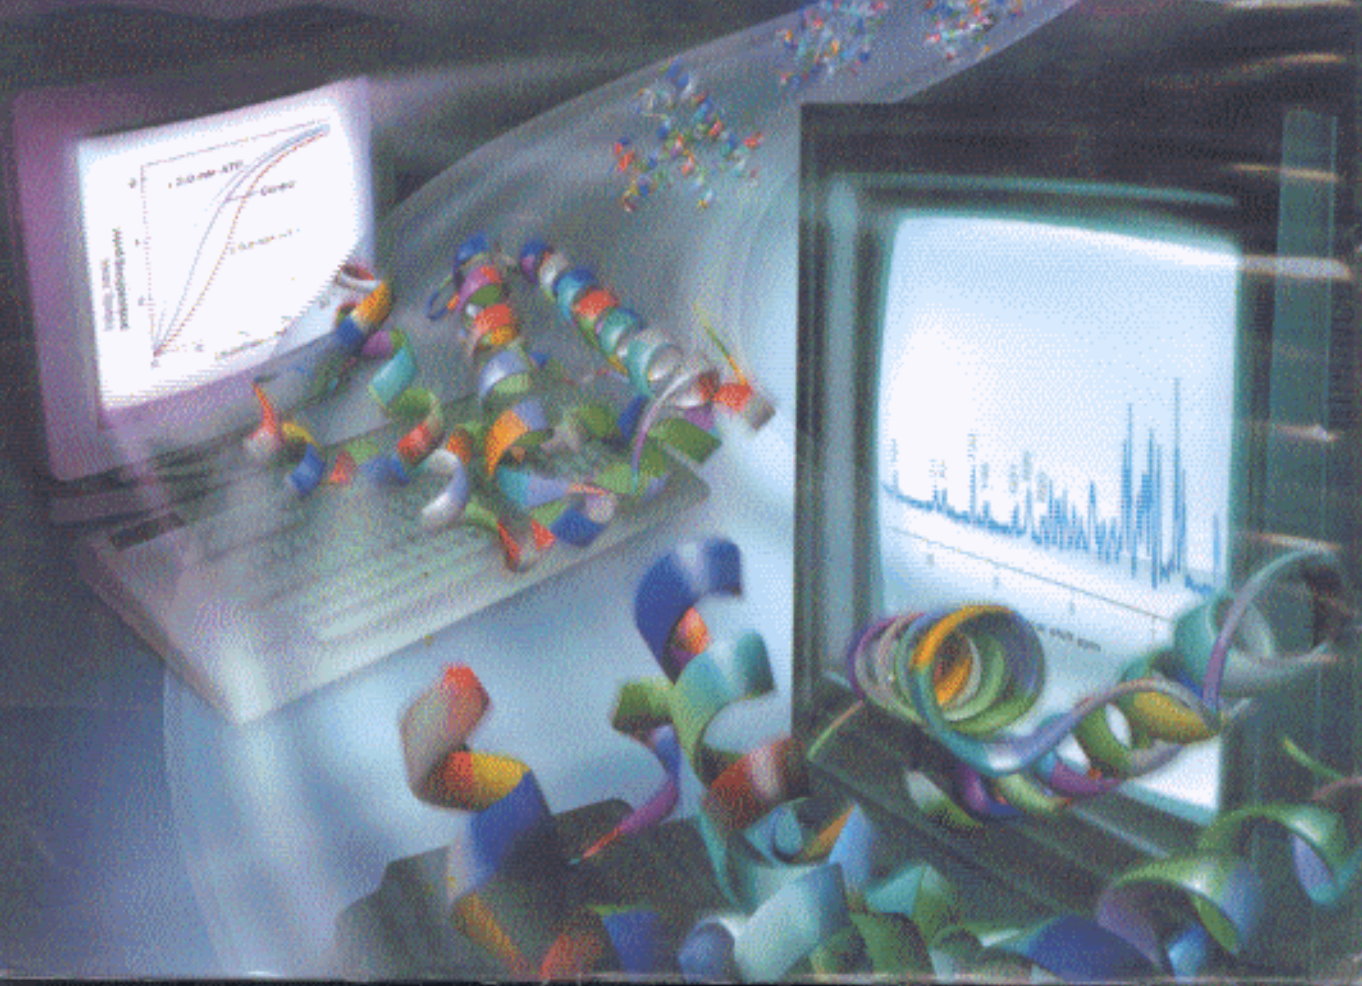

TABLE OF CONTENTS

PART ONE THEORY AND EXPERIMENTAL TECHNIQUES

CHAPTER 1	Introduction to the Biochemistry Laboratory	3
A.	Safety in the Laboratory	4
B.	The Laboratory Notebook and Experiment Reports	8
	<i>Details of Experimental Write-up</i>	9
C.	Cleaning Laboratory Glassware	10
	<i>Glassware</i>	10
	<i>Quartz and Glass Cuvettes</i>	11
D.	Preparation and Storage of Solutions	11
	<i>Water Quality</i>	11
	<i>Solution Preparation</i>	11
E.	Quantitative Transfer of Liquids	13
	<i>Filling a Pipet</i>	13
	<i>Disposable Pasteur Pipets</i>	14
	<i>Calibrated Pipets</i>	14
	<i>Automatic Pipetting Systems</i>	16
	<i>Cleaning and Drying Pipets</i>	18
F.	Statistical Analysis of Experimental Data	18
	<i>Analysis of Experimental Data</i>	19
	<i>Determination of the Mean, Sample Deviation, and Standard Deviation</i>	20
	<i>Statistical Analysis in Practice</i>	23
	Study Problems	25
	Further Reading	27
	On the Web	28
CHAPTER 2	General Laboratory Procedures	29
A.	pH, Buffers, Electrodes, and Biosensors	29
	<i>Measurement of pH</i>	30
	<i>Biochemical Buffers</i>	32

	<i>Selection of a Biochemical Buffer</i>	34
	<i>The Oxygen Electrode</i>	37
	<i>Ion-Selective Electrodes and Biosensors</i>	39
B.	Measurement of Protein Solutions	41
	<i>The Biuret and Lowry Assays</i>	41
	<i>The Bradford Assay</i>	43
	<i>The BCA Assay</i>	44
	<i>The Spectrophotometric Assay</i>	44
C.	Measurement of Nucleic Acid Solutions	46
	<i>The Spectrophotometric Assay</i>	46
	<i>Other Assays for Nucleic Acids</i>	46
D.	Techniques for Sample Preparation	48
	<i>Dialysis</i>	48
	<i>Ultrafiltration</i>	49
	<i>Lyophilization and Centrifugal Vacuum Concentration</i>	52
	Study Problems	55
	Further Reading	56
	On the Web	57

CHAPTER 3 Purification and Identification of Biomolecules by Chromatography 59

A.	Introduction to Chromatography	59
	<i>Partition versus Adsorption Chromatography</i>	60
B.	Planar Chromatography (Paper and Thin-Layer)	61
	<i>Preparation of the Stationary Support</i>	62
	<i>Solvent Development of the Support</i>	63
	<i>Detection and Measurement of Components</i>	64
	<i>Applications of Planar Chromatography</i>	64
C.	Gas Chromatography (GC)	65
	<i>Instrumentation</i>	65
	<i>Selection of Operating Conditions</i>	68
	<i>Analysis of GC Data</i>	68
	<i>Advantages and Limitations of GC</i>	69
D.	Column Chromatography	70
	<i>Operation of a Chromatographic Column</i>	71
	<i>Packing the Column</i>	71
	<i>Loading the Column</i>	72
	<i>Eluting the Column</i>	72
	<i>Collecting the Eluent</i>	73
	<i>Detection of Eluting Components</i>	73
E.	Ion-Exchange Chromatography	74
	<i>Ion-Exchange Resins</i>	75
	<i>Selection of the Ion Exchanger</i>	76

	<i>Choice of Buffer</i>	78	
	<i>Preparation of the Ion Exchanger</i>	78	
	<i>Using the Ion-Exchange Resin</i>	78	
	<i>Storage of Resins</i>	79	
F.	Gel Exclusion Chromatography	79	
	<i>Theory of Gel Filtration</i>	79	
	<i>Physical Characterization of Gel Chromatography</i>	80	
	<i>Chemical Properties of Gels</i>	81	
	<i>Selecting a Gel</i>	83	
	<i>Gel Preparation and Storage</i>	83	
	<i>Operation of a Gel Column</i>	84	
	<i>Applications of Gel Exclusion Chromatography</i>	85	
G.	High-Performance Liquid Chromatography (HPLC)	87	
	<i>Instrumentation</i>	89	
	<i>Stationary Phases in HPLC</i>	92	
	<i>The Mobile Phase</i>	95	
	<i>Solvents for HPLC Operation</i>	96	
	<i>Gradient Elution in HPLC</i>	97	
	<i>Sample Preparation and Selection of HPLC Operating Conditions</i>	98	
	<i>FPLC—A Modification of HPLC</i>	98	
H.	Affinity Chromatography and Immunoabsorption	99	
	<i>Chromatographic Media</i>	100	
	<i>The Immobilized Ligand</i>	101	
	<i>Attachment of Ligand to Matrix</i>	101	
	<i>Experimental Procedure for Affinity Chromatography</i>	104	
I.	Perfusion Chromatography	106	
	<i>Study Problems</i>	107	
	<i>Further Reading</i>	108	
	<i>Chromatography on the Web</i>	109	

CHAPTER 4 Characterization of Proteins and Nucleic Acids by Electrophoresis 111

A.	Theory of Electrophoresis	111	
B.	Methods of Electrophoresis	113	
	<i>Polyacrylamide Gel Electrophoresis (PAGE)</i>	113	
	<i>Nucleic Acid Sequencing Gels</i>	121	
	<i>Agarose Gel Electrophoresis</i>	122	
	<i>Pulsed Field Gel Electrophoresis (PFGE)</i>	126	
	<i>Isoelectric Focusing of Proteins</i>	127	
	<i>Two-Dimensional Electrophoresis of Proteins</i>	130	
	<i>Capillary Electrophoresis (CE)</i>	130	
	<i>Immuno-electrophoresis (IE)</i>	132	

C.	Practical Aspects of Electrophoresis	133
	<i>Instrumentation</i>	133
	<i>Reagents</i>	133
	<i>Staining and Detecting Electrophoresis Bands</i>	134
	<i>Protein and Nucleic Acid Blotting</i>	136
	<i>Analysis of Electrophoresis Results</i>	137
	Study Problems	138
	Further Reading	139
	Electrophoresis on the Web	140
CHAPTER 5	Spectroscopic Analysis of Biomolecules	141
A.	Ultraviolet-Visible Absorption Spectrophotometry	142
	<i>Principles</i>	142
	<i>Instrumentation</i>	146
	<i>Applications</i>	150
B.	Fluorescence Spectrophotometry	157
	<i>Principles</i>	157
	<i>Instrumentation</i>	160
	<i>Applications</i>	161
	<i>Difficulties in Fluorescence Measurements</i>	162
C.	Other Spectroscopic Methods	163
	<i>Nuclear Magnetic Resonance Spectroscopy</i>	163
	<i>Mass Spectrometry</i>	167
	Study Problems	168
	Further Reading	169
	Spectroscopy on the Web	170
CHAPTER 6	Radioisotopes in Biochemical Research	171
A.	Origin and Properties of Radioactivity	171
	<i>Introduction</i>	171
	<i>Isotopes in Biochemistry</i>	174
	<i>Units of Radioactivity</i>	175
B.	Detection and Measurement of Radioactivity	176
	<i>Liquid Scintillation Counting</i>	176
	<i>Geiger-Müller Counting of Radioactivity</i>	181
	<i>Scintillation Counting of γ Rays</i>	182
	<i>Background Radiation</i>	183
	<i>Applications of Radioisotopes</i>	183
	<i>Statistical Analysis of Radioactivity Measurements</i>	184
C.	Radioisotopes and Safety	184
	<i>Preparation for the Experiment</i>	185
	<i>Performing the Experiment</i>	186

Study Problems	187
Further Reading	187
Radioisotopes on the Web	188

CHAPTER 7 Centrifugation In Biochemical Research 189

A. Basic Principles of Centrifugation	189
B. Instrumentation for Centrifugation	193
<i>Low-Speed Centrifuges</i>	193
<i>High-Speed Centrifuges</i>	195
<i>Ultracentrifuges</i>	198
C. Applications of Centrifugation	201
<i>Preparative Techniques</i>	201
<i>Analytical Measurements</i>	202
<i>Care of Centrifuges and Rotors</i>	206
Study Problems	207
Further Reading	208
Centrifugation on the Web	208

PART TWO EXPERIMENTS

EXPERIMENT 1	Using the Computer in Biochemical Research	211
EXPERIMENT 2	Structural Analysis of a Dipeptide	227
EXPERIMENT 3	Using Gel Filtration to Study Ligand-Protein Interactions	243
EXPERIMENT 4	Isolation and Characterization of Bovine Milk α -Lactalbumin	257
EXPERIMENT 5	Kinetic Analysis of Tyrosinase	279
EXPERIMENT 6	Purification and Characterization of Triacylglycerols in Natural Oils	303
EXPERIMENT 7	Identification of Serum Glycoproteins by SDS-PAGE and Western Blotting	321
EXPERIMENT 8	Isolation and Characterization of Plant Pigments	333
EXPERIMENT 9	Photoinduced Proton Transport through Chloroplast Membranes	345

EXPERIMENT 10	Isolation, Subfractionation, and Enzymatic Analysis of Beef Heart Mitochondria	357
EXPERIMENT 11	Measurement of Cholesterol and Vitamin C in Biological Samples	371
EXPERIMENT 12	Activity and Thermal Stability of Gel-immobilized Peroxidase	389
EXPERIMENT 13	Extraction and Characterization of Bacterial DNA	399
EXPERIMENT 14	Plasmid DNA Isolation and Characterization by Electrophoresis	415
EXPERIMENT 15	The Action of Restriction Endonucleases on Plasmid or Viral DNA	431

A P P E N D I C E S

APPENDIX I	Properties of Common Acids and Bases	443
APPENDIX II	Properties of Common Buffer Compounds	444
APPENDIX III	pK_a Values and pH_1 Values of Amino Acids	445
APPENDIX IV	Molecular Weights of Some Common Proteins	446
APPENDIX V	Common Abbreviations Used in This Text	447
APPENDIX VI	Units of Measurement	449
APPENDIX VII	Table of the Elements	451
APPENDIX VIII	Values of t for Analysis of Statistical Confidence Limits	453
APPENDIX IX	Answers to Selected Study Problems	454
INDEX		467
