Introduction xviii

Part I Fundamentals of IP Multicast

Chapter 1 Introduction to IP Multicast 4

A Brief History of IP Multicast 7

The Pros of IP Multicast 8

Bandwidth 8

Server Load 10

Network Loading 11

The Cons of IP Multicast 11

Unreliable Packet Delivery 12

Packet Duplication 12

Network Congestion 13

Multicast Applications 15

Multimedia Conferencing 15

Data Distribution 16

Real-Time Data Multicasts 16

Gaming and Simulations 17

MBone—The Internet's Multicast Backbone 18

MBone Sessions 18

History of the MBone 19

Today's MBone Architecture 21

Tomorrow's MBone Architecture 23

Summary 23

Chapter 2 Multicast Basics 24

Multicast Addresses 25

IP Class D Addresses 26

Assigned Multicast Addresses 26

Administratively Scoped Multicast Addresses 29

Multicast MAC Addresses 29

Ethernet Multicast MAC Address Mapping 30

FDDI Multicast MAC Address Mapping 32

Token Ring Multicast MAC Address Mapping 32

Multicast Distribution Trees	34
Source Trees	35
Shared Trees	36
Multicast Forwarding	40
Reverse Path Forwarding	41
Multicast Forwarding Cache	42
TTL Thresholds	43
Administratively Scoped Boundaries	45
Multicast Routing Protocol Categories	47
Dense Mode Protocols	47
Sparse Mode Protocols	50
Link-State Protocols	53
Summary	54

Chapter 3 Internet Group Management Protocol 56

IGMP Version 1	58
IGMPv1 Message Format	58
The IGMPv1 Query-Response Process	59
Report Suppression Mechanism	61
IGMPv1 Querier	61
The IGMPv1 Join Process	61
The IGMPv1 Leave Process	62
IGMP Version 2	64
IGMPv2 Message Format	65
Query-Response Tuning	66
IGMPv2 Leave Group Messages	68
IGMPv2 Group-Specific Query Messages	69
IGMPv2 Leave Process	69
Querier Election Process	72
Early IGMPv2 Implementations	73
IGMPv1—IGMPv2 Interoperability	73
V2 Host/V1 Routers Interoperability	73
V1 Host / V2 Routers	75
Mixed V1 and V2 Routers Interoperability	76
The Possibilities of IGMPv3	76
Summary	77

Chapter 4 Multimedia Multicast Applications 78

- Real-Time Protocol 79
 - Using RTP and RTCP to Audio Conference: An Example 80
 - RTP Control Protocol 81
- Session Announcement Protocol 82
 - SAP Announcements 82
 - SAP Bandwidth Limits 83
- Session Description Protocol 84
 - SDP Message Format 84
 - SDP Information Description Types 84
 - Sample SDP Session Description 86
- MBone Multimedia Conferencing Applications 86
 - SDR—Session Directory Tool 87
 - VAT—MBone Multimedia Audio Tool 91
 - VIC—MBone Multimedia Video Tool 94
 - WB—Shared Whiteboard Tool 100
- Summary 102

Part II Multicast Routing Protocol Overview**Chapter 5 Distance Vector Multicast Routing Protocol 106**

- DVMRP Neighbor Discovery 107
- DVMRP Route Table 108
- Exchanging DVMRP Route Reports 110
- DVMRP Truncated Broadcast Trees 113
- DVMRP Multicast Forwarding 117
- DVMRP Pruning 118
- DVMRP Grafting 123
- DVMRP Scalability 126
- Summary 127

Chapter 6 PIM Dense Mode 128

- PIM Neighbor Discovery 130
 - PIM Hello Messages 130
 - PIM-DM Source Distribution Trees 132
- PIM-DM Multicast Forwarding 133

PIM-DM Pruning	136
Prune Override	138
Prune Delay Accumulation	140
PIM-DM Asserts	141
PIM-DM Grafting	143
Future PIM-DM Enhancement—State-Refresh	145
PIM-DM Scalability	146
Summary	147

Chapter 7 PIM Sparse Mode 148

Explicit Join Model	150
PIM-SM Shared Trees	150
Shared Tree Joins	151
Shared Tree Prunes	154
PIM-SM Shortest Path Trees	156
Shortest Path Tree Joins	157
Shortest Path Tree Prunes	159
PIM Join/Prune Messages	161
PIM-SM State-Refresh	162
Source Registration	163
PIM Register Messages	164
PIM Register-Stop Messages	165
Source Registration Example	165
Shortest Path Tree Switchover	169
SPT Switchover Example	169
Pruning Sources from the Shared Tree	171
PIM-SM Designated Router	174
The Role of the Designated Router	174
Designated Router Failover	175
RP Discovery	176
PIM-SM Suitability/Scalability	176
Summary	177

Chapter 8 Core-Based Trees 178

- CBT Overview 179
- Joining the Shared Tree 183
 - Transient State 183
 - Forwarding Cache 184
 - Multicast Forwarding 185
 - Nonmember Sending 185
- CBT State Maintenance 187
 - Echo-Request Messages 187
 - Echo-Response Messages 187
 - Flush-Tree Messages 188
- Pruning the Shared Tree 188
- CBT Designated Router 189
 - CBT Hello Protocol 189
 - DR Join Brokering 190
- Core Router Discovery 191
- CBT Version 3 191
- CBT Suitability/Scalability 191
- Summary 192

Chapter 9 Multicast Open Shortest Path First 194

- MOSPF Intra-Area Multicast Routing 196
 - Group Membership Link-State Advertisements 196
 - Intra-Area Shortest Path Trees 198
 - MOSPF Forwarding Cache 199
- MOSPF Interarea Multicast Routing 201
 - Multicast Area Border Routers 201
 - Interarea Group Membership Summary 202
 - Wildcard Multicast Receivers 204
- MOSPF Inter-AS Multicast Routing 207
 - Multicast Autonomous System Border Routers 207
- MOSPF Suitability/Scalability 209
- Summary 211

Part III Implementing Cisco Multicast Networks**Chapter 10 Using PIM Dense Mode 214**

Configuring PIM-DM 215

PIM-DM State Rules 217

PIM-DM (*, G) State Rules 218

PIM-DM (S, G) State Rules 218

PIM-DM State Maintenance Rules 220

PIM-DM State Entries 222

PIM-DM State Flags 222

PIM-DM State Example 223

PIM Forwarding 226

PIM-DM Flooding 227

PIM-DM Pruning 229

Dense Mode Grafting 232

New PIM Neighbor Adjacencies 234

Summary 238

Chapter 11 Using PIM Sparse Mode 240

Configuring PIM-SM 241

PIM-SM State Rules 242

PIM-SM (*, G) State Rules 243

PIM-SM (S, G) State Rules 244

PIM-SM Outgoing Interface Rules 244

PIM-SM Outgoing Interface Timers 246

PIM-SM State Maintenance Rules 246

Special PIM-SM (S, G)RP-Bit State Rules 247

PIM-SM State Entries 251

PIM-SM State Flags 254

Joining the Shared Tree 255

PIM Register Process 259

Receivers Join First 260

Source Registers First 268

Receivers Along the SPT 276

SPT-Switchover	279
Exceeding the SPT-Threshold	279
SPT-Switchover Process	280
SPT-Switchback Process	289
Pruning	289
Pruning the Shared Tree	289
Pruning the Source Tree	293
PIM-SM Special Cases	300
Unexpected Data Arrival	301
RP on a Stick	303
Turnaround Router	308
Proxy-Join Timer	309
Summary	312
Chapter 12 PIM Rendezvous Points	314
Auto-RP	315
Overview of Auto-RP	316
Configuring Auto-RP Candidate RPs	318
Configuring Auto-RP Mapping Agents	318
Using Multiple Mapping Agents for Redundancy	319
Using Multiple RPs for Redundancy	320
The Birth of Sparse-Dense Mode	320
A Simple Auto-RP Configuration	322
RP Failover in Auto-RP Networks	323
Constraining Auto-RP Messages	324
Preventing Candidate RP Spoofing	327
PIMv2 Bootstrap Router Mechanism	328
Overview of PIMv2 Bootstrap Router	328
Configuring PIMv2 Candidate RPs	331
Configuring PIMv2 Candidate BSRs	331
Using Multiple C-RPs for Redundancy & RP Load Balancing	332
RP Selection—The RP Hash Algorithm	333
Using Multiple C-BSRs for Redundancy	333
RP Failover in PIMv2 BSR Networks	335
Constraining BSR Messages	336
RP Placement and Tuning	337
Selecting RP Placement	337
Resource Demands on RPs	338
Forcing Groups to Remain in Dense Mode	341
Forcing Groups to Remain in Sparse Mode	348
Summary	350

Chapter 13 Connecting to DVMRP Networks 352

- Cisco DVMRP Interoperability 353
 - Enabling DVMRP Interoperability 354
 - PIM-DVMRP Interaction 355
- DVMRP Route Exchanges 367
 - Advertising Connected Routes (Default Behavior) 369
 - Classful Summarization of DVMRP Routes 370
 - Controlling DVMRP Route Advertisement 372
 - Controlling DVMRP Route Acceptance 379
 - Adjusting the Default DVMRP Distance 379
 - Offsetting DVMRP Metrics 380
 - Special Mbone Features 380
- PIM-DVMRP Boundary Issues 382
 - Unicast-Multicast Congruency 383
 - PIM Sparse Mode Issues 387
- DVMRP Network Connection Examples 390
 - Physically Congruent Networks 391
 - Separate Mbone Router 394
- Debugging Tips 397
 - Verifying DVMRP Tunnel Status 399
 - Verifying DVMRP Route Exchanges 401
- Summary 404

Part IV Multicast at Layer 2**Chapter 14 Multicast over Campus Networks 408**

- The Flat Earth Society 409
- Characteristics of LAN Switches 410
 - Broadcast/Multicast Flooding 411
 - Constraining Multicast Flooding 412
- IGMP Snooping 413
 - Joining a Group Using IGMP Snooping 413
 - Performance Impact of IGMP Snooping 416
 - Leaving a Group with IGMP Snooping 418
 - Maintaining the Group with IGMP Snooping 422
 - IGMP Snooping and Send-Only Sources 424
 - Detecting Routers with IGMP Snooping 426
 - IGMP Snooping Summary 427

Cisco Group Management Protocol	428
CGMP Messages	428
Joining a Group with CGMP	430
Maintaining the Group with CGMP	431
Leaving a Group with CGMP	432
CGMP Local Leave Processing	432
Performance Impact of CGMP	435
CGMP and Send-Only Sources	435
Detecting Routers with CGMP	436
CGMP Summary	436
Other LAN Switching Issues	437
IGMPv1 Leave Latency Problem	437
Interswitch Link Problem	438
Router Core Switch Problem	440

Summary	442
---------	-----

Chapter 15 Multicast over NBMA Networks 444

Traditional NBMA Networks	445
Multicast over Traditional NBMA Networks	448
Pseudobroadcast	449
PIM and Partial Mesh NBMA Networks	452
PIM NBMA Mode	454
Auto-RP over NBMA Networks	458
Multicast over ATM NBMA Clouds	461
ATM Point-to-Multipoint Broadcast Virtual Circuit	461
ATM Point-to-Multipoint VC per Group	463
PIM Multipoint Signaling	464
Limiting the Number of PIM Multipoint VCs	465
Debugging ATM P2MP Virtual Circuits	466
Classical IP over ATM Networks	468
Summary	470

Part V Advanced Multicast Topics

Chapter 16 Multicast Traffic Engineering 474

Controlling Multicast Bandwidth Usage	475
Bandwidth Control with Rate Limiting	476
Bandwidth Control with Scoped Zones	480
Configuring Scoped Zones	483
Scoped Zones and BSR	489

Controlling Multicast Traffic Paths	489
Alternative Sources of RPF Information	490
Traffic Engineering Example	498
Multicast Load Splitting with GRE Tunnels	500
Configuring Multicast Load Splitting	501
Process Versus Fast Switching	502
Broadcast-Multicast Traffic Conversion	503
Summary	507

Chapter 17 Inter-Domain Multicast Routing 508

Issues in Inter-Domain Multicast Routing	509
Multiprotocol BGP	511
New Multiprotocol BGP Attributes	511
Cisco's MBGP Implementation	512
MBGP Example	513
Multicast Source Discovery Protocol	514
A Little History	514
MSDP Concepts	515
Future Protocols	518
Border Gateway Multicast Protocol	519
Multicast Address Set-Claim	521
Summary	523

Part VI Appendix

Appendix A PIM Packet Formats 526

PIMv2 Packet Headers	527
Address Encoding	528
Unicast Address Encoding	528
Group Address Encoding	529
Source Address Encoding	529
Hello Message	530
Register Message	531
Register-Stop Message	531
Join/Prune Message	532
Bootstrap Message	534

Assert Message	537
Graft Message (Dense Mode Only)	537
Graft-Ack Message (Dense Mode Only)	538
Candidate-RP-Advertisement	538
Differences Between PIMv1 and PIMv2 Packets	539
PIMv1 Headers	539
PIMv1 Address Encoding	540
PIMv1 Messages Not Used in PIMv2	540

Index	542
--------------	------------
