<i>Introduction</i>	xi
1 General considerations	1
1.1 Legislation	1
1.2 Guidance and approval of water fittings	4
1.3 Scope of the standard	5
1.4 Definitions	5
1.5 Materials	13
1.6 Initial procedures	17
2 Cold water supply	21
2.1 Drinking water	21
2.2 Cold water systems	22
2.3 Storage cisterns	28
2.4 Valves and controls	43
2.5 Water revenue meters	51
2.6 Boosted systems	57
2.7 Water treatment	67
3 Hot water supply	71
3.1 System choice	71
3.2 Instantaneous water heaters	73
3.3 Water-jacketed tube heaters	77
3.4 Storage type water heaters and boiler heated systems	80
3.5 Primary circuits	95
3.6 Secondary hot water distributing systems	106
3.7 Components for hot water systems	110
3.8 Energy supply installations	125
4 Prevention of bursting	127
4.1 Energy control	127
4.2 Pressure and expansion control	136
4.3 Control of water level	141
5 Pipe sizing	143
5.1 Sizing procedure for supply pipes	144
5.2 Tabular method of pipe sizing	154
5.3 Sizing cold water storage	158
5.4 Sizing hot water storage	159
5.5 <i>Legionella</i> – implications in sizing storage	163
6 Preservation of water quality	165
6.1 Materials in contact with water	166

6.2	Stagnation of water and <i>Legionella</i>	168
6.3	Prevention of contamination by cross connection	170
6.4	Backflow protection	173
6.5	Backflow prevention devices	176
6.6	Wholesale and zone backflow protection	193
6.7	Application of backflow prevention devices	195
7	Frost precautions and maintenance of water temperature	208
7.1	Protection from frost	208
7.2	Protection of pipes and fittings	209
7.3	Draining facilities	216
7.4	Insulation	219
8	Water economy and energy conservation	223
8.1	Water economy	223
8.2	Energy conservation	234
9	Noise and vibration	236
9.1	Flow noises	236
9.2	Water hammer noise	239
9.3	Other noises	241
9.4	Noise transmission and reduction	242
10	Accessibility of pipes and water fittings	244
10.1	Pipes passing through walls, floors and ceilings	244
10.2	Stopvalves	248
10.3	Water storage cisterns	250
11	Installation of pipework	251
11.1	Steel pipes	251
11.2	Copper pipes	255
11.3	Stainless steel pipes	267
11.4	Plastics pipes	269
11.5	Iron pipes	284
11.6	Asbestos cement pipes	290
11.7	Lead pipes	291
11.8	Connections between pipes of different materials	291
11.9	Connections to cisterns and tanks	292
11.10	Branch connections for buildings	296
11.11	Contamination of mains	299
11.12	Laying underground pipes	299
11.13	Pipework in buildings	306
11.14	Electrical earthing and bonding	310
11.15	Jointing of pipework for potable water	310
11.16	Testing	313
11.17	Identification of valves and pipes	313
12	Commissioning and maintenance of pipelines, services and installations	316
12.1	Inspections	316
12.2	Testing for soundness	317
12.3	Testing methods	318
12.4	Flushing and disinfection	321

12.5	Maintenance	325
12.6	Locating leaks	328
12.7	Occupier information	331
	British Standards relevant to this book	332
