<b>PREFACE</b> .....	<b>xi</b>
<b>CHAPTER 1</b>	
<b>INTRODUCTION TO ELECTROMAGNETIC SCATTERING BY A SINGLE PARTICLE</b> .....	<b>1</b>
<b>1 Basic Scattering Parameters</b>	<b>2</b>
1.1 Scattering Amplitudes and Cross Sections	2
1.2 Scattering Amplitude Matrix	6
<b>2 Rayleigh Scattering</b>	<b>9</b>
2.1 Rayleigh Scattering by a Small Particle	9
2.2 Rayleigh Scattering by a Sphere	10
2.3 Rayleigh Scattering by an Ellipsoid	12
2.4 Scattering Dyads	14
<b>3 Integral Representations of Scattering and         Born Approximation</b>	<b>16</b>
3.1 Integral Expression for Scattering Amplitude	16
3.2 Born Approximation	18
<b>4 Plane Waves, Cylindrical Waves, and         Spherical Waves</b>	<b>21</b>
4.1 Cartesian Coordinates: Plane Waves	21
4.2 Cylindrical Waves	22
4.3 Spherical Waves	24
<b>5 Acoustic Scattering</b>	<b>30</b>
<b>6 Scattering by Spheres, Cylinders, and Disks</b>	<b>32</b>
6.1 Mie Scattering	32
6.2 Scattering by a Finite Length Cylinder Using the Infinite Cylinder Approximation	41
6.3 Scattering by a Disk Based on the Infinite Disk Approximation	46
<b>References and Additional Readings</b>	<b>52</b>

**CHAPTER 2**  
**BASIC THEORY OF ELECTROMAGNETIC SCATTERING 53**

<b>1</b>	<b>Dyadic Green's Function</b>	<b>54</b>
1.1	Green's Functions	54
1.2	Plane Wave Representation	55
1.3	Cylindrical Waves	57
1.4	Spherical Waves	59
<b>2</b>	<b>Huygens' Principle and Extinction Theorem</b>	<b>60</b>
<b>3</b>	<b>Active Remote Sensing and Bistatic Scattering Coefficients</b>	<b>66</b>
<b>4</b>	<b>Optical Theorem</b>	<b>68</b>
<b>5</b>	<b>Reciprocity and Symmetry</b>	<b>73</b>
5.1	Reciprocity	73
5.2	Reciprocal Relations for Bistatic Scattering Coefficients and Scattering Amplitudes	75
5.3	Symmetry Relations for Dyadic Green's Function	79
<b>6</b>	<b>Eulerian Angles of Rotation</b>	<b>81</b>
<b>7</b>	<b>T-Matrix</b>	<b>83</b>
7.1	T-Matrix and Relation to Scattering Amplitudes	83
7.2	Unitarity and Symmetry	88
<b>8</b>	<b>Extended Boundary Condition</b>	<b>91</b>
8.1	Extended Boundary Condition Technique	91
8.2	Spheres	97
	8.2.1 <i>Scattering and Absorption for Arbitrary Excitation</i>	100
	8.2.2 <i>Mie Scattering of Coated Sphere</i>	102
8.3	Spheroids	104
	<b>References and Additional Readings</b>	<b>106</b>

<b>CHAPTER 3</b>	
<b>FUNDAMENTALS OF RANDOM SCATTERING .....</b>	<b>107</b>
1 Radar Equation for Conglomeration of Scatterers	108
2 Stokes Parameters and Phase Matrices	116
2.1 Elliptical Polarization, Stokes Parameters, Partial Polarization	116
2.2 Stokes Matrix	123
2.3 Scattering per Unit Volume and Phase Matrix	124
2.4 Rayleigh Phase Matrix	127
2.5 Phase Matrix of Random Media	129
3 Fluctuating Fields	131
3.1 Coherent and Incoherent Fields	131
3.2 Probability Distribution of Scattered Fields and Polarimetric Description	132
4 Specific Intensity	140
5 Passive Remote Sensing	145
5.1 Planck's Radiation Law and Brightness Temperature	145
5.2 Kirchhoff's Law	149
5.3 Fluctuation Dissipation Theorem	152
5.4 Emissivity of Four Stokes Parameters	155
6 Correlation Function of Fields	161
References and Additional Readings	165

<b>CHAPTER 4</b>	
<b>CHARACTERISTICS OF DISCRETE SCATTERERS AND ROUGH SURFACES .....</b>	<b>167</b>
1 Ice	168
2 Snow	170
3 Vegetation	171
4 Atmosphere	172

<b>5</b>	<b>Correlation Function and Pair Distribution Function</b>	<b>173</b>
5.1	Correlation Function	174
5.2	Pair Distribution Function	176
<b>6</b>	<b>Gaussian Rough Surface and Spectral Density</b>	<b>179</b>
<b>7</b>	<b>Soil and Rocky Surfaces</b>	<b>184</b>
<b>8</b>	<b>Ocean Surface</b>	<b>185</b>
	<b>References and Additional Readings</b>	<b>195</b>

## **CHAPTER 5**

### **SCATTERING AND EMISSION BY LAYERED MEDIA ... 199**

<b>1</b>	<b>Incoherent Approach of Radiative Transfer</b>	<b>200</b>
<b>2</b>	<b>Wave Approach</b>	<b>203</b>
2.1	Reflection and Transmission	203
2.2	Dyadic Green's Function for Stratified Medium	207
2.3	Brightness Temperatures for a Stratified Medium with Temperature Distribution	212
<b>3</b>	<b>Comparison Between Incoherent Approach and Coherent Approach</b>	<b>217</b>
<b>4</b>	<b>Applications to Passive Remote Sensing of Soil</b>	<b>220</b>
	<b>References and Additional Readings</b>	<b>229</b>

## **CHAPTER 6**

### **SINGLE SCATTERING AND APPLICATIONS..... 231**

<b>1</b>	<b>Single Scattering and Particle Position Correlation</b>	<b>232</b>
<b>2</b>	<b>Applications of Single Scattering</b>	<b>237</b>
2.1	Synthetic Aperture Radar	237
2.2	Interferometric SAR	248
2.3	Active Remote Sensing of Half-Space Random Media	252
	<b>References and Additional Readings</b>	<b>258</b>

<b>CHAPTER 7</b>		
<b>RADIATIVE TRANSFER THEORY .....</b>		<b>259</b>
<b>1</b>	<b>Scalar Radiative Transfer Theory</b>	<b>260</b>
<b>2</b>	<b>Vector Radiative Transfer Theory</b>	<b>269</b>
2.1	Phase Matrix of Independent Scattering	269
2.2	Extinction Matrix	272
2.3	Emission Vector	275
2.4	Boundary Conditions	283
	<b>References and Additional Readings</b>	<b>286</b>

<b>CHAPTER 8</b>		
<b>SOLUTION TECHNIQUES OF RADIATIVE TRANSFER THEORY .....</b>		<b>287</b>
<b>1</b>	<b>Iterative Method</b>	<b>288</b>
1.1	Iterative Procedure	288
1.2	Integral Equation for Scattering Problems	293
1.3	Active Remote Sensing of a Half-Space of Spherical Particles	298
1.4	Active Remote Sensing of a Layer of Nonspherical Particles	303
	1.4.1 <i>Numerical Illustrations with Finite Dielectric Cylinders</i>	310
1.5	Second-Order Scattering from Isotropic Point Scatterers	322
<b>2</b>	<b>Discrete Ordinate-Eigenanalysis Method</b>	<b>324</b>
2.1	Radiative Transfer Solution for Laminar Structures	324
2.2	Numerical Procedure of Discrete Ordinate Method: Normal Incidence	328
2.3	Active Remote Sensing: Oblique Incidence	337
2.4	Discrete Ordinate Method for Passive Remote Sensing	343
2.5	Passive Remote Sensing of a Three-Dimensional Random Medium	349
2.6	Passive Remote Sensing of a Layer of Mie Scatterers Overlying a Dielectric Half-Space	352

<b>3</b>	<b>Invariant Imbedding</b>	<b>362</b>
3.1	One-Dimensional Problem	363
3.2	Passive Remote Sensing of a Three-Dimensional Scattering Medium with Inhomogeneous Profiles	370
3.3	Passive Remote Sensing of a Three-Dimensional Random Medium	373
3.4	Thermal Emission of Layers of Spherical Scatterers in the Presence of Inhomogeneous Absorption and Temperature Profiles	374
<b>4</b>	<b>Diffusion Approximation</b>	<b>380</b>
	<b>References and Additional Readings</b>	<b>386</b>

## **CHAPTER 9**

### **ONE-DIMENSIONAL RANDOM ROUGH SURFACE**

<b>SCATTERING</b> .....	<b>389</b>
<b>1</b> <b>Introduction</b>	<b>390</b>
<b>2</b> <b>Statistics of Random Rough Surface</b>	<b>392</b>
2.1     Statistics, Correlation Function and Spectral Density	392
2.2     Characteristic Functions	396
<b>3</b> <b>Small Perturbation Method</b>	<b>397</b>
3.1     Dirichlet Problem for One-Dimensional Surface	397
3.2     Neumann Problem for One-Dimensional Surface	403
<b>4</b> <b>Kirchhoff Approach</b>	<b>407</b>
4.1     Dirichlet Problem for One-Dimensional Surface	408
4.2     Neumann Problem for One-Dimensional Surface	415
<b>References and Additional Readings</b>	<b>417</b>

<b>INDEX</b> .....	<b>419</b>
