ASP XML

Mark Baartse, Richard Blair, Luca Bolognese, Dinar Dalvi,
Steven Hahn, Corey Haines, Alex Homer, Bill Kropog, Brian Loesgen,
Stephen Mohr, John Slater, Kevin Williams, Mario Zucca

Table of Contents

Introduction	1
What Does this Book Cover?	1
Who Is this Book For?	2
How Is this Book Structured?	2
Section 1: Introduction to XML	2
Section 2: Working with XML and ASP	3
Section 3: Case Studies	4
Section 4: Reference Appendices	5
What You Need to Use this Book	5
Conventions	6
Tell Us What You Think	7
Chapter 1: Introduction to eXtensible Markup Language	9
ASP & XML?	10
A Word on Markup Languages	10
Our old friend markup	10
How Markup Works	11
Languages and Metalanguages	12
HTML's Place in the Universe	12
In Walks XML	13
More than A Little Something for the Web	13
The Self-Describing Document	15
A Well-formed Document	15
A Valid Document	16
Getting Started with XML	16
You Only Need a Text Editor	16
The Document Element	17
The XML Processor	17

Internet Explorer 5.0 and XML	17
Parents, Children, Grand Children, and so on...	18
Anatomy of an Error	19
Incorporating Multiple Records	20

Summary	22
----------------	-----------

Chapter 2: Understanding XML Structure and Syntax	25
--	-----------

XML Structure	26
----------------------	-----------

Logical Structure	26
The Prolog	26
The Document Element	28
XML Syntax	29
Tags	29
Naming Conventions	29
Open, Close, and Empty	30
Elements	30
Child Elements	30
Nesting	30
Improper Nesting	31
Comments	31
Attribute	32
Special Attributes	33
CDATA	33
Processing Instructions	34
Entities	34
Character References	34
Entity References	35
Well-Formed Documents	35

Summary	35
----------------	-----------

Chapter 3: Validating XML with the DTD	37
---	-----------

Introducing the DTD	38
----------------------------	-----------

Defining a DTD	39
-----------------------	-----------

The Basic Structure	40
A Simple DTD	40
The Element Declarations	41
The ANY Rule	41
The EMPTY Rule	42

The Mixed Declaration	42
The Multiple Declaration	42
The #PCDATA Rule	43
Grouping, Occurrence and Element Symbols	43
The Attribute Declarations	44
Attribute Types	44
Defaults	45
The ENTITY Declarations	46
General or Internal Entities	46
External Entities	47
Parameter Entities	47
Other DTD Keywords	48
IGNORE and INCLUDE	48
Comments	49
Combining Internal and External DTDs	49
Client-Side Validation	50
Server-Side Validation	50
Summary	52

Chapter 4: Validating XML using Schemas	55
--	-----------

The Components of a Schema	56
Using Namespaces	58
Using Multiple Schemas	59
Complex Type Definitions	60
Using Existing Type Definitions	60
Simple Types	61
Facets	63
The Pattern Facet	64
The Enumeration Facet	64
Attributes	65
The Content Attribute	66
Groups	67
Derivation	68
Annotations	69
DTD vs. Schemas	70
Summary	70

Uses of the DOM	74
Multi-Use Content Publishing	74
Platform Neutral Data Exchange	75
Business Components	75
Getting the Right Parser	76
Internet Explorer	76
MSXML Redistributable	76
Included with Windows	77
MSXML 2.6: A Preview	77
MSXML and the W3C XML DOM	77
W3C Interfaces	78
Survey of MSXML Interfaces	79
Documents	80
Nodes	85
Node Lists	88
Named Node Maps	88
Error Handling	89
Additions and Changes in the Technology Preview	90
On-Demand Validation	91
Schema and Stylesheet Caching	91
XSLT/XPath Support	91
Tasks	92
Parser Creation	92
Document Loading and Validation	93
Tree Traversal	94
NodeLists	94
Getting at an Element's Text	95
Siblings	97
Path-Based Selection	97
ID and IDREF Relationships	100
Content Creation	101
Setting the MIME Type	102
New Documents	103
Elements	103
Subtree Cloning	105
Attributes	105
Other Constructs	106
Returning the Document	107
Summary	108

How do ASP and XML Fit Together?	112
Using the DOM	112
Server-Side Includes	113
FileSystemObject	114
Examples of Processing XML using ASP Code	115
Sending Data Directly to the Browser	115
Saving Data as HTML	116
Styling XML Data	117
Using XML to Store Web Links and Property Settings	118
Using ASP to Manipulate XML Documents	122
Defining the Functions	122
Testing the Functions	125
The "XML Brain"	125
Editing the Settings File (or Brain...)	126
The Colorpicker Example	129
Summary	130

XML versus HTML	134
Introducing Cascading Stylesheets	134
Some CSS Basics	135
CSS and HTML	135
Selectors	135
Boxes and the display Property	138
padding, margin and border	138
Units, Em and You	140
Inheritance and Cascading	141
Inheritance	141
Cascading	142
CSS and XML	144
Associating CSS with XML Documents	145
Linking to External Stylesheets	145
Embedded Stylesheets	145
Media-specific Styles	147
Linked Stylesheets	148
Mixed Media Styles	148

Putting It all Together	150
A More Advanced Example	152
Underwater what?	152
Behaviors	156
The Toggle Behavior	157
CSS and XSL: A Comparison	159
With HTML	160
With XML	160
Transformation Language	160
Client or Server	161
The Benefits of CSS	162
CSS and XSL Working Together	163
Mozilla & Netscape 6	164
Mozilla, Gecko, Seamonkey, What's It All About?	164
Standards Compliance	165
XUL and Chrome	166
Why Bother with XUL at All?	166
An Introduction to XUL	166
Directory and File Structure	166
Custom Search	167
DTDs and Localisation	170
Other Uses for XML and CSS	170
A Quick Look at SVG	171
Summary	172
 Chapter 8: XSL – Extensible Stylesheet Language	 175
Using XSL Stylesheets	176
How XSL Works	176
Connecting XML to XSL	179
Programmatic XSL Transformations	179
XSL Stylesheets	181
Templates	184
Finding Data with Patterns	185
XSL Information Methods	187
XSL Operators	187

Taking Action: Template Bodies	188
xsl:for-each	189
xsl:choose, xsl:when, xsl:otherwise	190
xsl:apply-templates	191
xsl:if and xsl:attribute	191
xsl:value-of	191
The Complete Stylesheet	192
XSL Methods	193
XSL Querles	196
Based on Elements	196
Based on Attributes	197
Sorting Data	198
Summary	199
Chapter 9: Advanced XSL Techniques	201
Enhancing ASP with XSL	202
Transforming XML using XSL and ASP	203
XSL Templates Revisited	203
XSL Transforms XML	205
Using the FileSystemObject Again	206
Logical XSL	208
Incorporating Scripting and Logic into XSL	209
Requirements for the Collapsing Navigation Tree	210
Start with HTML	211
Structure of the ASP	212
Client-Side Script for DHMTL Effects	213
XML Source	216
XSL Stylesheet	217
The Finished Product	222
Transforming other XML	222
Summary	223
Chapter 10: Case Study: Data-Driven XSL	227
Introduction	227
Meet the Puzzle Pieces	228
The Data	228

Generating the XSL	230
The Test Page	234
Summary	236
Chapter 11: Integrating ADO and XML	239
Deciding on ADO, XML, or Both	240
ADO and ASP	241
ADO Objects	242
ADO Data in XML	243
Obtaining XML from ADO	243
The ADO XML-Data Schema	245
Persistence	248
ADO Persistence	249
Persisting to a File	250
Persisting to Streams	251
Persisting from the Request Object	252
ADO with Style	254
Server Side Style	255
Summary	256
Chapter 12: Client-side Data Binding with XML	259
What Is Data Binding?	259
Data-Management Techniques on the Web	260
Data-Binding Technology in Internet Explorer 4 and 5	260
The Microsoft Remote Data Service (RDS)	261
Data Source Objects for XML	262
Source Data Updates with XML	264
Displaying XML with Data Binding	264
Binding Elements to the Cached Data	265
The HTML Elements Used in Data Binding	265
Types of Data Binding	267
Tabular Data Binding	267
Single Record Data Binding	272
Data Binding Events	273
Accessing Data in a DSO with Script	275
XML Data Binding in IE5 with Attributes	275
Summary	277

Chapter 13: Working with XML Data Binding **279**

Creating XML Documents Dynamically	279
Creating XML Documents from a Data Store	279
Creating XML with ASP Script	280
Creating XML with a Custom Component	283
Creating XML with the ADO Persistence Methods	283
Creating XML with the SQLXML Technology Preview	288
Updating the Source XML Document	290
Updating with ASP script and the MSXML Component	290
Updating with a Custom Component	292
Managing Concurrent Updates	295
Updating with the ADO Persistence Methods	296
Posting XML Documents to a Stream	297
Updating with the SQLXML Technology Preview	297
Summary	299

Chapter 14: Creating XML Procedure Libraries **301**

The Contents of Our Procedure Library	302
A Test Page for the Library Procedures	302
The Structure of the Test Page	302
About the Procedure Library Include File	303
Reading and Writing Text Files	303
Reporting Status and Logging Errors	304
Procedures for Working with XML Documents	304
The Procedure Library File in Outline	305
Include File Issues in ASP Pages	309
ASP Compiled Code Caching	309
Using a Central Library Repository	309
The Procedure Functions in Detail	310
The CreateScriptingObject Function	310
The WriteToLogFile Subroutine	311
The GetAbsolutePath Function	311
The WriteToFile Function	315
The ReadFromFile Function	318
The BuildXMLProlog Function	321
The LoadAndParseXML Function	323
The GetNodesFromXML Function	326
The TransformXML Function	330
The Error Log File	334
Summary	335

Schema Repositories	337
The Problem with "Roll Your Own" Tags	338
What are Schema Repositories?	338
Why Do We Need Them?	338
Benefits of Schema Repositories	339
Business Resistance to Schema Repositories	339
Currently Existing Schema Repositories	339
BizTalk	340
OASIS / XML.ORG	340
Do You Have to Choose?	341
The BizTalk.org Schema Repository	341
Schema Registration	341
The BizTalk Framework	342
Anatomy of a BizTalk Document	342
A Sample BizTalk Message	343
Delivery Section	344
Manifest Section	346
Body Section	347
Extending the BizTalk Framework	347
BizTalk Framework Summary	348
Transmitting XML over the Wire	348
Client Origination	348
Summary of XMLHttpRequest	352
What is SOAP?	352
Conversation and Message Types	353
The Envelope Please	353
The SOAP Header	355
Who's Fault?	355
Serving It Up	356
Security	356
Encoding Data	357
Sample Application	357
Layout of the Client-Side Page	358
Drilling Into Code	359
Talking About Problems – SOAP Style	365
Transparent Proxies	365
Summary of SOAP Example	365
Learning More	365
Summary	366

What are we doing here, anyway?	389
Who is this Case Study for?	370
Which technology will we use?	370
Glossary of Terms	370
Design Considerations	371
Requirements and Parameters	371
Site Overview	372
Sections	372
Survey Creation	372
Entity Definition	372
Survey	372
What is a Question?	374
Free-Form Questions	377
Attributes for Free-Form Questions	378
Multiple-Choice Questions	381
Attributes for Multiple-Choice Questions	386
Let's Start Coding!	391
Technologies	391
Directory structure	391
Support Files	391
Survey Creation Tool (createsurvey.asp)	394
Let's Create a Survey!	411
Taking a Survey (takesurvey.asp)	413
Showing a Survey	417
Reporting (showreport.asp)	426
XML Schema for Responses	426
XSL Transformation for a Basic Report	432
Database Schema for Storing Report Definitions	434
Where to now?	443
Survey Creation	443
Survey Delivery	444
Reporting	444
And Finally...	445

Architectural Overview	448
The Left / Middle Systems – Overview	448
The Right System – Overview	449
The Systems	450
The isComponentMgr System	450
The XML Data File	452
The Right System	453
The ASP Files	453
The Home Page	454
The Admin Page	456
The Reports Page	476
The Reports	480
Summary	490

Shopping Cart Design	494
Data Persistence	494
Our Shopping Cart Application	495
The Technology Set-Up	495
Other Technical Requirements	496
Setting up the Cart Environment	496
The Product & Customer DataBase – ShopCart	497
Database Definition	497
Creating a New Cart and Adding Items to a Cart	500
Displaying the Cart's Contents	501
Deleting Items and Updating Shopping Cart Contents	501
Emptying the Cart	502
The ASP Code	502
The Store Front	503
Inside the Shopping Cart	508
Cart Contents Screen	511
Checkout Screen	518
Summary	521

Summary 647

Abstract	649
Status of this document	650
Extensible Markup Language (XML) 1.0	650
Table of Contents	650
Appendices	651
1. Introduction	651
1.1 Origin and Goals	652
1.2 Terminology	652
2. Documents	653
2.1 Well-Formed XML Documents	654
2.2 Characters	654
2.3 Common Syntactic Constructs	655
2.4 Character Data and Markup	656
2.5 Comments	656
2.6 Processing Instructions	657
2.7 CDATA Sections	657
2.8 Prolog and Document Type Declaration	658
2.9 Standalone Document Declaration	660
2.10 White Space Handling	661
2.11 End-of-Line Handling	661
2.12 Language Identification	662
3. Logical Structures	663
3.1 Start-Tags, End-Tags, and Empty-Element Tags	664
3.2 Element Type Declarations	665
3.2.1 Element Content	666
3.2.2 Mixed Content	666
3.3 Attribute-List Declarations	667
3.3.1 Attribute Types	668
3.3.2 Attribute Defaults	669
3.3.3 Attribute-Value Normalization	670
3.4 Conditional Sections	670
4. Physical Structures	671
4.1 Character and Entity References	672
4.2 Entity Declarations	673
4.2.1 Internal Entities	673
4.2.2 External Entities	674

4.3 Parsed Entities	675
4.3.1 The Text Declaration	675
4.3.2 Well-Formed Parsed Entities	675
4.3.3 Character Encoding in Entities	675
4.4 XML Processor Treatment of Entities and References	676
4.4.1 Not Recognized	677
4.4.2 Included	677
4.4.3 Included If Validating	677
4.4.4 Forbidden	678
4.4.5 Included in Literal	678
4.4.6 Notify	678
4.4.7 Bypassed	678
4.4.8 Included as PE	678
4.5 Construction of Internal Entity Replacement Text	678
4.6 Predefined Entities	679
4.7 Notation Declarations	679
4.8 Document Entity	680
5. Conformance	680
5.1 Validating and Non-Validating Processors	680
5.2 Using XML Processors	681
6. Notation	681
Appendices	682
A. References	682
A.1 Normative References	682
A.2 Other References	683
B. Character Classes	683
C. XML and SGML (Non-Normative)	686
D. Expansion of Entity and Character References (Non-Normative)	686
E. Deterministic Content Models (Non-Normative)	688
F. Autodetection of Character Encodings (Non-Normative)	688
G. W3C XML Working Group (Non-Normative)	690

Appendix B: Microsoft XML v3.0 Reference	693
---	------------

Appendix C: IE5 XSL Reference	741
--------------------------------------	------------

The IE5 XSL Elements	741
XSL Stylesheet Structure	743
Creating New Nodes in XSL	744
XSL Stylesheet Runtime Methods	744

The IE5 XSL Pattern-Matching Syntax	747
Node Position and Hierarchy	747
Node Index Position	748
XSL Filters and Filter Patterns	748
Filter Patterns	748
Comparison Operators	750
Logical Filter Operators	751
Filter Set Operators	752
XSL Built-In Methods	753
The Information Methods	753
The Collection Methods	753
Important Note	754

Appendix D: Style Sheet Properties	757
---	------------

Units of Measurement	757
Listing of Properties	758
Font Properties	758
Color and Background Properties	759
Text Properties	761
Size and Border Properties	764
Printing Properties	769
Other Properties	770
IE4/5 Unsupported CSS Properties	770
Navigator 4 Unsupported CSS Properties	770

Appendix E: SAX 1.0: The Simple API for XML	773
--	------------

Class Hierarchy	773
Interface org.xml.sax.AttributeList	774
Interface org.xml.sax.DocumentHandler	776
Interface org.xml.sax.DTDHandler	779
Interface org.xml.sax.EntityResolver	780
Interface org.xml.sax.ErrorHandler	782
Class org.xml.sax.HandlerBase	783
Class org.xml.sax.InputSource	785
Interface org.xml.sax.Locator	788
Interface org.xml.sax.Parser	789
Class org.xml.sax.SAXException	791
Class org.xml.sax.SAXParseException	792

XPath	797
The Context Node	798
Axes	798
Node-Tests	799
Some XPath Examples	799
Absolute and Relative Paths	799
Shorthand Forms	800
Predicates	800
XPath Functions	800
XLink	803
HTML Linking Limitations	803
XLink Design	804
XLink Attributes	804
Types of Links	806
Simple Link	806
Extended Link	807
XPointer	810
Pointers in HTML	810
Using XPointer	810
XPointer Extensions to XPath	811
XPointer Functions	812
Summary	813

Appendix G: IE5 XML Schemas and Data Types

815

XML Schemas	815
IE5 XML Schema Elements	816
The IE5 XML Schema Structure	820
XML Datatypes	821
Primitive XML Data Types	824

Appendix H: XML Preview for SQL Server

827

Installation	827
Virtual Directory Configuration	828
Security	829
Data Source	829
Access Type Settings	830
Advanced	831

URL Queries	831
Template Queries	834
Using Parameters	836
Object Access	837
Update Grams	838
Summary	839

Appendix I: Support and Errata	841
---------------------------------------	------------
