CHAPTER 1 CUE INTEGRATION FOR MANIPULATION 1

D. Kragić and H. I. Christensen

1.1	Introduction	1
1.2	Cue Integration	2
1.2.1	Voting Methods	2
1.2.2	Fuzzy Fusion	3
1.3	Cues for Visual Servoing	5
1.3.1	Color Segmentation	5
1.3.2	Normalized Cross Correlation	5
1.3.3	Edge Tracking	6
1.3.4	Disparity	7
1.3.5	Blob Motion	7
1.4	System Outline	7
1.4.1	System Setup	7
1.4.2	Implementation	8
1.4.2.1	Voting Schema	8
1.4.2.2	Fuzzy Logic	9
1.5	Evaluation	9
1.5.1	Design	9
1.5.2	Results	10
1.5.3	Evaluation	11
1.5.3.1	Experiment 1	11
1.5.3.2	Experiment 2	12
1.5.3.3	Experiment 3	13
1.5.3.4	Summary	13
1.6	Summary	14
1.7	Acknowledgments	14

CHAPTER 2 SPATIALLY ADAPTIVE FILTERING IN A MODEL-BASED MACHINE VISION APPROACH TO ROBUST WORKPIECE TRACKING

17

H.-H. Nagel, Th. Müller, V. Gengenbach, and A. Gehrke

2.1	Introduction	17
2.2	Specification of Problem and Boundary Conditions	18
2.2.1	Outline of Our Machine-Vision-Based Tracking Process	18
2.2.2	Matching Data Edge Elements versus Matching Data Edge Segments	20
2.2.3	Overcoming a Weakness of Model-Based Data Edge Element Collection	20
2.2.4	An Alternative Solution Approach	21
2.3	Solution Approach to Be Investigated	21
2.3.1	Estimation of Local Grayvalue Characteristics	22
2.3.2	Expected Improvements by Using Locally Adapted Gradient Estimates	23
2.4	Results	24
2.5	Discussion and Outlook	25

CHAPTER 3 INCREMENTAL FOCUS OF ATTENTION: A LAYERED APPROACH TO ROBUST VISION AND CONTROL

27

Kentaro Toyama, Gregory D. Hager, and Zachary Dodds

3.1	Introduction	27
3.2	Robust Tracking	28
3.2.1	IFA System Construction	28
3.2.2	Layer Elements	28
3.2.2.1	Trackers	29
3.2.2.2	Selectors	29
3.2.2.3	Set Dilation	29
3.2.3	Layer Composition	30
3.2.4	State Transition Graph	30
3.2.5	Algorithm	31
3.3	Action Prohibition in Robot Control	32
3.3.1	Perception Formalism	32
3.3.2	Action Prohibition	33
3.4	Examples	34

3.4.1	Face Tracking	34
3.4.2	Doorknob Homing	34
3.5	Related Work	36
3.6	Discussion	36
3.7	Acknowledgments	36

CHAPTER 4 INTEGRATED OBJECT MODELS FOR ROBUST VISUAL TRACKING 39

Kevin Nickels and Seth Hutchinson

4.1	Introduction	39
4.2	Models Used	40
4.2.1	System Model	40
4.2.2	Object Geometric Model	40
4.2.3	Object Appearance Model	41
4.2.4	Imaging Model	41
4.2.5	Object Dynamic Model	41
4.2.6	Errors in Models	42
4.3	Observation Function	43
4.4	Feature Tracking	43
4.5	Extended Kalman Filter	46
4.6	Experimental Results	47
4.7	Conclusions	49

CHAPTER 5 ROBUST VISUAL TRACKING BY INTEGRATING VARIOUS CUES 53

Yoshiaki Shirai, Ryuzo Okada, and Tsuyoshi Yamane

5.1	Introduction	53
5.2	Optical Flow Extraction	53
5.3	Tracking with Optical Flow	54
5.4	Tracking Two Persons	55
5.5	Tracking with Optical Flow and Depth	56
5.5.1	Disparity Extraction	56
5.5.2	Tracking	56
5.5.2.1	Prediction of the Target Location	57
5.5.2.2	Extraction of Target Pixels	58
5.5.3	Estimation of the Target Block	58

	5.5.3.1	Determination of the Target Window	59
	5.5.4	Experimental Result	59
	5.5.5	Real-Time Tracking	59
5.6		Tracking with Optical Flow and Uniform Brightness Regions	60
	5.6.1	Target Motion Region	61
	5.6.2	Target Brightness Region	61
	5.6.3	Integration of Motion and Brightness	62
	5.6.3.1	Modification of Brightness Window by Motion	62
	5.6.3.2	Modification of Motion Window by Brightness	63
	5.6.3.3	Determination of Search Area for the Motion and Brightness Windows	63
5.7		Conclusion	64

CHAPTER 6 TWO-DIMENSIONAL MODEL-BASED TRACKING OF COMPLEX SHAPES FOR VISUAL SERVOING TASKS 67

Nathalie Giordana, Patrick Bouthemy, François Chaumette, and Fabien Spindler

6.1	Introduction	67
6.2	Specification of the Homing Task	67
	6.2.1	Image-Based Visual Servoing 67
	6.2.2	Positioning with Respect to an Object 68
6.3	Semi-Automatic Initialization	68
6.4	Two-Dimensional Tracking of Polyhedral Object	69
	6.4.1	Transformation Model 70
	6.4.2	Tracking Algorithm 70
	6.4.3	Estimation of the Model Parameters 70
6.5	Experimental Results	72
6.6	Conclusions	74
6.7	Acknowledgments	75

CHAPTER 7 INTERACTION OF PERCEPTION AND CONTROL FOR INDOOR EXPLORATION 77

D. Burschka, C. Eberst, C. Robl, and G. Färber

7.1	Introduction	77
-----	--------------	----

7.2	Concept	78	
7.2.1	System Architecture	78	
7.3	Sensor Data Preprocessing	79	
7.3.1	Image Processing	79	
	Localization	81	
	Exploration	81	
	Obstacle Detection	81	
	Object and State Identification	81	
7.3.2	Three-Dimensional Reconstruction	82	
7.3.3	Obstacle Detection	82	
7.3.4	The Dynamic Local Map	83	
	7.3.4.1 Update of the Map	84	
	7.3.4.2 Interaction with Other Modules	85	
7.4	Interpretation	86	
7.4.1	Recognition and Completion	86	
	7.4.1.1 Determination of Structures	86	
	7.4.1.2 Object Recognition	87	
7.4.2	Transfer of Predictions	88	
7.4.3	Evaluation	88	
7.5	Sensor and Platform Control	89	
7.5.1	Exploration Strategy	90	
7.5.2	Free Space Estimation	90	
7.5.3	Path Planning	91	
7.6	Results	92	
7.6.1	Image Processing	92	
7.6.2	Three-Dimensional Reconstruction	93	
7.6.3	DLM	93	
7.6.4	Sensor and Platform Control	94	
7.7	Conclusion	95	
7.8	Acknowledgment	95	

CHAPTER 8 REAL-TIME IMAGE PROCESSING FOR IMAGE-BASED VISUAL SERVOING 99

Patrick Rives and Jean-Jacques Borrelly

8.1	Introduction	99
8.2	Image-Based Visual Servoing Requirements	100
8.2.1	Building an Application	104
8.3	Application to a Pipe Inspection Task	104
8.3.1	Image Processing Aspects	105
	Local Processing (Data-Based)	105
	Global Processing (Model-Based)	106
8.4	Conclusion	107

CHAPTER 9 PROVEN TECHNIQUES FOR ROBUST VISUAL SERVO CONTROL 109

K. Arbter, G. Hirzinger, J. Langwald, G.-Q. Wei, and P. Wunsch

9.1	Introduction	109
9.2	Robust Feature Extraction	111
9.2.1	The Hough-Transform	111
9.2.1.1	Efficient Computation of the HT	112
9.2.1.2	Discretization Effects	113
9.2.1.3	Results	113
9.2.2	Robust Color Classification	114
9.2.2.1	Color Training and Color Segmentationnnnn	115
9.2.2.2	Real-Time Implementation	116
9.2.2.3	Applications in Medical Visual Servoing	116
9.3	Model-Based Handling of Occlusion	118
9.3.1	Approach	118
9.3.1.1	Efficient Hidden Line Removal	119
9.3.1.2	Results	120
9.4	Multisensory Servoing	120
9.4.1	Linear Estimation Approach	121
9.4.2	Neural Network Approach	122
9.5	Conclusion	123

CHAPTER 10 GLOBAL SIGNATURES FOR ROBOT CONTROL AND RECONSTRUCTION 127

R. A. Hicks, D. J. Pettey, K. S. Daniilidis, and R. Bajcsy

10.1	Introduction	127
10.1.1	Problem Statement	127
10.1.2	Signatures	129
10.1.3	Panoramic Sensors	129
10.1.4	Overview of the Solution	129
10.1.5	Related Work	130
10.1.6	Contributions	130
10.2	Applications to Robotics	131
10.3	Calculating Signatures	132
10.3.1	Angles and Complex Logarithms	132
10.3.2	Applying the Residue Theorem	132
10.4	Simulation Results	134
10.5	Conclusion	134

CHAPTER 11 USING FOVEATED VISION FOR ROBUST OBJECT TRACKING: THREE-DIMENSIONAL HOROPTER ANALYSIS 137

*Naoki Oshiro, Atsushi Nishikawa, and
Fumio Miyazaki*

11.1	Introduction	137
11.2	Preliminaries	137
11.2.1	Horopter	137
11.2.2	Virtual Horopter	138
11.2.3	Pixel Horopter	138
11.3	Horopter Analysis	139
11.3.1	Method	139
11.3.2	Results and Discussion	140
11.4	Concluding Remarks	143

CHAPTER 12 EVALUATION OF THE ROBUSTNESS OF VISUAL BEHAVIORS THROUGH PERFORMANCE CHARACTERIZATION 145

*João P. Barreto, Paulo Peixoto, Jorge Batista, and
Helder Araujo*

12.1	Introduction	145
12.2	Control of the MDOF Binocular Tracking System	146
12.2.1	Monocular Smooth Pursuit: Pan/Tilt Block Diagram	146
12.2.2	Vergence Block Diagram	147
12.3	Reference Trajectories Generation Using Synthetic Images	148
12.4	Reference Trajectories Equations	149
12.4.1	Smooth Pursuit: Pan/Tilt Control System	149
12.4.1.1	Reference Trajectories Defined for the Actuators	149
12.4.1.2	Reference Test Signals Defined in Image: Static Camera Situation	149
12.4.1.3	Reference Test Signals Defined in Image: Camera Undergoing Pure Rotation	150
12.4.2	Vergence Control System	152
12.5	System Response to Motion	153

12.5.1	Smooth Pursuit: Pan/Tilt Control Algorithm	153
12.5.1.1	Step Response	153
12.5.1.2	Ramp Response	154
12.5.1.3	Parabola Response	154
12.5.1.4	Sinusoidal Response	155
12.5.2	Vergence Control System	155
12.6	Improvements in the Visual Processing	156
12.6.1	Target Position Estimation in Image	156
12.6.2	Target Velocity Estimation in the Image	156
12.7	Motor Performance and Global System Behavior	158
12.8	Improvements in Global Performance—Experimental Results	159
12.9	Summary and Conclusions	160

CHAPTER 13 ROBUST IMAGE PROCESSING AND POSITION-BASED VISUAL SERVOING 163

*W. J. Wilson, C. C. Williams Hulls, and
F. Janabi-Sharifi*

13.1	Introduction	163
13.2	Position-Based Visual Servoing and Image Processing	165
13.2.1	Position-Based Visual Servoing Overview	165
13.2.2	Adaptive Image Processing and Position-Based Visual Servoing	166
13.2.3	Feature Set Planning and Feature Switching	167
13.2.4	Integration of Multiple Sensors and Redundant Image Measurements	167
13.3	Directed Image Processing and Adaptive Windowing	167
13.3.1	Image Processing Associated with Different Feature Types	168
13.3.1.1	Hole Feature Extraction	168
13.3.1.2	Corner Feature Extraction	169
13.3.2	Accuracy of Feature Measurements	171
13.3.3	The Effects of Lens Focus	174
13.3.4	Binary Image Processing	177
13.3.5	Adaptive Windowing	178
13.3.6	Feature Switching	181

13.4	Feature Planning and Selection	182	
13.4.1	Criteria for Feature Selection	183	
13.4.2	Criteria for Task Constraints	183	
13.4.2.1	Vdowing	186	
13.4.3	Feature Extraction and Pose Estimation Criteria	187	
13.4.3.1	Type of Feature	187	
13.4.3.2	Size of Feature	187	
13.4.3.3	Number of Features	188	
13.4.3.4	Optical Angle	189	
13.4.3.5	Set Nonambiguity	189	
13.4.3.6	Set Apartness	189	
13.4.3.7	Set Noncollinearity	189	
13.4.3.8	Set Noncoplanarity	189	
13.4.3.9	Set Angle	190	
13.4.3.10	Sensitivity	190	
13.4.3.11	Durability	190	
13.4.3.12	Observability	190	
13.4.3.13	Controllability	191	
13.4.4	Off-Line Feature/Trajectory Planning	191	
13.4.5	On-Line Feature Selection	192	
13.5	Information Redundancy and Sensor Integration	193	
13.5.1	Role of Additional Sensor Information	193	
13.5.2	Interaction of Sensors and Sensor Integration	195	
13.5.3	Fusion of Measurement Data from Different Sensors	195	
13.5.4	Data Association and Outlier Rejection	196	
13.5.5	Camera Sensor Redundancy and the Effect on Image Processing	197	
13.6	Conclusions	199	

CHAPTER 14 VISION-BASED OBJECTIVE SELECTION FOR ROBUST BALLISTIC MANIPULATION 203

Bradley E. Bishop, and Mark W. Spong

14.1	Introduction	203
14.2	Visual Measurement Scheme	204
14.3	State Estimation and Prediction	206

14.4	Air Hockey	212
14.5	Conclusions and Future Work	218
14.6	Acknowledgments	219

CHAPTER 15 VISION-BASED AUTONOMOUS HELICOPTER RESEARCH AT CARNEGIE MELLON ROBOTICS INSTITUTE (1991-1998) 221

Omead Amidi, Takeo Kanade, and Ryan Miller

15.1	Introduction	221
15.2	Goals	222
15.2.1	Goal Applications	222
15.2.2	Goal Mission	223
15.3	Capabilities	223
15.3.1	Vision-Based Stability and Position Control	224
15.3.2	Precise Autonomous Flight: Takeoff, Trajectory Following, and Landing	225
15.3.3	Aerial Mapping	226
15.3.4	Object Recognition and Manipulation	227
15.4	Future Work	229
