Performance Tuning and Network Administration

Study Guide

Exams
1Z0-024 & 1Z0-026

Joseph C. Johnson
Matthew Weishan

The #1 Best-Sellers. Over 4 Million
Sybex Study Guides in Print

Prepare for the Exam with
Leading-Edge Software:

- Custom Testing Engine with Hundreds of Sample Questions
- Bonus Practice Exams
- Electronic Flashcards for PCs and Palm Devices
- The Entire Book in Digital Format
- Evaluation Version of Oracle8i Enterprise Edition

Contents

<i>Introduction</i>		<i>xxv</i>
Assessment Test		xxvii
Part 1	OCP: Oracle8i Performance Tuning	1
Chapter 1	Introduction to Performance Tuning	1
	The Oracle Tuning Methodology	2
	Application Tuning	3
	Database Tuning	4
	Goal-Oriented Tuning	4
	Establishing a Benchmark	5
	Setting Performance Goals	6
	General Tuning Concepts	7
	Understanding Tradeoffs	7
	Two Tuning Rules of Thumb	8
	Review of the Oracle Architecture	9
	Logical versus Physical Structures	9
	Summary	12
	Key Terms	13
	Review Questions	14
	Answers to Review Questions	20
Chapter 2	Sources of Tuning Information	23
	The Alert Log	24
	Alert Log Tuning Information	27
	Managing the Alert Log	28
	Background, Event, and User Trace Files	29
	Background Trace Files	29
	Event Tracing	30
	User Trace Files	30
	Managing Trace Files	34
	Performance Tuning Views	35

V\$ Views Commonly Used in Performance Tuning	35
DBA Views Commonly Used in Performance Tuning	37
Sample Queries on Views	38
Oracle-Supplied Tuning Scripts	39
UTLBSTAT.SQL and UTLESTAT.SQL	39
Interpreting the Contents of REPORT.TXT	42
Graphical Performance Tuning Tools	43
Oracle Enterprise Manager/DBA Management Pack	43
Oracle Diagnostics Pack	46
Oracle Tuning Pack	50
Summary	51
Key Terms	52
Review Questions	53
Answers to Review Questions	58

Chapter 3	SQL Statement Tuning and Application Design	61
Measuring SQL Performance		62
The <i>TKPROF</i> Utility		63
The Explain Plan Facility		70
The <i>AUTOTRACE</i> Utility		75
Understanding the Oracle Optimizer		78
Rule-Based Optimization		78
Cost-Based Optimization		79
Setting the Optimizer Mode		91
Optimizer Mode: Instance Level		91
Optimizer Mode: Session Level		92
Optimizer Mode: Statement Level		92
Optimizer Precedence Rules		94
Improving Application Performance		94
Improving Execution Paths		95
Minimizing I/O Using Indexes and Clusters		106
OLTP vs. DSS Tuning Requirements		122
Transactional Tuning Considerations		122
Decision Support Tuning Considerations		122

Hybrid Systems: OLTP and DSS	123
Summary	123
Key Terms	124
Review Questions	125
Answers to Review Questions	130

Chapter 4 Tuning the Shared Pool 133

Understanding the Shared Pool	135
The Benefits of Statement Caching	135
Components of the Shared Pool	136
Measuring the Performance of the Shared Pool	139
Library Cache	140
Data Dictionary Cache	143
Monitoring Shared Pool Using OEM	145
Improving Shared Pool Performance	146
Make It Bigger	146
Make Room for Large PL/SQL Statements	147
Keep Important PL/SQL Code in Memory	148
Encourage Code Reuse	150
Create a Large Pool	151
Summary	153
Key Terms	154
Review Questions	155
Answers to Review Questions	160

Chapter 5 Tuning the Database Buffer Cache 163

Understanding the Database Buffer Cache	164
The LRU List	165
The Dirty List	167
User Server Process	167
Database Writer	168
Measuring the Performance of the Database Buffer Cache	170
Using V\$SYSTAT	170

Using <i>V\$SESS_IO</i> and <i>V\$SESSION</i>	171
Using <i>REPORT.TXT</i> Output	172
Monitoring Buffer Cache Using OEM	173
Non-Hit Ratio Performance Measures	173
Improving Buffer Cache Performance	174
Make It Bigger	175
Use Multiple Buffer Pools	176
Cache Tables in Memory	184
Bypass Buffer Cache	186
Use Indexes Appropriately	186
Summary	187
Key Terms	187
Review Questions	188
Answers to Review Questions	194

Chapter 6	Tuning the Redo Log Buffer	197
	Understanding the Redo Log Buffer	198
	Measuring the Performance of the Redo Log Buffer	201
	Using <i>V\$SYSSTAT</i>	201
	Using <i>V\$SESSION_WAIT</i>	202
	Using <i>REPORT.TXT</i> Output	204
	Monitoring Redo Log Buffer Using OEM	205
	Using <i>V\$SYSTEM_EVENT</i>	205
	Using the Alert Log	206
	Improving Redo Log Buffer Performance	207
	Make It Bigger	207
	Improve Efficiency of Checkpoints	208
	Speed Up Archiving	208
	Reduce Redo Generation	209
	Summary	211
	Key Terms	211
	Review Questions	212
	Answers to Review Questions	218

Chapter 7	Tuning Physical I/O	221
	Tuning Datafile I/O Performance	223
	Measuring Datafile I/O	224
	Improving Datafile I/O	228
	Tuning DBW0 Performance	235
	Measuring DBW0 I/O	235
	Improving DBW0 I/O	239
	Tuning Segment Block I/O	241
	Understanding Block I/O	241
	Improving Segment Block I/O	245
	Tuning Redo Log and LGWR I/O	251
	Measuring Redo Log and LGWR I/O	252
	Improving Redo Log and LGWR I/O	252
	Tuning Checkpoints and CKPT I/O	252
	Measuring Checkpoint and CKPT I/O	252
	Improving Checkpoint and CKPT I/O	253
	Tuning Archiving and ARC0 I/O	253
	Measuring Archiving and ARC0 I/O	254
	Improving Archiving and ARC0 I/O	256
	Tuning Sort I/O	259
	Understanding Sort Activity	259
	Measuring Sort I/O	261
	Improving Sort I/O	263
	Tuning Rollback Segment I/O	267
	Measuring Rollback Segment I/O	269
	Improving Rollback Segment I/O	276
	Summary	283
	Key Terms	284
	Review Questions	285
	Answers to Review Questions	290

Chapter 8	Tuning Contention	293
	Latch Contention	294
	The Cache Buffers LRU Chain Latch	296
	Tuning Latch Contention	297
	Free List Contention	298

Detecting Free List Contention	298
Tuning Free List Contention	300
Lock Contention	301
Lock Types and Modes	303
Monitoring Lock Contention	305
Resolving Lock Contention	308
Tuning Lock Contention	313
Summary	314
Key Terms	315
Review Questions	316
Answers to Review Questions	321

Chapter 9	Resource Management	323
	Resource Manager Overview	325
	Configuring Resource Management	327
	Granting Resource Manager Privileges	328
	Creating the Resource Manager Objects	329
	Assigning Resources to Users	333
	Setting Instance Resource Objectives	335
	Monitoring Resource Manager	336
	Resource Manager V\$ Views	336
	Resource Manager DBA Views	339
	Summary	344
	Key Terms	344
	Review Questions	345
	Answers to Review Questions	350

Chapter 10	Oracle Expert	353
	Starting Oracle Expert	355
	Using a Management Server	355
	Using an Expert Repository	356
	Oracle Expert Scope	359
	Specifying the Tuning Scope	359

Specifying Business Characteristics	361
Collecting Tuning Statistics	363
Database	364
Instance	365
Schema	366
Environment	367
Workload	368
Viewing Statistics and Editing Rules	370
Attributes	371
Rules	372
Reviewing Recommendations and Generating Scripts	374
Implementing Recommendations	379
Summary	382
Key Terms	382
Review Questions	383
Answers to Review Questions	388

OCP: Oracle8i Network Administration 391

Introduction to Network Administration	391
Network Design Considerations	393
Network Complexity Issues	393
Network Security Issues	394
Interfacing Existing Systems with New Systems	394
Network Responsibilities for the DBA	395
Network Configurations	395
Single-Tier Architecture	396
Two-Tier Architecture	396
N-Tier Architecture	397
Overview of Net8 Features	398
Multi-Protocol Support	399
Multiple Operating Systems	399
Java Connectivity	399
Open API	400
Optional Configuration Features	400
Advanced Security Option	401
Oracle Gateway Products	402

The Net8 Assistant	403
Troubleshooting Utilities	404
Summary	404
Key Terms	405
Review Questions	406
Answers to Review Questions	411

Chapter 12 Oracle8i Net8 Architecture 413

Establishing Connections to Oracle Servers	414
Entering Connection Information	415
Attempting to Resolve the Location of the Oracle Server	416
Establishing Contact with the Oracle Server	426
Connection Request Failures	431
Terminating Sessions	433
The Net8 Stack Architecture	436
The OSI Model	436
The Oracle Communications Stack	437
Changes to Net8 for Internet Communications	440
Summary	441
Key Terms	442
Review Questions	443
Answers to Review Questions	448

Chapter 13 Configuring Oracle8i Net8 on the Server 451

The Oracle Listener	452
How Do Listeners Respond to Connection Requests?	453
Starting and Using the Net8 Assistant	455
Configuring the Listener Using the Net8 Assistant	457
Managing the Listener Using lsnrctl	469
Starting the Listener	470
Reloading the Listener	471
Showing the Status of the Listener	472
Listing the Services for the Listener	473

	Other Commands in lsnrctl	474
	SET Commands in lsnrctl	475
	Stopping the Listener	476
	New Feature: Automatic Registration of Services	477
	Summary	478
	Key Terms	479
	Review Questions	480
	Answers to Review Questions	486
Chapter 14	Configuring Oracle8i Net8 for the Client	489
	Client-Side Names Resolution Options	490
	Decide on a Network Service Naming Model	491
	The Hostnaming Method	493
	The Localnaming Method	500
	Configuring Load Balancing and Failover	506
	Configuring Client Load Balancing	507
	Configuring Connection Load Balancing	508
	Configuring Connection Failover	509
	Summary	510
	Key Terms	511
	Review Questions	512
	Answers to Review Questions	517
Chapter 15	Centralizing Services with Oracle Names Server	521
	The Oracle Names Server	522
	Advantages of a Names Server	523
	How Names Servers Resolve Service Names	523
	Configuring a Names Server with Net8 Assistant	524
	Configuring a Names Server Using Checkpoint Files	525
	Configuring a Names Server Using a Region Database	534
	Creating the <i>names.ora</i> File	535
	Starting and Stopping the Names Server Using Net8 Assistant	536
	Registering Service Names Using Net8 Assistant	536
	Checkpoint Files that Store Service Information	538

Discovering Other Names Servers in a Region	540
Cache Replication between Names Servers in a Region	541
The <i>namesctl</i> utility	542
Starting and Stopping Names Servers	542
Register Service Names from <i>namesctl</i>	544
Other Commands in <i>namesctl</i>	545
Set and Show Commands in <i>namesctl</i>	546
Configure Clients to Use Names Servers	548
Defining Preferred Names Servers on the Client	548
Discover Names Servers from the Client	550
Define the Names Resolution Search Hierarchy	550
Client-Side Cache Option	551
Other Client-Side Parameters for Oracle Names	552
Auto-Registration of Services with a Names-Server	553
Configure Autoregistration Using Net8 Assistant	553
Verifying Listener Autoregistration to Names Servers	554
Summary	556
Key Terms	557
Review Questions	558
Answers to Review Questions	564

Chapter 16	Configuring the Multithreaded Server Option	567
Multithreaded Server Configuration		568
Dedicated Server versus Multithreaded Server		569
Advantages of Multithreaded Server		571
Applications Suited to Multithreaded Server		571
Drawbacks of Multithreaded Server		571
Scalability versus Performance		572
Oracle Server Changes in a Multithreaded Environment		572
The Role of the Listener in a Multithreaded Environment		573
Configuring the Multithreaded Server Option		575
MTS_DISPATCHERS Parameter		575
Determining the Number of Dispatchers to Start		576

Allocating Additional Dispatchers	577
MTS_MAX_DISPATCHERS Parameter	577
MTS_SERVERS Parameter	578
Allocating Additional Shared Servers	578
MTS_MAX_SERVERS Parameter	578
Starting the Instance and Managing Multithreaded Server	578
Registering Dispatcher Information with the Listener	579
Displaying Information about Multithreaded Connections	
Using lsnrctl	579
Data Dictionary Views for Multithreaded Server	580
Requesting a Dedicated Connection in a Multithreaded Environment	583
Configuring Dedicated Connections	
When Hostnaming is Used	584
Configuring Dedicated Connections	
When a Name Server is Used	585
Connection Pooling	585
Configure Connection Pooling	587
Tuning the Multithreaded Server Option	588
Configure the Large Pool	588
Sizing the Large Pool	589
Determine Whether You Have Enough Dispatchers	590
Determine How Long Users Are Waiting for Dispatchers	590
Determine Whether You Have Enough Shared Servers	591
Summary	665
Key Terms	593
Review Questions	594
Answers to Review Questions	600

Chapter 17	Connection Manager Configuration	605
	Connection Manager Features	606
	Connection Concentration	607
	Multi-Protocol Interchange	608
	Connection Access Control	608
	Connection Manager Processes	609
	CMGW process	609
	CMADMIN Process	610
	The <i>cman.ora</i> file	610
	<i>cman</i> Section	610

<i>cman_profile</i> Section	611
<i>cman_rules</i> Section	613
Managing Connection Manager	615
Configuring Connection Concentration	618
Connection Concentration with Localnaming	618
Using Connection Concentration with Names Server	620
Enabling Connection Pooling with Connection Concentration	621
Configure Multi-Protocol Interchange	621
Summary	622
Key Terms	623
Review Questions	624
Answers to Review Questions	630

Chapter 18	Advanced Security Option	633
	Security Concerns in the Enterprise	635
	Data Integrity	635
	Data Privacy	636
	Client Authentication	637
	Client Authorization	638
	Data Security Features	638
	Encryption: Protection of Data Privacy	639
	Checksumming: Protection of Data Quality	639
	Authentication Methods	642
	Token Cards	643
	Biometric Option	644
	KERBEROS and CyberSAFE Support	644
	RADIUS Support	644
	Secured Sockets Support	645
	Distributed Computing Environment (DCE)	645
	Authentication Configuration Parameters	646
	Summary	647
	Key Terms	648
	Review Questions	649
	Answers to Review Questions	654

Chapter 19	Troubleshooting Oracle8i Net8	657
	Diagnosing and Correcting Connection Problems	658
	Server-Side Checks	659
	Middle-Tier Checks	664
	Names Server Checks	665
	Client-Side Checks	668
	Other Network Areas to Check	671
	Net8 Logging and Tracing	672
	Server Logging	673
	Server Tracing	675
	Names Server Logging	678
	Names Server Tracing	681
	Connection Manager Logging	682
	Connection Manager Tracing	683
	Client Logging	683
	Client Tracing	685
	The Oracle Trace Assistant Utility	687
	Summary	689
	Key Terms	690
	Review Questions	691
	Answers to Review Questions	697
Appendix A	Practice Exam	701
	Practice Exam Questions	701
	Answers to Practice Exam	715
Appendix B	Practice Exam	721
	Practice Exam Questions	721
	Answers to Practice Exam	735
Glossary		741
<i>Index</i>		751
