

“When Microsoft needed operating system interoperability experts, we turned to the authors of this book.”

—John Ford, Group Manager, Network Solutions Group,
Microsoft Corporation

The Ultimate Windows 2000 System Administrator's Guide

ROBERT WILLIAMS
MARK WALLA

Contents

Preface	xxiii
Acknowledgments	xxix

Chapter 1	Administrative Overview	1
	Windows 2000—An Historical Perspective	1
	What's in a Name—The Windows 2000 Family	3
	<i>Windows 2000 Professional</i>	3
	<i>Windows 2000 Server</i>	3
	<i>Windows 2000 Advanced Server</i>	4
	<i>Windows 2000 DataCenter Server</i>	4
	<i>BackOffice Suite</i>	4
	Windows 2000 Administration Roles	5
	<i>Scope of Responsibility</i>	7
	Windows 2000 Features and Their Administration Implications	8
	<i>The Active Directory</i>	8
	<i>The Interface</i>	9
	The User Interface	9
	The Administrator Interface and Tools	10
	<i>Networking and Communications</i>	12
	<i>Hardware Support</i>	13
	<i>File and Storage Systems</i>	14
	<i>Security and Authentication</i>	15
	Postscript	16

Chapter 2	Windows 2000 Structure and Architecture	17
	Structural Modes, Subsystems, and Managers	17
	<i>Structural Layer Modes</i>	18
	<i>The Windows 2000 Executive Mode</i>	18
	The Hardware Abstraction Layer	19
	The Microkernel	20

Device Drivers	20
Executive Managers	20
The Executive Services Buffer	23
<i>The Windows 2000 User Mode</i>	<i>23</i>
The Protected User Mode System	23
Windows 2000 Processes	26
<i>Processes, Threads, and Handles</i>	<i>27</i>
Multi-Processor Support	29
Inter-Process Communications (IPC)	29
Windows 2000 Component Services	29
<i>The Task Manager</i>	<i>30</i>
Starting and Killing Processes	32
Scheduling Tasks	33
Viewing Processes	34
<i>The Event Viewer</i>	<i>37</i>
Stored and Virtual Memory	39
<i>Stored Memory and File System Basics</i>	<i>40</i>
The File Allocation Table—FAT and FAT32	40
The NTFS File System	41
File Objects within the NTFS File System	43
<i>The Virtual Memory Manager and Paging</i>	<i>44</i>
The Boot Process	45
The Windows 2000 Registry	49
<i>The Registry Structure</i>	<i>49</i>
<i>The Registry Editor</i>	<i>51</i>
Viewing Application Dependencies	52
Reviewing Application Compatibility	54
IntelliMirror and Other Innovations	54
Postscript	56

Chapter 3

Planning and Installation

57

Logical and Physical Structures	58
Understanding the Current Enterprise	59
<i>Taking Stock: First Inventory, Then Document</i>	<i>59</i>
Legacy Enterprise Analysis	61
Organizational Structure Analysis	62
Organizational Processes and Dynamics Analysis	63
Security Requirements Analysis	64
User Profiles Analysis	64
Physical Structures Analysis	65
<i>Commonsense Planning and Deployment Tips</i>	<i>66</i>
A Final Thought	68
Planning for Windows NT Upgrades	68
<i>Native versus Mixed Mode Installations</i>	<i>69</i>
The PDC Emulator	70
Mixed Mode Security	71
Mixed Mode Variations	72

<i>Domain Models</i>	72
<i>Upgrade Steps</i>	73
Installation	75
<i>Preparation</i>	76
Gathering Critical System Information	77
Key Questions	78
Optional Services and Components	82
Server Migration Order	82
<i>Installation Steps</i>	82
Installation Checklist	84
<i>Basic Installation</i>	84
Installation of Windows 2000 Server Versions	84
Installation of Windows 2000 Server across a Network	86
<i>System Configuration</i>	87
<i>Changing the Basic Setup</i>	87
<i>Automated or Unattended Installations</i>	87
<i>Disk Duplication</i>	89
Steps for Supporting Disk Duplication	89
Configuring the System Preparation Tool	90
<i>Remote OS Installation</i>	90
RIS Installation of Windows 2000 Professional	91
<i>Troubleshooting the Installation</i>	91
Postscript	92

Chapter 4 Getting Started

93

Interface Basics	93
<i>The Tool Bar and Cascading Menu System</i>	94
Desktop Icons	94
The My Computer Tool	96
My Network Places	98
Microsoft Management Console	101
<i>Creating and Using MMC</i>	101
Adding a Snap-In	102
MMC Modes	103
Saving MMC Locally or to Delegated Administrators	104
<i>Working with Individual Administrative Tools</i>	105
The Control Panel	105
<i>Character-Based Administrative Interface</i>	108
Launching Tools from the Run Menu	110
Help	110
Search	111
Postscript	112

Chapter 5 The Active Directory

113

Directory Services	114
<i>What Is the Active Directory?</i>	115

File Structure	116
Data Stores and Partitions	118
<i>An Administrative View of the Active Directory</i>	119
Active Directory Structural Components	119
<i>Logical Structure</i>	120
Domains	121
Domain Trees	121
Domain Forests	122
Organizational Units	123
Trees and Forest Scaling and Extensibility	124
Schema	124
<i>Physical Structure</i>	127
Sites	127
Domain Controller	128
<i>Replication</i>	131
Intersite and Intrasite Replication	132
Replication Component Objects	133
Preventing Data Replication Collision	133
<i>Special Domain Controller Roles</i>	134
The Global Catalog	134
Master Operation Roles	136
Open Standards Support and Naming Conventions	137
<i>The Active Directory and DNS</i>	138
Interoperability Issues	139
<i>Namespace and Naming Conventions</i>	140
Naming Conventions	140
Additional Use of Industry Naming Standards	140
<i>Active Directory Use of LDAP</i>	141
Migration and Backward Compatibility	143
Administrative Interface Snap-Ins	144
API Options	145
<i>ADSI Resources</i>	145
Sample ADSI Scripts	146
<i>The User Interface</i>	147
Administrative Security and Trust Relationships	147
Administrative Delegation	149
Postscript	150

Chapter 6 Active Directory Management and Use

151

Planning for the Active Directory	152
<i>The DNS Namespace</i>	152
DNS Names for Child Domains and Forests	152
Domain Names for Internal and External Use	153
<i>The Physical Structure: Sites and Replication</i>	153
Preparing for Replication and Synchronization	154
Replication Latency	154
Replication Topology	155

Planning for Operations Master Locations	156
Logical Structure Planning	156
Single Domain and Organizational Units	157
Domain Trees and Child Domains	157
Forests	158
Multiple Forests	159
Planning for Upgrades to the Active Directory	159
Upgrading the PDC and BDC	160
Planning for Domain Controllers	160
Sizing the Active Directory	161
Installing the Active Directory	161
Active Directory Wizard Installation	162
Active Directory Installation Example	163
Installation for Different Structures	167
Active Directory MMC Snap-In Tools	169
The Active Directory Domain and Trust Manager	171
Creating Trust Relationships	171
Changing from Mixed to Native Mode	174
Adding UPN Suffixes for User Logon	175
Assigning a Domain Naming Operations Master	176
Delegating Domain Controller Administration	177
The Active Directory Schema Manager Snap-In	177
Identifying and Modifying Object Classes	179
Identifying and Changing Attributes	182
Creating a New Object Class or Attribute	183
Changing the Domain Schema Operations Master	183
Ensuring Schema Availability and Restoration	184
The Active Directory Sites and Services Snap-In	184
Creating New Sites	187
Creating Site Subnets	188
Creating Intersite Links and Transports	188
The Intersite Replication Schedule	189
Selecting an Application Licensing Server	189
Moving Domain Controllers between Sites	190
Domain Controller Backup and Restoration	190
Forced Replication Check	191
Removing a Domain Controller Server from a Site	191
The Active Directory Users and Computers Snap-In	192
Computer Account Management	192
RID, PDC, or Infrastructure Operations Masters	195
The Active Directory Replication Monitor	196
Creating Organizational Units	196
Creating, Deleting, Modifying, and Moving an Organizational Unit	197
Creating an Organizational Unit	197
Deleting an Organizational Unit	197
Modifying Organizational Unit Properties	197

Moving Organizational Units	198
Renaming Organizational Units	198
Locating Objects	198
Active Directory Object Access	198
Standard and Special Permissions	199
<i>Setting and Viewing Object Permissions</i>	200
<i>Permission Inheritance and Preventing Inheritance</i>	201
Active Directory Administrative Delegation	202
<i>The Delegation Wizard</i>	202
Global Catalog Refinement	205
<i>Enabling a Global Catalog</i>	205
<i>Moving, Removing, and Duplicating the Global Catalog</i>	206
<i>Indexing and Adding Attributes to the Global Catalog</i>	206
The Active Directory Connector	207
<i>Configuring Connection Agreements</i>	207
Postscript	208

Chapter 7 User Accounts and Groups 209

User Accounts	209
<i>Local User Accounts</i>	211
Creating a Local User Account	212
<i>Domain User Accounts</i>	217
Creating a Domain User Account	217
Understanding User Account Properties	220
<i>User Profiles</i>	228
User Profile Types	229
All User and Individual User Profile Settings	230
Creating User Profiles	232
Groups	237
<i>Group-to-Group and Group-to-User Relationships</i>	238
<i>Group Scope</i>	239
Domain Local Groups	240
Global Groups	240
Universal Groups	242
<i>Group Types</i>	243
<i>Using Groups</i>	243
Default User Account Membership	244
Assigning Groups	246
Group Scope and Membership Example	248
Postscript	255

Chapter 8 Group Policies 257

Understanding Group Policies	257
<i>Group Policy Management and the Active Directory</i>	258
Group Policy Object Storage	259
Refining Group Policy Inheritance	260

<i>Group Policy Settings</i>	264
User and Computer Policies	265
Administrative Templates	266
Security Settings	267
Software Installation: Assigning and Publishing	271
Scripts	284
Folder Redirection	288
<i>GPO Implementation</i>	289
<i>Refreshing Policy Settings</i>	290
<i>PDC Operations Manager</i>	292
<i>Implementing Group Policy by Example</i>	292
<i>Local Computer Policy</i>	292
<i>Creating a GPO and Linking to the Active Directory Container</i>	297
Disabling Computer and User Configuration Settings	299
<i>Security Group Filtering Example</i>	303
<i>Scripts Example</i>	306
<i>Folder Redirection Example</i>	308
<i>IntelliMirror</i>	308
<i>Roaming Documents and Preferences</i>	309
Redirecting My Document Folders	309
<i>Postscript</i>	313

Chapter 9	Permissions Security, Folder Sharing, and Dfs	315
	<i>Reviewing NTFS Permissions</i>	316
	<i>Standard and Special Permissions</i>	316
	Permissions Levels	317
	<i>Working with Folder Permissions</i>	318
	Setting Permissions	318
	Special Permissions	322
	<i>Permission Inheritance</i>	326
	Moving and Copying File and Folder Permissions	330
	<i>Ownership</i>	330
	Implicit Groups and Permissions	335
	<i>Folder Sharing</i>	336
	<i>Creating Shared Folders</i>	338
	Sharing Folders	338
	<i>Facilitating Shared Access</i>	342
	Mapping a Network Drive to a Shared Folder	342
	The My Network Places Link to a Shared Folder	343
	Using Run Command to Access Shared Folders	343
	Accessing a Share from Internet Explorer	344
	<i>Special Hidden Shares</i>	344
	<i>Using NTFS Permissions and Shared Folders</i>	345
	<i>Publishing Files and Folders to the Active Directory</i>	346
	<i>Distributed File System Sharing</i>	347
	<i>Standalone versus Fault-Tolerant Dfs</i>	347

<i>Creating Dfs</i>	348
The Dfs Root	348
The Dfs Link	349
Dfs Topology	350
<i>More Dfs Advantages</i>	351
Browse and Search Directories	351
Bringing Servers Offline without User Interruption	351
Ease of Web Server Maintenance	351
<i>Concerns Regarding Dfs Use</i>	352
<i>Setting Up a Standalone Dfs Share</i>	352
Deleting a Dfs Share	358
<i>Setting Up a Fault-Tolerant Dfs Share</i>	358
<i>Publishing the Dfs Root to the Active Directory</i>	362
Postscript	363

Chapter 10 Kerberos and the Public Key Infrastructure

365

Kerberos Authentication	365
<i>Understanding Kerberos Concepts</i>	366
The Authentication Service Exchange	366
The Ticket-Granting Service Exchange	369
The Client/Server Exchange	370
Further Clarification of the Login Process	372
Referral Tickets	372
Delegation with Forwarding and Proxy	374
Forwarding Authentication	376
<i>The Kerberos Process</i>	376
Symmetrical Encryption and Shared Keys	376
Shared Secret Keys	377
<i>Kerberos Policies</i>	378
The Public Key Infrastructure	380
<i>PKI Background</i>	381
Data Encryption	382
The Digital Signature	382
<i>Certification Authority</i>	384
Certificate Components	384
Trusted Authorities and Certificate Stores	385
<i>Certificate Authority Hierarchies</i>	390
Third-Party Certificate Authorities	392
Other PKI Features	392
<i>Microsoft Certificate Authorities</i>	393
The Standalone Certificate Authority	393
The Enterprise Certificate Authority	393
<i>Public Key Policies</i>	394
<i>PKI and Other Components and Applications</i>	396
Web Security	397
Electronic Mail	399
Authenticode	400

<i>The Encrypted File System</i>	401
The EFS Process	402
EFS Issues	403
<i>Smart Cards</i>	406
<i>Certificate Authority Administration</i>	406
Installation	406
<i>Management</i>	410
Distributing Certificates Using Group Policies	410
Retrieving Certificates	417
Exporting Certificates and Backup	434
Certificate Authority Service Management	438
Certificate Authority Properties	442
Certification Authority Backup	447
Postscript	450
 Chapter 11	
Additional Security Issues and Solutions	451
Security Policy	452
<i>Security Policy Snap-Ins</i>	453
Using Security Template Snap-Ins	454
Building a Custom Template	457
<i>The Security Configuration and Analysis Tool</i>	458
Using the Security Configuration and Analysis Snap-In	458
Windows 2000 System Lockdown	462
<i>User Account Security</i>	463
The Administrator Account	463
Backup Operators	465
Guest Account	465
<i>Password Policies</i>	466
Domain Password Policies	466
Password Lockout Policies	467
Local Password Settings	467
Determining Who Sets a Password	468
Password Filtering	468
Other User Account Security Options	468
<i>Registry and File System Lockdown</i>	468
<i>Trojan Horses and Viruses</i>	469
<i>Environmental Path Settings</i>	470
Current Working Directory Security Resource	470
Extension Mapping to Disguise a File Type	472
Spoofing Shortcuts	472
<i>Extraneous Services as a Security Threat</i>	472
<i>Backups and Restoration Security</i>	473
<i>Physical Security</i>	473
Theft of Systems or Storage Media	473
Physical Access to the Boot CD-ROM and Floppy Drives	474
<i>Dual-Boot Environment Issues</i>	474

<i>Auditing as a Line of Defense</i>	475
Using Security Auditing	475
Offline Auditing Policies	477
Event Viewer Use	477
General Auditing Procedures	479
Audit Events that Need the Most Careful Review	480
Secure Network Services and Architecture	483
<i>Protecting Network Shares</i>	483
<i>Firewalls</i>	483
Packet Filtering	484
Proxy Services	486
Stateful Inspection	487
<i>Web Security</i>	487
Restricting Scripts from External Sources	487
HTTP Security	488
<i>IP Security</i>	488
<i>Internet Browser Security</i>	488
Restricting Java Components	489
Restricting ActiveX Components	489
Internet Certificate Management	490
<i>Securing RAS Servers</i>	490
<i>Securing Electronic Mail</i>	491
Preventing E-Mail Security Abuses	491
<i>Other TCP/IP Security Issues</i>	491
The End User's Responsibility	494
Postscript	494

Chapter 12 Networking Basics and Naming Services

497

Networking Basics	497
<i>Network Architecture</i>	497
A Modified Network Model	499
<i>IP Addressing</i>	499
Dissecting IP Addressing	500
Subnet Masks	501
The Address Resolution Protocol	501
<i>IP Routing</i>	503
Client-Side Routing Configuration	503
Naming Services and IP Assignments	503
<i>Domain Name System Conventions</i>	504
<i>Understanding DNS</i>	505
DNS Recursion	506
Standard versus Directory Integrated Zones	506
Installation with the Active Directory	507
Client Configuration	512
DNS Zones and Fault Tolerance	513

Forwarding	520
Scavenging	522
<i>The Dynamic Host Configuration Protocol</i>	523
Server-Side DHCP Configurations	524
Vendor and User Classes	532
Superscopes	533
DHCP and BOOTP Relay Agents	535
The 80/20 Rule for Fault Tolerance	535
Client-Side Configurations	535
<i>DNS with DHCP</i>	538
DHCP Server Configuration for DNS	539
The Backup and Restore Options	540
BOOTP	540
<i>WINS</i>	543
Postscript	543
 Chapter 13 Virtual Private Networks and IP Security	 545
Virtual Private Networks	545
Authentication	546
Role of Encryption	546
Tunnels	546
Point-to-Point Tunneling Protocol	548
Layer 2 Tunneling Protocol	548
IPSec Tunneling	550
VPN Configurations	551
Router-to-Router	551
Remote Access	551
Voluntary and Compulsory Tunnels	552
VPN Architecture and Configuration	552
Remote Access over the Internet—Example	553
Routing and Remote Access Server Management	568
Viewing Remote Access Clients	568
Internet Authentication Service and RADIUS	569
IAS Installation	571
RADIUS Account Logging	575
RADIUS Proxy Servers	576
IP Security	576
Understanding IPSec Policies	577
Setting IPSec Policies	577
Creating a New IPSec Policy	578
Authentication Methods	580
Tunnel Settings	581
Connection Type	582
IP Filters	583
IP Filter Actions	586
Postscript	590

Chapter 14 Disk Management, Backup and Restoration, and Disaster Recovery 591

Disk Management 591

NTFS and FAT/FAT32 Disk Management 592

Disk Management Tools 592

Disk Storage Types 593

Upgrading a Basic Disk to a Dynamic Disk 593

Managing Partitions and Basic Storage 594

Managing Volumes 595

The Disk Management Snap-In Tool 599

Disk Properties Options Available under NTFS 599

Disk Properties Options under FAT/FAT32 600

Disk Quotas 602

Disk Fragmentation Management 603

Removable Media and Library Management 605

Working with Libraries 606

Working with Media Pools 609

Operator Request Management 610

Securing Removable Storage 610

Remote Storage 611

Backup and Restoration 611

Backup Strategy Basics 611

Available Backup Types 612

Who Can Back Up 612

Managing Backups with NTBACKUP 613

Changing Default Backup Options 615

Restoration Basics 615

How to Restore 616

Using Batch Restoration 619

Authoritative Restoration 620

Disaster Management 621

Automatic System Recovery 621

Creating an ASR Saveset 621

Manual Recovery with the Advanced Options Menu 621

The Command-Line Recovery Console 622

Emergency Repair Disk 623

Fault Tolerance for Disaster Protection 623

Uninterrupted Power Supply Management 623

Postscript 624

Chapter 15 Terminal Services 625

Conceptual Review 625

Installing Terminal Services 627

Sizing Terminal Services Systems 628

Enabling and Disabling Terminal Services 628

Installing Applications for Use with Terminal Services 629

Configuring Terminal Services	630
<i>Configuring Connections</i>	<i>630</i>
General Settings	631
Remote Control Options	632
Client Settings for Remote Control	634
Network Adapter Settings	634
Permissions	635
Logon Settings	636
Sessions Options	637
Environment Settings	637
<i>Terminal Services Server Settings</i>	<i>638</i>
Connection Management	640
<i>Using the Connection Manager Wizard</i>	<i>640</i>
Terminal Services Administration	645
<i>Administrative Tools</i>	<i>645</i>
Terminal Services Manager	646
Active Directory Users and Computers Snap-In and the Local Users and Groups Snap-In	647
Task Manager Additions	648
Client Creator and Installation	650
Command Line Programs	650
Terminal Services from a User's Perspective	651
<i>User Launching</i>	<i>651</i>
Postscript	652

Chapter 16 Internet Information Services

653

Overview	653
<i>IIS Security Features</i>	<i>654</i>
IIS Security Mechanisms	654
IIS Internet Security Technologies	655
<i>IIS Data and Process Reliability</i>	<i>656</i>
<i>The Web Application Environment</i>	<i>657</i>
<i>IIS Management Components</i>	<i>658</i>
Understanding the IIS Web Server	658
<i>Administering IIS Web Services</i>	<i>658</i>
Creating a Website Using IIS	659
Basic Website Administration	661
Configuring Website Properties	664
Working with the SMTP Server	674
<i>SMTP Properties</i>	<i>674</i>
General SMTP Settings	675
Setting SMTP Authentication, Security, and Permissions	675
Regulating SMTP Delivery	676
Configuring SMTP LDAP Routing	676
Setting SMTP Operator Security	677
Setting SMTP Message Limits	677

Understanding the NNTP Server	679
Understanding the FTP Server	682
<i>FTP Properties</i>	682
Establishing General FTP Site Configuration	682
Establishing Basic FTP Security	682
Establishing the FTP Home Directory and Security	682
Postscript	685

Chapter 17 Cluster, Indexing, Message Queuing, SMS, and WSH 687

Understanding Cluster Services	687
<i>Failover and Failback</i>	688
<i>Cluster Network Concerns</i>	689
<i>The Cluster Database</i>	690
<i>Basic Cluster Planning</i>	691
Application Selection	691
Grouping and Capacity Issues	691
Network Issues	692
Required Domain Accounts	692
Potential Points of Failure	692
<i>Cluster Administration</i>	692
The Application Configuration Wizard	693
Understanding Default Groups	693
Failover Administration	693
Using the cluster.exe Command Line Utility	693
<i>Setting Cluster Properties</i>	694
<i>Postscript</i>	695
Index Services	695
<i>Using Index Services to Find Data</i>	697
<i>Indexing Service Sizing</i>	698
<i>Indexing Services Query Language</i>	699
Rules and Operators	699
<i>Common Indexing Server Administrative Tasks</i>	701
Creating a Catalog	701
Adding or Excluding a Directory to the Catalog	702
Adding, Editing, and Removing Properties	702
<i>Postscript</i>	703
Message Queuing Services	703
<i>Concepts</i>	704
Understanding Messages	704
Understanding Queues	704
Understanding Network Topology for MSMQ	705
<i>Understanding Message Routing</i>	706
Creating a Routing Link	707
Changing Routing Servers for a Routing Link	707
Creating a Cost for a Routing Link	707
Changing the Routing Server for Independent Clients	707
Testing Connectivity Using MQPing	708

<i>Installing Message Queuing Services</i>	708
Pre-Installation Hardware Considerations	708
Installation Considerations	709
<i>Administrative Tools for Message Queuing Services</i>	711
Finding an MSMQ System	711
Setting a Computer Message Storage Size	711
Limiting Journal Storage Size	712
Finding a Queue	712
Deleting a Queue	712
Enabling or Disabling Journals	712
Viewing Message Properties	713
Purging All Messages	713
<i>MSMQ Security Issues and Management</i>	713
Setting Permissions for a Computer or Queue	714
Changing Ownership of a Computer or Queue	715
Setting Default Security for MSMQ Storage Files	715
Setting Up Computer or Queue Auditing	715
Auditing a Routing Link	716
<i>Postscript</i>	716
System Management Server	716
<i>Software and Hardware Inventory</i>	717
<i>Software Installation and Distribution</i>	717
<i>Remote Administrative Tools</i>	717
<i>Software Metering</i>	718
<i>Network Diagnostics</i>	718
Windows Scripting Host	719
<i>Using WSH to Run Scripts</i>	719
Running Wscript.exe	719
Running Cscript.exe	721
Example WSH Scripts	722
Postscript	724

Appendix**Windows 2000 Commands and Utilities****725**

Backup Commands	727
<i>Using ntbackup on the Command Line</i>	728
Example ntbackup Command	729
Batch Commands	729
Comparison Commands	730
<i>fc Command</i>	730
fc Command Examples	731
<i>comp Command</i>	732
Example comp Command	732
<i>WinDiff</i>	733
Compression Commands	733
compact Command	734
expand Command	734

Display Commands	735
<i>Displaying the Contents of Files</i>	735
cls Command	735
more Command	735
type Command	736
<i>Displaying Attributes and Properties of Files and Folders</i>	737
Displaying File Properties Using Windows 2000 Explorer	737
dir Command	738
<i>echo Command</i>	742
<i>Displaying Help</i>	743
help Command	743
net help Command	744
net helpmsg Command	745
File Management Commands	745
<i>Displaying Path Names</i>	745
<i>Creating and Removing Folders</i>	745
Creating Folders	745
Removing Folders	746
<i>Moving between Folders</i>	747
chdir Command	747
<i>Creating and Removing Files</i>	747
Creating Files	748
Removing Files	748
<i>Copying and Moving Files</i>	749
Copying Files	749
Moving Files	754
Renaming Files or Folders	754
<i>Determining File Type</i>	755
File Manipulation Commands	755
<i>assoc Command</i>	756
<i>attrib Command</i>	756
attrib Command Example	756
<i>sort Command</i>	756
Miscellaneous Commands	758
<i>cacls Command</i>	758
<i>Converting to NTFS</i>	758
convert Command	758
<i>Setting and Displaying Date and Time</i>	759
date Command	760
time Command	760
net time Command	760
<i>Logging in as Another User</i>	761
<i>Chat Mode</i>	761
net name Command	761
net send Command	762

net print Command	797
net print Command Examples	797
Managing Printer Operations	798
Pausing and Resuming a Printer	798
Pausing and Resuming Printing	798
Restarting and Canceling a Document	798
Defining Printer Properties	799
LPD Service	799
Search Commands	799
find Command	800
find Command Examples	800
findstr Command	800
findstr Command Examples	802
System Management Commands	803
Disk Management	803
chkdsk Command	803
chkntfs Command	804
diskperf Command	804
Process Management	804
at Command	805
Task Manager	807
Other System Management Tools	808
Logging Off of the System	808
Shutting Down the System	808
Environment Variables	808
Resource Kit Support Tools	809
acldiag.exe—ACL Diagnostics	809
adsiedit.msc—ADSI Editor	810
apcompat.exe—Application Compatibility Tool	810
apmstat.exe—Advanced Power Management Status	810
clonepr.dll—Clone Principal	810
dcdiag.exe—Domain Controller Diagnostic Tool	811
depends.exe—Dependency Walker	812
dfsutil.exe—Distributed File System Utility	812
dnscmd.exe—DNS Troubleshooting Tool	813
dsacis.exe—dsacis	814
dsastat.exe—dsastat	814
dskprobe.exe—Disk Probe	815
dumpchk.exe—Dump Check	815
filever.exe—File Version Verification	816
gflags.exe—Global Flags	816
kill.exe—Task Killing Utility	818
ksetup.exe—Kerberos Client Configuration	818
ktpass.exe—Kerberos Tab Key Setup	818
ldp.exe—LDAP Tool	820

<i>memsnap.exe</i>	—Memory Profiling Tool	820
<i>movetree.exe</i>	—Movetree Object Manager	820
<i>msinfo32.exe</i>	—MS System Information Tool	821
<i>netdiag.exe</i>	—Network Connectivity Tester	822
<i>netdom.exe</i>	—Domain Manager	823
<i>nltest.exe</i>	—Network Domain Test	823
<i>pmon.exe</i>	—Process Monitor	823
<i>pvviewer.exe</i>	—Process Viewer	823
<i>repadmin.exe</i>	—Replication Diagnosis Tool	824
<i>replmon.exe</i>	—Replication Monitor	825
<i>rsdiag.exe</i>	—Remote Storage Diagnosis Tool	825
<i>sdcheck.exe</i>	—Security Descriptor Check Utility	826
<i>sidwalk.exe</i>	—SID Walk	827
<i>snmputilg.exe</i>	—SNMP Utility Tool	827
<i>tlis.exe</i>	—Task List Viewer	828
Postscript		828
