

POWER SYSTEM RESTORATION

METHODOLOGIES & IMPLEMENTATION
STRATEGIES

M. M. Adibi

Contents

Preface xiii

PART 1 Restoration Overview 1

- 1.01 Power System Restoration—A Task Force Report 3
 M. M. Adibi et al., (*IEEE Transactions on Power Systems*, May 1987).
- 1.02 Power System Restoration—The Second Task Force Report 10
 M. M. Adibi et al., (*IEEE Transactions on Power Systems*, November 1987).
- 1.03 Analytical Tools for Power System Restoration—Conceptual Design 17
 F. F. Wu et al., (*IEEE Transactions on Power Systems*, February 1988).
- 1.04 System Operations Challenges 24
 E. K. Nielson et al., (*IEEE Transactions on Power Systems*, February 1988).
- 1.05 Power System Restoration Issues 31
 M. M. Adibi et al., (*IEEE Computer Applications in Power*, April 1991).
- 1.06 Special Considerations in Power System Restoration 37
 M. M. Adibi et al., (*IEEE Transactions on Power Systems*, November 1992).
- 1.07 New Approaches in Power System Restoration 46
 M. M. Adibi et al., (*IEEE Transactions on Power Systems*, February 1992).
- 1.08 A Hierarchical Interactive Approach to Electric Power System Restoration 52
 R. Nadira et al., (*IEEE Transactions on Power Systems*, August 1992).
- 1.09 Special Consideration in Power System Restoration—The Second Working Group Report 61
 M. M. Adibi et al., (*IEEE Transactions on Power Systems*, February 1994).
- 1.10 Steam Plant Startup and Control in System Restoration 68
 F. P. de Mello et al., (*IEEE Transactions on Power Systems*, February 1994).
- 1.11 An AGC Implementation for System Islanding and Restoration Conditions 75
 H. B. Ross et al., (*IEEE Transactions on Power Systems*, August 1994).
- 1.12 Analytical Tool Requirements for Power System Restoration 86
 M. M. Adibi et al., (*IEEE Transactions on Power Systems*, August 1994).
- 1.13 A Framework for Power System Restoration Following a Major Power Failure 96
 J. J. Ancona, (*IEEE Transactions on Power Systems*, August 1995).

PART 2 Restoration Techniques 103

- 2.01 Cold Load Pickup 105
 J. E. McDonald et al., (*IEEE Transactions on Power Apparatus and Systems*, July/August 1979).
- 2.02 Physically Based Modeling of Cold Load Pickup 108
 S. Ihara et al., (*IEEE Transactions on Power Apparatus and Systems*, September 1981).

2.03	Blackstart Utilization of Remote Combustion Turbines, Analytical Analysis, and Field Test R. D. Shultz et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , August 1984).	117
2.04	Overvoltage Control During Restoration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , November 1992).	123
2.05	Reactive Capability Limitation of Synchronous Machines M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , February 1994).	130
2.06	An Approach to Standing Phase Angle Reduction S. Wunderlich et al., (<i>IEEE Transactions on Power Systems</i> , February 1994).	142
2.07	Nuclear Plant Requirements During Power System Restoration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , August 1995).	151
2.08	Protective System Issues During Restoration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , August 1995).	157
2.09	Remote Cranking of Steam Electric Stations M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , August 1996).	163
2.10	Optimizing Generator Reactive Power Resources M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , February 1999).	169
2.11	Asymmetry Issues in Power System Restoration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , August 1999).	175
2.12	Frequency Response of Prime Movers During Restoration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , May 1999).	181
2.13	Energizing High and Extra-High Voltage Lines During Restoration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , August 1999).	187

PART 3 Restoration Planning 193

3.01	System Restoration Plan Development for a Metropolitan Electric System R. J. Kafka et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , August 1981).	195
3.02	Role of Interactive and Control Computers in the Development of a System Restoration Plan R. J. Kafka et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , January 1982).	205
3.03	System Restoration—Deploying the Plan W. A. Johnson, (<i>IEEE Transactions on Power Apparatus and Systems</i> , November 1982).	214
3.04	Power System Restoration Planning M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , February 1994).	223
3.05	A Systematic Method for Power System Restoration Planning J. A. Huang et al., (<i>IEEE Transactions on Power Systems</i> , May 1995).	230
3.06	From Generic Restoration Actions to Specific Restoration Strategies L. H. Fink et al., (<i>IEEE Transactions on Power Systems</i> , May 1995).	237
3.07	Estimating Restoration Duration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , August 1999).	245

PART 4 Restoration Training 251

4.01	Development of a Large-Scale Dispatcher Training Simulator and Training Results I. Susumago et al., (<i>IEEE Transactions on Power Systems</i> , May 1986).	255
4.02	Dispatcher Training Simulators—Lessons Learned J. M. Bucciero et al., (<i>IEEE Transactions on Power Systems</i> , May 1991).	264
4.03	The Uses of an Operator Training Simulator for System Restoration R. F. Chu et al., (<i>IEEE Proceeding of the PICA Conference</i> , May 1991).	271
4.04	An Advanced Transportable Operator Training Simulator J. G. Waight et al., (<i>IEEE Proceedings of the PICA Conference</i> , May 1991).	278
4.05	Restoration Simulator Prepares Operators for Major Blackouts R. F. Chu et al., (<i>IEEE Computer Applications in Power</i> , October 1991).	285

4.06	Bulk Power System Restoration Training Techniques	291
	M. E. Cooper et al., (<i>IEEE Transactions on Power Systems</i> , February 1993).	
4.07	Experiences Using the Dispatcher Training Simulator as a Training Tool	298
	G. Miller et al., (<i>IEEE Transactions on Power Systems</i> , August 1993).	
4.08	Verification of an Advanced Power System Restoration Support System Using an Operator Training Simulator	305
	T. Kobayashi et al., (<i>IEEE Transactions on Power Systems</i> , May 1994).	
4.09	Evaluating a Restoration Tool Using Consolidated Edison's Training Simulator	312
	M. Rafian et al., (<i>IEEE Transactions on Power Systems</i> , August 1996).	
4.10	System Restoration Guidelines: How to Set-Up, Conduct, and Evaluate a Drill	319
	J. D. Willson, (<i>IEEE Transactions on Power Systems</i> , August 1996).	
4.11	Power System Restoration Training Questionnaire Results	330
	J. D. Willson, (<i>IEEE Transactions on Power Systems</i> , August 1996).	

PART 5 Specific System Restoration 337

5.01	Low Voltage Bulk Power System Restoration Simulation	341
	E. J. Simburger et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , November 1981).	
5.02	Summary of System Restoration Plan for the Pacific Northwest Power System	347
	P. F. Arnold, (<i>IEEE/PES 1982 Winter Power Meeting</i> , January 1982).	
5.03	Field Experiences in Reenergization of Electrical Networks from Thermal and Hydro Units	354
	E. Mariani et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , July 1984).	
5.04	System Restoration at Philadelphia Electric Company	361
	D. Scheurer, (<i>IEEE 8th Biennial Workshop on Real-Time Monitoring and Control of Power Systems</i> , October 1984).	
5.05	Service Restoration Following a Major Failure on the Hydro-Quebec Power System	364
	G. Morin, (<i>IEEE Transactions on Power Delivery</i> , April 1987).	
5.06	Policies for Restoration of a Power System	374
	J. Gutiérrez et al., (<i>IEEE Transactions on Power Systems</i> , May 1987).	
5.07	Restoration in Sweden and Experience Gained from the Blackout of 1983	381
	R. Kearsley, (<i>IEEE Transactions on Power Systems</i> , May 1987).	
5.08	Simulation and Field Tests of the Black Start of a Large Coal-Fired Generating Station Utilizing Small Remote Hydro Generation	388
	R. R. Lindstrom, (<i>IEEE Transactions on Power Systems</i> , February 1990).	
5.09	Power System Restoration Incorporating Interactive Graphics and Optimization	395
	J. A. Huang et al., (<i>IEEE Proceeding of the PICA Conference</i> , May 1991).	
5.10	Simulations and Field Tests of a Reactor Coolant Pump Emergency Start-up by Means of Remote Gas Units	402
	P. Omahen et al., (<i>IEEE Transactions on Energy Conversion</i> , December 1992).	
5.11	Major Incidents on the French Electric System: Potentiality and Curative Measures Studies	408
	C. Counan et al., (<i>IEEE Transactions on Power Systems</i> , August 1993).	
5.12	Black-start and Restoration of a Part of the Italian HV Network: Modeling and Simulation of a Field Test	415
	B. Delfino et al., (<i>IEEE Transactions on Power Systems</i> , August 1996).	
5.13	Interactive Long-Term Simulation for Power System Restoration Planning	424
	N. A. Fountas et al., (<i>IEEE Transactions on Power Systems</i> , February 1997).	
5.14	Analysis of the Power Blackout of June 8, 1995 in the Israel Electric Corporation	432
	Y. Hain et al., (<i>IEEE Transactions on Power Systems</i> , November 1997).	

PART 6 Knowledge-Based Systems 439

6.01	Development of a Knowledge-Based System for Power System Restoration	443
	T. Sakaguchi et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , February 1983).	

6.02	Development of a Guidance Method for Power System Restoration Y. Kojima et al., (<i>IEEE Transactions on Power Systems</i> , August 1989).	450
6.03	The Development of Power System Restoration Method for a Bulk Power System by Applying Knowledge Engineering Techniques Y. Kojima et al., (<i>IEEE Transactions on Power Systems</i> , August 1989).	458
6.04	Implementation of a Real-Time Expert System for a Restoration Guide in a Dispatching Center K. Hotta et al., (<i>IEEE Transactions on Power Systems</i> , August 1990).	466
6.05	Guiding a Power System Restoration with an Expert System D. S. Kirschen et al., (<i>IEEE Transactions on Power Systems</i> , May 1991).	473
6.06	Knowledge-Based Systems as Operational Aids in Power System Restoration K. Matsumoto et al., (<i>Proceedings of the IEEE</i> , May 1992).	481
6.07	Operational Experience and Maintenance of an On-Line Expert System for Customer Restoration and Fault Testing T.-K. Ma et al., (<i>IEEE Transactions on Power Systems</i> , May 1992).	489
6.08	A Knowledge-Based Method for Making Restoration Plan of Bulk Power System K. Shimakura et al., (<i>IEEE Transactions on Power Systems</i> , May 1992).	497
6.09	Generation Capability Dispatch for Bulk Power System Restoration: A Knowledge-Based Approach C.-C. Liu et al., (<i>IEEE Transactions on Power Systems</i> , February 1993).	504
6.10	Expert System Requirements for Power System Restoration M. M. Adibi et al., (<i>IEEE Transactions on Power Systems</i> , August 1994).	514
6.11	Tie Line Utilization During Power System Restoration K.-L. Liou et al., (<i>IEEE Transactions on Power Systems</i> , February 1995).	523
6.12	Power System Restoration by Joint Usage of Expert System and Mathematical Programming Approach T. Nagata et al., (<i>IEEE Transactions on Power Systems</i> , August 1995).	531
6.13	A Petri Net Algorithm for Scheduling of Generic Restoration Actions J.-S. Wu et al., (<i>IEEE Transactions on Power Systems</i> , February 1997).	538
6.14	Hierarchical Time-Extended Petri Nets as a Generic Tool for Power System Restoration N. A. Fountas et al., (<i>IEEE Transactions on Power Systems</i> , May 1997).	546
6.15	Decision Aid Function for Restoration of Transmission Power Systems: Conceptual Design and Real Time Considerations T. Kostić et al., (<i>IEEE Transactions on Power Systems</i> , August 1998).	553

PART 7 Distribution System Restoration 561

7.01	Adaptation of the Simplex Algorithm to Modeling of Cold Load Pickup of a Large Secondary Network Distribution System M. H. Yolcu et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , July 1983).	565
7.02	Statistical Synthesis of Physically Based Load Models with Applications to Cold Load Pickup C.-Y. Chong et al., (<i>IEEE Transactions on Power Apparatus and Systems</i> , July 1984).	569
7.03	Effects of Cold Load Pickup at the Distribution Substation Transformer R. L. Wilde, (<i>IEEE Transactions on Power Apparatus and Systems</i> , March 1985).	577
7.04	An Expert System Operational Aid for Restoration and Loss Reduction of Distribution Systems C.-C. Liu et al., (<i>1987 IEEE Power Industry Computer Application</i> , May 1987).	584
7.05	A New Algorithm for Service Restoration in Distribution Systems K. Aoki et al., (<i>IEEE Transactions on Power Delivery</i> , July 1989).	591
7.06	Heuristic Search Approach to Distribution System Restoration A. L. Morelato et al., (<i>IEEE Transactions on Power Delivery</i> , October 1989).	599
7.07	Distribution Transformer Overloading Capability under Cold-Load Pickup Conditions J. Aubin et al., (<i>IEEE Transactions on Power Delivery</i> , November 1990).	606
7.08	MARS: An Aid for Network Restoration After a Local Disturbance E. Mondon et al., (<i>IEEE Transactions on Power Systems</i> , May 1992).	614

7.09	An Analytical Approach for Step-by-Step Restoration of Distribution Systems Following Extended Outages	620
	C. Uçak et al., (<i>IEEE Transactions on Power Delivery</i> , July 1994).	
7.10	Knowledge-Based Behavior Interface: Its Application to Power Network Restoration Support System	627
	J. Shinohara et al., (<i>IEEE Transactions on Power Systems</i> , February 1996).	
7.11	An Object-Oriented Approach for Implementing Power System Restoration Package	634
	Z. L. Gaing et al., (<i>IEEE Transactions on Power Systems</i> , February 1996).	
7.12	Distribution System Design Optimization for Cold Load Pickup	641
	J. J. Wakileh et al., (<i>IEEE Transactions on Power Systems</i> , November 1996).	
7.13	Distribution Feeder Reconfiguration for Service Restoration and Load Balancing	647
	Q. Zhou et al., (<i>IEEE Transactions on Power Systems</i> , May 1997).	
7.14	Application of Expert System to Power System Restoration in Sub-control Center	653
	Y-M. Park et al., (<i>IEEE Transactions on Power Systems</i> , May 1997).
