

# DORMANCY IN PLANTS

FROM WHOLE PLANT  
BEHAVIOUR TO  
CELLULAR CONTROL

EDITED BY  
J.-D. VIÉMONT  
AND J. CRABBÉ

CABI Publishing

# Contents

---

Contributors	ix
Preface	xiii
Part I: Whole Plant and Organ Physiology	
1 Growth Cycle and Dormancy in Plants <i>H. Okubo</i>	1
2 Bud Dormancy: a Suggestion for the Control Mechanism and its Evolution <i>A. Erez</i>	23
3 The Distinct Controlling of Dormancy Release and Germination Commencement in Seeds <i>N.V. Obroucheva and O.V. Antipova</i>	35
4 Sugar Metabolism in Apple Embryos <i>S. Lewak, R. Bogatek and B. Żarska-Maciejewska</i>	47
5 Population Responses to Temperature for Loss and Induction of Seed Dormancy and Consequences for Predictive Empirical Modelling <i>A.J. Murdoch, L. Sonko and E. Kebreab</i>	57

- 
- |   |  |    |
|---|--|----|
| 6 | Pre-treatment at Controlled Seed Moisture Content as an Effective Means to Break Dormancy in Tree Seeds<br><i>M.P.M. Derks</i> | 69 |
|---|--|----|

## Part II: Water Relations and Stress

- |    |  |     |
|----|--|-----|
| 7  | Organismic and Environmental Controls of Bud Growth in Tropical Trees<br><i>R. Borchert</i>  | 87  |
| 8  | Water Relations in Winter: Effect on Bud Break of Walnut Tree<br><i>T. Améglio, A. Guillot, A. Lacoïnte, J.L. Julien, G. Alves, V. Valentin and G. Pétel</i>   | 109 |
| 9  | Morphological Structure and Water Status in Tulip Bulbs during their Transition from Dormancy to Active Growth: Visualization by Magnetic Resonance Imaging<br><i>R. Kamenetsky, H. Zemah, A. van der Toorn, H. Van As and P. Bendel</i> | 121 |
| 10 | Seed Dormancy as One of the Survival Strategies in Annual Plant Species Occurring in Deserts<br><i>Y. Gutterman</i>  | 139 |
| 11 | Seasonally Regulated Proteins in Peach ( <i>Prunus persica</i> L. Batsch): What Are They and What Do They Do?<br><i>M. Wisniewski and R. Arora</i>   | 161 |

## Part III: Absciscic Acid and Hormonal Control

- |    |  |     |
|----|--|-----|
| 12 | Aspects of ABA and Fusicoccin Signal Transduction in Barley Grains: I Effect of Fusicoccin on ABA-induced Gene Expression in Embryo and Aleurone; II Spatial and Temporal Expression of 14-3-3 Proteins in Dormant Embryos<br><i>C. Testerink, R.M. van der Meulen and M. Wang</i> | 173 |
| 13 | Dormancy of Cereal Seeds as Related to Embryo Sensitivity to ABA and Water Potential<br><i>F. Corbineau and D. Côme</i>  | 183 |
| 14 | Absciscic Acid Control of Seed Dormancy Expression in <i>Nicotiana glauca</i> and <i>Arabidopsis thaliana</i><br><i>M. Jullien, D. Bouinot, S. Ali-Rachedi, B. Sotta and P. Grappin</i>  | 195 |
| 15 | The Role of Endogenous Hormones in Potato Tuber Dormancy<br><i>J.C. Suttle</i>   | 211 |

- 16 Role of ABA, Gibberellins and Auxin in Dormancy and Dormancy Release of Tulip Bulbs 227  
*M. Saniewski, L. Kawa-Miszczak, E. Wegrzynowicz-Lesiak and H. Okubo*

Part IV: Biochemical and Cellular Aspects

- 17 ATP, ADP and NTP Contents in Vegetative and Floral Peach Buds During Winter: Are They Useful for Characterizing the Type of Dormancy? 245  
*M. Bonhomme, R. Rageau and M. Gendraud*
- 18 Alcohols that Break Seed Dormancy: the Anaesthetic Hypothesis, Dead or Alive? 259  
*M.A. Cohn and H.W.M. Hilhorst*
- 19 Are Cellular Membranes Involved in the Control of Seed Dormancy? 275  
*H.W.M. Hilhorst and M.A. Cohn*
- 20 Intercellular Communication Channels and Intracellular Calcium Levels Involved in the Dormancy Development of Poplar (*Populus deltoides*) Plants 291  
*L.-C. Jian, J.-H. Li, P.H. Li and T.H.H. Chen*
- 21 The Developmental Basis of Bud Dormancy in 1-year-old *Picea* and *Pseudotsuga* Seedlings 313  
*J.E. MacDonald*

Part V: Genetics and Molecular Biology

- 22 Molecular Genetic Analysis of Bud Dormancy-related Traits in *Populus* 319  
*T.H.H. Chen, J. Davis, B.E. Frewen, G.T. Howe and H.D. Bradshaw, Jr*
- 23 Regulation of Growth and Dormancy in Pea Axillary Buds 331  
*J.P. Stafstrom*
- 24 Expression of Endo- $\beta$ -mannanase and SNF-related Protein Kinase Genes in True Potato Seeds in Relation to Dormancy, Gibberellin and Absciscic Acid 347  
*V. Alvarado, H. Nonogaki and K.J. Bradford*

25	The Genetics of Seed Dormancy in <i>Arabidopsis thaliana</i> <i>M. Koornneef, C. Alonso-Blanco, L. Bentsink, H. Blankestijn-de Vries, I. Debeaujon, C.J. Hanhart, K.M. Léon-Kloosterziel, A.J.M. Peeters and V. Raz</i>	365
