

A large satellite dish is mounted on a tripod on a rooftop. The dish is white and pointed towards the sky. In the background, there is a cityscape with various buildings, including a prominent one with a clock tower and another with a golden dome. The sky is blue with some light clouds. The overall scene is brightly lit, suggesting daytime.

Jonathan Higgins

Satellite Newsgathering

Contents

Preface	vii
Acknowledgements	xi
1 From the beat of the distant drum. . .	1
2 From launch to transmission: satellite communication theory and SNG	27
3 Boxes or wheels: types of systems	110
4 Squeezing through the pipe: digital compression	161
5 Have phone, will travel: INMARSAT services	204
6 Across the spectrum: regulation and standards	242
7 Fitting the pieces together: satellites, systems and operations	263
8 Get there, be safe: safety and logistics	303
9 On the horizon	339
Appendix A Frequency bands of operation	365
Appendix B Sample link budgets	366
Appendix C Digital video	379
Appendix D INMARSAT certificate for transportation of equipment for SNG	381
Appendix E ITU emission codes for the classification of transmissions	383
Appendix F Sample uplink registration forms for INTELSAT and EUTELSAT	387
Appendix G Sample INTELSAT SSOG 600 form (space segment booking request)	397

vi Contents

Appendix H	A typical service order for booking SNG space segment	401
Appendix I	Sample information typically required for a request for permission to operate in a foreign country	403
Appendix J	Formulae for calculating non-ionizing radiation levels	405
Appendix K	Useful contacts	408
	Glossary of terms	428
	Bibliography	459
	Index	461
