

- New Regulations Included
- Procedures for Working On or Around Electronic Equipment
- Safety Audits
- In-House Training Programs

Electrical Safety Handbook

SECOND EDITION

JOHN CADICK, P.E.
MARY CAPELLI-SCHELLPFEFFER, M.D., M.P.A.
DENNIS NEITZEL, CPE

CONTENTS

Foreword	
Preface	
Acknowledgments	

Chapter 1 Hazards of Electricity	1.1
---	------------

Introduction	1.1
Hazard Analysis	1.1
Shock	1.1
Description	1.1
Influencing Factors	1.2
Arc	1.7
Definition and Description	1.7
Arc Energy	1.10
Arc Voltage	1.11
Arc Surface Area	1.11
Arc Energy Release	1.12
Arc Energy Received	1.12
Arc Burns	1.13
Blast	1.13
Affected Body Parts	1.14
General	1.14
Skin	1.14
The Nervous System	1.16
Muscular System	1.17
The Heart	1.18
The Pulmonary System	1.19
Summary of Causes—Injury and Death	1.19
Shock Effect	1.19
Causes of Injury	1.19
Causes of Death	1.20
Protective Strategies	1.21
References	1.21

Chapter 2 Electrical Safety Equipment	2.1
--	------------

Introduction	2.1
General Inspection and Testing Requirements for Electrical Safety Equipment	2.1
Flash and Thermal Protection	2.2
A Note on When to Use Thermal Protective Clothing	2.2
Thermal Performance Evaluation	2.2
Clothing Materials	2.4
Non-Flame-Resistant Materials	2.4
Flame-Resistant Materials	2.5
Work Clothing	2.6

Flash Suits	2.9
Head, Eye, and Hand Protection	2.12
Head and Eye Protection	2.12
Hard Hats	2.12
Safety Glasses, Goggles, and Face Shields	2.14
Rubber Insulating Equipment	2.14
Rubber Gloves	2.15
Rubber Mats	2.19
Rubber Blankets	2.20
Rubber Covers	2.21
Line Hose	2.23
Rubber Sleeves	2.24
In-Service Inspection and Periodic Testing of Rubber Goods	2.27
Hot Sticks	2.42
Description and Application	2.42
When to Use	2.45
How to Use	2.45
Testing Requirements	2.45
Insulated Tools	2.46
Description and Application	2.46
When to Use	2.47
How to Use	2.47
Barriers and Signs	2.47
Barrier Tape	2.47
Signs	2.47
When and How to Use	2.48
Safety Tags, Locks, and Locking Devices	2.49
Safety Tags	2.49
Locks and Multiple-Lock Devices	2.50
Locking Devices	2.51
When/Where to Use Lockout/Tagout	2.51
Voltage-Measuring Instruments	2.52
Safety Voltage Measurement	2.52
Proximity Testers	2.53
Contact Testers	2.54
Selecting Voltage-Measuring Instruments	2.56
Instrument Condition	2.57
Three-Step Voltage Measurement Process	2.58
General Considerations for Low-Voltage Measuring Instruments	2.60
Safety Grounding Equipment	2.60
The Need for Safety Grounding	2.60
Safety Grounding Switches	2.61
Safety Grounding Jumpers	2.62
Selecting Safety Grounding Jumpers	2.69
Installation and Location	2.71
Ground Fault Circuit Interrupters	2.71
Operating Principles	2.71
Applications	2.73
Safety Electrical One-Line Diagram	2.73
The Electrician's Safety Kit	2.76
References	2.77

Chapter 3 Safety Procedures and Methods	3.1
Introduction	3.1
The Six-Step Safety Method	3.1
Think—Be Aware	3.1

Understand Your Procedures	3.2
Follow Your Procedures	3.2
Use Appropriate Safety Equipment	3.2
Ask if You Are Unsure, and Do Not Assume	3.2
Do Not Answer if You Do Not Know	3.3
Pre-Job Briefings	3.3
Definition	3.3
What Should Be Included?	3.3
When Should Pre-Job Briefings Be Held?	3.3
Energized or De-Energized?	3.3
The Fundamental Rules	3.3
A Hot-Work Decision Tree	3.4
After the Decision Is Made	3.6
Safe Switching of Power Systems	3.6
Introduction	3.6
Remote Operation	3.7
Operating Medium-Voltage Switchgear	3.7
Operating Low-Voltage Switchgear	3.11
Operating Molded-Case Breakers and Panelboards	3.15
Operating Enclosed Switches and Disconnects	3.17
Operating Open-Air Disconnects	3.19
Operating Motor Starters	3.21
Energy Control Programs	3.23
General Energy Control Programs	3.24
Basic Energy Control Rules	3.24
Specific Energy Control Programs	3.26
Tagout-Lockout	3.26
Definition and Description	3.26
When to Use Locks and Tags	3.27
Locks without Tags or Tags without Locks	3.27
Rules for Using Locks and Tags	3.27
Responsibilities of Employees	3.28
Sequence	3.28
Lock and Tag Application	3.28
Isolation Verification	3.29
Removal of Locks and Tags	3.29
Safety Ground Application	3.30
Control Transfer	3.30
Nonemployees and Contractors	3.30
Lockout-Tagout Training	3.32
Procedural Reviews	3.32
Voltage-Measurement Techniques	3.32
Purpose	3.32
Instrument Selection	3.33
Instrument Condition	3.34
Three-Step Measurement Process	3.34
What to Measure	3.35
How to Measure	3.37
Placement of Safety Grounds	3.38
Safety Grounding Principles	3.38
Safety Grounding Location	3.38
Application of Safety Grounds	3.43
The Equipotential Zone	3.44
Removal of Safety Grounds	3.45
Control of Safety Grounds	3.45
Flash Hazard Calculations and Approach Distances	3.47
Introduction	3.47
Approach Distance Definitions	3.47

Determining Shock Hazard Approach Distances	3.48
Calculating the Flash Hazard Minimum Approach Distance (Flash Protection Boundary)	3.49
Calculating the Required Level of Arc Protection (Flash Hazard Calculations)	3.52
Required PPE for Crossing the Flash Hazard Boundary	3.55
A Simplified Approach to Crossing the Approach Boundaries	3.55
Barriers and Warning Signs	3.58
Illumination	3.58
Conductive Clothing and Materials	3.60
Confined Work Spaces	3.60
Tools and Test Equipment	3.61
General	3.61
Authorized Users	3.62
Visual Inspections	3.63
Electrical Tests	3.63
Wet and Hazardous Environments	3.63
The One-Minute Safety Audit	3.64
References	3.66

Chapter 4 Grounding of Electrical Systems and Equipment 4.1

Introduction	4.1
General Requirements for Grounding and Bonding	4.1
Definitions	4.1
Grounding of Electrical Systems	4.3
Grounding of Electrical Equipment	4.5
Bonding of Electrical Conductive Materials and Other Equipment	4.6
Performance of Fault Path	4.7
Arrangement to Prevent Objectionable Current	4.7
Alterations to Stop Objectionable Current	4.8
Temporary Currents Not Classified as Objectionable Current	4.8
Connection of Grounding and Bonding Equipment	4.8
Protection of Ground Clamps and Fittings	4.8
Clean Surfaces	4.8
System Grounding	4.9
Grounding Service-Supplied Alternating-Current Systems	4.9
Conductor to Be Grounded—Alternating-Current Systems	4.9
Main Bonding Jumper	4.10
Grounding Electrode System	4.10
Grounding Electrode System Resistance	4.13
Grounding Electrode Conductor	4.13
Grounding Conductor Connection to Electrodes	4.14
Bonding	4.16
Equipment Grounding	4.16
Equipment to Be Grounded	4.16
Grounding Cord- and Plug-Connected Equipment	4.17
Equipment Grounding Conductors	4.18
Sizing Equipment Grounding Conductors	4.19
Use of Grounded Circuit Conductor for Grounding Equipment	4.20

Chapter 5 Regulatory and Legal Safety Requirements and Standards 5.1

Introduction	5.1
The Regulatory Bodies	5.2
The American National Standards Institute (ANSI)	5.2

The Institute of Electrical and Electronic Engineers (IEEE)	5.3
National Fire Protection Association (NFPA)	5.3
American Society for Testing and Materials (ASTM)	5.5
American Society of Safety Engineers (ASSE)	5.5
The Occupational Safety and Health Administration (OSHA)	5.6
Other Electrical Safety Organizations	5.13
The National Electrical Safety Code (NESC)—ANSI-C-2	5.14
General Description	5.14
Industries and Facilities Covered	5.14
Technical/Safety Items Covered	5.14
The National Electrical Code (NEC)—ANSI/NFPA 70	5.15
General Description	5.15
Industries and Facilities Covered	5.16
Technical and Safety Items Included	5.16
Electrical Equipment Maintenance—ANSI/NFPA 70B	5.17
General Description	5.17
Industries and Facilities Covered	5.17
Technical and Safety Items Covered	5.17
Electrical Safety Requirements for Employee Workplaces—ANSI/NFPA 70E	5.18
General Description	5.18
Industries and Facilities Covered	5.18
Technical Safety Items Covered	5.19
The American Society for Testing and Materials (ASTM) Standards	5.20
Occupational Safety and Health Administration (OSHA) Standards	5.20
Overview	5.20
General Industry	5.20
Construction Industry	5.24
 Chapter 6 Accident Prevention, Accident Investigation, Rescue, and First Aid	 6.1
Accident Prevention	6.1
Individual Responsibility	6.1
Installation Safety	6.2
Power System Studies	6.3
First Aid	6.7
General First Aid	6.7
Resuscitation (Artificial Respiration)	6.12
Heart-Lung Resuscitation	6.13
Rescue Techniques	6.13
General Rescue Procedures	6.13
Elevated Rescue	6.21
Confined Space Rescue	6.21
Ground-Level Rescue	6.35
Accident Investigation	6.39
Purpose	6.39
General Rules	6.41
Data Gathering	6.41
Accident Analysis	6.43
 Chapter 7 Health Effects of Electrical Accidents	 7.1
Introduction	7.1
Electrical Incidents	7.1
Electrocution	7.2

Health Effects	7.3
Survivor Experience	7.3
Worker Reflexes	7.4
Triage and Medical Evacuation	7.5
Stabilization and Initial Evaluation	7.6
Medical and Surgical Intervention	7.6
Hospitalization	7.6
Discharge to Outpatient Services	7.8
Rehabilitation Focus and Return-to-Work Planning	7.8
Reentry to Employment Settings	7.8
Plateau In Recovery	7.9
 Chapter 8 Low-Voltage Safety Synopsis	 8.1
Introduction	8.1
Low-Voltage Equipment	8.2
Extension Cords	8.2
Plug- and Cord-Connected Equipment	8.3
Current Transformers	8.5
Grounding Low-Voltage Systems	8.5
What Is a Ground?	8.5
Bonding Versus Grounding	8.6
Voltage Hazards	8.7
System Grounds	8.8
Equipment Grounds	8.11
Ground Fault Circuit Interrupters	8.14
Safety Equipment	8.14
Overview	8.14
Hard Hats	8.14
Eye Protection	8.15
Arc Protection	8.18
Rubber Insulating Equipment	8.18
Voltage-Testing Devices	8.18
Safety Procedures	8.19
General	8.19
Approach Distances	8.19
Voltage Measurement	8.20
Locking and Tagging	8.21
Closing Protective Devices After Operation	8.21
Electrical Safety Around Electronic Circuits	8.21
The Nature of the Hazard	8.21
Special Safety Precautions	8.22
Stationary Battery Safety	8.23
Introduction	8.23
Basic Battery Construction	8.23
Safety Hazards of Stationary Batteries	8.25
Battery Safety Procedures	8.26
 Chapter 9 Medium- and High-Voltage Safety Synopsis	 9.1
Introduction	9.1
High-Voltage Equipment	9.1
Grounding Systems of Over 1000 V	9.3
What Is a Ground?	9.3
Bonding Versus Grounding	9.4

Voltage Hazards	9.4
System Grounds	9.5
Equipment Grounds	9.7
Safety Equipment	9.8
Overview	9.8
Hard Hats	9.8
Eye Protection	9.8
Rubber Insulating Equipment	9.12
Voltage-Testing Devices	9.12
Safety Procedures	9.12
General	9.12
Approach Distances	9.12
Voltage Measurement	9.13
Locking and Tagging	9.13
Closing Protective Devices After Operation	9.14

Chapter 10 Human Factors in Electrical Safety **10.1**

Introduction	10.1
Myths Beliefs	10.1
“I Am Experienced, So I Won’t Get Injured”	10.1
“Electrical Accidents Happen When an Employee Isn’t Paying Attention”	10.2
“As Long As I Don’t Touch an Electrical Source, I Won’t Get Shocked”	10.2
“As Long As I Am At a Safe Distance I Will Be Okay Doing Hot Work”	10.2
“Flame-Retardant/Resistant Gear Is Only Worn for Working on Live Parts”	10.3
“A Flash Can’t Give Me a Shock”	10.3
Human Factors	10.3
Vision	10.3
Hearing (Audition)	10.4
Reaction Times	10.4
Summary	10.6
References	10.6

Chapter 11 Safety Management and Organizational Structure **11.1**

Introduction	11.1
Electrical Safety Program Structure	11.1
Electrical Safety Program Development	11.2
The Company Electrical Safety Team	11.2
Company Safety Policy	11.3
Assessing the Need	11.4
Problems and Solutions	11.4
Program Implementation	11.5
Examples	11.5
Company Safety Procedures	11.7
Results Assessment	11.8
Employee Electrical Safety Teams	11.8
Reason	11.8
Method	11.8
Safety Meetings	11.9
Who Attends	11.9
What Material Should Be Covered	11.9
When Meetings Should Be Held	11.10
How Long Meetings Should Be	11.10
Evaluation of Safety Meetings	11.11

Outage Reports	11.11
Safety Audits	11.11
Description	11.11
Purposes	11.12
Procedure	11.12
The Audit Team	11.14
Audit Tools	11.14
Follow-Up	11.14
Internal Versus External Audits	11.34
Chapter 12 Safety Training Methods and Systems	12.1
<hr/>	
Introduction	12.1
Safety Training Definitions	12.1
Training Myths	12.2
Conclusion	12.3
Elements of a Good Training Program	12.3
Classroom Training	12.3
On-the-Job Training (OJT)	12.5
Self Training	12.6
Conclusion	12.6
On-the-Job Training	12.6
Setup	12.6
Implementation	12.8
Evaluation	12.8
Conclusion	12.9
Training Consultants and Vendors	12.9
Canned Programs and Materials	12.9
Evaluating Training Vendors and Consultants	12.11
Conclusion	12.12
Training Program Setup—A Step-by-Step Method	12.12
Setup	12.12
Implementation	12.14
Evaluation	12.15
Modification	12.16
