

Self-Paced

MCSE Training Kit Microsoft Windows 2000 Professional

- Official Microsoft study guide for MCP Exam 70-210: *Installing, Configuring, and Administering Microsoft Windows 2000 Professional*
- Work at your own pace through the book's skill-building practice exercises
- Develop real-world system support expertise by mastering the concepts, procedures, and tasks measured by certification exam objectives

Contents

About This Book	xxv
Intended Audience	xxvi
Prerequisites	xxvi
Reference Materials	xxvi
Features of This Book	xxvi
The Microsoft Certified Professional Program	xxxvii
Technical Support	xlii
 Chapter 1 Introduction to Windows 2000	1
About This Chapter	1
Before You Begin	1
Lesson 1: Overview of the Windows 2000 Platform	2
Overview of Windows 2000	2
Lesson Summary	5
Lesson 2: Windows 2000 Professional	6
Ease of Use	6
Simplified Management	8
Increased Hardware Support	8
Enhanced File Management	10
Enhanced Security Features	11
Lesson Summary	11
Lesson 3: Windows 2000 Workgroups and Domains	13
Windows 2000 Workgroups	13
Windows 2000 Domains	14
Lesson Summary	16
Lesson 4: Logging On to Windows 2000	17
Logging On Locally to the Computer	17
Windows 2000 Authentication Process	19
Lesson Summary	20

Lesson 5: The Windows Security Dialog Box	21
Using the Security Dialog Box	21
Lesson Summary	22
Review	23
Chapter 2 Installing Windows 2000 Professional	25
About This Chapter	25
Before You Begin	25
Lesson 1: Getting Started	26
Preinstallation Tasks	26
Hardware Requirements	26
Hardware Compatibility List	28
Disk Partitions	28
File Systems	29
Licensing	30
Domain or Workgroup Membership	31
Preinstallation Checklist	33
Lesson Summary	33
Lesson 2: Installing Windows 2000 from a CD-ROM	35
The Windows 2000 Setup Program	35
Running the Setup Program	36
Running the Setup Wizard	37
Installing Windows Networking Components	38
Completing the Installation	39
Practice: Installing Windows 2000 from a CD-ROM	40
Lesson Summary	45
Lesson 3: Installing Windows 2000 over the Network	46
Preparing for a Network Installation	46
Creating a Distribution Server	47
Performing an Installation over the Network	48
Modifying the Setup Process	49
Modifying the Setup Process Using Winnt32.exe	50
Lesson Summary	51

Lesson 4: Troubleshooting Windows 2000 Setup	52
Resolving Common Problems	52
Setup Logs	53
Lesson Summary	54
Review	55
Chapter 3 Using Microsoft Management Console and Task Scheduler	57
About This Chapter	57
Before You Begin	57
Lesson 1: Introducing the Microsoft Management Console	58
Microsoft Management Consoles	58
Snap-Ins	60
Console Options	61
Lesson Summary	62
Lesson 2: Using Consoles	64
Creating Consoles	64
Using Consoles for Remote Administration	65
Practice: Creating a Customized Microsoft Management Console	65
Lesson Summary	69
Lesson 3: Using Task Scheduler	70
Introduction to Task Scheduler	70
Options	70
Advanced Properties	71
Practice: Using Task Scheduler	72
Lesson Summary	74
Review	75
Chapter 4 Using Windows Control Panel	77
About This Chapter	77
Before You Begin	78
Lesson 1: Configuring Hardware Settings	79
Understanding Hardware Profiles	79
Creating or Modifying a Hardware Profile	79

Activating a Hardware Profile	80
Viewing Hardware Profile Properties	80
Lesson Summary	80
Lesson 2: Configuring the Display	82
Setting Display Properties	82
Using Multiple Displays	84
Configuring Multiple Displays	85
Troubleshooting Multiple Displays	86
Lesson Summary	87
Lesson 3: Configuring Operating System Settings	88
Performance Options	88
Environment Variables	94
Startup and Recovery Settings	96
Practice: Using Control Panel to Change Operating System Settings	98
Lesson Summary	100
Lesson 4: Installing Hardware Automatically	102
Installing Plug and Play Hardware	102
Installing Non-Plug and Play Hardware	102
Using the Add/Remove Hardware Wizard	102
Confirming Hardware Installation	103
Lesson Summary	104
Lesson 5: Installing Hardware Manually	105
Determining Which Hardware Resources Are Required	105
Determining Available Hardware Resources	106
Changing Hardware Resource Assignments	107
Lesson Summary	108
Lesson 6: Configuring and Troubleshooting the Desktop Environment ..	109
Configuring Language and Location Settings	109
Practice: Using Control Panel to Configure a Computer for Multiple Languages and Multiple Locations	110
Configuring and Troubleshooting Accessibility Options	111
Configuring and Troubleshooting Additional Desktop Settings	113
Lesson Summary	113
Review	114

Chapter 5 Using the Registry	115
About This Chapter	115
Before You Begin	115
Lesson 1: Understanding the Registry	116
Purpose of the Registry	116
The Hierarchical Structure of the Registry	118
Lesson Summary	122
Lesson 2: Using Registry Editor	123
Regedt32.exe	123
Practice: Using Registry Editor	124
Lesson Summary	128
Review	129
 Chapter 6 Managing Disks	 131
About This Chapter	131
Before You Begin	131
Lesson 1: Introduction to Disk Management	132
Tasks in Setting Up a Hard Disk	132
Storage Types	132
Partition Types (Basic Disks)	134
Volume Types (Dynamic Disks)	135
File Systems	136
The Disk Management Snap-In	136
Lesson Summary	137
Lesson 2: Common Disk Management Tasks	138
Working with Simple Volumes	138
Working with Spanned Volumes	139
Working with Striped Volumes	140
Adding Disks	141
Changing Storage Type	143
Viewing and Updating Information	144
Managing Disks on a Remote Computer	145
Practice: Working with Dynamic Storage	146
Lesson Summary	150
Review	151

Chapter 7 Installing and Configuring Network Protocols	153
About This Chapter	153
Before You Begin	153
Lesson 1: TCP/IP	154
Understanding the TCP/IP Protocol Suite	154
Configuring TCP/IP to Use a Static IP Address	157
Configuring TCP/IP to Obtain an IP Address Automatically	158
Using Automatic Private IP Addressing	160
Disabling Automatic Private IP Addressing	161
Using TCP/IP Utilities	161
Testing a TCP/IP Configuration	163
Practice: Installing and Configuring TCP/IP	165
Lesson Summary	171
Lesson 2: NWLink	172
Understanding NWLink Features	172
Installing NWLink	173
Configuring NWLink	173
Practice: Installing and Configuring NWLink	176
Lesson Summary	177
Lesson 3: Other Protocols Supported by Windows 2000	178
NetBEUI	178
DLC	179
AppleTalk Protocol	179
Network Monitor Driver 2	180
Lesson Summary	180
Lesson 4: Network Bindings	181
Binding Between Architectural Levels	181
Combining Network Bindings	182
Configuring Network Bindings	182
Specifying Binding Order	182
Practice: Working with Network Bindings	183
Lesson Summary	185
Review	186

Chapter 8 Using the DNS Service	187
About This Chapter	187
Before You Begin	187
Lesson 1: Understanding DNS	188
Domain Name Space	188
Host Names	190
Domain Naming Guidelines	190
Zones	191
Name Servers	192
Lesson Summary	192
Lesson 2: Understanding Name Resolution	194
Forward Lookup Query	194
Name Server Caching	195
Reverse Lookup Query	196
Lesson Summary	197
Lesson 3: Configuring a DNS Client	198
Preconfiguration Considerations	199
Practice: Configuring a DNS Client	199
Lesson Summary	200
Review	201
 Chapter 9 Introducing Active Directory Directory Services	 203
About This Chapter	203
Before You Begin	203
Lesson 1: Understanding Active Directory Directory Services	204
What Are Active Directory Directory Services?	204
Simplified Administration	204
Scalability	205
Open Standards Support	205
Support for Standard Name Formats	206
Lesson Summary	207
Lesson 2: Active Directory Structure and Replication	208
Logical Structure	208

Sites	211
Replication Within a Site	211
Lesson Summary	213
Lesson 3: Understanding Active Directory Concepts	214
Schema	214
Global Catalog	215
Namespace	216
Naming Conventions	217
Lesson Summary	219
Review	220
 Chapter 10 Setting Up and Managing User Accounts	 221
About This Chapter	221
Before You Begin	221
Lesson 1: Understanding User Accounts	222
Local User Accounts	222
Domain User Accounts	223
Built-In User Accounts	224
Lesson Summary	225
Lesson 2: Planning New User Accounts	226
Naming Conventions	226
Password Requirements	227
Lesson Summary	227
Lesson 3: Creating User Accounts	228
The Computer Management Snap-In	228
Practice: Creating Local User Accounts	230
Lesson Summary	232
Lesson 4: Setting Properties for User Accounts	233
The General Tab in a User Account's Properties	233
The Member Of Tab in a User Account's Properties	234
The Profile Tab in a User Account's Properties	234
Practice: Modifying User Account Properties	237
Lesson Summary	239
Review	240

Chapter 11 Setting Up and Managing Groups	241
About This Chapter	241
Before You Begin	241
Lesson 1: Implementing Local Groups	242
Understanding Groups	242
Understanding Local Groups	243
Preparing to Use Local Groups	243
Creating Local Groups	244
Deleting Local Groups	245
Adding Members to a Group	245
Practice: Creating and Managing Local Groups	246
Lesson Summary	248
Lesson 2: Implementing Built-In Local Groups	249
Built-In Local Groups	249
Built-In System Groups	250
Lesson Summary	251
Review	252
 Chapter 12 Setting Up and Configuring Network Printers	 253
About This Chapter	253
Before You Begin	253
Lesson 1: Introducing Windows 2000 Printing	254
Terminology	254
Requirements for Network Printing	255
Guidelines for a Network Printing Environment	256
Lesson Summary	257
Lesson 2: Setting Up Network Printers	258
Adding and Sharing a Printer for a Local Print Device	258
Adding and Sharing a Printer for a Network-Interface Print Device	260
Setting Up Client Computers	263
Practice: Installing a Network Printer	265
Lesson Summary	269
Lesson 3: Connecting to Network Printers	270
Using the Add Printer Wizard	270

Using a Web Browser	272
Downloading Printer Drivers	272
Lesson Summary	273
Lesson 4: Configuring Network Printers	274
Sharing an Existing Printer	274
Setting Up a Printer Pool	275
Setting Priorities Between Printers	276
Lesson Summary	277
Lesson 5: Troubleshooting Network Printers	279
Common Troubleshooting Scenarios	279
Lesson Summary	280
Review	281
 Chapter 13 Administering Network Printers	 283
About This Chapter	283
Before You Begin	283
Lesson 1: Understanding Printer Administration	284
Managing Printers	284
Managing Documents	284
Troubleshooting Printers	285
Performing Tasks That Require the Manage Printers Permission	285
Accessing Printers	285
Setting Printer Permissions to Control Access	286
Lesson Summary	289
Lesson 2: Managing Printers	290
Assigning Forms to Paper Trays	290
Setting a Separator Page	291
Pausing, Resuming, and Canceling Documents	292
Redirecting Documents to a Different Printer	293
Taking Ownership of a Printer	294
Practice: Performing Printer Management	295
Lesson Summary	297
Lesson 3: Managing Documents	298
Pausing, Restarting, and Canceling a Document	298

Setting Notification, Priority, and Printing Time	299
Practice: Managing Documents	300
Lesson Summary	302
Lesson 4: Administering Printers Using a Web Browser	303
Understanding Web Servers	303
Using a Web Browser to Manage Printers	303
Accessing Printers Using a Web Browser	304
Lesson Summary	304
Lesson 5: Troubleshooting Common Printing Problems	305
Examining the Problem	305
Reviewing Common Printing Problems	305
Lesson Summary	306
Review	307
 Chapter 14 Securing Resources with NTFS Permissions	309
About This Chapter	309
Before You Begin	309
Lesson 1: Understanding NTFS Permissions	310
NTFS Folder Permissions	310
NTFS File Permissions	311
Lesson Summary	311
Lesson 2: Applying NTFS Permissions	312
Access Control List	312
Multiple NTFS Permissions	312
NTFS Permissions Inheritance	314
Lesson Summary	315
Lesson 3: Assigning NTFS Permissions	316
Planning NTFS Permissions	316
Setting NTFS Permissions	317
Practice: Planning and Assigning NTFS Permissions	318
Lesson Summary	327
Lesson 4: Assigning Special Access Permissions	328
Using Special Access Permissions	328
Changing Permissions	329
Taking Ownership	329

Setting Special Access Permissions	329
Taking Ownership of a File or Folder	331
Lesson Summary	331
Lesson 5: Copying and Moving Files and Folders	332
Copying Files and Folders	332
Moving Files and Folders	333
Lesson Summary	334
Lesson 6: Solving Permissions Problems	335
Troubleshooting Permissions Problems	335
Avoiding Permissions Problems	336
Practice: Managing NTFS Permissions	336
Lesson Summary	341
Review	342
 Chapter 15 Administering Shared Folders	343
About This Chapter	343
Before You Begin	344
Lesson 1: Understanding Shared Folders	345
Shared Folder Permissions	345
How Shared Folder Permissions Are Applied	347
Guidelines for Shared Folder Permissions	347
Practice: Applied Permissions	348
Lesson Summary	349
Lesson 2: Planning Shared Folders	350
Application Folders	350
Data Folders	351
Lesson Summary	352
Lesson 3: Sharing Folders	353
Requirements for Sharing Folders	353
Administrative Shared Folders	353
Sharing a Folder	354
Caching	355
Assigning Shared Folder Permissions	357
Modifying Shared Folders	358

Connecting to a Shared Folder	358
Lesson Summary	360
Lesson 4: Combining Shared Folder	
Permissions and NTFS Permissions	361
Strategies for Combining Shared Folder Permissions and NTFS Permissions	361
Practice: Managing Shared Folders	362
Lesson Summary	371
Review	372
 Chapter 16 Auditing Resources and Events	373
About This Chapter	373
Before You Begin	373
Lesson 1: Understanding Auditing	374
Using an Audit Policy	374
Using Event Viewer to View Security Logs	374
Lesson Summary	375
Lesson 2: Planning an Audit Policy	376
Audit Policy Guidelines	376
Lesson Summary	377
Lesson 3: Implementing an Audit Policy	378
Configuring Auditing	378
Setting an Audit Policy	378
Auditing Access to Files and Folders	381
Auditing Access to Printers	382
Lesson Summary	384
Lesson 4: Using Event Viewer	385
Understanding Windows 2000 Logs	385
Viewing Security Logs	385
Locating Events	386
Managing Audit Logs	388
Archiving Logs	388
Practice: Auditing Resources and Events	389
Lesson Summary	393
Review	394

Chapter 17 Configuring Group Policy and Local Security Policy	395
About This Chapter	395
Before You Begin	395
Lesson 1: Configuring Account Policies	396
Configuring Password Policy	396
Configuring Account Lockout Policy	398
Practice: Configuring Account Policies	400
Lesson Summary	403
Lesson 2: Configuring Security Options	404
Shutting Down the Computer Without Logging On	404
Clear Virtual Memory Pagefile When System Shuts Down	405
Disable CTRL+ALT+DEL Requirement For Logon	405
Do Not Display Last User Name In Logon Screen	406
Practice: Configuring Security Settings	407
Lesson Summary	407
Review	408
 Chapter 18 Managing Data Storage	 409
About This Chapter	409
Before You Begin	409
Lesson 1: Managing NTFS Compression	410
Using Compressed Files and Folders	410
Compressing Files and Folders	410
Selecting an Alternate Display Color for Compressed Files and Folders	412
Copying and Moving Compressed Files and Folders	412
Using NTFS Compression	413
Practice: Managing NTFS Compression	414
Lesson Summary	418
Lesson 2: Managing Disk Quotas	419
Understanding Windows 2000 Disk Quota Management	419
Setting Disk Quotas	420
Determining the Status of Disk Quotas	421
Monitoring Disk Quotas	422

Determining Best Uses of Disk Quotas	422
Practice: Enabling and Disabling Disk Quotas	423
Lesson Summary	426
Lesson 3: Increasing Security with EFS	427
Understanding EFS	427
Encrypting	428
Decrypting	429
Using the Cipher Command	429
Using the Recovery Agent	430
Practice: Encrypting and Decrypting Files	431
Lesson Summary	433
Lesson 4: Using Disk Defragmenter	434
Defragmenting Disks	434
Using Disk Defragmenter Effectively	435
Lesson Summary	436
Review	437
Chapter 19 Backing Up and Restoring Data	439
About This Chapter	439
Before You Begin	439
Lesson 1: Understanding How to Back Up and Restore Data	440
Introducing Windows Backup	440
Planning Issues for Windows Backup	441
Examining Backup Types	442
Lesson Summary	445
Lesson 2: Backing Up Data	446
Performing Preliminary Tasks	446
Selecting Files and Folders to Back Up	447
Specifying Backup Destination and Media Settings	448
Specifying Advanced Backup Settings	450
Scheduling Backup Jobs	450
Practice: Backing Up Files	451
Lesson Summary	456

Lesson 3: Restoring Data	457
Preparing to Restore Data	457
Selecting Backup Sets, Files, and Folders to Restore	458
Specifying Advanced Restore Settings	458
Practice: Restoring Files	460
Lesson Summary	462
Lesson 4: Changing Windows Default Backup Options	463
Lesson Summary	464
Review	465
Chapter 20 Monitoring Access to Network Resources	467
About This Chapter	467
Before You Begin	467
Lesson 1: Monitoring Network Resources	468
Understanding the Purposes for Monitoring Network Resources	468
Understanding the Requirements to Monitor Network Resources	469
Lesson Summary	469
Lesson 2: Monitoring Access to Shared Folders	470
Monitoring Shared Folders	470
Monitoring Open Files	472
Disconnecting Users from Open Files	473
Practice: Managing Shared Folders	473
Lesson Summary	474
Lesson 3: Sharing a Folder Using the Shared Folders Snap-In	475
Practice: Creating a Shared Folder	476
Sharing a Folder on a Remote Computer	477
Lesson Summary	478
Lesson 4: Monitoring Network Users	479
Monitoring User Sessions	479
Disconnecting Users	480
Sending Administrative Messages to Users	481
Practice: Sending Console Messages	481
Lesson Summary	482
Review	483

Chapter 21 Configuring Remote Access	485
About This Chapter	485
Before You Begin	485
Lesson 1: Understanding the New Authentication Protocols in Windows 2000	486
The Extensible Authentication Protocol	486
The Remote Authentication Dial-in User Service	487
The Internet Protocol Security	487
The Layer Two Tunneling Protocol	488
The Bandwidth Allocation Protocol	488
Lesson Summary	489
Lesson 2: Configuring Inbound Connections	490
Allowing Inbound Dial-up Connections	490
Practice: Configuring an Inbound Connection	493
Lesson Summary	494
Lesson 3: Configuring Outbound Connections	495
Dial-up Connections	495
Connections to a Virtual Private Network	496
Direct Connections to Another Computer Through a Cable	497
Practice: Configuring an Outbound Connection	497
Lesson Summary	499
Review	500
 Chapter 22 The Windows 2000 Boot Process	 501
About This Chapter	501
Before You Begin	501
Lesson 1: The Boot Process	502
Files Used in the Boot Process	502
Preboot Sequence	503
Boot Sequence	503
Kernel Load	505
Kernel Initialization	505
Logon	507
Lesson Summary	507

Lesson 2: Control Sets in the Registry	508
Windows 2000 Control Sets	508
The Last Known Good Process	509
Lesson Summary	511
Lesson 3: Advanced Boot Options	512
Safe Mode	512
Other Advanced Boot Options	513
Lesson Summary	514
Lesson 4: The Boot.ini File	515
Components of the Boot.ini File	515
ARC Paths	516
Boot.ini Switches	517
Modifications to Boot.ini	518
Lesson Summary	518
Lesson 5: Using the Recovery Console	519
Installing and Starting the Recovery Console	519
Using the Windows 2000 Recovery Console	519
Understanding the Recovery Console Commands	520
Practice: Using the Windows 2000 Recovery Console	521
Lesson Summary	524
Review	525
 Chapter 23 Deploying Windows 2000	527
About This Chapter	527
Before You Begin	527
Lesson 1: Automating Installations	528
Automating Installations by Using the Windows 2000 Setup Manager	528
Practice: Installing the Windows 2000 Installation Deployment Tools	530
Lesson Summary	536
Lesson 2: Using Disk Duplication to Deploy Windows 2000	537
Examining the Disk Duplication Process	537
Extracting the Windows 2000 System Preparation Tool	537

Using the System Preparation Tool to Prepare the Master Image	537
Practice: Using the System Preparation Tool to Create a Master Disk Image	539
Installing Windows 2000 from a Master Disk Image	540
Practice: Using the System Preparation Tool to Install Windows 2000 Professional	540
Lesson Summary	542
Lesson 3: Performing Remote Installations	543
Understanding Remote Installation	543
Installing and Configuring Remote Installation Services	544
Practice: Installing RIS	545
Understanding Client Requirements for Remote Installation	548
Net PCs	548
Computers Not Meeting the Net PC Specification	548
Creating Boot Floppies	549
Practice: Creating a Remote Boot Disk	550
Lesson Summary	551
Lesson 4: Upgrading Previous Versions of Windows to Windows 2000 ..	552
Identifying Client Upgrade Paths	552
Identifying Hardware Requirements and Compatibility	553
Generating a Hardware Compatibility Report	553
Identifying Software Compatibility	554
Upgrading Compatible Windows 95 and Windows 98 Computers	554
Installing the Directory Service Client	555
Upgrading Windows NT 3.51 and 4 Clients	556
Lesson Summary	557
Lesson 5: Installing Service Packs	558
Slipstreaming Service Packs	558
Deploying Service Packs After Installing Windows 2000	558
Lesson Summary	559
Review	560
 Chapter 24 Configuring Windows 2000 for Mobile Computers	 561
About This Chapter	561
Before You Begin	561

Lesson 1: Using Offline Folders and Files	562
Configuring Your Computer to Use Offline Folders and Files	562
Practice: Configuring Offline Folders	563
Configuring Your Computer to Provide Offline Folders and Files	563
Practice: Configuring Offline Folders	564
Synchronizing Files	565
Configuring Synchronization Manager	565
Practice: Configuring Synchronization Manager	566
Lesson Summary	567
Lesson 2: Configuring Power Options	568
Configuring Power Schemes	568
Using Hibernate Mode	568
Configuring Advanced Power Management	568
Practice: Configuring Power Options	569
Lesson Summary	570
Review	572
 Chapter 25 Implementing, Managing, and	
Troubleshooting Hardware Devices and Drivers	573
About This Chapter	573
Before You Begin	574
Lesson 1: Using Device Manager and System Information	575
Introducing Device Manager	575
Installing Devices	576
Configuring and Troubleshooting Devices	576
Using the System Information Snap-In	578
Practice: Using Device Manager and System Information	579
Lesson Summary	580
Lesson 2: Configuring, Monitoring,	
and Troubleshooting Driver Signing	581
Configuring Driver Signing	581
Monitoring and Troubleshooting Driver Signing	582
Using the File Signature Verification Utility	582
Practice: Using the Windows Signature Verification Utility	583
Lesson Summary	583

Lesson 3: Configuring Computers with Multiple Processors and Monitoring System Performance	584
Scaling	584
Updating Drivers	584
Using Performance Console to Monitor System Performance	585
Adding Counters	585
Lesson Summary	587
Lesson 4: Installing, Managing, and Troubleshooting Devices	588
Configuring and Troubleshooting Fax Support	588
Managing and Troubleshooting I/O Devices	589
Lesson Summary	591
Review	592
 Appendix A Questions and Answers	 593
 Appendix B Creating Setup Boot Disks	 633
 Appendix C Understanding the DHCP Service	 635
The Bootstrap Protocol	635
Manual Versus Automatic TCP/IP Configuration	636
Requirements for a Server Running the DHCP Service	637
Requirements for DHCP Clients	637
The DHCP Lease Process	638
IP Lease Renewal and Release	640
 Appendix D Managing Backup Tapes	 643
Rotating and Archiving Tapes	643
 Glossary	 645
 Index	 673
