ACKNOWLEDGEMENTS	xii
PREFACE	xiii
1 INFORMATION SYSTEMS—WHAT ARE THEY?	1
1.1 Introduction	1
1.2 Information Systems in Practice	2
1.3 General Systems Theory	5
1.4 Information and Information Systems	14
1.5 Strategies for Success	18
1.6 Summary	21
2 PROBLEMS IN INFORMATION SYSTEMS DEVELOPMENT	24
2.1 Introduction	24
2.2 What are the Problems?	25
2.3 Why Things Go Wrong	32
2.4 The Ethical Dimension	36
2.5 Costs of Failure	39
2.6 Summary	40
3 AVOIDING THE PROBLEMS	43
3.1 Introduction	43
3.2 Project Life Cycles	45
3.3 Managing Information System Development	53
3.4 User Involvement	54
3.5 Methodological Approaches	55
3.6 CASE	55
3.7 Summary	59
4 WHAT IS OBJECT-ORIENTATION?	61
4.1 Introduction	61
4.2 Basic Concepts	61
4.3 The Origins of Object-Orientation	75
4.4 Summary	80
A1 AGATE LTD CASE STUDY—INTRODUCTION	82
A1.1 Introduction to Agate	82

A1.2	Existing Computer Systems	83
A1.3	Business Activities in the Current System	84
A1.5	Summary System Specification	84
B1	FOODCO LTD CASE STUDY—INTRODUCTION	88
B1.1	Introduction to FoodCo	88
B1.2	FoodCo Today	91
B1.3	The Proposal	95
5	REQUIREMENTS CAPTURE	96
5.1	Introduction	96
5.2	User Requirements	96
5.3	Fact Finding Techniques	100
5.4	User Involvement	108
5.5	Documentation Standards	110
5.6	Use Cases	111
5.7	Summary	116
6	REQUIREMENTS ANALYSIS	122
6.1	Introduction	122
6.2	What Must a Requirements Model Do?	122
6.3	Fundamental Techniques	124
6.4	The Data Dictionary	135
6.5	Drawing a Class Diagram	137
6.6	Summary	145
7	REFINING THE REQUIREMENTS MODEL	150
7.1	Introduction	150
7.2	Component-based Development	150
7.3	Adding Further Structure	155
7.4	Analysis Patterns	163
7.5	Summary	164
8	OBJECT INTERACTION	166
8.1	Introduction	166
8.2	Object Interaction and Collaboration	167
8.3	CRC (Class Responsibility Collaboration) Cards	169
8.4	Interaction Sequence Diagrams	172
8.5	Collaboration Diagrams	180
8.6	Model Consistency	183
8.7	Summary	184
9	SPECIFYING OPERATIONS	186
9.1	Introduction	186
9.2	The Role of Operation Specifications	187
9.3	Contracts	188
9.4	Describing Operation Logic	189
9.5	Object Constraint Language	198

9.6	Creating an Operation Specification	200
9.7	Use of Notes	202
9.8	Summary	203
10	SPECIFYING CONTROL	205
10.1	Introduction	205
10.2	States and Events	206
10.3	Basic Notation	208
10.4	Further Notation	212
10.5	Preparing a Statechart	215
10.6	Consistency Checking	219
10.7	Activity Diagrams	220
10.9	Summary	224
A2	AGATE LTD CASE STUDY—EXCERPT FROM REQUIREMENTS SPECIFICATION	226
A2.1	Introduction	226
A2.2	Use Cases and Actors	226
A2.3	Class Diagram	229
A2.4	Interaction Diagrams	231
A2.5	State and Activity Diagrams	234
11	MOVING INTO DESIGN	236
11.1	Introduction	236
11.2	How is Design Different from Analysis?	236
11.3	Logical and Physical Design	238
11.4	System Design and Detailed Design	240
11.5	Qualities and Objectives of Analysis and Design	245
11.6	Measurable Objectives in Design	251
11.7	Planning for Design	252
11.8	Summary	252
12	SYSTEM DESIGN	255
12.1	Introduction	255
12.2	The Major Elements of System Design	256
12.3	Software Architecture	256
12.4	Concurrency	271
12.5	Processor Allocation	273
12.6	Data Management Issues	273
12.7	Development Standards	274
12.8	Prioritizing Design Trade-offs	276
12.9	Design for Implementation	276
12.10	Summary	276
13	OBJECT DESIGN	279
13.1	Introduction	279
13.2	Class Specification	281
13.3	Interfaces	284

13.4	Criteria for Good Design	286
13.5	Designing Associations	290
13.6	Integrity Constraints	296
13.7	Designing Operations	299
13.8	Normalization	300
13.9	Summary	300
14	DESIGN PATTERNS	302
14.1	Introduction	302
14.2	Software Development Patterns	303
14.3	Documenting Patterns—Pattern Templates	307
14.4	Design Patterns	309
14.5	How to Use Design Patterns	319
14.6	Benefits and Dangers of Using Patterns	320
14.7	Summary	321
15	HUMAN-COMPUTER INTERACTION	323
15.1	Introduction	323
15.2	The User Interface	324
15.3	Approaches to User Interface Design	333
15.4	Standards and Legal Requirements	342
15.5	Summary	344
16	DESIGNING INTERFACE OBJECTS	346
16.1	Introduction	346
16.2	The Presentation Layer	347
16.3	Prototyping the User Interface	351
16.4	Updating the Sequence Diagram	355
16.5	Extending the Class Diagram	359
16.6	User Interface Design Patterns	360
16.7	Modelling the Dynamic Behaviour of the Interface	363
16.8	Summary	369
17	DATA MANAGEMENT DESIGN	371
17.1	Introduction	371
17.2	Storage Mechanisms—an Overview	371
17.3	Designing for Relational Database Management Systems	383
17.4	Designing for Object Database Management Systems	390
17.5	Designing Data Management Classes	394
17.6	Summary	402
A3	AGATE LTD CASE STUDY—EXCERPT FROM DESIGN SPECIFICATION	404
A3.1	Introduction	404
A3.2	Design Class Diagram	404
A3.3	Interaction Diagrams	409
A3.4	Prototype Dialogue Design	411
A3.5	Statecharts for Interface	411

18	IMPLEMENTATION	413
18.1	Introduction	413
18.2	Software Implementation	414
18.3	Component Diagrams	417
18.4	Deployment Diagrams	420
18.5	Software Testing	422
18.6	Data Conversion	425
18.7	User Documentation and Training	426
18.8	Implementation Strategies	427
18.9	Summary	429
19	MAINTENANCE AND REUSE	430
19.1	Introduction	430
19.2	Review and Maintenance	430
19.3	Reuse of Components	434
19.4	Case Study Example	439
19.5	Summary	444
20	SYSTEMS DEVELOPMENT METHODOLOGIES	446
20.1	Introduction	446
20.2	'Method' and 'Methodology'	447
20.3	Why Use a Methodology?	449
20.4	A Brief Historical Review	450
20.5	An Outline of Objectory	454
20.6	Issues in Choosing a Methodology	458
20.7	Hard <i>versus</i> Soft Methodologies	459
20.8	Summary	461
21	MANAGING OBJECT-ORIENTED PROJECTS	464
21.1	Introduction	464
21.2	Resource Allocation and Planning	465
21.3	Managing the Iteration	472
21.4	Dynamic Systems Development Method	472
21.5	Software Metrics	476
21.6	Process Patterns	478
21.7	Legacy Systems	479
21.8	Introducing Object Technology	479
21.9	Summary	480
APPENDIX A—NOTATION SUMMARY		483
APPENDIX B—SELECTED SOLUTIONS AND ANSWER POINTERS		488
