

Todd Brown and Chris Miller

Microsoft®

# Windows 2000 Server

## Expert Insight

The book presents focused explanations of the core features and complexities of Windows 2000 Server, including

- Active Directory structure: planning, installing, and upgrading
- File structure and drive handling changes
- Kerberos and Public Key Structure and concepts
- Disaster preparation and recovery
- Security changes: disk quotas, transitive trusts, enterprise management
- Installation tips and real-world examples
- Network protocols and TCP/IP essentials

## Authoritative Advice

Implement the advice from expert authors Todd Brown and Chris Miller to meet all of your Windows 2000 Server needs

- Introduction 1

## PART I Overview 3

1 Windows 2000 Introduction	5
A Network Operating System .....	6
An Operating System .....	6
Windows 2000 and your Network .....	7
Network Security .....	8
Performance Monitoring .....	8
The Product Family .....	9
Common Features .....	9
Windows 2000 Advanced Server .....	16
Windows 2000 Datacenter .....	17
Summary .....	18

## PART II Windows 2000 Operating System Environment 19

2 Architecture	21
The Subsystem and Kernel Architecture .....	22
User Mode and Kernel Mode .....	23
The Hardware Abstraction Layer .....	24
The Kernel .....	25
The Windows 2000 Executive .....	26
Subsystems: A Closer Look .....	28
The Win32 Subsystem .....	30
The POSIX Subsystem .....	32
The OS/2 Subsystem .....	33
Memory Model and Management .....	34
The Memory Model .....	34
Memory Management .....	37
Summary .....	38
3 Installation Considerations	39
System Requirements .....	40
Hardware Compatibility List .....	41
Installation Overview .....	42
The Installation Process .....	45
Booting Windows 2000 .....	45
Upgrade Information .....	50
Configuring Windows 2000 .....	50

Network Configuration .....	55
Licensing Options .....	58
Scenario 1: Per-Server Licensing .....	59
* Scenario 2: Per-Client Licensing .....	59
Automated Installation .....	61
Installing the Recovery Console .....	62
The <b>BOOT.INI</b> File .....	65
The Emergency Repair Disk .....	66
Migration from Preexisting Systems .....	66
Advanced Hardware Notes .....	67
Interrupts .....	67
EIDE Devices .....	68
Windows Update .....	68
Busses and Devices .....	69
Summary .....	69
<b>4 File Systems</b>	<b>71</b>
Hardware Considerations .....	72
Hard Disk Technology .....	73
Hard Disk Controllers .....	75
Principles of SCSI .....	77
Advanced Controller Technology .....	78
Hard Disk Partitions .....	81
System Startup .....	81
Basic Disks .....	83
Dynamic Disks .....	84
Basic and Dynamic Disks .....	84
Using the Disk Management Application .....	86
Starting Disk Management .....	87
Disk Properties .....	87
Volume or Partition Properties .....	88
Partition and Volume Management .....	93
Working with Dynamic Disks .....	96
Setting Up Disk Quotas .....	96
File System Formats .....	99
The FAT File System .....	100
NTFS .....	101
Working with Formats .....	109
Recommendations .....	110
Working with Volumes .....	111
Working with Simple Volumes .....	111
Spanned Volumes .....	112
Mirrored Volumes .....	112

Striped Volumes .....	114
RAID-5 Volumes .....	115
A Few Notes on Windows 2000 Volumes .....	115
Working with Network Shares .....	116
Sharing Directories .....	116
Connecting to Shared Directories .....	120
DFS: The Distributed File System .....	121
DFS Concepts .....	122
Setting Up DFS .....	122
Using DFS .....	123
Remote Storage Server .....	123
Remote Storage Concepts .....	124
Setting Up Remote Storage .....	124
Removable Storage Management .....	124
Summary .....	126
<b>5 Networking Brief</b>	<b>127</b>
Microsoft Networking Concepts .....	128
Workgroups and Domains .....	128
Active Directory .....	138
Network Services Setup .....	140
Networks (Your LAN or WAN)	
Versus Networks (Segmentation) .....	140
Switched Segmentation (Collision Domain Segments) .....	142
Routed Segmentation .....	144
RRAS .....	145
Remote Dial-In .....	145
Multiprotocol Routing .....	146
Summary .....	147
<b>6 Printing</b>	<b>149</b>
Printing Concepts .....	150
Printers .....	150
Fonts .....	152
Print Drivers .....	152
Communicating with Printers .....	153
The Life of a Print Job .....	155
Creating Print Queues .....	155
Using Print Manager .....	159
Managing Print Queues .....	164
The Forms Tab .....	164
The Ports Tab .....	165
The Drivers Tab .....	166
The Advanced Tab .....	167

Troubleshooting .....	168
Diagnosing Client-to-Server Printing	
Communications Problems .....	168
Diagnosing Print Quality Problems .....	176
Know Your Printer's Limitations .....	176
Know Your Printer's Specifications .....	176
Know Your Driver Versions .....	177
Matching Everything Up .....	177
Summary .....	178
<b>7 The Registry</b>	<b>179</b>
What Is the Registry? .....	180
The Structure of the Registry .....	181
The Classes Hive .....	181
The Users Hive .....	182
The Local Machine Hive .....	183
The Current Configuration Hive .....	185
How the Registry Is Used by Applications .....	185
Using the Registry Editor .....	187
When to Use Registry Editing Tools .....	187
How to Use REGEDIT .....	188
Finding Registry Changes Using REGEDIT .....	191
How to Use REGEDT32 .....	191
Using the Last Known Good Configuration .....	193
Summary .....	193
<b>8 TCP/IP Networking</b>	<b>195</b>
TCP/IP Concepts Brief .....	196
IP Addressing .....	196
Microsoft TCP/IP .....	205
Introduction to Microsoft TCP/IP .....	205
Installing .....	205
Routing .....	207
Dynamic Host Configuration Protocol (DHCP) .....	208
Windows Internet Name Service .....	217
Dynamic Domain Name Server (DDNS) .....	220
Migrating from WINS to DNS .....	226
Multiple Address Assignment for One Card .....	226
IP Security .....	227
Summary .....	227

**PART III Active Directory and Account Management 229**

<b>9</b>	<b>Directory and Access Concepts Brief</b>	<b>231</b>
	Security Concept .....	232
	Kerberos .....	232
	NTLM .....	237
	ACL .....	239
	Active Directory Control .....	239
	Workgroups and Domains .....	239
	Active Directory/Domain Objects .....	251
	Which Comes First: The Users or the Groups? .....	252
	Creating Objects .....	253
	Controlling User Access to Resources .....	257
	File Share Permissions .....	257
	Printer Permissions .....	260
	Summary .....	261
<b>10</b>	<b>Active Directory Design</b>	<b>263</b>
	Sites and Replication .....	264
	Sites .....	265
	Replication .....	266
	Site Creation .....	267
	Design Standards .....	269
	Political .....	270
	Geographic .....	271
	Mixed Environment .....	272
	Organizational Units .....	272
	Dynamic DNS .....	273
	How Dynamic Update Works .....	274
	Secure Dynamic Update .....	276
	Summary .....	276
<b>11</b>	<b>User Account Creation and Management</b>	<b>277</b>
	User Accounts .....	278
	Predefined or Built-in Users .....	278
	Naming and Password Conventions .....	280
	User Creation .....	282
	User Environment Needs .....	287
	Hard Drive Space .....	298
	Groups .....	300
	Group Scope .....	300
	Creating a New Group .....	302
	Predefined (Default) Groups .....	302
	Summary .....	304

<b>12</b>	<b>Intellimirror and User Control</b>	<b>305</b>
	Nuts and Bolts of Intellimirror .....	306
	Control Concepts .....	307
	Profiles .....	308
	Policies: A General Introduction .....	311
	Managing Group Policies .....	315
	Creating and Assigning .....	315
	Policy Modification .....	319
	Group Policy Administrators .....	319
	Windows Installer .....	320
	WinInstaller .....	321
	Delivery of the Package .....	324
	Remote Installation Services .....	325
	Summary .....	327
<b>PART IV Network Services 329</b>		
<b>13</b>	<b>Network Browsing</b>	<b>331</b>
	Understanding Network Browsing Concepts .....	332
	Browser Server Roles .....	334
	Browser Election Criteria .....	336
	Election Process .....	337
	Browsing Operations .....	340
	Browser Announcements .....	342
	Master Browser .....	343
	Browse List .....	344
	Multiple Domain and WAN Considerations .....	344
	Browsing Failures .....	349
	Configuring a Windows 2000 Server to Never Be a Browser .....	350
	Active Directory-Based Browsing Considerations .....	352
	Summary .....	354
<b>14</b>	<b>Remote Access (RAS)</b>	<b>355</b>
	Understanding the RRAS Service .....	356
	Protocol Support .....	357
	Transmission Control Protocol/Internet Protocol (TCP/IP) .....	357
	AppleTalk .....	358
	NWLink IPX/SPX/NetBIOS Compatible Transport .....	358
	NetBIOS Extended User Interface (NetBEUI) .....	359
	Remote Access Security .....	359
	Installing the RRAS Tools .....	361
	Remote Access Server Configurations .....	362
	Advanced Remote Access Server Configurations .....	369

Routing Configurations .....	389
Protocol Support .....	399
Modem Considerations .....	400
WAN Support .....	400
Authentication .....	401
Troubleshooting RAS .....	402
Summary .....	403
<b>15 Multiprotocol Environments</b>	<b>405</b>
Supported Protocols in Windows 2000 .....	406
Installing New Protocol .....	406
Load Them All! .....	408
Connection Style .....	409
TCP/IP .....	409
IPX/SPX .....	411
AppleTalk .....	414
NetBEUI .....	416
Routing and Remote Access Services .....	417
PPP .....	418
RIP .....	418
Troubleshooting .....	419
Summary .....	420
<b>16 Client Workstation Considerations</b>	<b>421</b>
Client Services Brief .....	422
Specific Client Operating System Considerations .....	429
Novell NetWare Clients .....	430
DOS, OS/2, Windows 3.x and Windows for Workgroups .....	436
Macintosh .....	440
UNIX Connectivity .....	444
Summary .....	447
<b>PART V Connectivity 449</b>	
<b>17 NetWare Connectivity</b>	<b>451</b>
Conceptual Differences .....	452
Security .....	452
Active Directory Versus NetWare Directory Services .....	453
File Shares .....	455
Printing .....	456
Connectivity to NetWare .....	457
Gateway Service for NetWare .....	458
File and Print Services for NetWare .....	463

Directory Service Migration Tool .....	463
NDS for NT (by Novell) .....	469
Summary .....	470
<b>18 UNIX Host to Windows 2000 Server Connectivity</b>	<b>471</b>
Conceptual Differences Between Windows 2000 Server and UNIX-Style Operating Systems .....	472
User Accounts .....	472
Security .....	473
Directory Services .....	474
Different Flavors of UNIX .....	475
