CONTENTS

IEEE Code of Ethics	i
Introduction.....	iii
Chapter 1 Overview	
Electric Power Systems: Past, Present, and Future	3
<i>C. Concordia</i>	
Blackouts: Is the Risk Increasing?.....	5
<i>J. Casazza</i>	
Shallow Turf: Everyone Seeks Firm Footing as NERC Drafts its Own Reform Legislation	9
<i>B. W. Radford</i>	
Electric Restructuring: Handicapping the 106th Congress	11
<i>J. F. Schuler, Jr.</i>	
Ten Myths About Electric Power Deregulation	17
<i>G. C. Loehr</i>	
Take Unicom Tonight and Sleep, Sleep, Sleep	21
<i>K. Maize</i>	
CHAPTER 2 TRANSMISSION SYSTEM PLANNING & DESIGN	
How to Reconcile the Opening of Competition and the Safety of the Power System: Historical Background and Lessons for the Future.....	25
<i>F. Meslier</i>	
Power Pools & ISOs: Monitoring Market Power in a Restructured Industry	55
<i>R. Lock</i>	
Wheeling & Dealing.....	61
<i>P. Lewis</i>	
Risks, Games, and Gambles.....	65
<i>T. Seppa</i>	
Microturbines—An Economic and Reliability Evaluation for Commercial, Residential, and Remote Load Applications.....	67
<i>M. W. Davis, A. H. Gifford and T. J. Krupa</i>	
The Microturbine: A Generator to Ease T & D Woes.....	75
<i>B. Koch</i>	

The Deregulation of the Electricity Industry	79
<i>P. M. VanDoren</i>	

CHAPTER 3 TRANSMISSION SYSTEM OPERATION

Reliability in Power Delivery: Where Technology and Politics Meet	83
<i>K. Stahlkopf and P. R. Sharp</i>	
<i>Editor's Note: Auckland, New Zealand Blackouts</i>	87
The Report of Ministerial Inquiry into the Auckland Power Supply Failure	89
<i>Executive Summary and Recommendations</i>	
Measuring Use of Transmission	95
<i>J. A. Casazza</i>	
NERC's Plan is a Grid Wreck in Progress	101
<i>D. E. Wojick</i>	
The First Ten Years of Real-Time Ratings on Underground Transmission Circuits, Overhead Lines, Switchgear and Power Transformers	103
<i>S. P. Walldorf and J. S. Engelhardt</i>	
Increasing Transmission Capabilities by Dynamic Line Rating	107
<i>T. O. Seppa</i>	
Group Aims to Protect Grid Reliability	119
Intelligent Management of the Electric Power Grid through an Innovative Anticipatory, Multi-Agent, High Performance Computing Approach	121
<i>Consortium for the Electric Power Grid (CIGMEG)</i>	
<i>Editor's Note: Ageing of Transmission Facilities</i>	129
Transmission System Aging	131
<i>CIGRE</i>	
Laying the Superconductivity Foundation for Future Power	141
<i>J. B. Howe</i>	

CHAPTER 4 TRANSMISSION TRANSFER CAPABILITY

<i>Editor's Note: Transmission Transfer Capabilities</i>	149
Available Transfer Capability, Definitions and Determination	151
<i>North American Electric Reliability Council</i>	
Comments on Capacity Benefit Margin	155
<i>J. A. Casazza and G. C. Loehr</i>	

Understanding FERC's OASIS: Like Following a Mirage	165
<i>M. Desai and K. J. Vormwald</i>	

CHAPTER 5 RESTRUCTURING, RELIABILITY & TRANSMISSION

Staff Report to the Federal Electric Regulatory Commission on the Causes of Wholesale Electric Pricing Abnormalities in the Midwest During June 1998	171
Missed Opportunity: What's Right and Wrong in the FERC Staff Report on the Midwest Price Spikes	
<i>J. L. Rose</i>	
Price Spikes Raise Market Manipulation Questions	185
<i>T. Cissna</i>	
Reliability and Quality: You Get What You Expect	187
<i>R. M. Chapman</i>	
Reliability Assessment 1998-2007: the Reliability of the Bulk Electric Systems in North America	195
<i>North American Electric Reliability Council</i>	
Available Transfer Capability and First Order Sensitivity	201
<i>M. H. Gravener and C. Nwankpa</i>	
Deregulation, Privatization, and Competition: Transmission Planning Under Uncertainty	209
<i>T. De la Torre, J. W. Feltes, T. G. San Roman and H. M. Merrill</i>	
Electricity Derivatives Regulation: Mired in Uncertainty	215
<i>N. Swan</i>	
ISO Economics: How California Flubbed It on Transmission Pricing	219
<i>L. D. Kirsch</i>	
Auctionable Capacity Rights and Market-Based Pricing	225
<i>R. D. Tabors and R. Wilson</i>	
A Market Solution to Reliability?	241
<i>G. C. Loehr</i>	
Electricity Prices: Don't Re-regulate Before We've Even Finished Deregulating	245
<i>J. Crystal</i>	
Meet the Emerging Transmission Market Segments	247
<i>F. A. Rahmi and A. Vojdani</i>	
Effects of Deregulation on Power Engineering Education	255
<i>G. G. Karaday</i>	
Downsizing Forces Utilities to Make Significant Changes in Engineering	261

Free Market Incentives to Expand Transmission Capacity Need Complex Regulations	263
<i>A. Madian</i>	

CHAPTER 6 TRANSMISSION SYSTEM COMPONENTS & RESEARCH

Explaining Real Dollar Cost of Imaginary Power to Nonengineers	269
<i>W. E. Kazibwe</i>	
Synchronous Condenser: An Idea Whose Time Has Come	271
<i>D. Gerstenkorn</i>	
Line Route Survey Uses Space-Age Technique	275
<i>P. Moir, J. Vaughn, N. Banks, D. Muftic, F. Ritke and M. Korber</i>	
Light a Fuse Under Energy Technology	279
<i>M. O'Neill</i>	
HVDC Intertie Leaps from Mercury-Arc Rectifiers to Light-Triggered Thyristors	281
New York State Acts to Relieve Growing Network Congestion	283
<i>J. Reason</i>	
<i>Editor's Note: Sleet Melting Procedures</i>	289
Ice Melting of Sub-Transmission Lines	291
<i>W. D. Adolphe</i>	

CHAPTER 7 COMMUNICATIONS, INFORMATION SECURITY, AND THE ENVIRONMENT

Silicon Crisis? How Info Tech Poses Risk for Electric Restructuring	299
<i>S. A. Klein</i>	
What it Takes to be an Internet Service Provider	307
<i>C. A. Heiberger</i>	
Meter Markets, A New Value Proposition—An Interview with Ralph Masiello and Sue Scott of ABB	309
<i>B. W. Radford</i>	
How EPA Ozone Transport Rules May Change The Electric Power Industry	311
<i>D. E. Wojick</i>
