Preface	ix
-------------------	----

Acknowledgments	xiii
---------------------------	------

Part I: HTML 4 Quick Start

1

Chapter 1: HTML 4 Basics 3

Introducing the Basic Building Blocks: Elements	3
Elements versus tags	4
Even elements have parts	4
Understanding Your Options: Attributes	5
Couples only	5
Always shop from a list	6
Please take a number	6
The colors of the world	6
Creativity counts	8
Using Special Characters: Entities	8
Adding Comments to Your HTML	10
Making Your HTML Readable	11
Avoiding Common Syntax Errors	12
Understanding Nesting	13
The Basic Structure of an HTML Document: HEAD and BODY	14
From Here	15

Chapter 2: The HTML 4 Way 17

The Extension Problem	17
Compatibility across browsers	18
The World Wide Web Consortium	19
The Ideal: Separating Structure from Presentation	20
Cluttered HTML (the pre-HTML-4 universe)	20
The maintenance nightmare	22
HTML 4 defines structure	23
Introducing Cascading Style Sheets	24
The HTML 4 Way	26
The Future: XML	26
The Ideal Versus the Reality	27
Where's All This Going?	27
What Should You Do Now?	28
From Here	28

Chapter 3: Creating Your First Web Page 29

Fire Up Your Editor	29
Titling Your Page	31
First things first	31
Identifying the Author	32
Defining key words for better retrieval	32
Beginning the BODY	34
Adding an Apparent Title	34
Typing and Editing Text	36
Paragraphs	36
Blockquotes	36
Breaking Lines and Starting New Paragraphs	37
Preventing line breaks	37
Adding horizontal lines	38
Creating a List	39
Bulleted lists	39
Numbered lists	40
Adding a Link	41
Adding an internal link	41
Adding an external link	42
Preview Your Page	42
Finishing Touches	43
Loading your style sheets	43
Linking to style sheets	43
Change your style	44
HTML Elements in Shorthand	45
From Here	46

Chapter 4: Going Public! 47

Getting Your Facts Straight	47
Desktop Web Servers	49
Enterprise Web Servers	51
Publishing on Your Own Server	51
Publishing on Your Service Provider's Server	52
Platform Issues	52
Extra: Publishing to a	
Windows NT/2000 server	53
From Windows 98	53
From Windows NT/2000	56
From a Mac	57
Introducing FTP	59
Introducing FTP clients: CuteFTP, WS_FTP, Fetch	60
Developing Directories to Store Your Pages and Graphics	62
Directory structure to match your pages	62
Directory structure by file type (generally a better idea)	63

Uploading Your Pages and Graphics	64
DNS	65
Permissions	65
Testing Your Work	65
From Here	67

Part II: Understanding HTML 4

69

Chapter 5: Introducing HTML 71

What's Your Purpose?	72
Transit point	72
Destination	72
Educational	73
Motivational	73
Informational	74
Persuasive	74
Sales	75
Understanding Your Tools	75
SGML	76
HTML	77
The HTML Standardization Process	77
Buzz and scrambling	77
Committees and working drafts	78
Voting process	78
HTML editors	80
Writing HTML	81
Format your text	82
Structure your document	82
Including Multimedia	83
Inline	83
Out-of-line	84
Objects	84
Standardization	84
Understanding the Standardization Process	85
Activities	85
Groups	86
Consensus	86
Proposed recommendations	86
Voting	86
Recommendations	87
Players in the Standardization Process	87
The Extensions Game	88
From Here	89

Chapter 6: What About XML/XSL? 91

What Is XML?	91
Document type definition	92
XML namespace	92
What Is XSL	92
Transformations	93
Formatting	93
From Here	93

Chapter 7: Introducing XHTML: HTML's Future 95

What Is XHTML?	95
Extensibility	95
Portability	96
Differences Between HTML and XHTML	96
Required tags	96
Tags must be properly nested	96
Lowercase tag and attribute names	98
Empty elements are not allowed	98
Nonempty elements have to be closed	98
Attribute values must be quoted	99
Attribute values must be expanded	99
From Here	99

Chapter 8: Choosing an HTML Editor 101

To WYSIWYG or Not to WYSIWYG?	102
WYSIWYG editors: Easy to use, but hands-off	102
Getting serious: Tag-based programs	102
What's the difference?	103
Exploring HTML Editor Features	105
Considerations	105
HTML 4 support	106
Support for advanced tags	111
Looking at HTML Editors	117
TextPad 4.2.1	117
HotDog Professional 6.0	117
HomeSite 4.5	119
HoTMetaL PRO 6.0	120
CoffeeCup 8.2	121
Dreamweaver	123
FrontPage 2000	124
HTML-Kit 1.0	124
PageMill 3.0	125
NetObjects Fusion 5.0	126
From Here	127

Chapter 9: Writing for the Web	129
Designing for Quick Scanning	129
Writing Concisely	131
Active verbs	131
Subordination	132
Expletives	132
Sentence length	133
Write Vividly	133
Check Spelling and Proofreading	134
From Here	134
Chapter 10: Considering Special Needs—Web Accessibility	135
Accessible Design	135
Accessibility Guidelines	136
From Here	137
Chapter 11: Understanding Server Options	139
The Client-Server Model	139
The client-server model	140
Processing: The crux of the issue	141
Client Processing	142
Introducing Web Servers	143
Permissions	144
NT: Hidden permission	144
Server Processing	145
What the Web server can't process	146
Converting scripts to HTML	146
The History of Middleware	146
Built-in middleware	148
Stand-alone middleware	149
Rapid application development	149
Cookies	150
Secure Servers	150
Looking at UNIX Servers	152
Looking at Windows NT Servers	153
From Here	153

Chapter 12: Understanding HTML 4 Document Architecture 157

What's New in HTML 4?	157
Frames	157
Forms	158
Annotation	158
Tables	158
Facilitating CSS	159
What's gone from HTML 4.0?	159
Components of HTML	159
Elements	159
Attributes	160
Entities	160
Block Versus Inline Elements	160
Understanding Nesting	161
The HTML Element	162
The HEAD Element	163
Additional HEAD Elements	163
The BODY Element	166
Structure Versus Presentation, Again	166
Making Your HTML as Readable as Possible	167
From Here	167

Chapter 13: Specifying the HTML Version and Document Title . . . 169

Version Information	169
Document Title	170
From Here	170

Chapter 14: Specifying Metadata 173

The META Element	173
Name attributes	174
The http-equiv attribute	175
Robots.txt	176
From Here	177

**Chapter 15: Structuring Lines and Paragraphs with
Block-Level Elements 179**

Introducing Block-Level Elements	179
Dictating presentation	180

Creating Paragraphs: The P Element	180
Controlling Line Breaks and Spacing	181
Breaking up your page	181
Preventing a line break	182
Adding Headings	182
Creating Indented Quotations: The BLOCKQUOTE Element	183
Adding Preformatted Text	184
Grouping Block Elements: The DIV Element	185
From Here	186
Chapter 16: Creating Lists	187
Introducing Lists	187
Creating bulleted lists: The UL element	187
Creating numbered lists: The OL element	189
Creating definition lists: The DL element	190
Nesting Block Elements	192
From Here	192
Chapter 17: Using Inline Elements and Special Characters	195
Introducing Inline Elements	195
Logical Versus Physical Styles	197
Understanding Web Character Sets	198
Adding Special Characters	198
Special Characters for Specific Jobs	199
Handling Foreign Languages	202
Adding Quotes: The Q Element	203
Grouping Inline Elements: The SPAN Element	203
From Here	204
Chapter 18: Adding Hyperlinks	205
Understanding Links	205
URLs Dissected	206
Linking Local Pages with Relative File Names	207
Qualifying the URL	207
The A element	207
Linking to Pages in Other Directories	208
Linking to External Pages	208
Linking to Locations on the Same Page	209
Link to Pages from Images	210
Linking to Non-Web Data	211
The BASE Element	211
Adding a mailto Link	212
Bonus: Create a Link Without Leaving Your Page	212
From Here	213

Chapter 19: Inserting Graphics and Other Objects 215

A Quick Introduction to Graphics File Formats	215
JPEG	215
GIF	216
PNG	216
Creating a graphic image	216
Adding Inline Images with the IMG Element	216
Multimedia	218
Adding Inline Multimedia with the OBJECT Element	218
Tips on Using Images Effectively	220
Providing Alternatives for Text-Only Browsers	221
From Here	222

Chapter 20: Adding Tables 223

Introducing the HTML Table Model	223
Defining the Table	224
Adding Table Data	226
Grouping Rows	231
Defining Columns	234
Grouping Columns	235
Spanning Rows and Columns	236
Adding Finishing Touches to a Table	237
Nesting Tables	238
From Here	238

Chapter 21: Creating Forms and Inserting Scripts 239

Introducing Forms	239
Understanding Form Processing	240
Saving the data for further processing	240
Returning information to the visitor	240
Taking other action	241
Inserting the FORM	241
Action	242
Method	242
Adding Controls	243
INPUT Element	245
Type attribute	246
BUTTON Element	251
SELECT, OPTION, and OPTGROUP Elements	252
SELECT element	253
OPTION element	254
TEXTAREA Element	256
LABEL Element	257
FIELDSET and LEGEND Elements	258
Form Processing Options	259

Dealing with Form Data	260
Mailto:	260
From Here	261
Chapter 22: Creating Frames	263
Introducing Frames	263
Developing the Master Frame Document	264
Rows only	265
Columns only	265
Both rows and columns	266
Nested FRAMESETs	266
Targets	267
Creating FRAMES	268
Enhancing Navigability	269
NOFRAMES	271
Adding Inline Frames (IFRAMES)	271
From Here	273
Chapter 23: Grouping Elements with DIV and SPAN	275
What Is CLASS?	275
Introducing DIV	276
Introducing SPAN	277
From Here	278
Chapter 24: Testing and Validating Your HTML	279
Watch for These Common HTML Mistakes	279
Testing Your HTML	280
Why You Should Validate	281
What is validating?	281
Why validate?	281
Validating Your HTML	282
Validating Your CSS	283
Different ways of validating your CSS	284
Assessing Usability	284
From Here	285

Part IV: Enhancing Presentation with Cascading Style Sheets

287

Chapter 25: Introducing Cascading Style Sheets 289

Why Style Sheets Are Needed	289
What Style Sheets Can Do	290
Grouping elements	290

Site face-lift	291
Delegating page assembly without sacrificing design control	291
The Cascading Model	291
Style Sheet Examples	292
Browser Compatibility Issues	295
From Here	295

Chapter 26: Learning CSS Syntax 297

Anatomy of a Style Sheet	297
Differences Between CSS and HTML Syntax	298
Defining Properties	299
Grouping Properties	300
Property Definition Shortcuts	301
Box Formatting: The CSS Formatting Model	301
Box dimensions	301
Padding	302
Border	303
Margins	304
Understanding Inheritance	304
Defining Classes	305
Pseudo-Classes	305
Defining IDs	306
Grouping Elements with DIV and SPAN	306
Comments in Style Sheets	307
From Here	307

Chapter 27: Adding Styles to Your Web Pages 309

Using an External Style Sheet	309
Using a STYLE Element within the HEAD	310
Adding Inline Styles	312
Using a Standardized Style Sheet	312
Mixing the Approaches: An Example	315
From Here	317

Chapter 28: Adding Colors and Backgrounds 319

How Your Monitor Creates Color	319
Introducing Color Codes	320
Using English	320
Monitor-to-monitor variations	321
Color Palettes	321
Color-Compatibility Considerations	322
Defining a Background Color	322
Changing Default Text Colors	323
Adding a Background Graphic	323
From Here	325

Chapter 29: Formatting Paragraphs 327

Reviewing the CSS Box Formatting Model	327
Padding summary	328
Margins summary	328
Units of length	329
Adding Indentations	329
Controlling Alignment	329
Choosing Line Height	330
Controlling Lists with Styles	330
List style type	330
List style image	331
List style position	331
List style shorthand	332
Adding Borders	332
Border width	332
Border color	333
Border style	333
Shorthand techniques	334
From Here	334

Chapter 30: Formatting Tables 337

Controlling Table Alignment	337
Setting Horizontal Cell Alignment	338
At the cell level	338
At the row level	339
At the column level	340
At the row group level or column group level	341
Setting Vertical Cell Alignment	341
Specifying Table and Cell Widths	342
Absolute values	342
Relative values	343
Specifying width in style sheets	343
Adding Cell Spacing	344
Defining Cell Padding	345
Using Colors in Tables	346
Defining Rules and Borders	346
From Here	347

Chapter 31: Adding Fonts 349

Introducing Fonts	349
Font families	349
Fonts versus the image of fonts	351
Using Local Fonts	351
Font-Selection Considerations	351
The aesthetics of font selection	352
Availability of local fonts	352

Controlling Font Selection	352
Choosing Font Sizes	353
Using Condensed and Expanded Fonts	353
Condensing and expanding horizontally	354
Condensing and expanding vertically	355
Adding Small Caps and Other Decorations	355
Changing the first line	356
Changing the first letter	356
From Here	357

Part V: Lay It Out Like the Pros

359

Chapter 32: Essentials of Web Page Design 361

What's in a Page?	361
Focusing on Your Message	362
Keeping it to the point (your left brain)	362
Go with the feeling (your right brain)	363
When to ask for help	364
Lead me not into temptation	364
The Shell Game	365
Consistency	367
Predictability	368
Navigability	368
Navigation bar or navigation buttons	368
Table of contents	370
Site map	371
Site search	372
Site drop-down list	372
Visual Appeal	373
Interactivity	373
Speed	373
Design Guidelines	374
Effective Use of White Space	378
Optimum Page Length	378
Future Expandability	379
Designing an Effective Welcome Page	379
Splash Screens	379
Testing	379
The Myth of Completeness	380
From Here	380

Chapter 33: Understanding CSS Positioning Options 381

The display Property	381
The float Property	383
The clear Property	385

The position Property	388
The z-index Property	389
Understanding Relative Positioning	389
Understanding Absolute Positioning	390
Combining Relative and Absolute Positioning	390
From Here	390

Chapter 34: Positioning Graphics and Text 391

Specifying Image Location	391
Using frames	391
Using CSS with absolute positioning	392
Using CSS with relative positioning	392
Using CSS to float the image	394
Defining Text Positions	395
Changing the BODY element	396
Positioning text with relative positioning	396
Floating an Image Next to Text	397
Floating both the text and the image	398
Floating only the text	399
The order of the HTML matters	399
From Here	402

Chapter 35: Cool CSS Positioning Tips and Tricks 403

Creating Columns of Text	403
Superimposing Text and Graphics	405
Creating Pull Quotes	407
From Here	409

Chapter 36: Structuring Multipage Sites 411

Possibilities and Problems of Multipage Sites	411
The Pros of multipage sites for your visitors	412
The Cons of multipage sites for your visitors	412
The Pros of developing a multipage site	414
The Cons of developing a multipage site	414
Dividing the Site	414
By origination of content	415
By type of content	416
By visitor type	417
Dividing Content	419
Site Architecture	421
Linear architecture: The forced march	422
Hierarchical architecture	423
Avoid extreme devotion to hierarchy	423
Anarchy	424
A seamless web	424

Providing Navigational Aids	425
Maintaining a Multipage Site	426
Bonus: Maintaining a Really Large Web Site	428
From Here	429

Part VI: Adding Sensory Excitement and Interactivity

431

Chapter 37: Creating Still Graphics for the Web 433

Understanding Graphics File Formats	433
Why compression?	433
Compression options	436
Understanding Color Depth	437
Enhancing Downloading Speed	438
Image file sizes	438
Number of images	439
Reuse images	439
Use frames	440
Use text rather than images	440
Creating Graphics	440
Essential functions	440
Free alternatives	441
Capturing Graphics	442
Progressive JPEGs and Interlaced GIFs	442
Using Transparent GIFs	443
From Here	444

Chapter 38: Creating Animated Graphics for the Web 445

Introducing Animated GIFs	445
Planning Your Animation	446
Creating the Animation	448
Using a GIF Animation Editor	448
Including an Animated GIF on Your Page	450
Testing Your Animation	450
More Animation Options	450
Shockwave/Flash	450
Movies	451
Java applets	451
ActiveX controls	451
From Here	451

Chapter 39: Designing and Implementing Imagemaps 453

Introducing Imagemaps	453
Imagemap Design	454
Server-Side Versus Client-Side Imagemaps	455
Developing Graphics for Imagemaps	455
Using an Imagemap Editor	456
The MAP Element	457
The AREA Element	457
The Anatomy of an Imagemap	458
Adding Alternate Text	458
From Here	458

Chapter 40: Producing and Adding Sounds 461

Understanding Digital Audio	461
Recording equipment	462
Recording bit-depth	462
Sample rate	462
Mono versus stereo	463
Playback equipment	463
Introducing Sound File Formats	463
Introducing Streaming Audio	464
Obtaining Sound Files	465
Recording Sound Files	465
Editing Sound Files and Adding Filters	466
Compressing Sound Files	466
Adding Sound Files to Your Page	467
Inline sound	467
Out-of-line sound	468
From Here	468

Chapter 41: Producing and Adding Video 471

Introduction to Digital Video	471
Expectations	472
Garbage in, garbage out	472
The Anatomy of Digital Video	472
Frame rate	473
Frame size	473
Introducing Video File Formats	473
Introducing Streaming Video	474
Video Compression Schemes	474
Capturing Analog Video	474
Editing Digital Video	475

Adding Video Files to Your Page	477
Inline movies	477
Out-of-line movies	477
Invaluable Resources	477
From Here	477

Chapter 42: Incorporating Plug-Ins and ActiveX Controls 479

Reviewing the OBJECT Element	479
How Plug-Ins Work	480
Plug-In Pluses and Minuses	482
Adding Plug-Ins	482
3D and animation plug-ins	483
Audio and video plug-ins	484
Discipline-specific plug-ins	485
Business plug-ins	485
Testing Your Plug-In	486
Configuring Your Server	487
Introducing ActiveX	487
ActiveX Pluses and Minuses	488
Understanding the ActiveX Security Model	489
Finding ActiveX Controls	489
Incorporating ActiveX Controls	490
Defining Options (Parameters)	491
Getting Around the Mac Problem	491
Testing Your Control	492
From Here	492

Chapter 43: Adding Java Applets 495

Introducing Java	495
Java Pluses and Minuses	496
The Java virtual machine	496
The Just-In-Time compiler	497
Understanding the Java Security Model	497
Java Development Tools	498
Incorporating Java Applets	500
Defining Options (Parameters)	500
Testing Your Applet	501
Introducing Server-Side Java	501
From Here	501

Chapter 44: Creating Subscriptions with the Channel Definition Format 503

Introducing Push Options	503
Nothing new	504
Channels	504

Marketing with Push	505
Introducing Channel Definition Format	505
CDF (XML) syntax	506
Images	506
Items	508
Subscribing to a Channel	508
From Here	509

Chapter 45: Accessing External Databases 511

Understanding Databases	511
Tables	511
Keys	512
Relationships	512
Common databases	512
ODBC	512
The Web-to-Database Interface	513
Requesting data	513
Communicating with the database	514
Returning results	515
Conclusions from the Web-to-database interaction	515
Options for Accessing Database Data	515
Three stand-alone components	516
Dual-purpose Web server and stand-alone database	516
Stand-alone Web server and dual-purpose database	517
External Database Access without Programming	517
External Database Access with SQL	517
From Here	518

Chapter 46: Building a Community: Incorporating Discussion Groups and Chat 519

Introducing Threaded Discussion Groups and Chat	519
Applications of threaded discussion groups	520
Applications of chat rooms	520
Adding Threaded Discussion Groups to a Web Page	521
Adding Chat to a Web Page	521
Text chat	521
Visual chat	522
Creating Community	522
What can you offer?	522
A big-name columnist	523
Talk with a professional	523
Beyond Chat and Threaded Discussion Groups	523
From Here	524

Chapter 47: Introducing Dynamic HTML and the Document Object Model	527
What Is Dynamic HTML?	528
Foundation for Change: The Document Object Model	531
How is the DOM implemented?	532
Cross-browser compatibility and the DOM	533
The structure of the DOM	533
From Here	536
Chapter 48: Cross-Browser Basics with JavaScript	539
JavaScript: The Dynamic in DHTML	539
Adding scripts with the SCRIPT element	541
JavaScript execution	542
Event handling in JavaScript	544
Properties, methods, and functions	547
Passing data from the page to the script	549
Testing and debugging JavaScript	551
Cross-Browser JavaScript	552
Surveying the Browser Environment	552
Object detection in JavaScript	555
From Here	556
Chapter 49: Frames, Layers, and the Shell Game	557
Defining Hidden Text	557
Bringing hidden text into view	558
Designing an interactive table of contents	558
Dynamically modifying styles	561
The script	562
Moving Layers	563
Creating cross-browser HTML	565
DOM object detection	566
Setting the initial position	566
Moving the object	567
From Here	569
Chapter 50: Doing Windows with JavaScript	571
What's a Window?	571
Window Workings	572
Opening Windows	573
Special-Purpose Windows	574
Windows by remote	576
Closing windows	577

Appendix A: HTML 4 Data Types	579
Appendix B: HTML 4 Elements Reference	583
Appendix C: HTML 4 Attributes Reference	653
Appendix D: HTML 4 Character Entities Reference	665
Appendix E: Cascading Style Sheets Reference	669
Appendix F: Language Codes Reference	713
Appendix G: Hex Notations Reference	719
Appendix H: About the CD-ROM	723
Index	725
End-User License Agreement	744
CD-ROM Installation Instructions	750
