

Principles of MOLECULAR REGULATION

EDITED BY

P. Michael Conn
Anthony R. Means

 HUMANA PRESS

CONTENTS

<i>Foreword</i>	v
<i>Preface</i>	ix
<i>Contributors</i>	xiii

Part I. Signaling Mechanisms Initiated by Cell Surface Receptors

1	G Protein-Coupled Receptors and G Proteins	3
	<i>Alfredo Ulloa-Aguirre and P. Michael Conn</i>	
2	G Proteins Large and Small Guanine Nucleotide Binding Proteins: <i>Cellular Communication Networks</i>	27
	<i>Thomas M. Wilkie and Michael A. White</i>	
3	The Insulin Receptor Kinase: <i>Regulation and Therapeutic Significance</i>	41
	<i>Barry I. Posner</i>	
4	Growth Hormone Action: <i>Signaling via a JAK/STAT-Coupled Receptor</i>	55
	<i>David J. Waxman and Stuart J. Frank</i>	
5	Regulation of <i>Drosophila</i> Visual Transduction Through a Supramolecular Signaling Complex	85
	<i>Craig Montell</i>	
6	<i>Dictyostelium</i> : A Model Experimental System for Elucidating the Pathways and Mechanisms Controlling Chemotaxis	99
	<i>Chang Y. Chung and Richard A. Firtel</i>	
7	gp130-Related Cytokines	115
	<i>Christoph J. Auernhammer and Shlomo Melmed</i>	

Part II. Signaling Mechanisms Mediated by Ion Channels, Calcium, and Lipids

8	Ion Channels	135
	<i>Deborah J. Nelson and Harry A. Fozzard</i>	
9	Calcium Ions as Intracellular Messengers: <i>Pathways and Actions</i>	149
	<i>Stanko S. Stojilkovic with Melanija Tomic', Taka-aki Koshimizu, and Fredrick Van Goor</i>	
10	Calcium and Calmodulin-Mediated Regulatory Mechanisms	187
	<i>Anthony R. Means</i>	
11	Protein Kinase C	205
	<i>Alexandra C. Newton</i>	
12	Nitric Oxide	219
	<i>Randy Krainock and Sean Murphy</i>	
13	Phospholipases	229
	<i>J. H. Exton</i>	

Part III.	Cyclic AMP, Protein Kinases and Protein Phosphatases	
14	Adenylyl Cyclases <i>Lutz Birnbaumer</i>	249
15	Cyclic Nucleotide Phosphodiesterases <i>Marco Conti</i>	261
16	Cyclic Nucleotide-Dependent Protein Kinases <i>Sharron H. Francis and Jackie D. Corbin</i>	277
17	Protein Serine/Threonine Kinases <i>Jörg Heierhorst, Richard Pearson, James Horne, Steven Bozinovski, Bostjan Kobe, and Bruce E. Kemp</i>	297
18	Protein Serine/Threonine Phosphatases <i>Shirish Shenolikar</i>	311
19	Protein Tyrosine Phosphatases <i>Cynthia V. Stauffacher and Harry Charbonneau</i>	323
Part IV.	Signaling Mechanisms Initiated by Nuclear Receptors	
20	The Mechanism of Action of Steroid Hormone Receptors <i>Donald P. McDonnell</i>	351
21	Orphan Nuclear Receptors <i>Deepak S. Lala and Richard A. Heyman</i>	363
22	Coactivators and Corepressors <i>Neil J. McKenna, Zafar Nawaz, Sophia Y. Tsai, and Ming-Jer Tsai</i>	385
23	CREB Binding Protein—Coactivator Complexes <i>Riki Kurokawa and Christopher K. Glass</i>	395
Part V.	Molecular Regulation of Cell Proliferation and Death	
24	Cell Cycle Checkpoints <i>Sally Kornbluth</i>	407
25	Molecular Regulation of Apoptosis <i>Rosemary B. Evans-Storms and John A. Cidlowski</i>	415
26	T Cells and Immunosuppression <i>Andrew W. Taylor</i>	429
Part VI.	Rational Drug Discovery	
27	Rational Drug Discovery and the Impact of New, Advanced Technologies ... <i>Jonathan Greer</i>	439
	<i>Index</i>	461
