

MICROSOFT® PROGRAMMING SERIES

Microsoft

CD-ROM
includes:

Inside **Direct3D**

Includes
the
DirectX® 7
SDK on
CD-ROM!

The definitive
guide to real-time
3D power and
performance
for Microsoft
Windows

Suranaree University of Technology

31051000652014

Peter J. Kovach

Foreword by
Michael D. Anderson

CONTENTS

<i>Foreword</i>	xvii
<i>Acknowledgments</i>	xix
<i>Using the Companion CD</i>	xxi
<i>Introduction</i>	xxv

CHAPTER ONE

DirectX Fundamentals	1
The DirectX APIs	2
DirectDraw	2
Direct3D	3
DirectMusic	3
DirectSound	4
DirectPlay	4
DirectInput.....	4
DirectSetup	4
How Direct3D Works as a DirectX API	5
What You Need to Know to Use a DirectX API	6
What Is a COM Object?	6
What Are the <i>AddRef</i> and <i>Release</i> Methods For?	7
How C and C++ Calls to DirectX Methods Differ	7
Return Codes	8
The Direct3D Framework	9
Conclusion	10

CHAPTER TWO

Windows Code for Direct3D Programs	11
How to Structure Your Windows Code	12
Code to Specify Include Files and to Define GUIDs	13
The <i>CMyD3DApplication</i> and <i>CD3DApplication</i> Classes	14
Setting Up the Main Window and Message Handling	17
Setting Up the Message-Processing Loop	20
Setting Up the Application's Window Procedure	26

The Code So Far	33
Conclusion	34

CHAPTER THREE

Setting Up DirectDraw for a Direct3D Program	35
DirectDraw and Multiple Monitors	36
Setting Up DirectDraw	38
Creating a Structure to Hold	
the Enumerated Devices	38
Enumerating the DirectDraw Devices	40
Creating a DirectDraw Object	44
Enumerating the Display Modes	46
Enumerating the Direct3D Devices	48
Picking a Direct3D Device	52
Initializing DirectDraw with the	
CD3DFramework7 Object	54
Setting the Cooperative Level	60
Creating Surfaces	63
The Front Buffer, Back Buffers, and Clipper	64
Full-Screen Buffers	64
Windowed Mode Buffers	69
Flipping the Surfaces	72
DirectDraw Complex Surfaces and Flipping Chains	73
The Code So Far	75
Conclusion	76

CHAPTER FOUR

Direct3D for DirectX Applications	77
Direct3D Immediate Mode Objects and Interfaces	77
DirectDraw Object	77
DirectDrawSurface Object	78
Direct3DDevice Object	78
Direct3DVertexBuffer Object	79
Creating an Immediate Mode Application	80
Step 1: Initializing the Application	82
Step 2: Determining the DirectX Version	82
Step 3: Enumerating the Available Direct3D Devices	83
Step 4: Selecting the Direct3D Device	84

Step 5: Getting an <i>IDirectDraw7</i> Interface	84
Step 6: Obtaining an <i>IDirect3D7</i> Interface from <i>IDirectDraw7</i> and Creating the Direct3D Device	84
Step 7: Creating a Depth Buffer	96
The Code So Far	101
Conclusion	102

CHAPTER FIVE

Direct3D Vertices and the Transformation and Lighting Pipeline	103
Overview of the T&L Pipeline	104
World Transformation	105
View Transformation	106
Lighting	107
Projection Transformation and the Viewing Frustum	107
Clipping	109
Dividing by w , or Nonhomogenization	110
Viewport Scaling	110
Vertices	110
Flexible Vertex Formats	111
Left-Handed and Right-Handed Coordinate Systems	112
Strided Vertex Format	113
Vertex Buffers	115
Setting Up the T&L Pipeline Matrices	117
The World Matrix	117
The View Matrix	122
The Projection Matrix	123
The Viewport	124
Creating the Viewport	124
Setting Up the Viewport	125
Clearing the Viewport	126
Lighting	127
Ambient Light	129
Direct Light	130
Color for Lights and Materials	131

Types of Lights 132

Light Properties 134

Setting the Light's Properties 137

Retrieving Light Properties 138

Enabling and Disabling the Lighting Engine 139

Enabling and Disabling a Light 139

The Code So Far 140

Conclusion 140

CHAPTER SIX

Rendering 3D Primitives 141

The *BeginScene* and *EndScene* Methods 141

Indexed and Nonindexed Primitives 142

The *DrawPrimitive* Methods 144

DrawPrimitive 144

DrawPrimitiveStrided 145

DrawPrimitiveVB 146

DrawIndexedPrimitive 147

DrawIndexedPrimitiveStrided 148

DrawIndexedPrimitiveVB 150

Primitive Types 151

 Point Lists 152

 Line Lists 154

 Line Strips 155

 Triangle Lists 156

 Triangle Strips 158

 Triangle Fans 159

Setting Render States 161

 Alpha Blending States 163

 Alpha Testing State 163

 Ambient Lighting State 164

 Antialiasing State 165

 Clipping State 165

 Color Keying State 165

 Culling State 166

 Depth-Buffering State 167

 Fill State 167

Fog State	168
Lighting State	168
Outline State	168
Per-Vertex Color States	169
Shading State	169
Stencil Buffering States	170
Texture Perspective State	171
Texture Wrapping State	171
Vertex Color Lighting State	172
z-Biasing State	172
Interpolants: Gouraud Shading and Specular Lighting	173
Creating a 3D Application	175
Loading the Models	175
Initializing the Device	175
Handling Per-Frame Activity	176
Rendering the Frame	176
The Code So Far	177
Conclusion	178

CHAPTER SEVEN

Keyboard and Joystick Input 179	
Creating a DirectInput Object	180
Getting the Keyboard, the Mouse, or the Joystick	186
Force Feedback	200
Creating a Force	203
Creating DirectInput Forces	203
Conclusion	214

CHAPTER EIGHT

Texturing 215	
Texture Coordinates	216
Assigning Texture Coordinates	216
Creating Texture Surfaces	217
Palettized Textures	220
Texture Management	224

Texture Compression	226
DXT Formats	227
Using DXT Surfaces	229
Mipmaps	233
Creating a Mipmap Texture	235
Accessing the Mipmap Levels	237
Setting the Mipmap LOD Bias	238
Texture Filtering	238
Nearest Point Sampling	239
Linear Texture Filtering	240
Anisotropic Texture Filtering	241
Mipmap Texture Filtering	241
Texture Interface Pointers	242
Texture Stages	243
Texture Blending	247
Multipass Texture Blending	247
Single-Pass Multiple-Texture Blending	249
Bump Mapping	252
Texture-Addressing Modes	257
Border Color Texture-Addressing Mode	258
Clamp Texture-Addressing Mode	258
Mirror Texture-Addressing Mode	259
Wrap Texture-Addressing Mode	260
Texture Wrapping	261
Applying a Texture Wrap	262
The Code So Far	263
Conclusion	264
 CHAPTER NINE	
Fog 265	
Fog Formulas	266
Setting Up Fog	269
Range-Based Fog	271
Pixel Fog	273
Eye-Relative Depth and z-Based Depth Pixel Fog	274
The Code So Far	277
Conclusion	282

CHAPTER TEN

Alpha Blending	283
Blending with the Frame Buffer	283
Special Effects	287
Emissive Objects in a Foggy Atmosphere	287
Lens Flare	287
Light Maps	288
Tinted Glass	289
Alpha Testing	289
Color-Key Transparency	291
Alpha-Capable Palettized Textures	293
Texture Stages Using Alpha	294
Legacy Blending Modes and Texture Stages	295
Premultiplied vs. Nonpremultiplied Alpha	296
The Code So Far	297
Conclusion	298

CHAPTER ELEVEN

Light Mapping and Environment Mapping	299
Light Mapping	299
Light Mapping with Multipass Texture Blending	302
Light Mapping with Texture Stages	304
Environment Mapping	307
Spherical Environment Maps	308
Cubic Environment Maps	309
The Code So Far	314
Conclusion	314

CHAPTER TWELVE

Stencil Buffers	315
Creating a Stencil Buffer	316
Clearing a Stencil Buffer	320
Configuring the Stencilling State	321
Creating Effects	325
Composites	325
Decals	325
Dissolves	326

Fades	326
Outlines	327
Silhouettes	327
Swipes	327
Shadows	327
The ShadowVol and ShadowVol2 Demos	328
The Code So Far	330
Conclusion	330

CHAPTER THIRTEEN

Loading and Animating 3D Models 331	
Animated Characters	331
Segmented Characters	332
Single-Mesh Characters	332
Loading and Handling RoadRage Models	335
The Code So Far	341
Conclusion	342

CHAPTER FOURTEEN

Optimizing a Direct3D Application 343	
The Direct3D Framework	343
Conserving Texture Memory	344
AGP Memory	344
Texture Map Compression	345
Enhancing Your 3D Effects	346
Multitexturing	346
Triple Buffering	346
True-Color Rendering	347
Optimizing Your Geometry Handling	347
<i>ComputeSphereVisibility</i>	347
Vertex Buffers	348
Batching <i>DrawPrimitive</i> Calls	348
Floating-Point Precision and Multithread <i>SetCooperativeLevel</i> Flags	348
Guard-Band Clipping	348
Texture-Type Hints	349

Minimizing Resources	349
High-Cost State Changes	349
Polygons	349
Texture Changes	349
Texture Memory	350
Visibility Grids	350
Conclusion	350

CHAPTER FIFTEEN

Integrating DirectPlay	351
DirectPlay Concepts	351
Getting Started	353
The Multiplayer Connect Dialog Box	357
The Multiplayer Games Dialog Box	361
DirectPlay Messages	370
Passing Game Messages to Players	371
Ending the Game	402
The Code So Far	405
Conclusion	406

CHAPTER SIXTEEN

Conclusion	407
Games	407
Simulation and Virtual Reality	408
Good Luck and Enjoy!	408
<i>Index</i>	409
