ward approach to the best ways
Windows Millennium

All the critical information you need to work efficiently
and take advantage of the new features

Contents

I Windows Millennium: Beyond the Basics	1
1 Ten Things You Should Know	
About the Windows Millennium Setup	9
Going Beyond the Minimum Windows Millennium Hardware Requirements.....	10
Upgrading from DOS or an Existing Version of Windows	12
Upgrading from DOS	12
Upgrading from Windows 3.x.....	13
Upgrading from Windows 95 or Windows 98.....	14
Dual Booting Windows Millennium with Another Operating System	14
Partitioning for Dual Booting	15
Dual Booting with Windows 2000 or Windows NT.....	15
Other Dual Boot Options.....	18
Performing a Clean Installation.....	18
Preparing Your System.....	22
A Preparation Checklist.....	22
Better Backup Ideas.....	24
Running the Windows Millennium Setup.....	25
Using Setup's Switches.....	26
Creating Automated Setup Scripts.....	26
Launching Setup.....	29
Adding and Removing Windows Millennium Components	32
Extracting a File from the Windows Millennium Setup Files	33
Editing Your Username and Company Name	34
Uninstalling Windows Millennium.....	35
Essential Information.....	37

2 Understanding and Controlling the Windows Millennium Startup	39
How the Startup Process Works	39
Say Goodbye to Real Mode in Windows Millennium.....	42
Working with the Windows Millennium Startup Menu.....	43
Controlling Startup Using the System Configuration Utility	45
Controlling Startup Using the System Configuration Utility	46
Controlling Startup Using Msdos.sys.....	50
Shutting Down Windows Millennium.....	55
How the Shutdown Process Works.....	55
The Shutdown Procedure.....	56
Creating Shutdown Shortcut.....	57
Creating Custom Startup and Shutdown Screens.....	57
Essential Information.....	60
3 An Insider's Guide to Four Crucial Configuration Tools	61
An Insider's Guide to the Registry	62
Why Is the Registry So Important?....	62
Keeping the Registry Safe.....	63
Launching the Registry Editor.....	69
How the Registry Is Structured	70
Working with Registry Keys and Settings	71
An Insider's Guide to System Policies	78
Installing the System Policy Editor.....	79
Working with a Local Registry	80
Installing and Running Tweak UI.....	82
Installing Tweak UI.....	82
Running Tweak UI	82
An Insider's Guide to the Control Panel	82
Controlling the Control Panel.....	84
Hiding and Displaying Control Panel Icons	87
Control Panel and the Registry.....	90
Essential Information.....	91

II Inside Windows Millennium Communication and Internet Features 93

4 Getting on the Internet 95

How to Get on the Internet Using a	
Phone Line	95
Installing a Modem	96
Information You Need Before	
Getting Started	104
Using the Internet Connection	
Wizard	105
Using Dial-Up Networking	108
Setting a Few More Connection	
Properties	111
Making the Connection	113
Creating Scripts to Automate	
Dial-Ups	115
Disconnecting from Your ISP	119
Notes on Broadband (Cable or DSL)	
Connections	119
How to Get on the Internet Using a	
Local Area Network	121
Information You Need Before	
Getting Started	121
Installing and Configuring the	
TCP/IP Protocol	122
Some Internet Utilities You	
Should Know	124
Essential Information	125

5 Expert Internet Explorer Techniques 127

Basic Browsing Techniques	127
Understanding Web Page	
Addresses	128
Opening and Browsing Pages	128
Searching for Sites	131
Customizing the Links Bar	132
Address Bar Tricks	133
Using the Favorites Folder to Save	
Sites	135
Opening Favorite Sites	135
Sharing Favorites and Netscape	
Bookmarks	136
Maintaining Favorites	137

Reading Pages Offline	138
<i>Setting Up a Page for Offline</i>	
<i>Reading</i>	139
<i>Synchronizing Offline Pages</i>	141
<i>Changing Offline Page Properties</i>	141
<i>Changing Synchronization Settings</i>	144
Controlling the Web Page Cache	145
Internet Explorer's Advanced Options	146
<i>Essential Information</i>	153
6 Outlook Express and Internet Email	155
A Quick Look at Some Outlook	
Express Email Basics	156
<i>Setting Up Mail Accounts</i>	157
<i>Sending a Message</i>	160
<i>Retrieving Messages</i>	162
<i>Reading a Message</i>	163
<i>Dealing with a Message After</i>	
<i>You've Read It</i>	164
Working with Outlook Express	
Folders	165
Filtering Incoming Messages	166
Finding a Message	169
<i>Simple Searches</i>	169
<i>Advanced Searches</i>	170
Finding a Person	172
Working with Identities	173
<i>Creating a New Identity</i>	173
<i>Switching Identities</i>	174
<i>Managing Identities</i>	175
<i>Logging Off Your Identity</i>	176
Identities—Storage Locations	
and the Registry	176
Customizing Outlook Express	177
<i>Reorganizing the Message List</i>	
Columns	177
<i>Rearranging the Layout of the</i>	
Outlook Express Window	178
<i>Essential Information</i>	180
7 Implementing Windows Millennium	
Internet Security Features	181
Internet Security and the TCP/IP	
Protocol	182
<i>"Always On" Connections and</i>	
Personal Firewalls	182

Internet Explorer's Security Features	184
Working with Internet Explorer's	
Security Zones	185
More Security Settings	192
Using a Digital ID for Secure Email	193
Setting Up an Email Account	
with a Digital ID	195
Obtaining Another Person's	
Public Key	196
Sending a Secure Message	197
Receiving a Secure Message	197
Essential Information	198

III Controlling Your Files and Folders

201

8 Expert Windows Explorer Techniques 203

My Computer or Windows Explorer?.....203

Basic File and Folder Chores: The

Techniques Used by the Pros204

Selecting Files and Folders205

Making Sense of Windows

 Millennium's Rules for Moving

 and Copying207

Expert Drag-and-Drop Techniques.....209

Taking Advantage of the Send To

Command.....210

Creating New Folders and Files.....211

Renaming Files and Folders212

Working with Zip Files

 (Compressed Folders).....212

The Recycle Bin: Deleting and

Recovering Files and Folders214

File Maintenance Using the Open

and Save As Dialog Boxes219

Powerful Search Techniques for

Finding Files.....219

Customizing Windows Explorer222

 Changing the View222

 Sorting Files and Folders223

 Exploring the View Options224

 Customizing the Standard

 Buttons Toolbar227

Using Windows Explorer's

 Command-Line Options229

Essential Information.....230

9 Powerful Techniques for File Types	231
Understanding File Types.....	232
<i>File Types and File Extensions</i>	232
<i>File Types and the Registry</i>	234
<i>The File Types Tab: A Front-End for HKEY_CLASSES_ROOT</i>	235
Opening a Document with an Unassociated Application	235
Working with Existing File Types	238
<i>Editing a File Type</i>	238
<i>Working with File Type Actions</i>	240
<i>Associating an Extension with a Different Application</i>	242
<i>Disassociating an Application and an Extension</i>	243
Creating a New File Type.....	243
<i>Using Open With to Create a Basic File Type</i>	243
<i>Using the File Types Tab to Create a More Advanced File Type</i>	244
Associating Two or More Extensions with a Single File Type	245
Customizing the New Menu	246
Figuring Out Browser File Types:	
Internet Explorer Versus Netscape ...	248
<i>Essential Information</i>	249
10 Taking Advantage of Shortcuts	251
Understanding Shortcuts	251
Creating a Shortcut.....	253
Modifying Shortcut Properties	254
Finding a Moved or Renamed Target	256
Some Unauthorized Shortcut Tricks	257
<i>Viewing Shortcut Extensions</i>	257
<i>Disabling the shortcut to Text</i>	258
<i>Customizing the Shortcut Icon Arrow</i>	259
Getting the Most out of Shortcuts	260
<i>Essential Information</i>	262

IV Windows Millennium Performance Tuning and Troubleshooting 263

11 Getting the Most out of Your Applications 265

Installing Applications Safely	265
<i>An Installation Safety Checklist</i>	266
<i>Installing the Application</i>	268

Applications and the Registry	270
<i>Program Settings</i>	270
<i>User Settings</i>	271
<i>File Types</i>	271
<i>Application-Specific Paths</i>	271
<i>Shared DLLs</i>	272
<i>Uninstall Settings</i>	273

Launching Applications	273
------------------------------	-----

Launching Applications	
Automatically at Startup	276
<i>Using the startUp Folder</i>	276
<i>Using the Registry</i>	277
<i>Using win.ini</i>	278

Switching Between Running Applications	278
---	-----

Uninstalling Applications	279
<i>Using Add/Remove Programs to Uninstall 32-Bit Applications</i>	279
<i>Uninstalling 16-Bit Applications by Hand</i>	281
<i>Essential Information</i>	284

12 Maximizing Your System's Memory 285

Memory: The Lifeblood of Your Computer	285
<i>The Address Space</i>	286
<i>Types of Memory</i>	287

Determining How Much Memory Is Installed	288
---	-----

Restricting Memory Usage	289
--------------------------------	-----

How Much Memory Is Enough?	290
----------------------------------	-----

Managing the Windows Millennium Swap File	292
--	-----

Tracking and Optimizing System	
Resources	294
Using the Resource Meter to	
Track System Resources	295
Some Ways to Save System	
Resources	297
More Memory Management	
Techniques	298
Essential Information	299
13 Optimizing Your Hard Disk	301
Examining Hard Disk Properties	302
Using Disk Cleanup to Remove	
Unnecessary Files	303
Detecting and Repairing Hard	
Disk Errors with ScanDisk	306
Optimizing Disk Access Times	
with Disk Defragmenter	310
Running Disk Defragmenter	311
Understanding the Intel	
Application Launch Accelerator....	312
Making the Move to FAT32	314
Understanding the FAT	315
What Is FAT32?	320
How Much Disk Space Will	
You Save?	322
Converting a Partition to FAT32	323
Essential Information	324
14 Crucial System Maintenance Skills	327
Getting the Big Picture: Windows	
Millennium Information Utilities	327
The System Information Utility	328
The File Information Utility	330
Finding the Version Number of a	
File	332
Automatic System Maintenance	
with the Scheduled Tasks Folder	333
Displaying the Scheduled Tasks	
Folder	333
Adding a New Scheduled Task	334
Working with Scheduled Tasks	335
Modifying a Scheduled Task's	
Properties	335

Understanding Windows Millennium's	
PC Health Features	337
Help and Support	337
System File Protection	338
System Restore	340
AutoUpdate	343
Essential Information	346

15 Preparing for Trouble 347

Putting Together an Emergency	
Boot Disk	347
Creating a Windows Millennium	
Startup Disk	348
Test Driving the Startup Disk	350
Backing Up Your Files	354
Installing Microsoft Backup	355
Starting Microsoft Backup	356
Setting Up a Backup Job	357
Notes Toward Easier Backup Jobs	359
Restoring a Backup Job	360
Gathering Troubleshooting	
Information	362
Essential Information	363

V Advanced Windows Millennium Customizing 365

16 An In-Depth Look at Web Integration 367

The Integration Interface I: Opening	
and Selecting Objects	368
The Integration Interface II: Viewing	
Folders As Web Pages	370
Creating a Custom Web View	
Background	371
Adding a Folder Comment	373
Understanding Web View	
Templates	375
Under the Hood: The Structure	
of a Web View Template	377
Inserting Links to Local, Intranet,	
and Internet Resources	380
The Integration Interface III: Web	
Content on the Desktop	381
Turning the Active Desktop	
On and Off	382

<i>Working with Desktop Items</i>	382
<i>Turning the Active Desktop into a Web Page</i>	385
<i>Essential Information</i>	386
17 Customizing the Windows Millennium Interface	387
Changing an Icon	387
More Than Just Wallpaper:	
Customizing the Desktop.....	389
A Quick Look at Windows Millennium's Display Settings	389
Modifying the Desktop Items	392
Setting Up Custom Shell Folders.....	396
Customizing Windows Millennium's System Icons	396
Renovating the Start Menu	397
Adding and Removing Start Menu Shortcuts	398
Some Start Menu Properties	400
Creating Accelerator Keys for Start Menu Shortcuts	403
Redoing the Taskbar.....	403
Setting Taskbar Properties	403
Using the Taskbar to Control Open Windows	404
Moving and Sizing the Taskbar.....	405
Customizing the Quick Launch Toolbar.....	405
Displaying Other Taskbar Toolbars....	406
Essential Information.....	407
VI Windows Millennium Networking Skills	409
18 Understanding Networking	411
Network Types: Client/Server Versus Peer to Peer.....	412
Network Hardware: NICs, Cables, and More	413
The Connection Point: The Network Interface Card	413
The Connection: The Network Cable	414
Other Network Hardware	417
Network Topology: Star Versus Bus.....	419

Network Protocols: NetBEUI, IPX/SPX, and TCP/IP	420
Essential Information.....	422

19 Setting Up Your Own Local

Area Network	423
---------------------	------------

Some Preparatory Chores	424
-------------------------------	-----

A Seven-Step Guide to Setting Up

a Network Client	425
------------------------	-----

Step 1: Installing a Network

Client Driver	426
---------------------	-----

Step 2: Installing Network

Protocols	427
-----------------	-----

Step 3: Installing Network

Services	429
----------------	-----

Step 4: Setting Up File

and Print Sharing	429
-------------------------	-----

Step 5: Identifying the Computer

Step 6: Specifying Access Control ...

Step 7: Specifying the

Network Logon	432
---------------------	-----

Finishing Up

	433
--	-----

Sharing a Dial-Up Connection

Between Network Clients	433
-------------------------------	-----

Running the New Home

Networking Wizard	434
-------------------------	-----

Setting Up Windows 9x

Clients	437
---------------	-----

Setting Up the Shared

Internet Connection	437
---------------------------	-----

Essential Information	438
-----------------------------	-----

20 Windows Millennium Networking

Features	439
-----------------	------------

Accessing the Network	439
-----------------------------	-----

Logging On to the Network	439
---------------------------------	-----

How to Access the My Network

Places folder	442
---------------------	-----

Understanding the Universal

Naming Convention	445
-------------------------	-----

Adding a Network Place	446
------------------------------	-----

Sharing Your Resources on the

Network	447
---------------	-----

Working with Share-Level Access	447
---------------------------------------	-----

Working with User-Level Access	449
--------------------------------------	-----

Mapping a Shared Resource As a	
Local Disk Drive	451
Mapping a Resource.....	451
Disconnecting a Mapped Resource ..	452
Printing over the Network.....	452
Dialing In to Your Network.....	454
Setting Up Windows Millennium	
As a Dial-Up Server.....	454
Creating and Configuring a	
Network Connection.....	456
Making the Connection	458
Essential Information.....	459

VII High-Powered Hardware Techniques 461

21 Taking the Mystery out of Hardware 463

Crucial Hardware Concepts	464
IRQ Lines, I/O Ports, and Other	
Device Settings.....	464
Understanding Device Drivers	468
How to Make Plug and Play	
Work (Most of the Time)	469
Installing Device Drivers	470
Using Automatic Hardware	
Detection.....	471
Installing a Driver by Hand.....	473
Working with the Signature	
Verification Tool.....	474
Using Automatic Skip Driver	
Agent to Bypass	477
Troublesome Drivers	477
Getting Device Information	478
Dealing with Device Manager	479
Viewing Devices by Resource	480
Working with Device Properties.....	481
Essential Information.....	482

22 Maximizing Multimedia Hardware 485

Installing and Configuring a	
Graphics Adapter.....	485
Changing the Adapter Driver.....	487
Configuring the Color Depth	
and Resolution	488

Working with Windows	
Millennium's Monitor Features.....	492
Changing the Monitor Type.....	493
Using Your Monitor's Power	
Management Features.....	494
Setting Up Multiple Monitors.....	495

Working with Scanners and	
Digital Cameras.....	498
Installing a Still-Image Device.....	498
Capturing Images.....	499

Wiring Windows for Sound.....	500
Assigning Sounds to Windows	
Millennium Events.....	501
Recording a WAV File.....	503
Editing a WAV File.....	504
Essential Information.....	505

23 The Ins and Outs of Windows

Millennium Notebook Features	507
-------------------------------------	------------

Power Management for Notebook	
Users.....	507
Putting the System into	
Standby Mode.....	509
Putting the System into	
Hibernate Mode.....	509
Resuming from Standby	
Mode or Hibernate Mode.....	510
Setting Up a Power Scheme.....	511
Monitoring the Battery.....	512
Configuring Your Notebook's	
Power Buttons.....	514

Windows Millennium PC Card	
Support.....	515

Transferring Files Between	
Computers Using Direct Cable	
Connection.....	516

Using a Briefcase to Synchronize	
File Sharing.....	519
Transferring Files via Floppy Disk.....	520
Transferring Files via Direct Cable	
Connection.....	521
Essential Information.....	522

VIII Appendixes	523
A A Glossary of Windows Terms	525
B Online Resources for Windows Millennium	545
The World Wide Web	545
Microsoft Sites.....	545
Non-Microsoft Sites.....	547
Usenet Newsgroups.....	549
C Windows Millennium Keyboard Shortcuts	553
Windows Millennium Startup Keys...	553
Interface Keys.....	554
Application Keys	555
Dialog Box Keys.....	556
Drag-and-Drop Keys	557
Windows Explorer Keys	557
Internet Explorer Keys.....	558
Doskey Keys	559
Windows Logo () Keys	560
Index	563
