

Microsoft® Official Study Guide

Microsoft®

CD-ROM
Included

Self-Paced

MCSE **Training Kit** Microsoft **Windows® 2000** **Server**

- Official Microsoft study guide for MCP Exam 70-215: *Installing, Configuring, and Administering Microsoft Windows 2000 Server*
- Work at your own pace through the hands-on, skill-building exercises on CD-ROM
- Develop real-world system support expertise by mastering the concepts, procedures, and tasks measured by certification exam objectives

About This Book	xxxi
Intended Audience	xxxii
Prerequisites	xxxii
Reference Materials	xxxii
About the CD-ROM	xxxiii
Features of This Book	xxxiii
Notes	xxxiii
Conventions	xxxiv
Chapter and Appendix Overview	xxxv
Finding the Best Starting Point For You	xxxvii
Getting Started	xlii
The Microsoft Certified Professional Program	xlvi
Microsoft Certification Benefits	xlvi
Requirements for Becoming a Microsoft Certified Professional	xlvi
Technical Training for Computer Professionals	1
Technical Support	li
 Chapter 1 Introduction to Microsoft Windows 2000	 1
About This Chapter	1
Before You Begin	1
Lesson 1: Overview of Windows 2000	2
Editions of Windows 2000	2
Windows 2000 Professional	2
Windows 2000 Server	3

Windows 2000 Advanced Server	3
Windows 2000 Datacenter Server	3
Features of Windows 2000	4
Lesson Summary	6
Lesson 2: Operating System Architecture	7
Windows 2000 Architectural Overview	7
User Mode	8
Environment Subsystems	9
Integral Subsystems	10
Kernel Mode	10
Windows 2000 Executive	10
Hardware Abstraction Layer (HAL)	12
Kernel Mode Drivers	13
Lesson Summary	18
Lesson 3: Windows 2000 Directory Services	19
Introduction to Directory Services	19
Workgroups and Domains	20
Windows 2000 Workgroups	20
Windows 2000 Domains	22
Windows 2000 Active Directory Services	23
Active Directory Features	23
The Active Directory Structure	25
Lesson Summary	33
Review	34
Chapter 2 Installing and Configuring Microsoft Windows 2000 Server	37
About This Chapter	37
Before You Begin	38
Lesson 1: Preparing to Install Windows 2000 Server	39
Preparing for Installation	39
Minimum Hardware Requirements	42
Hardware Compatibility	43
Disk Partitions	44
Sizing the Installation Partition	45

File Systems	46
NTFS	46
FAT16 and FAT32	47
File System Considerations	48
Licensing	50
Per-Server Licensing	50
Per-Seat Licensing	50
Workgroups and Domains	51
Joining a Workgroup	51
Joining a Domain	52
Upgrade or New Installation	53
Installation Methods	53
Setup Boot Disks	54
Bootable CD-ROM	55
Over-the-Network (Server-Based)	56
Choosing Which Components to Install	57
Lesson Summary	60
Lesson 2: Installing Windows 2000 Server	61
Windows 2000 Server Setup Programs	61
Windows 2000 Setup Program	61
Winnt.exe Setup Program	62
Winnt32.exe Setup Program	63
The Installation Process	66
Pre-Copy Phase	66
Text Mode	67
GUI Mode	67
Exercise 1: Installing Windows 2000 Server	70
Lesson Summary	80
Lesson 3: Upgrading to Windows 2000 Server	81
Upgrading to Windows 2000 Server	81
Upgrading Servers	82
Upgrading a Windows NT Domain	83
Planning for a Windows NT Domain Upgrade	85
Preparing for a Windows NT Domain Upgrade	85
Preparing to Upgrade the Domain Controller	86

Upgrading the Primary Domain Controller	87
Upgrading the Backup Domain Controllers	87
Upgrading Member Servers	89
Domain Consolidation	89
Lesson Summary	91
Lesson 4: Troubleshooting a Windows 2000 Server Installation	92
Troubleshooting Windows 2000 Server	92
Lesson Summary	93
Review	94
 Chapter 3 Unattended Installations of	
Microsoft Windows 2000 Server	97
About This Chapter	97
Before You Begin	98
Lesson 1: Preparing for an	
Unattended Installation of Windows 2000 Server	99
Creating the Answer File	99
Answer File Format	100
Methods for Creating an Answer File	103
Creating the Distribution Folders	105
Structuring the Distribution Folder	106
Exercise 1: Preparing and Running an Automated Installation ...	109
Lesson Summary	118
Lesson 2: Automating the Installation of	
Windows 2000 Server	119
Performing an Unattended Installation	119
Bootable CD-ROM	120
Winnt.exe or Winnt32.exe	120
Automating the Installation of Windows 2000 Server	121
Using Syspart	123
Using Sysprep	125
Using Systems Management Server	135
Using a Bootable CD-ROM	136
Lesson Summary	137

Lesson 3: Automating the Installation of Server Applications	138
Using the Cmdlines.txt File	138
Using the Answer File	139
Installing Applications	141
Lesson Summary	143
Review	144
 Chapter 4 Microsoft Windows 2000 File Systems	147
About This Chapter	147
Before You Begin	148
Lesson 1: Disk Management Basics	149
Setting Up a Hard Disk	149
Storage, Partition, and Volume Types	149
File Systems	154
Common Disk Management Tasks	155
Working with Simple Volumes	156
Working with Spanned Volumes	157
Working with Striped Volumes	158
Adding Disks	159
Changing Storage Type	159
Viewing and Updating Information	161
Managing Disks on a Remote Computer	164
Exercise 1: Configuring a Simple Disk and Converting It to a Dynamic Disk	164
Lesson Summary	168
Lesson 2: File Allocation Table (FAT)	169
Introduction to the FAT File System	169
The FAT16 File System	170
The FAT32 File System	173
FAT32 Partition Structure	173
File System Limits	174
Lesson Summary	175

Configuring NTFS Permissions	204
Copying and Moving Files and Folders	208
Troubleshooting NTFS Permissions	209
Lesson Summary	210
Review	211
Chapter 5 Advanced File Systems	213
About This Chapter	213
Before You Begin	213
Lesson 1: Distributed File System	214
Dfs Overview	214
Limits of Dfs	216
Types of Dfs Roots	217
Stand-Alone Dfs Roots	217
Domain Dfs Roots	218
Configuring Dfs	219
Configuring a Stand-Alone Dfs Root	219
Configuring a Domain Dfs Root	220
Configuring New Dfs Links	220
Exercise 1: Creating a Dfs Root and Dfs Link	222
Lesson Summary	228
Lesson 2: File Replication Service	229
FRS Replication	229
Sites and Replication	230
Knowledge Consistency Checker	231
Unique Sequence Numbers	232
Implementing FRS	233
Replicating SYSVOL	233
Replicating Dfs Fault Tolerant Roots	233
Configuring FRS for Inter-Site Replication	234
Lesson Summary	235
Review	236

Chapter 6 Active Directory Services	237
About This Chapter	237
Before You Begin	238
Lesson 1: Overview of Active Directory Services	239
Introduction to Active Directory Services	239
Understanding Active Directory Concepts	240
Extensible Schema	241
Global Catalog	242
Namespace	243
Naming Conventions	244
Active Directory Architecture	247
Access to Active Directory Services	248
Directory Service Architecture	250
Lesson Summary	255
Lesson 2: Planning Active Directory Implementation	257
Planning a Namespace	257
Internal and External Namespaces	258
Defining a Namespace Architecture	260
Planning Organizational Units	263
Creating the OU Structure	263
OU Design Guidelines	264
Structure the OU Hierarchy	264
Planning a Site	266
Optimizing Workstation Logon Traffic	268
Optimizing Directory Replication	268
Lesson Summary	268
Lesson 3: Implementing Active Directory Services	269
The Active Directory Installation Wizard	269
Adding a Domain Controller to an Existing Domain	270
Creating the First Domain Controller for a New Domain	270
The Database and Shared System Volume	272
The Active Directory Database	272
The Shared System Volume	272

Domain Modes	273
Mixed Mode	273
Native Mode	273
Exercise 1: Installing Active Directory Services	274
Exercise 2: Joining Server02 to the Domain	277
Exercise 3: Installing and Examining the Contents of Adminpak.msi	279
Exercise 4: Changing from Stand-Alone Dfs to Domain Dfs	280
Lesson Summary	284
Lesson 4: Administering Active Directory Services	285
Creating Organizational Units and Their Objects	285
Creating Organizational Units	285
Adding Objects to Organizational Units	287
Exercise 5: Creating an Organizational Unit and Its Objects	288
Managing Active Directory Objects	290
Locating Objects	290
Modifying Attribute Values and Deleting Objects	293
Moving Objects	294
Exercise 6: Managing Active Directory Objects	294
Controlling Access to Active Directory Objects	296
Managing Active Directory Permissions	296
Permissions Inheritance	298
Delegating Administrative Control of Objects	298
Guidelines for Administering Active Directory Services	300
Lesson Summary	301
Review	302
 Chapter 7 Administering Microsoft Windows 2000 Server	305
About This Chapter	305
Before You Begin	305
Lesson 1: Using the Microsoft Management Console	306
The MMC Environment	306
The MMC Window	307
MMC Consoles	307

Snap-Ins	311
Stand-Alone Snap-Ins	311
Extension Snap-Ins	312
Console Options	312
Author Mode	313
User Mode	313
Exercise 1: Navigating and Creating a Custom MMC	314
Lesson Summary	318
Lesson 2: Administering User Accounts	319
Windows 2000 User Accounts	319
Domain User Accounts	319
Local User Accounts	320
Built-In User Accounts	320
Planning New User Accounts	321
Naming Conventions	321
Password Requirements	323
Account Options	323
Creating User Accounts	324
Creating Domain User Accounts	324
Exercise 2: Modifying Domain User Account Properties	327
Creating Local User Accounts	332
Modifying Properties for User Accounts	333
The Properties Dialog Box	333
Administering User Accounts	338
Managing User Profiles	338
Modifying User Accounts	343
Creating Home Folders	344
Exercise 3: Creating a Roaming Profile and Assigning a Home Folder	347
Lesson Summary	352
Lesson 3: Administering Group Accounts	353
Implementing Groups into a Domain	354
Types of Groups	354
Group Scopes	355
Group Membership	356

Implementing Groups	360
Administering Groups	361
Implementing Local Groups	364
Creating Local Groups	364
Built-In Groups	366
Built-In Global Groups	366
Built-In Domain Local Groups	367
Built-In Local Groups	368
Built-In System Groups	369
Exercise 4: Changing the Domain Mode	370
Exercise 5: Creating Groups	371
Lesson Summary	376
Lesson 4: Administering Group Policies	377
Introduction to Group Policies	377
Benefits of Group Policy	378
Types of Group Policies	379
Group Policy Structure	380
Group Policy Objects	380
Group Policy Containers	381
Group Policy Templates	381
Applying Group Policies	383
Creating a GPO	383
Using the Group Policy Snap-In	384
GPO Permissions	388
Support for Windows 95, Windows 98, and Windows NT 4.0	392
Administering Group Policies	393
Managing Software Settings	393
Managing Scripts	395
Managing Security Settings	396
Managing Administrative Templates	398
Managing Folder Redirection	399

Exercise 6: Creating a Group Policy Object and Setting a Policy	400
Exercise 7: Modifying Software Policies	403
Lesson Summary	405
Review	406
 Chapter 8 Administering Print Services	409
About This Chapter	409
Before You Begin	410
Lesson 1: Introduction to Windows 2000 Printing	411
Terminology	411
Requirements for Network Printing	413
Guidelines for a Network Printing Environment	414
Printing Configurations	415
Lesson Summary	419
Lesson 2: Setting Up Network Printers	420
Installing a Local Print Device	420
Installing a Network Print Device	421
Sharing an Existing Printer	421
Exercise 1: Installing and Configuring Print Sharing and Setting the Printer for Offline Operation	422
Lesson Summary	427
Lesson 3: Administering Network Printers	428
Accessing Printers	428
Managing Printers	430
Assigning Forms to Paper Trays	430
Setting a Separator Page	431
Pausing, Resuming, and Canceling Documents	432
Redirecting Documents to a Different Printer	433
Taking Ownership of a Printer	433
Managing Documents	434
Pausing, Restarting, and Canceling a Document	434
Setting Notification, Priority, and Printing Time	435
Administering Printers from a Web Browser	435
Using a Web Browser to Manage Printers	436
Accessing Printers Using a Web Browser	437

Setting Up a Printer Pool	438
Setting Priorities Between Printers	439
Troubleshooting Common Printing Problems	439
Reviewing Common Printing Problems	440
Lesson Summary	441
Lesson 4: Printing and Active Directory Services	442
Overview of Printing and Active Directory Services	442
Publishing Windows 2000 Printers	443
Publishing Mechanism	444
Pruning Orphans	445
Supporting Windows NT Printers	445
Group Policy Settings	446
Printer Location Tracking	446
Lesson Summary	446
Lesson 5: Connecting to Network Printers	447
Using the Add Printer Wizard	447
Client Computers Running Windows 2000	448
Client Computers Running Windows 95, Windows 98, or Windows NT	448
Client Computers Running Other Microsoft Operating Systems	448
Using a Web Browser	449
Downloading Printer Drivers	450
Lesson Summary	451
Review	452
 Chapter 9 Network Protocols and Services	 455
About This Chapter	455
Before You Begin	456
Lesson 1: Network Protocols	457
Introduction to Network Protocols	457
Protocol Binding Order	458
TCP/IP	458
ATM	458
LAN Emulation	460
IP over ATM	460

ATM over xDSL	460
ATM Access through Winsock 2.0 and Native ATM Access	461
NWLink	461
Setting the Frame Type	462
NetBEUI	463
AppleTalk	463
DLC	464
IrDA	465
Lesson Summary	465
Lesson 2: Transmission Control Protocol/Internet Protocol	466
Overview of the TCP/IP Suite	466
Network Interface Layer	467
Internet Layer	467
Transport Layer	468
Application Layer	469
Configuring TCP/IP to Use a Static IP Address	469
Configuring TCP/IP to Obtain an IP Address Automatically	471
Using Automatic Private IP Addressing	472
Disabling Automatic Private IP Addressing	473
Troubleshooting TCP/IP	473
Testing TCP/IP Connectivity	474
Using Ipconfig	474
Using Ping	475
Using Ipconfig and Ping	475
Exercise 1: Configuring and Testing TCP/IP	476
Lesson Summary	479
Lesson 3: Dynamic Host Configuration Protocol Service	480
Introduction to DHCP	480
The DHCP Lease Process	481
IP Lease Renewal and Release	484
Installing and Configuring the DHCP Service	485
Installing the DHCP Service	486

The DHCP Snap-In	486
Creating a DHCP Scope	487
Authorizing the DHCP Server	491
Exercise 2: Installing and Configuring the DHCP Service	492
Backing Up and Restoring the DHCP Database	499
Backing Up the DHCP Database	499
Restoring the DHCP Database	499
Lesson Summary	500
Lesson 4: Windows Internet Naming Service	501
Introduction to WINS	501
The WINS Name Resolution Process	501
Name Registration	502
Name Renewal	503
Name Release	504
Name Query	504
Implementing WINS	505
WINS Server Configuration	505
WINS Client Configuration	505
WINS Installation	506
The WINS Snap-In	506
Support for Non-WINS Clients	506
DHCP Server Configuration	508
Exercise 3: Installing and Configuring WINS	510
Lesson Summary	513
Lesson 5: Domain Name System	514
Introduction to DNS	514
Domain Namespace	515
Host Names	517
Domain Naming Guidelines	517
Zones	517
Name Servers	518
Overview of the Name Resolution Process	520
Forward Lookup Query	520
Name Server Caching	522
Reverse Lookup Query	522

Installing the DNS Service	523
Configuring the DNS Service	524
The DNS Snap-In	524
Creating Forward Lookup Zones	525
Creating Reverse Lookup Zones	526
Adding Resource Records	527
Configuring Dynamic DNS	528
Exercise 4: Configuring the DNS Service	529
Configuring a DNS Client	533
Troubleshooting the DNS Service	534
Monitoring the DNS Server	534
Setting Logging Options	535
Using Nslookup	535
Lesson Summary	536
Review	537
 Chapter 10 Routing and Remote Access Service	539
About This Chapter	539
Before You Begin	540
Lesson 1: Introduction to the Routing and Remote Access Service	541
Windows 2000 Routing and Remote Access Service	541
Combining Routing and Remote Access	543
LAN and WAN support	544
Installation and Configuration	544
Exercise 1: Enabling RRAS and Examining a Basic Configuration	545
Disabling RRAS	552
Authentication and Authorization	552
Lesson Summary	554
Lesson 2: Features of the Routing and Remote Access Service	555
Unicast IP Support	555
IP Multicast Support	556
IPX Support	557
AppleTalk	558

Demand-Dial Routing	558
Remote Access	558
VPN Server	559
RADIUS Client-Server	559
SNMP MIB Support	560
API Support for Third-Party Components	560
Lesson Summary	561
Lesson 3: Remote Access	562
Overview of Remote Access	562
Dial-Up Remote Access Connections	563
Remote Access Client	563
Remote Access Service Server	563
Dial-Up Equipment and WAN Infrastructure	564
Remote Access Protocols	568
LAN Protocols	569
Remote Access Security	569
Secure User Authentication	569
Mutual Authentication	570
Data Encryption	570
Callback	571
Caller ID	571
Remote Access Account Lockout	571
Managing Remote Access	572
Managing Users	572
Managing Addresses	573
Managing Access	573
Managing Authentication	580
Exercise 2: Configuring and Monitoring a RAS Connection	582
Lesson Summary	588
Lesson 4: Virtual Private Networks	589
Introduction to Virtual Private Networks	589
Connecting Networks over the Internet	590
Connecting Computers over an Intranet	590

Tunneling Basics	591
Tunnel Maintenance and Data Transfer	591
Tunnel Types	593
VPN Protocols	595
PPTP	595
L2TP	596
PPTP versus L2TP	597
IPSec	597
IP-IP	599
Managing Virtual Private Networking	599
Managing Users	599
Managing Addresses and Name Servers	599
Managing Access	600
Managing Authentication	600
Troubleshooting	601
Connection Attempt is Rejected When it Should Be Accepted ...	602
Connection Attempt is Accepted When it Should Be Rejected ...	604
Unable to Reach Locations beyond the VPN Server	605
Unable to Establish Tunnel	606
Lesson Summary	607
Lesson 5: RRAS Tools	608
Routing and Remote Access Snap-In	608
Net Shell Command-Line Utility	609
Authentication and Accounting Logging	612
Event Logging	613
Tracing	614
File Tracing	614
Lesson Summary	615
Review	616

Chapter 11 Microsoft Windows 2000 Security	619
About This Chapter	619
Before You Begin	620
Lesson 1: Public Key Infrastructure	621
Security Properties	621
Authentication	621
Integrity	621
Confidentiality	622
Anti-Replay	622
Cryptography	622
Public Key Cryptography	623
Secret Keys	625
Certificates	626
CA Hierarchy	628
Microsoft Certificate Services	628
Certificate Services Architecture	629
Processing Certificate Requests	632
CA Certificates	634
Installing Certificate Services	635
Administering Certificate Services	636
Exercise 1: Installing and Configuring Certificate Services	638
Lesson Summary	644
Lesson 2: Public Key Technologies	645
Secure Channel Authentication Package	645
Smart Cards	646
Smart Card Logon	647
Authenticode	647
Encrypting File System	648
Data Protection	649
Data Recovery	649
Encrypted Backup and Restoration	649

Fault Tolerance	649
EFS Encryption	650
EFS Decryption	651
EFS Recovery	652
Cipher Command-Line Utility	653
Exercise 2: Configuring and Using File Encryption	654
IP Security	658
IPSec Policies	658
IPSec Components	659
Example of IPSec Communication	660
Lesson Summary	662
Lesson 3: The Kerberos Protocol in Windows 2000	663
Overview of the Kerberos Protocol	663
Kerberos Protocol Terms	664
Features of the Kerberos Protocol	666
Kerberos Authentication Process	667
Kerberos Delegation	669
Kerberos Logon Processes	670
Local Interactive Logon	670
Domain Interactive Logon	671
Kerberos Public Key Support	673
Lesson Summary	673
Lesson 4: Security Configuration Tools	674
Security Configuration And Analysis Snap-In	674
Security Configuration	674
Security Analysis	674
Using the Security Configuration And Analysis Snap-In	675
Security Templates Snap-In	676
Using the Security Templates Snap-In	676
Exercise 3: Creating and Using the Security Analysis And Configuration Snap-In	677
Group Policy Snap-In	681
Lesson Summary	681
Lesson 5: Microsoft Windows 2000 Auditing	682
Overview of Windows 2000 Auditing	682
Using an Audit Policy	682

Planning an Audit Policy	683
Implementing an Audit Policy	684
Configuring Auditing	685
Setting an Audit Policy	686
Auditing Access to Files and Folders	687
Auditing Access to Active Directory Objects	688
Auditing Access to Printers	688
Using Event Viewer	688
Windows 2000 Logs	689
Viewing the Security Log	689
Locating Events	690
Managing Audit Logs	690
Archiving Logs	691
Lesson Summary	691
Review	692
 Chapter 12 Reliability and Availability	 693
About This Chapter	693
Before You Begin	694
Lesson 1: Managing Hardware Devices and Drivers	695
Hardware Overview	695
Hardware Types	696
Plug and Play Overview	697
Installing Devices	698
Uninstalling Devices	700
Tools for Managing Devices and Drivers	701
Add/Remove Hardware Wizard	701
The Device Manager Snap-In	702
Driver Signing	703
Hardware Profiles	705
Event Logs	707
Installing Service Packs	708
Service Pack Slipstreaming	708
Post-Setup Installation of a Service Pack	708
Lesson Summary	709

Lesson 2: Backing Up Data	710
Introduction to Windows Backup	710
Planning Issues for Windows Backup	712
Determine Which Files and Folders to Back Up	712
Determine How Often to Back Up	712
Determine Which Target Media to Use for Storing Backup Data	712
Determine Whether to Perform Network or Local Backup Jobs	713
Setting Backup Options	714
Backup Types	715
Backing Up Data	718
Performing Preliminary Tasks	718
Selecting Files and Folders to Back Up	719
Specifying Backup Destination and Media Settings	720
Specifying Advanced Backup Settings	721
Scheduling Backup Jobs	723
Exercise 1: Backing Up Files	724
Lesson Summary	730
Lesson 3: Implementing Disaster Protection	731
Configuring an Uninterruptible Power Supply	731
Configuring Options for the UPS Service	732
Testing a UPS Configuration	732
Implementing Disk Fault Tolerance	733
RAID Implementations	733
Mirrored Volumes	734
RAID-5 Volumes	736
Mirrored Volumes versus RAID-5 Volumes	737
Implementing RAID Systems	738
Lesson Summary	739
Lesson 4: Recovering from a Disaster	741
Repairing the Windows 2000 Installation	741
Safe Mode	742
Recovery Console	743
Emergency Repair Disk	746

Restoring Data	749
Preparing to Restore Data	749
Selecting Backup Sets, Files, and Folders to Restore	750
Specifying Advanced Restore Settings	751
Exercise 2: Restoring Data	752
Recovering a Mirrored or RAID-5 Volume	755
Recovering from a Mirrored Volume Failure	755
Repairing a RAID-5 Volume	757
Lesson Summary	757
Review	758
 Chapter 13 Monitoring and Optimization	761
About This Chapter	761
Before You Begin	762
Lesson 1: Disk Monitoring and Optimization	763
Check Disk	763
Disk Defragmenter Snap-In	764
Defragmenting Disks	764
Using Disk Defragmenter Effectively	766
Data Compression	767
Using Compressed Files and Folders	767
Compressing Files and Folders	767
Selecting an Alternate Display Color for Compressed Files and Folders	769
Copying and Moving Compressed Files and Folders	769
Using NTFS Compression	770
Disk Quotas	771
Managing Disk Quotas	771
Setting Disk Quotas	772
Determining the Status of Disk Quotas	774
Enforcing Disk Quotas	774
Best Uses of Disk Quotas	775
Exercise 1: Implementing Disk Quotas	776
Lesson Summary	778

Lesson 2: Simple Network Management Protocol Service	779
Overview of SNMP	779
Management Systems and Agents	781
Management Information Base	782
SNMP Messages	783
Defining SNMP Communities	785
Installing and Configuring the SNMP Service	786
SNMP Service Properties	787
Windows 2000 SNMP Agent Properties	787
Trap Properties	788
Security Properties	788
Troubleshooting SNMP	789
Event Viewer	789
WINS Service	789
IPX Addresses	789
SNMP Service Files	790
Lesson Summary	792
Lesson 3: Performance Console	793
Introduction to the Performance Console	793
System Monitor Snap-In	794
System Monitor Interface	795
Monitoring System and Network Performance	798
Disk Objects and the Diskperf Utility	800
Performance Logs and Alerts Snap-In	800
Performance Logs And Alerts Interface	802
Lesson Summary	803
Lesson 4: Network Monitor	805
Overview of Network Monitor	805
Installing Network Monitor Tools	807
Capturing Frame Data	807
Using Capture Filters	808
Displaying Captured Data	810
Using Display Filters	811
Network Monitor Performance Issues	813
Lesson Summary	813

Lesson 5: Task Manager	814
Overview of Task Manager	814
Applications Tab	815
Processes Tab	815
Performance Tab	817
Lesson Summary	818
Review	819
 Chapter 14 Microsoft Windows 2000 Application Servers	821
About This Chapter	821
Before You Begin	822
Lesson 1: Exploring Microsoft Internet Information Services 5.0 Features	823
Introduction to Microsoft IIS 5.0	823
Reliability and Performance	823
Management	826
Security	836
Application Environment	843
Installing IIS 5.0	844
Setting Up a Web Environment	845
Getting Started	845
Using ASP to Manage Web Site Content	850
Exercise 1: Accessing the Administration Web Site	852
Lesson Summary	858
Lesson 2: Administering a Web Environment	859
