CHAPTER 1

NOISE IN COMMUNICATIONS SYSTEMS

	Introduction	1
		2
1.1	Elements of Atomic Structure	2
1.2	Classification of Electronic Signals	3
1.3	Classification of Electronic Noise	3
	<i>External Noise</i>	3
	<i>Internal Noise</i>	6
1.4	Signal-to-Noise Ratio (SNR)	16
1.5	Carrier-to-Noise Ratio (CNR)	19
1.6	Noise Figure (NF)	20
	<i>Attenuator Noise Figure</i>	25
	<i>Mixer Noise Figure</i>	26
	<i>Receiver Noise Figure</i>	29
1.7	Relationships between the Carrier-to-Noise, Carrier-to-Noise Power Density, and Bit Energy-to-Noise Power Density Ratios	29
1.8	Figure of Merit	32
	Questions	32
	Problems	32

CHAPTER 2

VOICE SIGNAL DIGITIZATION

35

	Introduction	36
2.1	Pulse-Amplitude Modulation (PAM)	36
	<i>The Sampling Theorem</i>	36
	<i>Sampling Circuits</i>	38
2.2	Pulse-Position Modulation (PPM)	41
2.3	Pulse-Width Modulation (PWM)	41
2.4	Pulse-Code Modulation (PCM)	41
	<i>Quantization</i>	43
2.5	Delta Modulation	51
	<i>Adaptive Delta Modulation (ADM)</i>	53
	<i>Quantization Noise in Delta Modulation</i>	55
	<i>Delta Modulation Signal Power</i>	56
	<i>DM Signal-to-Quantization Noise Ratio</i>	57
2.6	PCM and DM Voice Signal Comparison	59

2.7	Time-Division Multiplexing of PCM Signals	60
2.8	The International Telegraph and Telephone Consultative Committee (CCITT)	62
	<i>The North American (Bell) 24-Channel T1-System (G-733)</i>	62
	<i>The Japanese Digital Hierarchy</i>	63
	<i>The European 30-Channel System CEPT (G-732)</i>	64
	<i>Jitter</i>	65
	Questions	72
	Problems	72

CHAPTER 3

DIGITAL RADIO

73

	Introduction	74
3.1	Digital Radio Block Diagram	74
3.2	Digital Modulation	77
	<i>Amplitude-Shift Keying</i>	78
	<i>Frequency-Shift Keying (FSK)</i>	79
	<i>Phase-Shift Keying (PSK)</i>	82
3.3	Quadrature Amplitude Modulation (QAM)	91
	<i>Phasor Diagram</i>	92
	<i>Constellation Display</i>	95
	<i>Eight-Level QAM Signal Bandwidth</i>	95
3.4	Digital Demodulation	98
	<i>Coherent Detection</i>	98
	<i>FSK Demodulator</i>	99
	<i>BPSK Demodulator with Clock Recovery</i>	102
	<i>QPSK Demodulation</i>	107
3.5	QAM Demodulation	116
	<i>QAM Error-Performance Evaluation</i>	116
	<i>Comparison of Digital Modulation Schemes</i>	122
	Questions	127

CHAPTER 4

LINE-OF-SIGHT MICROWAVE LINKS

129

	Introduction	130
4.1	Analog Line-of-Sight Microwave Links	131
	<i>The Transmitter</i>	131
	<i>The Receiver</i>	143
4.2	Digital Line-of-Sight Microwave Links	149
	<i>System Gain</i>	149
	<i>Line-of-Sight Digital Microwave Link System Design</i>	154
	<i>Antenna Tower Height</i>	161
	Questions	173
	Problems	173

CHAPTER 5

COMMUNICATIONS SATELLITES

175

	Introduction	175
5.1	Classification of Satellites	178
5.2	The Communications Satellite Systems	178
	<i>Orbits</i>	179

180	<i>Planetary Mechanics</i>	180
185	<i>Satellite Launching into Orbit</i>	185
187	<i>Stabilization</i>	187
190	<i>Spacecraft Subsystems</i>	190
201	<i>The Satellite Repeater</i>	201
210	Questions	210
210	Problems	210

CHAPTER 6

	SATELLITE EARTH STATIONS	211
	Introduction	212
6.1	Earth Station Antenna Subsystems	213
	<i>Elements of Electromagnetic Wave Propagation</i>	213
	<i>Antenna Parameters</i>	215
	<i>Parabolic Reflectors</i>	215
6.2	The Earth Station Transmitter	226
	<i>Up-Converter Circuit</i>	226
	<i>The High-Power Amplifier (HPA)</i>	228
	<i>Earth Station Transmitter Redundancy</i>	230
6.3	The Earth Station Receiver	234
	<i>Low-Noise Amplifier (LNA)</i>	234
	<i>The Parametric Amplifier</i>	234
	<i>MMIC LNAs</i>	236
	Questions	245
	Problems	246

CHAPTER 7

	SATELLITE ACCESS	247
	Introduction	248
7.1	Frequency-Division Multiple Access	250
	<i>Multiple Channels per Carrier (FDMA)</i>	250
	<i>Single-Channel-per-Carrier (SCPC) Demand Assignment</i>	252
7.2	Time-Division Multiple Access (TDMA)	257
	<i>TDMA Frame Synchronization</i>	258
	<i>TDMA Frame Efficiency and Channel Capacity</i>	259
	Questions	261
	Problem	261

CHAPTER 8

	SATELLITE LINKS	263
8.1	Satellite Link Analysis and Design	264
	<i>System Parameters</i>	264
8.2	Digital Satellite Link Design	266
	Problems	277

CHAPTER 9

	FIBER-OPTIC COMMUNICATIONS	279
	Introduction	280
9.1	The Nature of Light	280
9.2	Optical Laws	282

9.3	Optical Fibers	287
	<i>Classifications of Optical Fibers</i>	288
	<i>Properties of Optical Fibers</i>	291
9.4	Optical Sources	300
	<i>Introduction</i>	300
	<i>Light-Emitting Diode (LED)</i>	302
	<i>Laser Diodes</i>	315
9.5	Photodetection	325
	<i>PIN Photodetector</i>	325
	<i>PIN Photodetector Characteristics</i>	329
	<i>Avalanche Photodetectors (APDs)</i>	333
	Questions	341
	Problems	341

CHAPTER 10 OPTICAL FIBER COMMUNICATIONS SYSTEMS ANALYSIS AND DESIGN 343

	Introduction	344
10.1	System Parameters	345
10.2	Analog Optical Fiber Communication Links	346
	<i>Design Procedure</i>	348
	<i>Multichannel Analog Systems</i>	352
	<i>FM/FDM Video Signal Transmission</i>	364
10.3	Digital Optical Fiber Systems	371
	Problems	384

CHAPTER 11 SYSTEM MEASUREMENTS AND PERFORMANCE EVALUATION 385

	Introduction	386
11.1	Fourier Series	388
	<i>Fourier Transform</i>	390
11.2	The Z-Transform	392
11.3	Modulator/Demodulator Sensitivity Measurements	393
	<i>The Modulator</i>	393
	<i>The Demodulator</i>	396
	<i>Modulator/Demodulator, Linearity, and Differential Gain</i>	397
	<i>IF Amplitude Response</i>	399
	<i>Return-Loss Measurements</i>	400
11.4	Digital Microwave Link Measurements and Performance Evaluation	402
	<i>Error Performance</i>	402
	<i>Noise and Interference Measurements</i>	404
	Questions	435

CHAPTER 12 ELEMENTS OF HIGH-DEFINITION TV 437

	Introduction	438
12.1	System Specifications	439
	<i>Resolution</i>	439

<i>Format Comparison</i>	439
<i>Video Compression</i>	441
<i>The MPEG Profile</i>	441
<i>Video Encoder</i>	442
<i>Video Decoder</i>	443
<i>Transportation (Packet Delivery)</i>	443
<i>Audio</i>	443
Questions	445

GLOSSARY	447
REFERENCES	451
INDEX	453
