

# Behaviour of steel structures in seismic areas

STESSA 2000

Federico M. Mazzolani  
Robert Tremblay  
Editors

## Table of contents

Preface	XIII
Organization	XV
 <i>Material and member behaviour</i>	
New trends in the evaluation of available ductility of steel members <i>A.Anastasiadis, V.Gioncu &amp; F.M.Mazzolani</i>	3
ASTM A913 grades 50 and 65: Steels for seismic applications <i>S.Bouchard &amp; G.Axmman</i>	11
Influence of strain-rate on the behaviour of steel members <i>V.Gioncu</i>	19
Modeling of cracking and local buckling in steel frames by using plastic hinges with damage <i>P.Inglessis, S.Medina, A.López &amp; J.Flórez-López</i>	27
Buckling-restrained braces as hysteretic dampers <i>M.Iwata, T.Kato &amp; A.Wada</i>	33
Seismic performance of brace fuse elements for concentrically steel braced frames <i>M.Rezai, H.G.L.Prion, R.Tremblay, N.Bouatay &amp; P.Timler</i>	39
Cyclic elasto-plastic analysis of steel members <i>I.H.P.Mamaghani</i>	47
Member response to strong pulse seismic loading <i>G.Mateescu &amp; V.Gioncu</i>	55
Calibration of thin-walled members ductility <i>A.Moldovan, D.Petcu &amp; V.Gioncu</i>	63
Fatigue damage modelling of steel structures <i>R.Perera, S.Gómez &amp; E.Alarcón</i>	73
Performance of high strength CFT columns under seismic loading <i>A.H.Varma, J.M.Ricles, R.Sause &amp; L.W.Lu</i>	79

## Connections

Monotonic and cyclic analysis of bolted T-stubs <i>S.Ádány &amp; L. Dunai</i>	89
Experimental studies on cyclic behaviour modes of base-plate connections <i>S.Ádány, L. Calado &amp; L. Dunai</i>	97
Cyclic behaviour of the shear connection component in composite joints <i>J.M.Aribert &amp; A. Lachal</i>	105
The behaviour of compression welds and carrying capacity with earthquake effects <i>K. Badamchi</i>	113
Monotonic and cyclic behaviour of composite beam-column connections <i>J.G.Beutel, D.P.Thambiratnam &amp; N.Perera</i>	119
Effect of column straightening protocol on connection performance <i>R.Bjorhovde, L.J.Goland &amp; D.J.Benac</i>	125
Cyclic testing of flush end-plate semi-rigid steel connections <i>B.M.Broderick &amp; A.W.Thomson</i>	135
Welded plate and T-stub tests and impact on structural behavior of moment frame connections <i>F.W.Brust, P.Dong &amp; T.Kilinski</i>	141
Cyclic behaviour of steel beam-to-column joints with a concrete slab <i>C.A.Castiglioni, C.Bernuzzi &amp; L. Calado</i>	147
Characterization of components in steel and composite connections under cyclic loading <i>P.J.S.Cruz, L. Calado &amp; L. Simões da Silva</i>	155
Cyclic behavior of semi-rigid angle connections: A comparative study of tests and modeling <i>G.De Matteis, R.Landolfo &amp; L. Calado</i>	165
Influence of loading asymmetry on the cyclic behaviour of beam-to-column joints <i>D.Dubina, A.L.Ciutina &amp; A. Stratan</i>	175
Cyclic behaviour of bolted T-stubs: Experimental analysis and modelling <i>C.Faella, V.Piluso &amp; G.Rizzano</i>	183
Hysteretic behavior of steel moment resisting column bases <i>M.Fahmy, B.Stojadinovic &amp; S.C.Goel</i>	191
Experiment and analysis of bolted semi-rigid beam-column connections Part I: Cyclic loading experiment <i>K.Kasai, Y.Xu &amp; A. Mayangarum</i>	199
Experiment and analysis of bolted semi-rigid beam-column connections Part II: 3-D finite element analysis of the connections using angles <i>Y.Xu, K.Kasai &amp; C.Mao</i>	207
Fracture of beam-to-column connection simulated by means of the shaking table test using the inertial loading equipment <i>Y.Matsumoto, S.Yamada &amp; H.Akiyama</i>	215

Quality assurance for welding of Japanese welded beam-to-column connections <i>M. Nakashima</i>	223
Experimental studies on post-tensioned seismic resistant connections for steel frames <i>J. M. Ricles, R. Sause, M. M. Garlock, S. W. Peng &amp; L. W. Lu</i>	231
Inelastic seismic response of frame fasteners for steel roof decks <i>C. A. Rogers &amp; R. Tremblay</i>	239
Tests on the strain rate effects on beam-to-column steel connection <i>L. Sanchez &amp; A. Plumier</i>	247
Dynamic behavior of composite structures with composite connections <i>L. Simões da Silva, P. J. S. Cruz &amp; L. Calado</i>	255
Improvement of seismic behaviour of beam-to-column joints using tapered flanges <i>P. Sotirov, N. Rangelov &amp; J. Milev</i>	265
Comparison of seismic capacity between post-Northridge and post-Kobe beam-to-column connections <i>K. Suita, M. Nakashima &amp; M. D. Engelhardt</i>	271
Seismic responses of steel reduced beam section to weak panel zone moment joints <i>K. C. Tsai &amp; W. Z. Chen</i>	279
Experimental method of the full scale shaking table test using the inertial loading equipment <i>S. Yamada, Y. Matsumoto &amp; H. Akiyama</i>	287
 <i>Codification, design and application</i>	
Parametric analysis of the dynamic behaviour of ENEL towers in Naples by means of 'minimum' model <i>P. Belli &amp; F. Guarracino</i>	295
Serviceability and stress control in seismic design of steel structures <i>B. Calderoni &amp; A. De Martino</i>	303
Romanian new Code for the design of steel structures subjected to seismic loads <i>C. Dalban, P. Ioan, S. Dima &amp; St. Spanu</i>	311
Lions' Gate Bridge North Approach – Seismic retrofit <i>D. J. Dowdell &amp; B. A. Hamersley</i>	319
Seismic design and response of a 14-story concentrically braced steel building <i>L. Martinelli, F. Perotti &amp; A. Bozzi</i>	327
Seismic behavior of steel lattice telecommunication towers <i>G. McClure, M. Lapointe &amp; M. A. Khedr</i>	335
Seismic upgrading of existing steel frames by a bracing system installed with fully mechanical interfaces <i>K. Ohi</i>	339

Investigation and analysis of damage to expressway tollgate structures caused by the Hyogoken-Nanbu earthquake <i>K. Suita, K. Onikawa, Y. Mitani, S. Yamada &amp; M. Arashiyama</i>	345
Inelastic behaviour of a 52-storey steel frame building <i>C. E. Ventura &amp; Y. Ding</i>	353
<i>Base isolation and energy dissipation</i>	
A new ADAS system for seismic retrofitting of framed structures by means of the new hysteretical 'I' shaped device <i>L. Anania, A. Badalà &amp; S. Costa</i>	363
Active base isolation of m.d.o.f. structures by a time-convolution algorithm <i>A. Baratta &amp; O. Corbi</i>	371
Effectiveness of viscous damped bracing systems for steel frames <i>A. Chiarugi, S. Sorace &amp; G. Terenzi</i>	379
Non-invasive passive energy dissipation systems for the seismic design and retrofit of steel structures <i>C. Christopoulos &amp; A. Filiatrault</i>	387
Earthquake protection of buildings and bridges with viscous energy dissipation devices <i>D. Di Marzo, A. Mandara &amp; G. Serino</i>	395
Seismic performance of moment resistant steel frame with hysteretic damper <i>Y. H. Huang, A. Wada, H. Sugihara, M. Narikawa, T. Takeuchi &amp; M. Iwata</i>	403
Seismic redesign of steel frames by local insertion of dissipating devices <i>M. G. Mulas, M. Arcelaschi &amp; J. E. Martinez-Rueda</i>	411
Seismic dampers utilization and design for steel structures <i>W. Pong</i>	419
Earthquake resistant performance of moment resistant steel frames with damper <i>M. Yamaguchi, S. Yamada, A. Wada, M. Ogihara, M. Narikawa, T. Takeuchi &amp; Y. Maeda</i>	425
<i>Global behaviour</i>	
Effects of repeated seismic events on structures <i>C. Amadio, M. Fragiaco, S. Rajgelj &amp; F. Scarabelli</i>	435
Toward a consistent methodology for ductility checking <i>A. Anastasiadis, V. Gioncu &amp; F. M. Mazzolani</i>	443
Numerical investigation of the q-factor for steel frames with semi-rigid and partial-strength joints <i>J. M. Aribert &amp; D. Grecea</i>	455
Composite frames under dynamic loadings: Numerical and experimental analysis <i>L. Calado, J. M. Proença, L. Simões da Silva &amp; P. J. S. Cruz</i>	463

Analytical study of buildings constructed with riveted semi-rigid connections <i>K.C.Chessman &amp; M.Bruneau</i>	471
Seismic response of steel columns under multi component seismic motion <i>M.Como, R.Ramasco &amp; M.De Stefano</i>	479
Establishing seismic force reduction factors for steel structures <i>R.G.Driver, D.J.L. Kennedy &amp; G.L. Kulak</i>	487
Seismic response of tied and trussed eccentrically braced frames <i>A.Gherzi, F.Neri, P.P.Rossi &amp; A.Perretti</i>	495
Large scale tests of steel frames with semi-rigid connections under quasi-static cyclic loading <i>M.Iványi &amp; G.Varga</i>	503
Influence of P- $\Delta$ effect on a proposed procedure for seismic design of steel frames <i>F.Neri</i>	511
Steel building response under biaxial seismic excitations <i>R.Ramasco, G.Magliulo &amp; G.Faella</i>	519
Influence of brace slenderness on the seismic response of concentrically braced steel frames <i>R.Tremblay</i>	527
Inelastic seismic analysis of eccentrically loaded steel bridge piers <i>T.Usami &amp; Q.Y.Liu</i>	535
Steel panel shear wall – Analysis on the center core steel panel shear wall system <i>M.Yamada &amp; T.Yamakaji</i>	541
 <i>Performance based design and moment resisting frames</i>	
Earthquake resistance of frames with unsymmetric bolted connections <i>D.Beg, P.Skuber &amp; C.Remec</i>	551
Inelastic dynamic and static analyses for steel MRF seismic design <i>B.Calderoni &amp; Z.Rinaldi</i>	559
Seismic performance of dual steel moment-resisting frames <i>D.Dubina, A.Stratan, G.De Matteis &amp; R.Landolfo</i>	569
Comparative study on seismic design procedures for steel MR frames according to the force-based approach <i>B.Faggiano, G.De Matteis &amp; R.Landolfo</i>	577
Optimum bending and shear stiffness distribution for performance based design of rigid and braced multi-story steel frames <i>C.J.Gantes, I.Vayas, A.Spiliopoulos &amp; C.C.Pouangare</i>	585
Seismic behavior of post-tensioned steel frames <i>M.M.Garlock, J.M.Ricles, R.Sause, C.Zhao &amp; L.W.Lu</i>	593
The effect of connection hysteretic behaviour on seismic damage to moment resisting steel frames <i>R.Landolfo, G.Della Corte &amp; G.De Matteis</i>	601

Performance based design of seismic-resistant MR-frames <i>F.M. Mazzolani, R. Montuori &amp; V. Piluso</i>	611
Energy based methods for evaluation of behaviour factor for moment resisting frames <i>J. Milev, P. Sotirov &amp; N. Rangelov</i>	619
Plastic design of steel frames with dog-bone beam-to-column joints <i>R. Montuori &amp; V. Piluso</i>	627
Behaviour of MRFs subjected to near-field earthquakes <i>L.D. Tirca</i>	635
Evaluation of the response of moment frames in respect to various performance criteria <i>A.I. Vayas &amp; B.F. Dinu</i>	643
Low-cycle fatigue behaviour of moment resisting frames <i>I. Vayas &amp; A. Spiliopoulos</i>	649
 <i>SAC steel project</i>	
SAC program to assure ductile connection performance <i>C.W. Roeder</i>	659
Development of the free flange steel moment connection <i>J. Choi, B. Stojadinović &amp; S.C. Goel</i>	667
Fracture mechanics analysis of moment frame joint incorporating welding effects <i>P. Dong, J. Zhang &amp; F.W. Brust</i>	675
Reduced beam section welded steel moment frame connections <i>G.T. Fry, S.L. Jones &amp; M.D. Engelhardt</i>	681
Relating ground motion spectral information to structural deformation demands <i>A. Gupta &amp; H. Krawinkler</i>	687
Reinforced steel moment-resisting joints <i>T. Kim, A.S. Whittaker &amp; V.V. Bertero</i>	695
Cyclic modeling of T-stub bolted connections <i>R.T. Leon &amp; J.A. Swanson</i>	703
Inelastic finite element studies of unreinforced welded beam-to-column moment connections <i>C. Mao, J.M. Ricles, L.W. Lu &amp; J.W. Fisher</i>	711
Seismic testing of welded beam-to-column moment connections <i>C. Mao, J.M. Ricles, L.W. Lu &amp; J.W. Fisher</i>	719
Seismic design of sixteen-bolt extended stiffened moment end-plate connections <i>T.W. Mays, E.A. Sumner, R.H. Plaut &amp; T.M. Murray</i>	727
'Heavy' moment end-plate connections subjected to seismic loading <i>E.A. Sumner, T.W. Mays &amp; T.M. Murray</i>	735
Seismic response of 3-D steel structure with Bi-directional columns <i>H. Tagawa &amp; G.A. MacRae</i>	741

Cyclic instability of steel moment connections with reduced beam sections <i>C.-M. Uang &amp; C.-C. Fan</i>	747
Effects of lateral bracing and system restraint on the behavior of RBS moment connections <i>Q. S. Yu &amp; C.-M. Uang</i>	755
Author index	763
