Hall

Contents

<i>Foreword</i>	<i>page</i> ix
<i>Series preface</i>	x
<i>Volume preface</i>	xii
<i>Acknowledgements</i>	xv
<i>Invocation</i>	xix
Part I Concepts, attitudes and values	
Chapter 1 Introduction: ecology for people	3
1.1 Ecosystems, change, ecology and people	3
1.2 People's lives and ecosystems	27
1.3 Involvements with ecosystems	30
1.4 Ecology, social justice and sustainability	33
Further reading	40
Chapter 2 Are there any guiding principles from ecological science?	41
2.1 Science and environmental decision making	41
2.2 Can we be guided by "ecological principles"?	51
2.3 Ecological principles as value judgements	55
Further reading	60
Chapter 3 Ecosystems: the conceptual basis	62
3.1 What use is the ecosystem concept?	62
3.2 Renewable but unrepeatable	67
3.3 Conceptual models, science and attitudes to ecosystems	68
3.4 Questions	73
Further reading	74
Chapter 4 Ecosystems, society and environmental change	76
4.1 Societal goals and ecosystems	76
4.2 Environmental changes – what is involved?	78
4.3 How does the biosphere react to change?	82
4.4 Are the changes seen as detrimental?	99
Further reading	104
Chapter 5 Wilderness, nature and gardens	105
5.1 Wilderness ecosystems	106
5.2 Wilderness and nature values	107

5.3	Managed ecosystems: nature reserves	117
5.4	Urban ecosystems and gardens	136
	Further reading	147
Part II Soil: a fundamental resource		
Chapter 6 Concepts of soil		
6.1	The significance of soil	151
6.2	Soil renewability and sustainability	151
6.3	Soil erosion and soil formation	158
6.4	The legacy of the past	160
	Further reading	161
		168
Chapter 7 Soils and environmental change		
7.1	Soil differentiation	169
7.2	Soils properties and processes	169
7.3	Sensitivity of soil properties and processes to environmental conditions	173
	Further reading	188
		197
Part III Productive ecosystems		
Chapter 8 Domesticated and managed ecosystems		
8.1	Domesticated and managed landscapes	201
8.2	Managed ecosystems: forests	201
8.3	Agricultural ecosystems and the environment	203
8.4	Sustainable agriculture	215
8.5	Organic farming	221
8.6	Decisions on land use type and land use practice	227
	Further reading	229
		237
Part IV Conclusions		
Chapter 9 Conclusions: environmental change and ecosystem management – attitudes and values		
9.1	Thought and action	241
9.2	The search for meaning; from hot to beautiful and a plurality of meanings	242
9.3	So: how should we view nature? What do we do for the best – how should we act – what are we trying to achieve and what should we be guided by? Concepts and practices which enable and facilitate ecosystems and societies	246
	Further reading	250
