# BRIEF CONTENTS

- Chapter 1**  
Elementary Materials Science  
Concepts 1
- Chapter 2**  
Electrical and Thermal Conduction  
in Solids 99
- Chapter 3**  
Elementary Quantum Physics 155
- Chapter 4**  
Bonding, the Band Theory  
of Solids, and Statistics 237
- Chapter 5**  
Semiconductors 305
- Chapter 6**  
Semiconductor Devices 403
- Chapter 7**  
Dielectric Materials  
and Insulation 511
- Chapter 8**  
Magnetic Properties  
and Superconductivity 599
- Appendix A**  
Major Symbols  
and Abbreviations 675
- Appendix B**  
Constants and Useful  
Information 680
- Appendix C**  
Elements to Uranium 681
- Index 683

# CONTENTS

## Chapter 1

### Elementary Materials Science Concepts 1

- 1.1 Atomic Structure 1
- 1.2 Bonding and Types of Solid 4
  - 1.2.1 Molecules and General Bonding Principles 4
  - 1.2.2 Covalently Bonded Solids: Diamond 5
  - 1.2.3 Metallic Bonding: Copper 8
  - 1.2.4 Ionically Bonded Solids: Salt 9
  - 1.2.5 Secondary Bonding 12
  - 1.2.6 Mixed Bonding 17
- 1.3 Kinetic Molecular Theory 19
  - 1.3.1 Mean Kinetic Energy and Temperature 19
  - 1.3.2 Molecular Velocity and Energy Distribution 26
- 1.4 Heat, Thermal Fluctuations, and Noise 30
- 1.5 Thermally Activated Processes 35
- 1.6 The Crystalline State 39
  - 1.6.1 Types of Crystals 39
  - 1.6.2 Bravais Lattices 46
  - 1.6.3 Miller Indices: Crystal Directions and Planes 48
  - 1.6.4 Allotropy and the Three Phases of Carbon 52
- 1.7 Crystalline Defects and Their Significance 54
  - 1.7.1 Point Defects: Vacancies and Impurities 54
  - 1.7.2 Line Defects: Edge and Screw Dislocations 57
  - 1.7.3 Planar Defects: Grain Boundaries 60
  - 1.7.4 Crystal Surfaces and Surface Properties 61

- 1.7.5 Stoichiometry, Nonstoichiometry, and Defect Structures 64

- 1.8 Single-Crystal Czochralski Growth 65
- 1.9 Glasses and Amorphous Semiconductors 67
  - 1.9.1 Glasses and Amorphous Solids 67
  - 1.9.2 Crystalline and Amorphous Silicon 70
- 1.10 Solid Solutions and Two-Phase Solids 72
  - 1.10.1 Isomorphous Solid Solutions: Isomorphous Alloys 72
  - 1.10.2 Phase Diagrams: Cu-Ni and Other Isomorphous Alloys 73
  - 1.10.3 Zone Refining and Pure Silicon Crystals 78
  - 1.10.4 Binary Eutectic Phase Diagrams and Pb-Sn Solders 80

Important Terms 86

Questions and Problems 89

## Chapter 2

### Electrical and Thermal Conduction in Solids 99

- 2.1 Classical Theory: The Drude Model 99
  - 2.1.1 Metals and Conduction by Electrons 99
- 2.2 Temperature Dependence of Resistivity: Ideal Pure Metals 106
- 2.3 Matthiessen's Rule 110
  - 2.3.1 Matthiessen's Rule and the Temperature Coefficient of Resistivity ( $\alpha$ ) 110
  - 2.3.2 Solid Solutions and Nordheim's Rule 119
- 2.4 Mixture Rules and Electrical Switches 124
  - 2.4.1 Heterogeneous Mixtures 124

- 2.4.2 Two-Phase Alloy (Ag–Ni) Resistivity and Electrical Contacts 127
- 2.5 Skin Effect: Conductor HF Resistance of a Conductor 129
- 2.6 The Hall Effect and Hall Devices 133
- 2.7 Thermal Conductivity 137
- Additional Topics 141
- 2.8 Thin Metal Films and Integrated Circuit Interconnections 141
- Important Terms 143
- Questions and Problems 145

### Chapter 3

## Elementary Quantum Physics 155

- 3.1 Photons 155
  - 3.1.1 The Photoelectric Effect 158
  - 3.1.2 Compton Scattering 162
  - 3.1.3 Black Body Radiation 165
- 3.2 The Electron as a Wave 167
  - 3.2.1 De Broglie Relationship 167
  - 3.2.2 Time-Independent Schrödinger Equation 170
- 3.3 Infinite Potential Well: A Confined Electron 175
- 3.4 Heisenberg's Uncertainty Principle 180
- 3.5 Tunneling Phenomenon: Quantum Leak 183
- 3.6 Potential Box: Three Quantum Numbers 190
- 3.7 Hydrogenic Atom 193
  - 3.7.1 Electron Wavefunctions 193
  - 3.7.2 Quantized Electron Energy 199
  - 3.7.3 Orbital Angular Momentum and Space Quantization 202
  - 3.7.4 Electron Spin and Intrinsic Angular Momentum  $S$  207
  - 3.7.5 Total Angular Momentum  $J$  210
- 3.8 The Helium Atom and the Periodic Table 212
  - 3.8.1 He Atom and Pauli Exclusion Principle 212
  - 3.8.2 Hund's Rule 216
- 3.9 Stimulated Emission and Lasers 217
  - 3.9.1 Stimulation Emission and Photon Amplification 217
  - 3.9.2 Helium–Neon Laser 220
  - 3.9.3 Laser Output Spectrum 223

- Additional Topics 225
- 3.10 Time-Dependent Schrödinger Equation 225
- Important Terms 227
- Questions and Problems 230

### Chapter 4

## Bonding, the Band Theory of Solids, and Statistics 237

- 4.1 Hydrogen Molecule: Molecular Orbital Theory of Bonding 237
- 4.2 Band Theory of Solids 243
- 4.3 Semiconductors 252
- 4.4 Electron Effective Mass 256
- 4.5 Energy Bands: Density of States 258
- 4.6 Statistics: Collections of Particles 264
  - 4.6.1 Boltzmann Classical Statistics 264
  - 4.6.2 Fermi–Dirac Statistics 265
- 4.7 Modern Theory of Metals 267
- 4.8 Fermi Energy Significance 272
  - 4.8.1 Metal–Metal Contacts: Contact Potential 272
  - 4.8.2 The Seebeck Effect and the Thermocouple 274
- 4.9 Thermionic Emission and Vacuum Tube Devices 281
  - 4.9.1 Thermionic Emission: Richardson–Dushman Equation 281
  - 4.9.2 Field-Assisted Emission: The Schottky Effect 284

Additional Topics 288

- 4.10 Band Theory of Metals: Electron Diffraction in Crystals 288

Important Terms 298

Questions and Problems 299

### Chapter 5

## Semiconductors 305

- 5.1 Intrinsic Semiconductors 306
  - 5.1.1 Silicon Crystal and Energy Band Diagram 306
  - 5.1.2 Electrons and Holes 308
  - 5.1.3 Conduction in Semiconductors 310
  - 5.1.4 Electron and Hole Concentrations 312

5.2	Extrinsic Semiconductors	320	6.4	Diffusion (Storage) Capacitance and the Small-Signal Model	427
5.2.1	<i>n</i> -Type Doping	320	6.5	Reverse Breakdown: Avalanche and Zener Breakdown	431
5.2.2	<i>p</i> -Type Doping	323	6.5.1	Avalanche Breakdown	431
5.2.3	Compensation Doping	325	6.5.2	Zener Breakdown	433
5.3	Temperature Dependence of Conductivity	330	6.6	Bipolar Transistor (BJT)	435
5.3.1	Carrier Concentration Temperature-Dependence	330	6.6.1	Common Base (CB) dc Characteristics	435
5.3.2	Drift Mobility: Temperature and Impurity Dependence	335	6.6.2	Common Base Amplifier	440
5.3.3	Conductivity Temperature Dependence	338	6.6.3	Common Emitter (CE) dc Characteristics	445
5.3.4	Degenerate and Nondegenerate Semiconductors	341	6.6.4	Low-Frequency Small-Signal Model	446
5.4	Recombination and Minority Carrier Injection	342	6.7	Junction Field Effect Transistor (JFET)	450
5.4.1	Direct and Indirect Recombination	342	6.7.1	General Principles	450
5.4.2	Minority Carrier Lifetime	344	6.7.2	JFET Amplifier	456
5.5	Diffusion and Conduction Equations, and Random Motion	351	6.8	Metal-Oxide-Semiconductor Field Effect Transistor (MOSFET)	460
5.6	Steady-State Diffusion and the Continuity Equation	358	6.8.1	Field Effect and Inversion	460
5.7	Optical Absorption	360	6.8.2	Enhancement MOSFET	462
5.8	Luminescence	364	6.8.3	Depletion MOSFET	466
5.9	Schottky Junction	366	6.8.4	Threshold Voltage	470
5.9.1	Schottky Diode	366	6.8.5	Ion Implanted MOS Transistors and Poly-Si Gates	472
5.9.2	Schottky Junction Solar Cell	371	6.9	Semiconductor Device Fabrication	475
5.10	Ohmic Contacts and Thermoelectric Coolers	374	6.9.1	Discrete Devices and Integrated Circuits	475
Additional Topics		379	6.9.2	Monolithic IC Fabrication: Planar Process	476
5.11	Direct and Indirect Band Gap Semiconductors	379	Additional Topics		492
5.12	Indirect Recombination	389	6.10	High-Frequency Small-Signal BJT Model	492
Important Terms		390	6.11	Shot Noise Generated by the <i>pn</i> Junction	497
Questions and Problems		392	Important Terms		499
<b>Chapter 6</b>			Questions and Problems		502
<b>Semiconductor Devices</b>		<b>403</b>	<b>Chapter 7</b>		
6.1	Ideal <i>pn</i> Junction	404	<b>Dielectric Materials and Insulation</b>		<b>511</b>
6.1.1	No Applied Bias: Open Circuit	404	7.1	Matter Polarization and Relative Permittivity	512
6.1.2	Forward Bias	409	7.1.1	Relative Permittivity: Definition	512
6.1.3	Reverse Bias	416	7.1.2	Dipole Moment and Electronic Polarization	513
6.2	<i>pn</i> Junction Band Diagram	421			
6.2.1	Open Circuit	421			
6.2.2	Forward and Reverse Bias	422			
6.3	Depletion Layer Capacitance of the <i>pn</i> Junction	425			

- 7.1.3 Polarization Vector  $\mathbf{P}$  516
  - 7.1.4 Local Field  $E_{loc}$  and Clausius–Mosotti Equation 520
  - 7.2 Electronic Polarization: Covalent Solids 522
  - 7.3 Polarization Mechanisms 524
    - 7.3.1 Ionic Polarization 524
    - 7.3.2 Orientational (Dipolar) Polarization 526
    - 7.3.3 Interfacial Polarization 528
    - 7.3.4 Total Polarization 529
  - 7.4 Frequency Dependence: Dielectric Constant and Dielectric Loss 531
  - 7.5 Gauss's Law and Boundary Conditions 540
  - 7.6 Dielectric Strength and Insulation Breakdown 546
    - 7.6.1 Dielectric Strength: Definition 546
    - 7.6.2 Dielectric Breakdown and Partial Discharges: Gases 547
    - 7.6.3 Dielectric Breakdown: Liquids 549
    - 7.6.4 Dielectric Breakdown: Solids 549
  - 7.7 Capacitor Dielectric Materials 557
    - 7.7.1 Typical Capacitor Constructions 557
    - 7.7.2 Dielectrics: Comparison 561
  - 7.8 Piezoelectricity, Ferroelectricity, and Pyroelectricity Phenomenology 565
    - 7.8.1 Piezoelectricity 565
    - 7.8.2 Piezoelectricity; Quartz Oscillators and Filters 571
    - 7.8.3 Ferroelectric and Pyroelectric Crystals 574
  - Additional Topics 579
  - 7.9 Electric Displacement and Depolarization Field 579
  - Important Terms 584
  - Questions and Problems 588
- Chapter 8**
- Magnetic Properties and Superconductivity 599**
- 8.1 Magnetization of Matter 599
    - 8.1.1 Magnetic Dipole Moment 599
    - 8.1.2 Atomic Magnetic Moments 601
    - 8.1.3 Magnetization Vector  $\mathbf{M}$  603
    - 8.1.4 Magnetizing Field or Magnetic Field Intensity,  $\mathbf{H}$  605
    - 8.1.5 Magnetic Permeability and Magnetic Susceptibility 606
  - 8.2 Magnetic Material Classifications 611
    - 8.2.1 Diamagnetism 611
    - 8.2.2 Paramagnetism 612
    - 8.2.3 Ferromagnetism 613
    - 8.2.4 Antiferromagnetism 614
    - 8.2.5 Ferrimagnetism 614
  - 8.3 Ferromagnetism Origin and the Exchange Interaction 615
  - 8.4 Saturation Magnetization and Curie Temperature 618
  - 8.5 Magnetic Domains: Ferromagnetic Materials 619
    - 8.5.1 Magnetic Domains 619
    - 8.5.2 Magnetocrystalline Anisotropy 621
    - 8.5.3 Domain Walls 623
    - 8.5.4 Magnetostriction 624
    - 8.5.5 Domain Wall Motion 625
    - 8.5.6 Polycrystalline Materials and the  $M$  versus  $H$  Behavior 626
    - 8.5.7 Demagnetization 631
  - 8.6 Soft and Hard Magnetic Materials 633
    - 8.6.1 Definitions 633
    - 8.6.2 Initial and Maximum Permeability 634
  - 8.7 Soft Magnetic Materials: Examples and Uses 635
  - 8.8 Hard Magnetic Materials: Examples and Uses 638
  - 8.9 Superconductivity 643
    - 8.9.1 Zero Resistance and the Meissner Effect 643
    - 8.9.2 Type I and Type II Superconductors 646
    - 8.9.3 Critical Current Density 649
  - 8.10 Superconductivity Origin 652
    - Additional Topics 653
  - 8.11 Magnetic Recording Materials 653
  - 8.12 Josephson Effect and Flux Quantization 659
  - Important Terms 662
  - Questions and Problems 666
