# HANDBOOK OF DREDGING ENGINEERING

SECOND EDITION

JOHN B. HERBICH

# CONTENTS

---

Contributors' List	xvii
Foreword to the Second Edition	xix
Foreword to the First Edition	xxi
Preface to the Second Edition	xxiii
Preface to the First Edition	xxv
Acknowledgments	xxvii

---

## Chapter 1. Introduction 1.1

---

Dredging Problems	/ 1.4
References	/ 1.5

---

## Chapter 2. Basic Fluid Mechanics 2.1

---

Definitions	/ 2.1
Manometers	/ 2.5
Buoyancy and Floatation	/ 2.6
Dynamics of Flow	/ 2.9
References	/ 2.15

---

## Chapter 3. Dredge Pumps 3.1

---

Theory and Application of Centrifugal Pumps	/ 3.1
Elements of Dredge Pump Design	/ 3.6
Model Testing of Pumps	/ 3.23
Pump Characteristics	/ 3.36
Effect of Solid-Water Mixtures on Pump Performance	/ 3.48
Cavitation of Dredge Pumps	/ 3.59
Gas Effect and Removal	/ 3.83
Gas Removal Systems	/ 3.93
References	/ 3.108

---

## Chapter 4. Dredging Equipment 4.1

---

Mechanical Dredges	/ 4.1
Hydraulic Dredges	/ 4.5
Survey Boats	/ 4.65
References	/ 4.65

- Early Utilization in the United States / 5.1
- Current Status / 5.4
- Features of Small Dredges / 5.4
- Typical Dredging Projects / 5.6
- Small-Dredge Operational Features / 5.8
- Sediment/Sludge Disposal Techniques / 5.10
- Pumping and Pipeline Systems / 5.11
- Specialty Small Dredges / 5.18
- Summary / 5.19

**Chapter 6. Physical Classification of Sediments**

- Classification of Soils / 6.2
- The Soil Groups / 6.11
- Soil Investigation in Situ / 6.14
- Materials in Disposal Areas / 6.20
- Properties of Rock / 6.29
- Distribution of Dredged Material in the United States / 6.31
- Dredgeability of Soils / 6.41
- References / 6.41

**Chapter 7. Pipeline Transport of Solids****Section 1 Pipeline Transport / 7.1**

- Placer Mining by Dredging Methods / 7.3
- Characteristics of the Transported Material / 7.3
- Composition of Solid-Water Mixtures / 7.9
- Regimes of Sediment Flow / 7.11
- Flow of Solids-Water Mixtures / 7.24
- Piping / 7.30
- References / 7.39

**Section 2 Pipeline Transport of Dredged Material / 7.49**

- Introduction / 7.49
- Particle Settling Velocity / 7.51
- Composition of Solid-Water Mixtures (Slurries) / 7.57
- Sediment Flow Regimes / 7.59
- Critical Velocity / 7.59
- Friction Head Loss for Slurry Pipes / 7.62
- Evaluation of Friction Factor / 7.65
- Losses Due to Fittings and Valves / 7.69
- Pipeline Characteristics / 7.70
- Example Evaluation of Head Loss for Slurry Pipe Flow / 7.70
- Acknowledgments / 7.76
- References / 7.76

**Section 3 Sediment Transport in Pipes / 7.77**

- Introduction / 7.77
- Sediment Properties / 7.77
- Sediment Transport in Pipes / 7.80
- References / 7.91
- Nomenclature / 7.91

**Section 1 River Dredging / 8.2**

Estuary and Coastal Dredging / 8.4

Operating Characteristics of Cutterhead Dredges / 8.17

**Section 2 Effect of a Ladder Pump on the Cavitation Characteristics of a Cutterhead Dredge / 8.26**

Description of the System / 8.26

Losses / 8.27

Calculations and Results / 8.28

Ocean Dredging / 8.31

Beach Replenishment / 8.46

Construction of Artificial Islands / 8.53

"Glory-Hole" Dredging / 8.66

Low-Cost Maintenance Dredging / 8.66

References / 8.68

**Chapter 9. Maintenance Dredging in Channels and Harbors**

Introduction / 9.1

Sedimentation in Dredged Channels / 9.2

Sedimentation in Semi-Enclosed Harbor Basins / 9.6

Example Numerical Model Results / 9.14

References / 9.14

**Chapter 10. Case Histories for Significant U.S. Dredging Projects**

Pier 400 Land Reclamation Project, Port of Los Angeles, California / 10.2

Acknowledgments / 10.7

Poplar Island Restoration Project, Maryland Port Administration, Baltimore, Maryland / 10.8

References / 10.16

Acknowledgments / 10.16

Contained Aquatic Disposal Facilities, Port of New York and New Jersey / 10.17

References / 10.28

Acknowledgments / 10.31

New York Harbor Navigation Study / 10.31

Acknowledgments / 10.50

**Chapter 11. Disposal and Placement of Dredged Material**

Disposal Alternatives / 11.1

Regulatory Considerations / 11.2

Management Strategy / 11.3

Open-Water Disposal / 11.4

Open-Water Disposal Sites in the United States / 11.5

Environmental Evaluation for Open-Water Suitability / 11.14

Management and Controls for Open-Water Disposal / 11.15

Confined (Diked) Disposal / 11.16

Features of Confined Disposal Facilities / 11.17

CDF Design, Operation, and Management / 11.19

Long-Term Storage Capacity of Confined Disposal Facilities / 11.30

Estimation of Long-Term Storage Capacity /	11.34
Dredged Material Dewatering Operations /	11.38
Contaminant Pathways for CDFs /	11.44
Beneficial Uses of Dredged Material /	11.45
Summary /	11.49
Acknowledgment /	11.49
References /	11.50

---

## **Chapter 12. Numerical Models for Predicting the Fate of Dredged Material Placed in Open Water**

**12.1**

Introduction /	12.1
Processes Affecting Dredged Material Placed in Open Water /	12.2
Numerical Modeling of Dredged Material Placed in Open Water /	12.3
STFATE Concepts /	12.5
LTFATE Concepts /	12.9
MDFATE Concepts /	12.12
Example MDFATE Application /	12.15
Summary /	12.23
References /	12.24

---

## **Chapter 13. Environmental Effects of Dredging Activities**

**13.1**

Section 1 /	13.1
Introduction /	13.1
Resuspension of Sediment during Dredging Operations /	13.5
Mechanics of Sediment Resuspension /	13.7
Effects of Dredged Material Resuspension on the Aquatic Environment /	13.14
Methods of Characterizing Pollution Potential /	13.18
Environmental Impacts /	13.20
Section 2 /	13.22
Evaluation of Dredged Material for Open-Water Disposal Numerical Criteria of Effects-Basse? /	13.22
Introduction /	13.22
Discussion /	13.23
Conclusion /	13.28
Acknowledgments /	13.28
References /	13.28
Section 3 /	13.30
Contaminated Sediments /	13.30
Field Studies to Evaluate Open-Water Disposal /	13.32
Extent of Contaminated Marine Sediments /	13.32
Capping of Contaminated Sediments /	13.37
London Dumping Convention /	13.39
Production Use of Dredged Material /	13.39
Evaluation of Contaminated Sediment Impacts on Aquatic Environment in The Netherlands /	13.41
References /	13.42

---

## **Chapter 14. Water Quality Aspects of Dredging and Dredged Sediment Disposal**

**14.1**

Background /	14.1
Development and Use of U.S. EPA Water Quality Criteria /	14.2

Application of U.S. EPA Water Quality Criteria to Dredged Sediment Disposal Projects / 14.4	
The Development and Use of Hazard-Risk-Assessment Approaches for Dredged Sediment Projects / 14.7	
Factors Controlling Release of Constituents from Sediments / 14.8	
Significance of the Concentrations of Constituents in Sediments / 14.11	
Potential Water Quality Problems Associated with Dredging Projects / 14.12	
Impact of Equipment Used for Dredging and Dredged Sediment Disposal / 14.25	
Upland-"Confined" Disposal of Dredged Sediments / 14.30	
New and Pending Regulations / 14.32	
Conclusions / 14.38	
Acknowledgments / 14.39	
References / 14.39	

---

## **Chapter 15. Subaqueous Capping of Contaminated Sediment**

**15.1**

Introduction / 15.1	
Sediment Characterization and Site Selection / 15.6	
Equipment and Placement Techniques / 15.8	
Dispersion and Mound Development / 15.17	
Cap Design / 15.20	
Long-Term Cap Stability / 15.26	
Cap Monitoring / 15.27	
Summary / 15.29	
Acknowledgments / 15.29	
References / 15.29	

---

## **Chapter 16. Beneficial Uses of Dredged Material**

**16.1**

Dredged Material as a Resource / 16.1	
Logistical Considerations / 16.10	
Habitat Development and Restoration / 16.16	
Wetland Habitats / 16.24	
Upland Habitats / 16.50	
Island Habitats / 16.61	
Aquatic Habitats / 16.69	
Beaches and Beach Nourishment / 16.73	
Parks and Recreation / 16.78	
Agriculture, Horticulture, Forestry, and Aquaculture / 16.84	
Strip-Mine Reclamation and Solid Waste Landfill / 16.97	
Multipurpose Uses and Other Land-Use Concepts / 16.104	
Baseline and Monitoring Studies / 16.112	
Site Valuation and Evaluation / 16.117	
References / 16.120	

---

## **Chapter 17. Design and Construction of Coastal Wetlands Using Dredged Material**

**17.1**

Introduction / 17.1	
Wetland Processes / 17.2	
Planning Considerations / 17.3	
Regulatory Aspects / 17.6	
Design Considerations / 17.8	
Construction Considerations / 17.25	
Project Case Studies / 17.29	

Lessons Learned / 17.32  
Summary and Conclusions / 17.34  
References / 17.35  
Notation / 17.37

## **Chapter 18. Removal of Contaminated Sediment by Dredging**

**18.1**

Introduction / 18.1  
Extent of Contamination / 18.4  
Classification Methodologies / 18.6  
Evaluation Approach / 18.9  
Interim and Long-Term Controls / 18.10  
Containment / 18.14  
Confined Disposal / 18.14  
Comparative Analysis / 18.17  
Risk Assessment / 18.18  
Dredging Equipment for Handling Contaminated Sediment / 18.19  
Case Studies / 18.30  
Summary / 18.98  
References and Selected Readings / 18.100  
Appendix 1. Canadian Sediment Quality Guidelines / 18.105  
Appendix 2. The Use of Sediment Quality Guidelines as Benchmarks / 18.107  
Appendix 3. Glossary / 18.118

## **Chapter 19. Instrumentation and Automation**

**19.1**

Section 1 Types of Meters / 19.1  
Flow and Velocity Meters / 19.1  
Density Meters / 19.4  
Production Meters / 19.6  
Dredging Automation / 19.8  
Section 2 Automation, Survey, and Profitable Dredging / 19.18  
The Historical Record / 19.18  
Possible Causes of Unpaid Overdredge / 19.19  
A Computer-Based Solution / 19.19  
Consequential Benefits / 19.21  
The Significance of Dredge Survey / 19.22  
Survey Computer Errors / 19.23  
Conclusion / 19.25  
References / 19.26  
Bibliography / 19.26  
Section 3 Laboratory Evaluation of Production Meter Components / 19.27  
Background / 19.27  
Introduction / 19.27  
Materials and Methods / 19.27  
Results and Discussion / 19.30  
Conclusions / 19.38  
Acknowledgments / 19.39  
Summary / 19.39  
Evaluation of Production Meter Instrumentation and Uses / 19.39  
References / 19.43

- Request for Bids / 20.1
- Bidding Costs / 20.2
- Other Requirements / 20.2
- Payments for Dredging Work / 20.3
- Contracting in Europe / 20.3
- Federal Projects / 20.3
- Regulatory Program / 20.3
- Environmental Impact Statements / 20.4
- References / 20.9

**Chapter 21. Dredging Contracts**

- Contracts, Specifications, and Claims / 21.1
- Alternative Dispute Resolution / 21.10
- Bibliography / 21.13

**Chapter 22. The U.S. Army Corps of Engineers Dredging Operations and Environmental Research (DOER) Program**

- Introduction / 22.1
- Contaminated Sediment Characterization and Management / 22.3
- Environmental Windows for Dredging Operations / 22.16
- Instrumentation for Dredge and Site Monitoring / 22.21
- Nearshore Aquatic Placement of Dredged Materials / 22.24
- Innovative Dredging Technology / 22.35
- Ecological Risk Management for Dredging and Disposal Projects / 22.37
- Benefits of the DOER Program / 22.40
- Acknowledgments / 22.40
- Appendix A: Genesis of the Dredging Operations and Environmental Research (DOER) Program / 22.41
- Appendix B: DOER Technical Reports and Technical Notes / 22.46

**Chapter 23. Dredging for Commercial Navigation in the United States** **23.1**

---

- Trade / 23.2
- Vessel Requirements / 23.4
- Marine Terminal Infrastructure / 23.6
- Navigation Dredging / 23.11
- References / 23.13

**Appendix 1. Conversion Factors and Quantities****Appendix 2. Fluid Properties**

**Appendix 3. Concentration of Mixtures, Fall Velocity of Particles, and Apparent Kinematic Viscosity** **A3.1**

---

**Appendix 4. Government Regulatory Programs** **A4.1**

---

**Appendix 5. Dredging Operations Technical Support Publications** **A5.1**

---

- Publications / A5.2
- Guidance Documents / A5.3
- Dredged Material Research Program Reports / A5.4
- DOER Technical Reports / A5.19
- DOER Technical Notes / A5.19
- Dredging Research Program (DRP) Bibliography / A5.21
- Dredging Research Program (DRP) Technical Reports / A5.27
- Dredging Research Technical Notes / A5.28
- Reports Published by the Effects of Dredging Program (EEDP) / A5.30
- Environmental Effects on Dredging Technical Notes / A5.42
- Field Verification Program (FVP) / A5.43
- Corps of Engineers Civil Works Division and Districts / A5.44

**Appendix 6. Example Design Calculations** **A6.1**

---

- General / A6.1
- Example 1: Containment Area Design Method for Sediments Exhibiting Flocculent Settling / A6.1
- Example 2: Containment Area Design Method for Sediments Exhibiting Zone Settling / A6.9

**Appendix 7. Specifications for Dredging Houston Ship Channel** **A7.1**

---

- Introduction / A7.1
- Part 1 General / A7.4
  - Description of Work / A7.4
  - Location / A7.4
  - Obstruction of Channel / A7.5
  - Temporary Removal of Aids to Navigation / A7.5
  - Notification Prior to Commencement of Dredging Operations / A7.5
  - Utilities Across the Limits of Dredging / A7.5
  - Work Covered by the Contract Price / A7.6
  - Character of Materials / A7.6
  - Measurement / A7.6
  - Payment / A7.7
- Part 2 Products / A7.8
  - Bridge-to-Bridge Radio-Telephone Equipment / A7.8
- Part 3 Execution / A7.8
  - Estimated Quantities / A7.8
  - Quality Control / A7.9
  - Sections / A7.10
    - Order of Work / A7.10
    - Placement of Excavated Material / A7.10
    - Overdepth, Side, and End Slopes / A7.15
    - Houston-Galveston Vessel Traffic Service Area / A7.16
    - Reporting Requirement / A7.17

## **Appendix 8. DREDGABL: Geotechnical Factors in Dredgeability (Computer Program)**

**A8.1**

---

DREDGABL Computer Program / A8.1  
Geosite Computer Program / A8.4  
References / A8.8

## **Appendix 9. Estimating Dredging Costs**

**A9.1**

---

Introduction / A9.1  
Cutter Suction Dredge / A9.4  
Production Rate / A9.5  
Dredge Cost Components / A9.6  
Methodology for Estimating Production / A9.7  
Methodology for Estimating Cost / A9.9  
Cutter Suction Dredge Cost Estimation Program (CSDCEP) / A9.11  
Testing CSDCEP for Accuracy / A9.20  
Comparison of Cost Estimates and Actual Costs / A9.20  
References / A9.21

## **Appendix 10. Recognizing Wetlands**

**A10.1**

---

What Is a Wetland? / A10.1  
Why Is It Necessary to Consider Whether an Area Is a Wetland? / A10.1  
How Do Wetlands Benefit People? / A10.3  
How Are Wetlands Recognized? / A10.4  
Wetland Determinations / A10.11  
What to Do If Your Property Has Wetlands that You Propose to Alter / A10.11  
Sources of Information for Making Wetland Delineators / A10.11

**INDEX** Follows Appendix 10
