

"My book will teach you
step-by-step what you
need to know to
put your business
on the Web."

BEGINNING

E-Commerce

with Visual Basic, ASP,
SQL Server 7.0 and MTS

Matthew Reynolds

Table of Contents

Introduction

Who Should Read this Book	1
How to Get the Most from this Book	2
What's Covered in this Book	2
Conventions Used	4
Customer Support	5
P2P.WROX.COM	5

Chapter 1: From Business to E-Business

E-Commerce is Not a Fad	7
E-Commerce vs. E-Business	8
B2B vs. B2C	9
The Aim of this Book	11
Jo's Coffee	12
Business Models	12
Equipment Retail	14
Consumables Retail	14
Community Building	14
Creating the Brand	15
The Importance of Being Different	15
So, Who's Doing It Right?	17
Auctions and E-cards	18
Summary	18

Chapter 2: Starting Our Site

21

Distributed Applications	21
Connecting to the Distributed Application	22
3-Tier Development	23
Scalability	25
WroxCommerce	27
Software Requirements	27
Starting the Jo's Coffee Project	28
Creating the Microsoft Visual InterDev Project	32
A Quick Overview of Visual InterDev	34
Summary	39

Chapter 3: Building the Object Model

41

Object-Oriented Programming	42
Components	44
COM	45
ActiveX	45
Object Models	47
Linking the Theory and Implementation	48
Designing the Model	48
Choosing the Objects	49
The Full Object Model	52
Building a Scalable Application	53
Starting the WroxCommerce Project	54
Adding the Configure Method	56
Connecting to the Database	59
Linking to the ADO Library	60
Providing Data Services	61
Accessing the Database	65
Versioning	65
Compiling the File	69
Permissions	69

Interfaces in the WroxCommerce Project	70
Creating our own Interface	72
Looking at the Results	76
Building the Catalog Object	78
Creating the Object	78
Summary	84

Chapter 4: Presenting Our Online Store **87**

Designing a Layout	88
Plan A – Get a Graphic Designer	88
Plan B – Do Nothing	89
What You Need to Know about Web Site Design	90
Designing the Layout	93
Picking a Theme	93
The Prototype	93
Building the Framework	94
Making Tables	95
Adding GIFs to Our Visual InterDev Project	96
Include Files	96
Home Navigation	106
The Home Page	107
Cascading Style Sheets	107
Creating the Template	115
What to Put on Your Home Page	115
Summary	118

Chapter 5: Structuring the Online Store **121**

Designing the Store	121
Department Structure	122
Adding Departments	123
Building Our Administration Tools	126

Creating the Administration Page	126
Authentication	128
The action Variable	130
Building the Menu	131
Building the Add Department Form	132
Saving the Department	136
Changing the Catalog Object	137
Querying the Database	138
Modifying the ASP Pages	144
Summary	151

Chapter 6: Building the Product Catalog **153**

The Problems with Storing Product Information	153
Building the Schemas	155
Storing Products	161
Adding and Viewing Basic Product Information	166
Adding Products Using the Administration Tool	171
Viewing the Products	175
Adding and Viewing Product Detail	179
The Product Object and Detail Presentation	179
Supporting Dynamic Attributes	189
Setting Attribute Values	198
Summary	203

Chapter 7: The Shopping Basket **205**

Holding State	205
Creating the Tables for a Shopping Basket	206
The vBasketItems View	207
Modifying the Object Model	209
Modifying the Visit Object	209
Creating the Basket Object	212

Adding the Basket to Our ASP Code	219
Presenting the Basket	221
Changing Quantities	224
Making the Basket Accessible	225
Summary	231

Chapter 8: The Checkout 233

Drop Shipping	233
Persuading Your Supplier to Drop Ship	234
The Holy Grail of Drop Shipping	235
Drop Shipping from Multiple Suppliers	236
Storing Customer Details	237
Storing Credit Cards	238
Keeping Track of the Current Customer	239
Shipping Methods	242
Splitting Up the Order	243
Creating the Views	245
Creating the Objects	249
Dealing with Tax	259
Calling the SplitBasket Method	261
Building the Checkout	263
The Checkout Process Flowchart	264
Step 1 – Capture the E-mail Address and Password	265
Step 2 – Capture the New Customer's Name and Password	276
Step 3 – Adding Addresses	281
Step 4 – Choosing Addresses	288
Step 5 – Capturing Credit Card Information	295
Step 6 – Choosing Credit Cards	300
Step 7 – Showing the Order and Presenting Shipping Options	304
Step 8 – Approving the Order	316
Summary	318

The Jo's Coffee Order Processing Pipeline	322
Breaking Down the Pipeline	323
Building the Pipeline	324
MTS	325
Creating the WroxProcessor Component	326
The IConnector Interface	334
Pipeline Support Code	336
Audit Trail	336
Notification Systems	342
Starting the Pipeline	344
Progressing Orders	346
Running Transactions	347
Choosing the Connector	353
More OrderProcessor Support Code	357
Doing the Work	360
Signaling Suppliers	361
Creating an Extranet	366
Viewing Orders	366
Supplier Access	376
Enabling Supplier Confirmation	384
Credit Card Authorization	388
Two Separate Networks	388
An Overview of Credit Card Transactions	390
Charging the Customer	392
Viewing the Audit Trail	404
Handling Failure	406
Finalizing the Order	408
Canceling an Order	411
Summary	412

Chapter 10: Secure Communications	415
Cryptography	416
Breaking Encryption	416
How Public Key Cryptography Works	417
What's all this got to do with E-commerce?	418
The Need for Certificates	419
Obtaining a Certificate	420
Test Certificates	421
Obtaining a Test Certificate	425
Using the New Certificate	429
Obtaining a Full ID	430
Making checkout.asp Secure	431
Using the Basket over the Secure Connection	432
Summary	434

Chapter 11: Searching	437
Building the Search Object to Create a Search	437
Choosing the Fields to Search	439
Putting Keywords into an Array	440
Efficient Text Searches in SQL Server	443
Building the Query	451
Building a Search Tool	456
Presenting the Results	457
Summary	462

Chapter 12: Hosting and Deployment	465
What does Hosting Involve?	466
Jo's Coffee Site	467
Finding a Host	468
Hosting Location	472
Support Services	475

Deploying the Site	477
Creating and Populating the Database	477
Installing the Components	480
Copying the Code	482
Summary	483

Chapter 13: Privacy **485**

Privacy Statements	485
Researching Privacy Statements	486
Threats to Privacy	486
Privacy Guidelines	488
TRUSTe.org	488
The Process	489
The TRUSTe Trustmark	490
The Privacy Wizard	491
Protecting Your Privacy	496
Pressure Groups	496
Infomediaries	497
Summary	497

Chapter 14: Customer Service **499**

Toll-Free Numbers	500
Customer Service E-mails	500
Order Status E-mails	505
Obtaining Customer Feedback	506
Order Tracking	509
Automatic 'Fire-and-Forget' E-mails	517
Scheduling the E-mails	522
Summary	525

Chapter 15: Creating an Online Community 527

Newsletters	527
Implementing a Newsletter	528
What to Put in the Newsletter	530
Discussion Groups	531
Doug Dean's EZsite Forum 3	532
Presenting the Forum	536
More Forum Options	541
Summary	542

Chapter 16: Up-sell, Cross-sell, and Recommendations 545

Making Suggestions	545
The Suggestion Matrix	546
Presenting Sales Suggestions - Before the Checkout	552
Presenting Sales Suggestions - At the Checkout	556
Featured Items	559
Recommendation-Based Selling	567
Examining Customer Habits	568
Personal Recommendations	569
Summary	569

Chapter 17: Integration with Other Systems 571

eXtensible Markup Language - XML	572
Markup Languages	572
How Does It Work?	573
XML Standards	575
Proven Use of XML	575
Publishing Information in XML	576
Creating an ASP Page that Generates XML Documents	579
Extracting Product Information	583
Merchant Aggregation & Comparison Shopping	583
Publishing Your Product Catalog	584

Downloading Orders	592
Updating the Catalog	594
Summary	603

Chapter 18: Marketing Your Site **605**

Tracking Success	605
Logging Click-Throughs	606
Redirecting	607
Handling Many Different Referrers	610
Examining the Results	611
Traditional Marketing Media	614
Search Engines	614
The Sites	614
Preparing Your Site	616
Submission Services	616
Banner Advertising	617
Free Banner Exchanges	617
Major Banner Agencies	619
Associates Programs	620
ClickTrade	620
Building an Associates Program	620
Tagging the Browser	621
Tallying Associate Commissions	622
Paying Associates	625
Other Marketing Opportunities	626
Direct E-mail	626
Merchant Aggregators and Comparison Shopping	627
Directories and Catalogs	627
Summary	627

Appendix A: DataCash Component Reference 629

Appendix B: Doug Dean's EZsite Forum 3 Component Reference 639

Creating the Database	639
Installing the Graphics	640
Using the Forum Object	640
Using the Forum Manager	649

Appendix C: ASP Quick Reference 651

The Anatomy of the HTTP Protocol	651
Introducing Active Server Pages	656
The Active Server Pages Object Model	660
Using Active Server Pages Effectively	678
Summary	685

Appendix D: ASP Object Model 687

The Request Object	687
The Response Object	688
The Application Object	689
The Session Object	690
The Server Object	690
TheObjectContext Object	691

Appendix E: Microsoft ActiveX Data Objects 2.1 Library Reference 693

Objects and Collections	693
Command Object	694

Connection Object	695
Error Object	697
Errors Collection	697
Field Object	698
Fields Collection	699
Parameter Object	699
Parameters Collection	700
Properties	700
Property Object	701
Recordset Object	701
Method Calls Quick Reference	705

Appendix F: MTS Object Reference **709**

Global Methods	709
Objects	709

Appendix G: VBScript Language Reference **713**

Array Handling	713
Assignments	714
Constants	714
Control Flow	718
Functions	720
Variable Declarations	725
Error Handling	726
Input/Output	726
Procedures	729
Other Keywords	729
Visual Basic Run-time Error Codes	730

Glossary **737**
