Introduction xi

I Introduction to SMS 1

1 Overview and Purpose of SMS 3
The Need for Desktop and Software Management 3
The Internet 7
Purpose of SMS 2.0 7
Limitations of SMS 1.2 9

2 Conceptual Overview 11
Explanation of Key Concepts of Windows NT, SQL, and SMS 11
Windows Management Initiative 28
Windows Management and SMS 2.0 30

3 Planning and Design 33
Project Planning and Resources 33
Roles and Responsibilities 36
Sample Business 42
Baseline 48
Implementation Strategy 50

4 Prerequisites 63
SMS and SQL Configuration 63

II Installization and Configuration 71

5 Installation and Upgrade 73
Site Hierarchy 73
Installation of a New SMS Central Site 76
Verification of a Successful Site Install 79
Performing Post-Installation Tasks/Site Property Configuration Details 80
Installation of the Secondary Site 88
Upgrading from SMS 1.2 91

Novell NetWare 96
Discovery and Installation 98
SMS Service Pack 1 99

6 **Security** 101
Introduction 101
SMS Security Accounts 102
Different Security Architectures 104
Different Layers of Security 105
Real-World Examples 107
Single Domain Model 109
Object Classes and Instances 109
Managing SMS User Accounts 110
Best Practices for Maximum Security 111
Securing the SMS Tools 112

7 **Microsoft Management Console** 115
Overview and Purpose of MMC 115
Installing the SMS Administrator Console and Related Tools 116
Creating and Distributing Custom SMS Consoles 118
Limitations of the Microsoft Management Console 121

8 **Clients** 123
Discovery and Discovery Methods 123
Installation and Uninstallation 136
Pre-Installation (Staging) of Clients 141
Client Exclusion 141
Installation Recommendations 142
Uninstalling the Client 142
Client Agents 143
Control Panel Applets 152
Traveling Mode and Laptops 156

9 **Software Metering** 159
Overview and Purpose 159
Conceptual Overview 160

Planning and Design 163
Roles 164
Assigning Roles 166
Setup and Configuration 167
Security 171
Troubleshooting 172
Fault Tolerance 173
Performance 174
Scalability 174
Reporting 174
Recommendations 175
Sample Company Usage 176

III Usage 177

10 Software Packages 179
Definition of a Package 179
SMS 2.0 Installer Overview and Purpose 180
Creating and Customizing Packages 181
Distribution Points 188
Programs 188
Deleting a Package 193
SMS 1.2 Packages 194
Recommendations 195

11 Software Distribution 197
Overview and Purpose of Software Distribution 197
What's New with SMS 2.0 Software Distribution 198
Missing Elements in SMS 2.0 Software Distribution 201
Software Distribution Process 202
Distribution to SMS 1.2 Clients 206
Recommendations Before You Initiate Software Distribution 206
A Sample Software Distribution for Designer Denim 207
Software Distribution Troubleshooting Tips 209
Courier Sender 210

12 Collection 211
Overview and Purpose of Collections **211**
Collection Security **214**
Deleting Collections **215**
Propagating Collections Within a Site Hierarchy **215**
Maintaining Collections **216**
Sub-Collections **217**
SMS 1.x Upgrade Issues **219**
Limitations of Collections **219**
Advanced Options **219**

13 Inventory and Y2K Compliance 223
Hardware Inventory **223**
Software Inventory **227**
Troubleshooting Inventory Problems **229**
Customizing and Extending Inventory **230**
Using MIFs to Extend Inventory **232**
Y2K and SMS **234**

14 Remote Tools 237
Overview **237**
Remote Tools Configuration **238**
Remote Control Improvements in SMS 2.0 **238**
Remote Tools Settings Recommendations **239**
Remote Diagnostics **244**
Troubleshooting Remote Control Installation and Operation **244**
Miscellaneous Remote Control Issues **245**
Improving Remote Control Performance **248**

15 Queries and Reports 249
Understanding Queries **249**
Reporting **256**
Other Reporting Tools **258**

16 Tools 263
Network Monitor **263**
Network Trace **268**
Event Log to Trap Translator **270**

IV Troubleshooting and the Future 277

17 Status and Logs 279

Data Storage 280
Overview and Purpose of Status Messages 280
Status Message Flow 285
Using the System Status to Monitor SMS 289
Status System: Best Practices 295
Overview and Purpose of Logs 297
Other Log File Utilities 301
Log File Detail 301

18 Administration 307

Performance Monitor Counters 307
Event Log 313
Health Monitor 313
Backup and Restore 318
Database Maintenance 322
Routine Administrative Tasks 323
Utilities to Aid in Site Administration and Monitoring 324
Site Code Administration 326

19 Moving Forward 327

Overview 328
Sites, Domains, and Organization Units 329
Integration with the IntelliMirror Concept and Group Policy Technologies 330
SMS Installer 332
Integration of MSI (Windows Installer Service) 332
Integration with Active Directory 332
Role of SMS in the Migration Process of Windows NT 4.0 to Windows 2000 333
Integration of SMS with the Windows 2000 Remote Install Service 334

V Appendixes 335

A Inside Look 337

Accounts on the SMS Site Server 337
SMS Accounts for NetWare Site Systems 338

The SMS Executive Service 339
Services Created on the SMS Primary Site Server 344
Services Created on the SQL Server Machine 345
Shares on the SMS Site Servers 345
SMS Site Server Directories 346
Easter Egg 358

B Resources and Third-Party Tools 359
Microsoft 359
Third-Party Tools 362

C MSI (Microsoft Installer Service) 377
MSIEXEC Command-Line Options 378
Command-Line Option Combinations 381
MSIEXEC Examples 381

Index 383
