

ENVIRONMENTAL SOIL SCIENCE

Second Edition, Revised and Expanded

Complex reaction (chelation)

Kim H. Tan

CONTENTS

Preface to the Second Edition	iii
Preface to the First Edition	ix
Chapter 1 SOILS AND THE ENVIRONMENT	1
1.1 Definition and Concept of Soils	1
1.2 Pedologic Concept of Soils	3
1.3 Soil Orders	8
1.3.1 Entisols	10
1.3.2 Gelisols	11
1.3.3 Inceptisols	12
1.3.4 Mollisols	13
1.3.5 Spodosols	14
1.3.6 Alfisols	15
1.3.7 Ultisols	15
1.3.8 Oxisols	16
1.3.9 Aridisols	17
1.3.10 Vertisols	18
1.3.11 Andisols	20
1.3.12 Histosols	23
1.4 Relation of Soil Orders with the Environment	24

Chapter 2 INORGANIC SOIL CONSTITUENTS	28
2.1 Soil Composition	28
2.2 Inorganic Constituents	31
2.3 Mineral Composition	32
2.4 Primary Minerals	35
2.4.1 Quartz	35
2.4.2 Feldspars	37
2.4.3 Mica	38
2.4.4 Ferromagnesian	39
2.4.5 Magnesium Silicates	40
2.4.6 Phosphate Minerals	41
2.4.7 Carbonates	42
2.5 Weathering of Primary Minerals	44
2.5.1 Abiotic Weathering of Primary Minerals	44
2.5.2 Biological Weathering	49
2.5.3 Environmental Factors in Weathering	55
2.5.4 Physical Properties of the Minerals	56
2.5.5 Chemical Characteristics and Crystal Chemistry	58
2.5.6 Saturation of the Environment	59
2.6 Secondary Minerals	60
2.6.1 Major Types of Secondary Minerals	61
2.6.2 Weathering of Secondary Minerals	78
Chapter 3 ORGANIC SOIL CONSTITUENTS	80
3.1 Soil Organic Matter	80
3.1.1 Beneficial Effect of Soil Organic Matter	82
3.1.2 Allelopathy	83
3.2 Humus	84
3.2.1 Environmental Significance of Humus	86
3.3 Soil Biomass	87
3.3.1 Macrofaunae	88
3.3.2 Microfaunae	90
3.3.3 Macroflorae	93
3.3.4 Microflorae	96

3.4 Biochemical Reactions of Soil Microorganisms	108
3.4.1 Carbon Cycle	109
3.4.2 Decomposition and Mineralization	109
3.4.3 Nitrogen Cycle	112
3.4.4 Nitrogen Fixation	112
3.4.5 Ammonification	117
3.4.6 Nitrification	119
3.4.7 Denitrification	121
3.4.8 Chemodenitrification	122
3.4.9 Assimilatory Denitrification	123
3.4.10 Immobilization	123
3.5 Nonhumified Organic Matter	124
3.5.1 Carbohydrates	124
3.5.2 Amino Acids and Protein	128
3.5.3 Lipids	130
3.5.4 Nucleic Acids	131
3.5.5 Lignin	132
3.5.6 Organic Acids	134
3.6 Humified Organic Matter	135
3.6.1 Types of Humic Matter	137
3.6.2 Chemical Composition	138
3.6.3 Chemical Reactions	139
3.6.4 Spectral Characteristics	140
3.6.5 Effect of Humic Matter on Soils and the Environment	142
 Chapter 4 GAS PHASE IN SOILS	 145
4.1 Soil Air	145
4.2 Soil Aeration	148
4.2.1 Determination of Soil Air Quality	149
4.3 Biochemical Effect of Aeration	152
4.3.1 Biochemistry in Aerobic Conditions and Its Role in Environmental Quality	153
4.3.2 Biochemistry in Anaerobic Conditions and Its Role in Environmental Quality	156

4.4	Biological Effect of Aeration	157
4.4.1	Effect on Plant Growth	157
4.4.2	Water Uptake	162
4.4.3	Nutrient Uptake	162
4.4.4	Microorganisms	163
4.4.5	Decomposition of Organic Matter and Its Effect on Environmental Quality	164
4.5	Chemical Effect of Aeration	166
Chapter 5 LIQUID PHASE		168
5.1	Soil Solution	168
5.1.1	Forces Attracting Water in Soils	169
5.1.2	Classification of Soil Water	172
5.1.3	Environmental Significance of Soil Moisture Constants	175
5.2	Movement of Soil Water	176
5.2.1	Movement of Liquid Water	176
5.2.2	Unsaturated Flow	177
5.2.3	Saturated Flow	178
5.2.4	Movement of Water as Water Vapor	179
5.2.5	Environmental Significance of Water Movement	181
5.3	Water Losses	182
5.3.1	Vapor Loss	183
5.3.2	Liquid Loss	185
5.4	Dissolved Solid Substances	187
5.4.1	Aluminum	187
5.4.2	Iron	191
5.4.3	Silicon	193
5.4.4	Nitrogen	199
5.4.5	Phosphorus	202
5.4.6	Sodium and Potassium	205
5.4.7	Calcium	206
5.4.8	Magnesium	208
5.4.9	Sulfur	209
5.4.10	Manganese	210

5.4.11 Soil Colloids	211
5.5 Dissolved Gas	215
5.5.1 Henry's Law	215
5.5.2 Dissolved CO ₂ Gas	217
5.5.3 Dissolved Oxygen	219
5.5.4 Oxygen Demand	221
Chapter 6 SOIL PHYSICS IN THE ENVIRONMENT	224
6.1 Physical Properties	224
6.2 Soil Texture	226
6.2.1 Soil Separates	226
6.2.2 Soil Texture	227
6.2.3 Environmental Significance of Soil Texture	229
6.3 Soil Structure	233
6.3.1 Types of Soil Structure	233
6.3.2 Environmental Significance of Soil Structure	235
6.4 Soil Density and Soil Porosity	239
6.4.1 Bulk Density	239
6.4.2 Particle Density	241
6.4.3 Pore Spaces	242
6.4.4 Environmental Significance of Soil Density and Soil Porosity	243
6.5 Soil Consistence	243
6.5.1 Types of Soil Consistence	244
6.5.2 Atterberg's Plasticity Index	245
6.5.3 Environmental Significance of Consistence	246
6.6 Soil Temperature	248
6.6.1 Thermal Properties of Soils	248
6.6.2 Significance of Environmental Factors for Soil Temperature	250
Chapter 7 ELECTROCHEMICAL PROPERTIES OF SOLID CONSTITUENTS	252
7.1 Electrical Charges	252
7.2 Soil Clays	253

7.2.1 Isomorphous Substitution and Permanent Negative Charges	253
7.2.2 Isomorphous Substitution and Permanent Positive Charges	255
7.2.3 Dissociation of Exposed Hydroxyl Groups	256
7.2.4 Protonation of Exposed Hydroxyl Groups	257
7.2.5 Zero Point of Charge	257
7.2.6 Electric Double Layers in the Environment	259
7.2.7 Cation Exchange Capacity	262
7.28 Environmental Importance of Cation Exchange	264
7.3 Anion Exchange Capacity	266
7.3.1 Environmental Significance of Anion Exchange	269
7.4 Soil Organic Matter	270
7.4.1 Amino Acids	271
7.4.2 Humic Matter	273
7.5 Soil Reaction	277
7.5.1 Concept of Soil Reaction	277
7.5.2 Types of Soil Reactions	279
7.5.3 Sources and Types of Soil Acidity	280
7.5.4 Effect of Soil Reaction on Plant Growth	282
Chapter 8 SOILS AND CROP PRODUCTION	285
8.1 Clearing New Lands	286
8.1.1 Nutrient Cycling	288
8.2 Soil Degradation	290
8.2.1 Physical Degradation	290
8.2.2 Chemical Degradation	293
8.2.3 Biological Degradation	294
8.3 Environmental Changes	296
8.3.1 Regional Climatic Changes	297
8.3.2 Effect of Increased CO ₂ Emission	298
8.3.3 The Issue of Biodiversity	299
8.4 Plantation Agriculture and Agroforestry	300
8.5 Intensifying Soil Productivity	306

8.5.1 Green Revolution	306
8.5.2 Hybrid Corn	308
8.5.3 Use of Fertilizers	309
8.6 Residue- or No-Till Farming	312
8.7 Organic Farming	314
8.8 Low-Input Sustainable Agriculture	315
Chapter 9 SOILLESS AGRICULTURE	317
9.1 Hydroponics	317
9.1.1 Water Requirements	318
9.1.2 Nutrient Solutions	319
9.1.3 The Issue of Crop Yield	322
9.1.4 Significance in Food Production	323
9.2 Aeroponics	325
9.3 Nutrient Film Technique	327
9.4 Artificial Soil	328
9.4.1 Orchid Medium	329
9.5 Aquaculture	330
9.5.1 Freshwater Aquaculture	331
9.5.2 Marine Aquaculture	332
9.6 Aquaculture in the United States	332
9.6.1 Salmon Ranching	332
9.6.2 Channel Catfish Farming	333
9.7 The Law of the Sea	334
Chapter 10 BIOTECHNOLOGY IN SOIL SCIENCE AND AGRICULTURE	335
10.1 Food Biotechnology	336
10.2 Agricultural Biotechnology	337
10.2.1 Crop Production	337
10.2.2 Environmentally Friendly Pesticides	338
10.3 Tissue Culture	339
10.3.1 Nutrient Solutions	340
10.3.2 Meristem Culture of Orchids	341
10.4 Environmental Significance of Tissue Cultures	342

10.5	Soil Biotechnology	344
10.5.1	Biofertilizers	345
10.5.2	Biomedicines	347
10.5.3	Microbial Genetic Engineering	347
Chapter 11	SOIL AND POLLUTION	349
11.1	Definition and Concept of Waste	349
11.2	Agricultural Waste	350
11.2.1	Fertilizers	351
11.2.2	Pesticides	352
11.2.3	Crop Residue	355
11.2.4	Animal Waste	356
11.2.5	Compost	358
11.2.6	Forest Waste	359
11.3	Industrial Waste	362
11.3.1	Carbon Monoxide	362
11.3.2	Carbon Dioxide	363
11.3.3	Nitrogen Oxides	365
11.3.4	Sulfur and Sulfur Oxide	367
11.4	Waste from Food Processing Plants	369
11.4.1	Solid Waste	370
11.4.2	Liquid Waste (Effluent)	370
11.5	Municipal Waste	371
11.5.1	Municipal Refuse	371
11.5.2	Environmental Problems in Disposal of Municipal Refuse	372
11.5.3	Sewage Sludge	373
11.6	Detoxification of Waste	379
11.6.1	Soil Remediation	380
11.6.2	Natural Attenuation	382
11.7	Environmental Impact of Agricultural and Industrial Waste	385
11.7.1	Greenhouse Effect	385
11.7.2	Acid Rain	386
11.7.3	Destruction of the Ozone Shield	389
