

Mine Environment and Ventilation

Editor
D.C. Panigrahi

CONTENTS

Foreword	v
Preface	vii

I. ANALYSIS AND DESIGN OF VENTILATION SYSTEMS

1. Computer simulation studies for improving work place environment in Dungri North section of Jamadoba Colliery, TISCO <i>D. C. Panigrahi, R. S. Singh and P. N. Singh</i>	1
2. Improved ventilation and use of respirators to allow safe mining during release of coal seam hydrogen sulphide <i>A. D. Stewart Gillies, M. S. Kizil and H. W. Wu</i>	7
3. A case study of ventilation modeling of a large block caving operation <i>Satya Harpalani and Kuda Mutama</i>	19
4. An approach to mine ventilation based on aerodynamic potential of ventilating air with reference to unit mass of dry air <i>Henryk Bystron</i>	29
5. The multi-purpose ventilation network analysis system <i>Masahiro Inoue and Kenichi Uchino</i>	43
6. A review of current Australian longwall ventilation practice <i>Timothy I. Mayes and A. D. Stewart Gillies</i>	55
7. Simulation studies for short-term as well as long-term improvement in the ventilation system of Balaghat Mine <i>D. C. Panigrahi, H. R. Kalihari and S. M. Bothra</i>	65
8. Application of mine ventilation network optimization in a mine <i>Bingrui Li, Kenichi Uchino and Masahiro Inoue</i>	71
9. Improvement in ventilation with minimum risk of spontaneous heating in mines of Jharia Coalfield <i>N. Sahay, S. K. Ray, I. Ahmad, N. K. Varma, R. P. Singh, A. K. Singh, S. M. Verma and B. C. Bhowmick</i>	79

II. COAL BED METHANE AND GAS EMISSION MODELING

10. Changes in coal microstructure and its influence on gas production from coal <i>Satya Harpalani</i>	89
11. A general model of convective diffusion of gas stream in a mine working <i>Petko Lalov</i>	97

12.	The methane rating system and how it is used to evaluate South African methane contents and release rates	103
	<i>Jaco J. Van Vuuren and Alan Cook</i>	
13.	Study of the process of adsorption of gas in coal	115
	<i>Li Zhang, Xue-Qiu He, Bai-Sheng Nie, En-Yuan Wang, Zhen-Tang Liu, Lin-Ming Dou and Shang-Quan Ma</i>	
14.	Macro and micro-mechanism of effect of EMF on CBM adsorption in coal	121
	<i>Bai-Sheng Nie, Xue-Qiu He, En-Yuan Wang, Zhang Li and Zhen-Tang Liu</i>	
15.	Regularity of distribution of EMR in workings of coal mines	129
	<i>En-Yuan Wang, Xue-Qiu He, Bai-Sheng Nie, Lin-Ming Dou, Shang-Quan Ma and Li Zhang</i>	
16.	Applied research on the law of "Rheological and Mutative properties" in gas outburst phenomena	137
	<i>Shang-Quan Ma and Xue-Qiu He</i>	
17.	Sorption isotherm for coal bed methane exploration - a case study from Jharia Coal Basin, Bihar, India	145
	<i>Saikat Mazumdar and Atul Kumar Varma</i>	

III. DUST GENERATION AND CONTROL

18.	Comprehensive programme of pneumoconiosis prevention in Polish coal mining	151
	<i>Kazimierz Lebecki</i>	
19.	Dust control equipment of UO type used in exhaust or combined ventilation system	159
	<i>Walenty Frydel and Marcin Steindor</i>	
20.	Air pollution and its control in mining areas	167
	<i>S. P. Banerjee</i>	
21.	Exposure to respirable dust: case studies of Jharia and Raniganj Coalfields	181
	<i>S. Ganguly, S.K. Gangopadhyay and Rahul Guha</i>	
22.	Concentration and geo-textural characteristics of suspended particulate matter and its prediction	193
	<i>A. Jamal, R. P. Singh and K.K. Gupta</i>	
23.	A new approach in haul road dust control	201
	<i>J. K. Pandey and Anjanee Kumar</i>	
24.	Dust control techniques in a mechanised longwall face	205
	<i>V. Vinod Kumar</i>	

IV. HEAT FLOW, FAN AND FACE VENTILATION

- | | | |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 25. | Airflow distribution and methane concentration at heading faces with auxiliary ventilation
<i>Masahiro Inoue and Kenichi Uchino</i> | 209 |
| 26. | Control of heat and humidity in German Mines
<i>Wolfgang Schlotte</i> | 219 |
| 27. | Numerical assessment of the impact of thermal insulation on environmental conditions in mine workings
<i>Józef Knechtel</i> | 227 |
| 28. | Condition monitoring, diagnosis and maintenance of mine ventilation fans
<i>A. K. Mukhopadhyay</i> | 235 |
| 29. | Application of tracer gas for air leakage measurements through ventilation structures in coal mines
<i>A. K. Singh, I. Ahmad, R. P. Singh, N. K. Verma, N. Sahay and S. M. Verma</i> | 243 |
| 30. | Application of fuzzy set theory for selection of mine fan
<i>Suprakash Gupta, R. Nath and J. Bhattacharya</i> | 249 |
-

V. MONITORING AND CONTROL OF MINE ENVIRONMENT

- | | | |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 31. | The development of a real time airflow monitoring and control system
<i>A. D. Stewart Gillies, Timothy I. Mayes, H. W. Wu, M. S. Kizil and Nan Wang</i> | 255 |
| 32. | Safety systems for coal mines
<i>Tadeusz Piśkorski and Janusz Karwot</i> | 265 |
| 33. | Monitoring and control of ventilation to improve work safety in mines
<i>Władysław Mironowicz and Stanisław Wasilewski</i> | 273 |
| 34. | Fiber optic methane sensor for mines
<i>V. Kumar and D. Chandra</i> | 283 |
| 35. | The new management and supervision systems to improve efficiency of mining and safety in mines
<i>Władysław Mironowicz and Jacek Wojciechowski</i> | 289 |
| 36. | Continuous mine environmental monitoring system – a case study
<i>D.P.Tripathy and H.B.Sahu</i> | 297 |

VI. MINE EXPLOSIONS, INUNDATIONS AND OTHER EMERGENCIES

37. Emerging trends and adoption of standards for stoppings and seals in Australian coal mines 303
A. D. Stewart Gillies and H. W. Wu
38. Developments in water barriers to stop coal dust explosion 315
K. Lebecki and K. Cybulski
39. Detection of shallow subsurface cavities associated with old abandoned coal mines of Raniganj Coalfield to avoid possible inundation in mines 323
P. R. Mohanty and B. B. Bhattacharya
40. Development of Indian legislation in preventing explosions in Indian coal mines 329
Anup Biswas
41. Fire hazard in Polish underground coal mines: actions taken to prepare suitable conditions for personnel self-rescue by self-rescuers 337
W. Kozik and E. Ossowska

VII. SPONTANEOUS HEATING AND MINE FIRES

42. A study of susceptibility of Indian coals to spontaneous combustion and its correlation with their intrinsic properties 347
D. C. Panigrahi, V. K. Saxena and G. Udaybhanu
43. Experimental study on the abnormal potential distribution around the heat source of spontaneous combustion of coal 355
Bingrui Li, Kenichi Uchino and Masahiro Inoue
44. Highlights of a few unresolved problems on mine fires 363
S. C. Banerjee
45. Fires in Jharia Coalfield vis-a-vis legislative provisions 371
Ram Madhab Bhattacharjee and Malay Tikader
46. Hazard analysis of spontaneous combustion in fully mechanized longwall mining with caving and its prevention strategies 379
Lu Guangli and Li Chongshan
47. Heat release and mass loss of combustible materials in mines 387
Yuanping Cheng, Jingwei Ji and Zenghua Li

VIII. PREVENTION AND CONTROL OF MINE FIRES

48. A study of pillar fire problems to categorise pillars in coal mines with respect to their susceptibility to spontaneous combustion 395
D. C. Panigrahi and Ram Madhab Bhattacharjee

49.	Fire protective coating-a novel approach for preventing spontaneous combustion in coal mines	403
	<i>R.V.K Singh, V.K. Singh and G. Sural</i>	
50.	Role of some additives on spontaneous heating characteristics of Indian coals	409
	<i>D. C. Panigrahi, Ranveer and G. Udaybhanu</i>	
51.	Polypropylene fibre (PP) reinforced shotcrete for sealing and supporting coal mine galleries against air leakage : a laboratory study	415
	<i>U. K. Singh, B. K. Kumar and V. Radhakrishna</i>	
52.	Controlling underground coal mine fires - achievements and challenges	423
	<i>D. D. Tripathi</i>	

IX. MODEL AND CASE STUDIES OF MINE FIRES

53.	Changes in air temperature and flow rate during a mine fire in a roadway	427
	<i>Masahiro Inoue, Kenichi Uchino and Takehiro Isei</i>	
54.	Study on the mechanism and factors influencing throttling of roadway fire	439
	<i>Zhou Fubao and Wang Deming</i>	
55.	Study of fire size, gas concentration and temperature correlation of open fire in a small tunnel representing mine gallery	447
	<i>R. P. Singh, S. M Verma, N. Sahay, I. Ahmad, A. K. Singh, S. K. Ray and B. C. Bhowmick</i>	
56.	Spontaneous heating in a longwall face - a case study of Jhanjra Project	455
	<i>S. K. Varma, S. R. Mehta and P. K. Mondal</i>	
57.	Coal mine fire and its impact on human habitation in Jharia Coalfield	465
	<i>T. N. Singh</i>	
58.	Characteristics and effects of spontaneous heating in Barmer lignite - a case study	471
	<i>P. K. Gautam and D. M. Surana</i>	
59.	Fire fighting in XIII/XIV seam Sijua Colliery - a case study	479
	<i>R. K. Jain and A. Basu</i>	
60.	Prevention of spontaneous heating by reducing surface fan pressure - a case study	487
	<i>A. K. Gangopadhyaya and N. Sudhakara Rao</i>	
61.	A handy objective model for estimation of spontaneous fire risk potential of underground panels in bord and pillar method of mining	491
	<i>T. R. Roy</i>	

X. EMERGING ENVIRONMENTAL ISSUES

- | | | |
|-----|----------------------------------------------------------------------------------------------------------------------------|-----|
| 62. | Post detonation fume quality of explosives vis-a-vis their contribution towards polluting environment in underground mines | 499 |
| | <i>M. M. Bhattacharyya, R. R. Singh, R. K. Paul and S. K. Roy</i> | |
| 63. | A conceptual vision for future R&D in mine ventilation | 507 |
| | <i>M. L. Gupta</i> | |
| 64. | Control of workplace environment during rock excavation near super sensitive structures | 513 |
| | <i>P. Pal Roy, C. Sawmliana and M. M. Singh</i> | |
| 65. | Environmental impact of ocean-floor mining | 521 |
| | <i>S. B. Srivastava</i> | |
| 66. | Ergonomic design of mining vehicle's cab and seat for increased driver's comfort | 531 |
| | <i>M. Hari Kiran and J. Bhattacharya</i> | |
| 67. | Environmental issues of marble industry – overview of Rajasthan | 539 |
| | <i>S. S. Rathore</i> | |
