## **I INTRODUCTION** **1**

### **1 Remote Sensing and Urban Analysis** **3**

*Jean-Paul Donnay, Michael J. Barnsley and Paul A. Longley*

1.1	Introduction . . . . .	3
1.2	State-of-the-Art in Urban Remote Sensing . . . . .	4
1.2.1	The Demand for Higher Spatial Resolution Data . . . . .	4
1.2.2	Attempts to Enhance the Classification Process . . . . .	5
1.2.3	From Urban Morphology to the Human Dimension . . . . .	6
1.2.4	Human Connotation of the Physical Dimension . . . . .	7
1.3	Urban Remote Sensing Issues . . . . .	8
1.3.1	Detection of Urban Features . . . . .	9
1.3.2	Identification of Urban Features . . . . .	9
1.3.3	Analysis of Urban Features . . . . .	10
1.4	Urban Remote Sensing and GIS . . . . .	10
1.5	References . . . . .	11

<b>II</b>	<b>THE PHYSICAL STRUCTURE AND COMPOSITION OF URBAN AREAS</b>	<b>19</b>
<b>2</b>	<b>Improving the Spatial Resolution of Remotely-Sensed Images by Means of Sensor Fusion: A General Solution Using the ARSIS Method</b>	<b>21</b>
	<i>Thierry Ranchin, Lucien Wald and Marc Mangolini</i>	
2.1	Introduction . . . . .	21
2.2	The Wavelet Transform . . . . .	22
2.3	Multi-Resolution Analysis . . . . .	25
2.4	The ARSIS Method . . . . .	27
2.5	Examples . . . . .	31
2.6	Conclusions . . . . .	34
2.7	Acknowledgements . . . . .	34
2.8	References . . . . .	34
<b>3</b>	<b>Urban Pattern Characterization through Geostatistical Analysis of Satellite Images</b>	<b>39</b>
	<i>Pietro Alessandro Brivio and Eugenio Zilioli</i>	
3.1	Introduction . . . . .	39
3.2	The Structure Function $\gamma(h)$ . . . . .	40
3.3	Geostatistical Analysis of Satellite Sensor Images . . . . .	42
3.3.1	Examining the Spatial Pattern of Contrasting Terrestrial Landscapes . . . . .	42
3.3.2	Models of Urban Structure . . . . .	44
3.4	Conclusions . . . . .	50
3.5	References . . . . .	51
<b>4</b>	<b>Recognizing Settlement Structure using Mathematical Morphology and Image Texture</b>	<b>55</b>
	<i>Martino Pesaresi and Alberta Bianchin</i>	
4.1	Introduction . . . . .	55
4.2	Origins of the Morphology Concept . . . . .	55
4.2.1	From 'Urban Form' to Morphology . . . . .	57
4.2.2	The Contribution of Image Processing to the Development of an Analytical Discipline . . . . .	57
4.2.3	Two Kinds of Spatial Information in the Mind of the Town Planner . . . . .	58
4.2.4	The Digital Image as a Formalized Reference System . . . . .	59
4.3	The Detection of Urban Areas using Satellite Data . . . . .	59
4.3.1	Image Classification . . . . .	59
4.3.2	Segmentation of the Built-Up Areas . . . . .	63
4.4	Beyond Classical Thematic Information . . . . .	64
4.5	References . . . . .	67

<b>III</b>	<b>FROM URBAN LAND COVER TO LAND USE</b>	<b>69</b>
<b>5</b>	<b>Modified Maximum-Likelihood Classification Algorithms and their Application to Urban Remote Sensing</b>	<b>71</b>
	<i>Victor Mesev, Ben Gorte and Paul A. Longley</i>	
5.1	Introduction . . . . .	71
5.2	Modified Maximum-Likelihood Classification . . . . .	73
5.2.1	Modification of Prior Probabilities . . . . .	74
5.2.2	Empirical Example 1 . . . . .	75
5.2.3	Iterative Calculation of Prior Probabilities . . . . .	79
5.2.4	Empirical Example 2 . . . . .	83
5.3	Discussion and Conclusions . . . . .	85
5.4	Acknowledgements . . . . .	86
5.5	References . . . . .	86
<b>6</b>	<b>Image Segmentation for Change Detection in Urban Environments</b>	<b>95</b>
	<i>Hans-Peter Bähr</i>	
6.1	Introduction . . . . .	95
6.2	Small-Scale Data Acquisition . . . . .	97
6.2.1	The Multi-Sensor Concept for Satellite Image Classification . . . . .	97
6.2.2	Delimitation of Urban Areas using Delaunay Triangulation to Update ATKIS . . . . .	102
6.3	Large-Scale Data Acquisition from Aerial Photography . . . . .	107
6.3.1	Blackboard Approach . . . . .	109
6.3.2	Semantic Network Approach . . . . .	113
6.4	Conclusions . . . . .	113
6.5	References . . . . .	113
<b>7</b>	<b>Inferring Urban Land Use by Spatial and Structural Pattern Recognition</b>	<b>115</b>
	<i>Michael J. Barnsley, Lasse Møller-Jensen and Stuart L. Barr</i>	
7.1	Introduction . . . . .	115
7.2	From Land Cover to Land Use . . . . .	116
7.3	Case Study 1: Statistical, Kernel-Based Techniques . . . . .	118
7.4	Case Study 2: Knowledge-Based Texture Models . . . . .	123
7.4.1	Spatial Object Models of Urban Scenes . . . . .	123
7.4.2	Implementation of the Spatial Object Model . . . . .	124
7.4.3	Modelling Image Texture . . . . .	126
7.4.4	Results and Discussion . . . . .	128
7.5	Case Study 3: Structural Pattern-Recognition Techniques . . . . .	130
7.6	Conclusions . . . . .	140
7.7	Acknowledgements . . . . .	141
7.8	References . . . . .	141

<b>8</b>	<b>Urban Agglomeration Delimitation using Remote Sensing Data</b>	<b>145</b>
	<i>Christiane Weber</i>	
8.1	Introduction . . . . .	145
8.2	Defining Urban Agglomerations . . . . .	146
8.2.1	Definition Criteria . . . . .	147
8.3	Spatial Forms — Urban Forms? . . . . .	148
8.3.1	The Relationships Between Urban Forms and Remote Sensing Data . . . . .	149
8.3.2	Statistical Information Needs and Remotely Sensed Data . . . . .	150
8.4	Application and Discussion . . . . .	151
8.4.1	Application . . . . .	151
8.4.2	Discussion . . . . .	153
8.5	Conclusion . . . . .	153
8.6	References . . . . .	158
