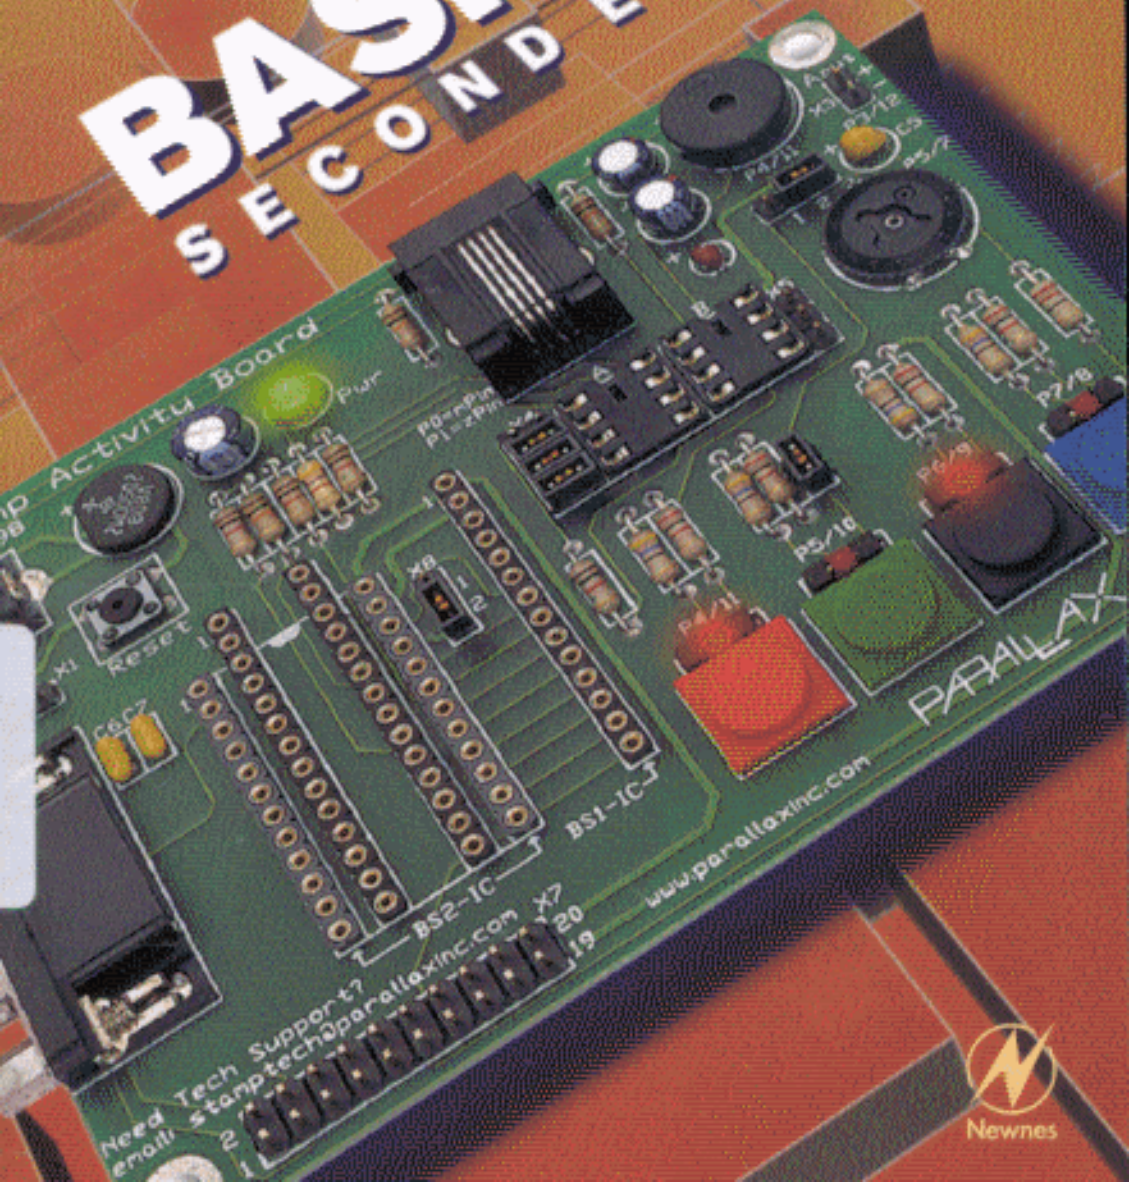
BASIC Stamp

SECOND EDITION



Newnes

Contents

Preface **Ix**

1 Introduction to Microcontrollers **1**

1.1 Function Groups of a Simple Microcontroller 1
1.2 Some Important Terms 7

2 Hardware Base of the BASIC Stamps **11**

2.1 Microchip's PIC micros 11
2.1.1 Internal Architecture 11
2.1.2 Peripheral Functions 14
2.2 Scenix Semiconductor's SX Microcontroller 20
2.2.1 Internal Architecture 20
2.2.2 Peripheral Functions 21
2.3 Technical Data of PIC16C5x and SX28AC 23

3 BASIC Stamp **29**

3.1 BASIC Stamp I Device 29
3.2 BASIC Stamp version D 31
3.3 BS1-IC 32
3.4 BASIC Stamp II Device 33
3.5 BS2-IC 34
3.6 BASIC Stamp IIsx 37
3.7 BS2sx-IC 39
3.8 Comparison of BASIC Stamps 39

4 BASIC Stamp Development Systems 41

4.1 System Requirements 41
4.1.1 System Requirements for DOS-Based Tools 41
4.1.2 System Requirements for BASIC Stamp II Windows Interface 42
4.2 Parallax's Programming Packages 42
4.3 Preparations for BASIC Stamp I Program Development 42
4.4 Preparations for BASIC Stamp II Program Development 43
4.5 Working with the Development Systems 45
4.5.1 Editing Programs with DOS-Based Tools 46
4.5.2 Editing BS2 Programs with the Windows Interface 49
4.5.3 Programming BASIC Stamp I 53
4.5.4 Programming BASIC Stamp II 55
4.6 Some Tools 62
4.6.1 Program STMPSIZE 62
4.6.2 Program BSLOAD 62
4.6.3 RS232 Monitor Programs 63
4.6.4 Program BS1EMU 64

5 PBASIC for All BASIC Stamps 69

5.1 PBASIC Instruction Set 69
5.2 Explanations of Some PBASIC Instructions 96
5.2.1 Query a Key with BUTTON 97
5.2.2 Generating Tones with SOUND 98
5.2.3 Digital-to-Analog Conversion with PWM 99
5.2.4 Resistor Measurement with POT 102
5.2.5 Memory Management for BASIC Stamp IIsx 104
5.3 Numeric Operations 107
5.4 Source Text Formatting 112

6 On the Way to Application: The Practical Use of BASIC Stamp 115

6.1 Experiments and Some Tools 115
6.2 Hints for Programming and Debugging 119
6.3 Run-Time of PBASIC Instructions 121
6.3.1 Measurement of a Single Instruction with a Scope 121
6.3.2 Measurement of Multiple Instructions with a Stop Watch 122
6.3.3 Runtime of PBASIC Instructions for BS2 and BS2sx 122

7 BASIC Stamp Applications 125

7.1 Basics for Applications 125
7.1.1 [BS1]—RS232 Interface Between BASIC Stamp and PC 126
7.1.2 [BS1]—Communication Between BASIC Stamps 135
7.1.3 Electrical Pin Conditions for Analog and Digital I/Os 140

7.2 More Complex Applications 141
7.2.1 BASIC Stamp Network 141
7.2.2 Scalable Node Address Protocol (S.N.A.P.) 159
7.2.3 Communication Between BASIC Stamps over Longer Distances 171
7.2.4 [BS2]—Remote Alarm Message via Modem 177
7.2.5 [BS1]—Connecting a Keyboard 181
7.2.6 Control of Digital Displays 184
7.2.7 Management of Time Information 207
7.2.8 I/O Extension with I²C Circuits 218
7.2.9 [BS1]—D/A Conversion with WM8016 234
7.2.10 [BS1]—Motion Detection with a Radar Sensor 238
7.2.11 [BS1]—Distance Measurement with IR Triangulation 241
7.2.12 [BS2]—Scale Based on Frequency Output 248
7.2.13 [BS2]—Generate and Recognize DTMF Tones 250
7.2.14 [BS1]—Light Measurements with TSL230 Sensor 254
7.2.15 [BS2]—Serial Reading from Phone Card 260
7.2.16 [BS2]—Home Automation with X-10 263
7.2.17 [BS2sx]—Tilt Control with Servo 269
7.2.18 [BS2]—Controlling a Stepper Motor with Stepper Motor Control Module 274
7.2.19 [BS1]—Simple Optical Data Transmission 278

Appendix A Reserved Words **283**

Appendix B BASIC Stamp—Versions of Firmware **285**

Appendix C HAYES Commands—The Most Important Modem Instructions **287**

Appendix D Product Sources **289**

Index **293**
