

*Using XML, XSLT, and interMedia
with Java, PL/SQL, and XSQL Pages*

Includes Oracle
JDeveloper 3.1 for Microsoft
Windows NT/2000 on CD-ROM

Building

Oracle XML Applications

Table of Contents

Preface	ix
I. XML Basics	1
1. Introduction to XML	3
What Is XML?	3
What Can I Do with XML?	8
Why Should I Use XML?	17
What XML Technologies Does Oracle Provide?	22
2. Working with XML	28
Creating and Validating XML	28
Modularizing XML	40
Searching XML with XPath	49
II. Oracle XML Fundamentals	59
3. Combining XML and Oracle	61
Hosting the XML FAQ System on Oracle	61
Serving XML in Any Format	66
Acquiring Web-based XML Content	74
4. Using JDeveloper for XML Development	77
Working with XML, XSQL, and JSP Files	78
Working with Database Objects	89
Using JDeveloper with Oracle XDK Components	94

5. <i>Processing XML with PL/SQL</i>	103
Loading External XML Files	104
Parsing XML	108
Searching XML Documents with XPath	128
Working with XML Messages	151
Producing and Transforming XML Query Results	164
6. <i>Processing XML with Java</i>	174
Introduction to Oracle8i JServer	175
Parsing and Programmatically Constructing XML	189
Searching XML Documents with XPath	234
Working with XML Messages	242
Producing and Transforming XML Query Results	262
7. <i>Transforming XML with XSLT</i>	275
XSLT Processing Mechanics	275
Single-Template Stylesheets	280
Understanding Input and Output Options	284
Improving Flexibility with Multiple Templates	288
8. <i>Publishing Data with XSQL Pages</i>	310
Introduction to XSQL Pages	310
Transforming XSQL Page Results with XSLT	335
Troubleshooting Your XSQL Pages	345
9. <i>XSLT Beyond the Basics</i>	351
Using XSLT Variables	351
The Talented Identity Transformation	358
Grouping Repeating Data Using SQL	368
Sorting and Grouping Repeating Data with XSLT	375
10. <i>Generating Datagrams with PL/SQL</i>	388
Programmatically Generating XML Using PL/SQL	388
Automatic XML Generation with DBXML	398
11. <i>Generating Datagrams with Java</i>	407
Generating XML Using Java	407
Serving XML Datagrams over the Web	415
Automatic XML from SQL Queries	424

12. Storing XML Datagrams	433
Overview of XML Storage Approaches	434
Loading Datagrams with the XML SQL Utility	436
Storing Posted XML Using XSQL Servlet	481
Inserting Datagrams Using Java	494
13. Searching XML with interMedia	500
Why Use interMedia?	500
What Is interMedia?	502
The interMedia Query Language	508
Handling Heterogeneous Doctypes	518
Handling Doctype Evolution	522
Advanced interMedia	523
14. Advanced XML Loading Techniques	525
Storing Datagrams in Multiple Tables	525
Building an XMLLoader Utility	534
Creating Insert Transformations Automatically	539
III. Oracle XML Applications	547
15. Using XSQL Pages as a Publishing Framework	549
Overview of XSQL Pages Facilities	549
Additional XML Delivery Options	575
16. Extending XSQL and XSLT with Java	585
Developing Custom XSQL Actions	585
Integrating Custom XML Sources	603
Working with XSLT Extension Functions	607
17. XSLT-Powered Portals and Applications	625
XSLT-Powered Web Store	625
Building a Personalized News Portal	643
Online Discussion Forum	686
