

FLOOD FREQUENCY ANALYSIS

A. Ramachandra Rao
Khaled H. Hamed

Contents

List of Tables	xi
List of Figures	xv
Preface	xix
Acknowledgments	xxi
1 Introduction	1
1.1 Hydrologic Frequency Analysis	1
1.2 General Aspects and Approaches	1
1.3 Other Models	4
1.4 Return Period, Probability, and Plotting Positions	6
1.5 Flood Frequency Models	8
1.6 Hydrologic Risk	10
1.7 Regionalization	11
1.8 Tests on Hydrologic Data	12
1.8.1 Test for Independence and Stationarity	13
1.8.2 Homogeneity and Stationarity Tests	14
1.8.3 Test for Outliers	16
2 Selection and Evaluation of Parent Distributions:	
Conventional Moments	23
2.1 Moments of Distributions and Their Sample Estimates	23
2.2 Moment Ratio Diagrams (MRDs)	26
2.3 Probability Plots	36
2.4 Selection of Distributions	38
2.4.1 Chi-Square and Psi Tests	41
2.4.2 Kolmogorov-Smirnov Test	43
2.5 Regional Homogeneity and Regionalization	47

3	Selection and Evaluation of Parent Distributions: Probability Weighted Moments and L-Moments	53
3.1	Moments of Distributions and Their Sample Estimates	53
3.2	L-Moment Ratio Diagrams	56
3.3	Tests Based on L-Moments	61
3.3.1	Goodness-of-Fit Tests	61
3.3.2	Regional Homogeneity Tests	62
3.4	A Case Study	64
3.4.1	Data and Preliminary Analysis	64
3.4.2	Regional Homogeneity	65
3.4.3	Regional Quantile Estimates	69
4	Parameter and Quantile Estimation	73
4.1	Introduction	73
4.2	Parameter Estimation	73
4.2.1	Method of Moments (MOM)	74
4.2.2	Method of Maximum Likelihood (MLM)	75
4.2.3	Method of Probability Weighted Moments (PWM)	75
4.3	Quantile Estimation	76
4.4	Confidence Intervals	77
4.4.1	Standard Error in the MOM	78
4.4.2	Standard Error in the MLM	80
4.4.3	Standard Error in the PWM	81
5	Normal and Related Distributions	83
5.1	Normal Distribution	83
5.1.1	Introduction	83
5.1.2	Parameter Estimation	85
	Method of Moments	85
	Maximum Likelihood (ML) Method	86
	PWM Method	87
5.1.3	Quantile Estimates	90
5.1.4	Standard Error	92
	Method of Moments	92
	ML Method	92
	PWM Method	94
5.2	Two-Parameter Lognormal (LN(2)) Distribution	96
5.2.1	Introduction	96
5.2.2	Parameter Estimation	97
	Method of Moments	97
	Maximum Likelihood (ML) Method	98
	PWM Method	99

5.2.3	Quantile Estimates	101
5.2.4	Standard Error	103
	Method of Moments	103
	ML Method	104
5.3	Three-Parameter Lognormal (LN(3)) Distribution	107
5.3.1	Introduction	107
5.3.2	Parameter Estimation	109
	Method of Moments	109
	The Maximum Likelihood (ML) Method	110
	PWM Method	112
5.3.3	Quantile Estimates	115
5.3.4	Standard Error	117
	Method of Moments	117
	ML Method	119
6	The Gamma Family	127
6.1	Exponential Distribution	127
6.1.1	Introduction	127
6.1.2	Parameter Estimation	128
	Method of Moments	128
	Maximum Likelihood (ML) Method	130
	PWM Method	131
6.1.3	Quantile Estimates	133
6.1.4	Standard Error	135
	Method of Moments	135
	ML Method	136
	PWM Method	137
6.2	Two-Parameter Gamma (G(2)) Distribution	140
6.2.1	Introduction	140
6.2.2	Parameter Estimation	141
	Method of Moments	141
	Maximum Likelihood (ML) Method	142
	PWM Method	144
6.2.3	Quantile Estimates	146
6.2.4	Standard Errors	150
	Method of Moments	150
	ML Method	150
6.3	Pearson (3) Distribution	154
6.3.1	Introduction	154
6.3.2	Parameter Estimation	156
	Method of Moments	156
	Maximum Likelihood (ML) Method	157
	PWM Method	159

6.3.3	Quantile Estimation	163
6.3.4	Standard Errors	165
	Method of Moments	165
	ML Method	165
6.4	Log-Pearson (3) Distribution	170
6.4.1	Introduction	170
6.4.2	Studies on Skewness Coefficients	174
6.4.3	Parameter Estimation	175
	Method of Moments	175
	Maximum Likelihood (ML) Method	176
	PWM Method	177
6.4.4	Quantile Estimation	181
6.4.5	Standard Error	183
	Method of Moments	183
	ML Method	186
6.5	U.S. Water Resources Council Method (WRCM)	191
6.5.1	Introduction	191
6.5.2	Frequency Analysis Procedure by the WRCM	192
6.5.3	Outlier Tests	199
6.5.4	Confidence Limits	200
7	Extreme Value Distributions	207
7.1	Generalized Extreme Value (GEV) Distribution	207
7.1.1	Parameter Estimation	208
	Method of Moments	208
	Maximum Likelihood (ML) Method	212
	PWM Method	216
7.1.2	Quantile Estimates	221
7.1.3	Standard Error	222
	Method of Moments	222
	ML Method	223
	PWM Method	225
7.2	The Extreme Value Type I EV(1) Distribution	229
7.2.1	Parameter Estimation	232
	Method of Moments	232
	Maximum Likelihood (ML) Method	232
	PWM Method	234
7.2.2	Quantile Estimates	236
7.2.3	Standard Error	238
	Method of Moments	238
	ML Method	239
	PWM Method	240
7.3	Weibull Distribution	241

7.3.1	Parameter Estimation	243
	Method of Moments	243
	Maximum Likelihood (ML) Method	245
	PWM Method	246
7.3.2	Quantile Estimates	249
7.3.3	Standard Errors	251
	Method of Moments	251
	ML Method	251
8	The Wakeby Distribution	259
8.1	The Five-Parameter Wakeby Distribution (WAK(5))	259
8.1.1	Introduction	259
8.1.2	Parameter Estimation	260
8.1.3	Quantile Estimation	265
8.1.4	Standard Error	265
8.2	The Four-Parameter Wakeby Distribution (WAK(4))	267
8.2.1	Introduction	267
8.2.2	Parameter Estimation	267
8.2.3	Quantile Estimation	269
8.2.4	Standard Error	271
8.3	The Generalized Pareto Distribution	271
8.3.1	Introduction	271
8.3.2	Parameter Estimation	272
	Method of Moments	272
	Maximum Likelihood (ML) Method	275
	PWM Method	277
8.3.3	Quantile Estimation	281
8.3.4	Standard Error	284
	Method of Moments	284
	ML Method	285
	PWM Method	285
9	The Logistic Distribution	291
9.1	Logistic Distribution	291
9.1.1	Introduction	291
9.1.2	Parameter Estimation	291
	Method of Moments	291
	Maximum Likelihood (ML) Method	292
	PWM Method	294
9.1.3	Quantile Estimation	297
9.1.4	Standard Error	298
	Method of Moments	298
	ML Method	299

PWM Method	300
9.2 Generalized Logistic Distribution	302
9.2.1 Introduction	302
9.2.2 Parameter Estimation	304
Method of Moments	304
Region I: $-10 < C_s < 10$; $-1/3 < k < 1/3$	306
Region II: $0 < C_s < 10$; $1/3 < k < 1/2$	306
Region III: $-10 < C_s < 0$; $-1/2 < k < -1/3$	306
The Maximum Likelihood (ML) Method	307
PWM Method	311
9.2.3 Quantile Estimation	314
9.2.4 Standard Error	316
Method of Moments	316
ML Method	317
10 Computer Program	323
10.1 Introduction	323
10.2 Description of Program	323
References	327
Index	343
