Help With Oracle Networking

Covers LDAP

Oracle Net8

Configuration and Troubleshooting

O'REILLY®

Hugo Toledo & Jonathan Gennick

Table of Contents

Preface ..... *xi*

I. How Net8 Works *1*

1. Oracle's Network Architecture and Products *3*
Goals of Net8 ..... *4*
Net8 Components *6*
Stack Communications *11*
Management Utilities *14*

2. Name Resolution *20*
Local Naming *21*
Directory Naming *22*
Centralized Naming *23*
Host Naming *26*
External Name Resolution *27*
Choosing the Method to Use *28*

II. Net8 Configuration *31*

3. Client Configuration *33*
The Overall Process *33*
Installing the Net8 Client Software *34*
Configuring Your Profile *40*
Defining Net Service Names *48*
Using LDAP *59*

Using Oracle Names 61
Using External Naming Methods 65
Testing Client Connectivity 66

4. Basic Server Configuration 67
The Overall Process 67
Software to Install 68
Configuring a Listener 70
The Listener Control Utility 88
Securing a Listener 95
Modifying and Deleting a Listener 98
Detecting Dead Connections 104

5. Multi-Threaded Server 106
Understanding MTS 106
Planning for MTS 112
Database Initialization File Changes 116
Forcing a Dedicated Server Connection 123
Viewing MTS Status 124
Online MTS Modifications 131

6. Net8 and LDAP 136
What Is LDAP? 136
Client Configuration for LDAP 140
Defining Net Service Names in an LDAP Directory 144

7. Oracle Names 156
Configuring a Names Server 157
Managing a Names Server 168
Discovery and Client Configuration 182
Domains and Regions 185

8. Net8 Failover and Load Balancing 191
Failover 191
Load Balancing 206

9. Connection Manager *212*
Connection Manager Benefits *212*
Connection Manager Architecture *217*
Configuring Connection Manager *218*
Configuring a Client *228*
Managing Connection Manager *232*

III. Net8 Troubleshooting *243*

10. Net8 Troubleshooting Techniques *245*
Testing Connectivity to the Server *245*
Looking at Net8 Log Files *256*
Generating Net8 Trace Files *264*

11. Solutions to Common Problems *271*
Net8 General Problems *271*
Connection Manager Problems *279*
Multi-Threaded Server Problems *281*
Oracle Names Problems *282*

IV. Appendixes *285*

A. The sqlnet.ora File *287*

B. The tnsnames.ora File *308*

C. The listener.ora File *321*

D. The names.ora File *334*

E. Environment and Registry Variables *345*

F. MTS Initialization Parameters *351*

G. MTS Performance Views *358*

Index *367*
