

PERFORMANCE
ANALYSIS OF
TELECOMMUNICATIONS
AND LOCAL AREA
NETWORKS

Wah Chun Chan

Contents

Preface	ix
 1. INTRODUCTION TO TELECOMMUNICATION SYSTEMS	 1
1-1 Introduction	1
1-2 Examples of Telecommunication Systems	5
1-3 Elements of a Telecommunication System	13
1-4 Topological Structure of Telecommunication Networks	15
1-5 Signals and Their Characteristics	21
1-6 Transmission Media and Their Characteristics	21
1-7 Quality of Service in Telephone Networks	22
1-8 Fundamentals of Voice Traffic and Data Traffic	24
1-9 Outline of the Book	28
1-10 Summary	31
References	32
Problems	32
 2. TRANSMISSION SYSTEMS	 33
2-1 Introduction	33
2-2 Subscriber Loop Design	40
2-2-1 Basic Resistance Design	41
2-2-2 Basic Transmission Design	44
2-3 Unigauge Design for Telephone Customer Loop Plants	51
2-4 Signal Multiplexing	52
2-4-1 Space-Division Multiplexing	52
2-4-2 Frequency-Division Multiplexing	53
2-4-3 Time-Division Multiplexing	54

2-5	Digital Transmission Systems	55
2-5-1	Asynchronous Transmission	60
2-5-2	Synchronous Transmission	60
2-6	Optical Fiber Transmission Systems	62
2-7	Summary	65
	References	66
	Problems	66
3.	SWITCHING SYSTEMS	69
3-1	Introduction	69
3-2	Centralized Switching	72
3-3	Switching Techniques	76
3-3-1	Space-Division Switching	76
3-3-2	Time-Division Switching	77
3-3-3	Frequency-Division Switching	78
3-4	Congestion in Space-Division Switching Networks	79
3-4-1	Switching Matrices	82
3-4-2	Multistage Networks	84
3-4-3	Link Systems	87
	3-4-3-1 Two-Stage Link Systems	88
	3-4-3-2 Three-Stage Link Systems	90
	3-4-3-3 Three-Stage Link Systems Using a Collection Stage	92
3-5	Nonblocking Networks	96
3-6	Three-Stage Networks with Retrials	100
3-7	Congestion in Time-Division Switching Networks	101
3-8	Summary	112
	References	112
	Problems	113
4.	MODELING OF TRAFFIC FLOWS, SERVICE TIMES AND SINGLE-SERVER QUEUES	117
4-1	Introduction	117
4-2	The Poisson Input Process	121

4-2-1	Distribution for Number of Arrivals in a Fixed Time Interval	122
4-2-1-1	Superposition of Independent Poisson Input Traffic Flows	127
4-2-1-2	Decomposition of a Poisson Flow	130
4-2-2	The Interarrival Time Distribution	133
4-2-2-1	The Markov Property or Memoryless Property	136
4-2-2-2	Relationship between the Poisson Arrival Process and the Interarrival Times	136
4-3	The Service Time Distribution	138
4-4	The Residual Service Time Distribution	140
4-5	The Birth and Death Process	143
4-6	Little's Formula for Mean Values for a General Queue	154
4-7	The $M/M/1$ Queue	158
4-8	The Pollaczek-Khinchin Formulas for the $M/G/1$ Queue	168
4-9	The $GI/M/1$ Queue	186
4-10	The $M/G/1$ Queue with Priority Discipline	191
4-11	The $M/G/1$ Queue with Vacations	198
4-12	Summary	198
	Appendix A - Review of Probability Theory	200
	Appendix B - Review of Markov Chain Theory	206
	References	212
	Problems	213
5.	THE ERLANG LOSS AND DELAY SYSTEMS	224
5-1	Introduction	224
5-2	The Erlang Loss System	225
5-3	The Erlang Delay System	237
5-4	The Combined Delay and Loss System	245
5-5	The Outside Observer's Distribution and the Arriving Customer's Distribution	247

5-6	The Waiting Time Distribution Function for the Erlang Delay System with Service in Order of Arrival	251
5-7	The Waiting Time Distribution Function for the Combined Delay and Loss System with Service in Order of Arrival	256
5-8	Overflow Traffic	258
5-9	The Equivalent Random Method	263
5-10	Summary	276
	References	277
	Problems	277
6.	THE ENGSET LOSS AND DELAY SYSTEMS	284
6-1	Introduction	284
6-2	The Engset Loss System	284
6-3	The Arriving Customer's Distribution for the Engset Loss System	287
6-4	The Offered Load and Carried Load in the Engset Loss System	289
6-5	The Engset Delay System	292
6-6	The Waiting Time Distribution Function for the Engset Delay System with Service in Order of Arrival	294
6-7	The Offered Load and Carried Load in the Engset Delay System	296
6-8	The Mean Waiting Time in the Engset Delay System with Service in Order of Arrival	296
6-9	Summary	300
	References	301
	Problems	301
7.	INTRODUCTION TO LOCAL AREA NETWORKS	304
7-1	Introduction	304
7-2	Description of Local Area Networks	305
7-3	Channel Access Techniques	308
7-4	Fixed Assignment Access Methods	309
7-4-1	Frequency-Division Multiple Access	310

7-4-2	Time-Division Multiple Access	311
7-4-3	Code-Division Multiple Access	315
7-5	Random Access Methods	318
7-5-1	Pure ALOHA Networks	318
7-5-2	Pure ALOHA Networks with Captures	324
7-5-3	Slotted ALOHA Networks	325
7-5-4	Slotted ALOHA Networks with Captures	331
7-6	Central Control Access Methods	331
7-7	Summary	333
	References	334
	Problems	335
8.	POLLING NETWORKS	339
8-1	Introduction	339
8-2	Operation of Polling Networks	341
8-3	Performance Analysis of Polling Networks	342
8-4	Summary	353
	References	354
	Problems	354
9.	TOKEN RING NETWORKS	358
9-1	Introduction	358
9-2	Token Ring Networks	359
9-3	Operation of Token Ring Networks	360
9-4	Performance Analysis of Token Ring Networks	365
9-4-1	Average Transfer Delay for Multiple-Token Operation	367
9-4-2	Average Transfer Delay for Single-Token Operation	368
9-4-3	Average Transfer Delay for Single-Packet Operation	370
9-5	Operation of Slotted Ring Networks	373
9-6	Performance Analysis of Slotted Ring Networks	375
9-7	Register Insertion Rings	381

9-8	Operation of Register Insertion Ring Networks	381
9-9	Performance Analysis of Register Insertion Ring Networks	384
9-10	Summary	394
	References	394
	Problems	395
10.	RANDOM ACCESS NETWORKS	399
10-1	Introduction	399
10-2	Performance Analysis of Slotted ALOHA with Poisson Input	400
10-3	Performance Analysis of Slotted ALOHA with a Finite Number of Stations	405
	10-3-1 Throughput Analysis	408
	10-3-2 Average Transfer Delay	409
10-4	Performance Analysis of Slotted ALOHA by Equilibrium Point	414
10-5	Carrier-Sense Multiple Access (CSMA) Protocols	419
	10-5-1 Throughput Analysis of Non-Persistent CSMA	422
	10-5-2 Throughput Analysis of Slotted Non-Persistent CSMA	428
10-6	Carrier-Sense Multiple Access with Collision Detection (CSMA/CD) Protocols	432
10-7	Summary	443
	References	444
	Problems	445
	Appendix A - Determination of q_n and q_r	449
	Appendix B - Determination of the Limiting Values of q_n and q_r	453
	Answer to Selected Problems	456
	Index	462
