Table of Contents

Introduction	1
Chapter 1: Welcome to GTK+/GNOME	7
<hr/>	
The X Window System	7
Desktop Managers	9
Why GTK+ and GNOME?	11
Getting Ready to Go	13
Tarballs	14
Binary Packages (RPM, DEB)	15
GTK+/GNOME Development	15
The GTK+/GNOME Libraries	16
GLib	16
GDK	17
GTK+	17
ImLib	17
GNOME	18
libGnome	18
libGnomeUI	18
libGnorba	18
libart_igpl	19
Other Libraries	19
Developing an Application	20
A Code Walkthrough	22
Help and Documentation	25
Summary	27
Chapter 2: GLib	29
<hr/>	
Compiling GLib Applications	30
The GLib Data Types	31

Macros	33
Standard Macros	33
Separator macros and constants	33
Math macros	36
Detecting Errors	38
Working with Memory	40
Lists	43
The Framework	44
Creating and Destroying the List	44
Adding Items to the List	45
Moving Through the List	46
Using Comparison Functions	46
Trees	50
Extended Data Types	54
GString	54
Creating and destroying strings	54
Appending and prepending strings	55
Inserting strings into one another	56
Other functions	56
String Utility Functions	56
Duplicating strings	57
Comparing strings	57
Splitting strings up	57
Timers	59
Creating and Destroying a Timer	60
Starting, Stopping, and Resetting the Timer	60
Checking the Timer	60
Spooky Timers	61
Summary	62
Chapter 3: Introducing GTK+	65
The Basics	66
Non-object Based Object-Oriented Programming	68
Initializing GTK+	70
Creating and Showing the Window	70
The <code>gtk_main</code> Loop Function	71
Compiling and Running GTK+ Applications	72

The gtk-config Utility	72
Running the Application	73
Signals	74
Connecting Signals	75
Writing Signal Handlers	76
Events	78
Signals and Events in Action	79
Disconnecting Signals	83
Summary	84
<hr/> Chapter 4: Controlling the User Interface Layout	<hr/> 87
More on Windows	88
Captioning the Window	88
Window Size and Position	88
Adding Controls to Windows	92
Adding a Button to a Window	93
Adding More than One Button to a Window	96
Better Containers	97
Packing Boxes	97
Screen sizes and coordinate systems	103
More with Packing Boxes	107
Tables	110
Summary	114
<hr/> Chapter 5: Widget Wonders	<hr/> 117
A Quick Recap	117
GtkLabel — The Label Widget	120
GtkEntry — Getting Text from the User	123
Exploring GtkEditable	127
GtkToggleButton — On/Off Buttons	129
Check Buttons	132
Radio Buttons	133
Frames	136
Summary	139

Chapter 6: List and Bulk Data Widgets	141
GtkList, the Basic List Widget	141
Adding an Entire List into the Listbox	146
Listboxes, lists and memory	149
Dealing with Selections	151
Visible Items and Scrolling	155
GtkCombo, Combo Boxes	155
GtkCList, the New Listbox	158
Getting Started with the CList	159
Adding Items to the List	161
Removing data from the list	162
Working with individual cells	162
CList Selections	163
Summary	164
Chapter 7: Dialogs	167
Building your Own Dialogs	167
Dialogs and the GtkWindow	168
Modality	169
Removing a window from view	169
Putting it all into practice	170
More about gtk_main	173
GtkDialog, the prebuilt GtkWindow	176
Using the Built In Dialogs	177
GtkFileSelection	178
Creating the dialog	178
Customizing the dialog	179
Ending our time together	179
GtkColorSelectionDialog	181
Summary	183
Chapter 8: Menus	185
Menus	186
Creating Menus Piece by Piece	186
Separators	191

Responding to the Menu	191
Menus as Feedback	192
Radio Menu Items	193
Accelerator Keys	193
Creating Menus with an Item Factory	198
Pop-up Menus	201
Summary	207
<hr/> Chapter 9: Advanced Widgets	<hr/> 209
Filling Out the Window	210
Tool tips	210
Beneath the surface of the GtkTool tips object	213
Status Bars	216
Toolbars	220
Numeric Widgets	221
Progress Bars	222
Spin Buttons	226
Calendars	229
Range Controls	233
Scroll Bars	234
Sliders	236
Scrolling any Widget	238
Summary	243
<hr/> Chapter 10: Graphics, Colors and Fonts	<hr/> 245
Styles	245
Colors	248
Fonts	252
Putting it All Together	257
Making Pictures	262
Pixmap	263
Drawing with Code	266
Summary	270

Chapter 11: Introducing GNOME	273
There's No Place Like GNOME	274
Source Trees	274
Localization of Text	277
Config Files and Command Line Parameters	278
Objects and Libraries	279
Starting Up	280
Initialization	280
Compiling GNOME Applications	281
Command Line Parsing	283
GNOMEAPP	286
Menus and toolbars	288
GNOMEAPPBar	292
Summary	294
Chapter 12: GNOME Dialogs	297
GnomeDialog	297
Dialogs in the Real World	300
Customizing the Behavior of the Dialog	302
Running and Closing Dialogs	305
Making the Dialog Work Properly	306
Easy Dialogs	307
About Boxes	313
MessageBoxes	315
GnomePropertyBox	316
Summary	322
Chapter 13: GNOME Widgets	325
GnomeCalculator	326
GnomeNumberEntry	328
GnomeColorPicker	331
GnomeFontPicker	334
GnomeDateEdit	338

GnomeEntry	340
Working with the History Items	341
GnomeFileEntry	342
GnomeIconEntry	347
GnomeDruid	350
Adding Pages to a Druid	351
GnomeDruidPageStart	351
GnomeDruidPageStandard	353
GnomeDruidPageFinish	354
Druid Signals	354
Summary	355
Chapter 14: Further GNOME	357
<hr/>	
Config Files	358
Sound	364
Help	364
Internet Access	367
DNS Lookups	367
Viewing URL Documents	371
Summary	371
Chapter 15: The GNOME Canvas	373
<hr/>	
Introducing the Canvas	374
GDK and anti-aliased Canvas Modes	376
GnomeCanvas coordinates	377
GnomeCanvasItems	379
GnomeCanvasGroup	379
GnomeCanvasRect and GnomeCanvasEllipse	380
GnomeCanvasLine	384
GnomeCanvasPolygon	387
GnomeCanvasText	388
GnomeCanvasWidget	390
GnomeCanvasImage	393
Canvas Item Functions	394

Table of Contents

Events	397
Affine Transformations	399
Summary	401

Chapter 16: The GNOME Integrated Development Environment (gIDE) 403

gIDE	404
Installing gIDE	406
Using gIDE	409
Working with Files	410
Working with Projects	411
Customizing gIDE	418
Summary	421

Chapter 17: Glade 423

Installing/Upgrading Glade	424
What does Glade need?	424
Where to find Glade?	425
How to install/upgrade Glade?	425
Where to find more information?	426
Part I — Glade	426
The Interface	426
Project window	427
Palette	430
Properties window	432
Widget tree	433
Menu editor	434
Summary of shortcuts	435
Features	435
Part II — Writing Your First Application	437
Creating your own Calculator	437
Starting the Project	437
Creating the Calculator	438
Setting the properties	442
Building the source code	446

Compiling the Calculator	446
The files created	446
How to build and compile the calculator	448
Adding the Code	449
Putting it All Together	458
Summary	459
Chapter 18: Application: Image Viewer	461
<hr/>	
Introducing ImageViewer	461
The User Interface	462
The Design Philosophy	463
Writing the Code	464
Starting the Application	464
Stopping the Application	465
Building the User Interface	467
The Image Window	470
Interaction between Two Windows	473
Summary	477
Chapter 19: Application: Balls and Springs	479
<hr/>	
Balls And Spring	479
Setting Up	480
Creating our Window	481
Drawing Items	484
Drawing updates	489
Mouse Interaction	492
Compiling the Application	493
Summary	494
Appendix A: Signal Callbacks	497
<hr/>	
Appendix B: Events	511

Table of Contents

Appendix C: GNOME User Interface API Reference **519**

Appendix D: ImageViewer **569**

Appendix E: Balls and Spring **583**

Index **593**
