

MULTIDIMENSIONAL GEOGRAPHIC INFORMATION SCIENCE

JONATHAN
RAPER

Contents

<i>List of figures</i>	x
<i>List of tables</i>	xii
<i>List of plates</i>	xiii
<i>Acknowledgements</i>	xv
<i>Preface</i>	xix

PART I 1

1 The worldview of geographic information science 3

Foundations 3

Definitions 3

Discipline 4

Theoretical commitments of the GISc worldview 5

The GISc worldview 5

Metaphysics 6

Ontology 9

Epistemology 10

Philosophy of mind 17

Linguistics 19

Cognitive science 22

Informatics 24

The possibility of GISc 28

2 Two-dimensional representations of space 31

Introduction 31

Metaphysics of space 31

Metaphysics of space and place 32

Metaphors for geographical thinking 33

Metaphysics of geographical and spatial representation 34

Social conceptions of geographic space 35

Naïve geography 36

vi *Multidimensional Geographic Information Science*

- Psychology of realism* 38
- Space and spaces* 39
- Metaphysical implications* 40
- Ontology of space* 41
 - Geographical kinds* 41
 - Are there geographic kinds to find?* 41
 - How do we characterise geographic kinds?* 42
 - How certain are we of the identity of geographical kinds?* 43
 - Cognitive maps* 44
 - Scale and space* 45
 - Spatial knowledge, knowledge representation and spatial reasoning* 47
 - Space in language* 51
 - Space in representational art* 53
 - Social constitution of spatial concepts* 54
 - Absolute and relative views of space* 57
 - Ontological implications* 58
- Epistemologies of space* 58
 - The evolution of epistemological theories of space* 59
 - Epistemological commitments of contemporary research on space* 62
 - Positivism* 62
 - Neo-positivism* 62
 - Post-positivism* 62
- The origins of two-dimensional spatial representation* 63
 - History of mathematics, physics and geometry* 63
 - History of cartographic representation* 67
- Maps as representations of space* 71
 - Maps and mapping* 71
 - Maps and communication about space in the narrow sense* 72
 - Mapping as representation in the broad sense* 76
- The development of Geographical Information Systems* 77
 - Surveying conventions* 78
 - Cartographic conventions* 80
 - Digital mapping conventions* 80
 - The critique of GIS from social theory* 81
- The current and future scope of GIS and GISc* 82

3 *Multidimensional representations of space and time*

85

- Introduction* 85
- Foundations of theory on space and time* 85
 - Ancient thinking on space and time* 85
 - Thinking on space and time between the Renaissance and the 20th century* 90

<i>Research on space and time in the 20th century</i>	98
<i>Physics of space and time and space-time</i>	99
<i>Philosophy of space and time</i>	102
<i>Mathematics, space and time</i>	106
<i>The psychology of space and time</i>	108
<i>Anthropological concepts of space and time</i>	110
<i>Social construction of space and time</i>	111
<i>Concepts of multidimensional geo-representation</i>	115
<i>A framework for multidimensional concepts in the mesoscopic domain</i>	116
<i>Physics</i>	116
<i>Ontology</i>	116
<i>Epistemology</i>	116
<i>Cognitive science</i>	117
<i>Linguistics</i>	117
<i>Social theory</i>	118
<i>Synthesis</i>	118
<i>Development of multidimensional geo-representations</i>	118

4 Multidimensional geo-representations for modelling 121

<i>Introduction</i>	121
<i>Spatial and temporal reasoning about processes and geo-phenomena</i>	121
<i>Multidimensional conceptualisation of geo-phenomena</i>	121
<i>Spatial and temporal structures</i>	124
<i>Space and time connection – hybrid</i>	125
<i>Space and time connection – integrated</i>	126
<i>Discretisation – continuous</i>	126
<i>Discretisation – discrete</i>	126
<i>Model – absolute</i>	127
<i>Model – relative</i>	127
<i>Combinations of space-time structures</i>	127
<i>Models of time</i>	129
<i>Scale and space</i>	130
<i>Theory and practice of geo-representation</i>	131
<i>Geo-representation of forms, structures and properties</i>	132
<i>Two-dimensional data modelling</i>	133
<i>Three-dimensional data modelling</i>	136
<i>Geo-representation of processes</i>	138
<i>Approaches to process modelling</i>	139
<i>Spatio-temporal data modelling</i>	140
<i>Two-dimensional geo-representation</i>	141

<i>Three-dimensional geo-representation</i>	145
<i>Solid geometric modelling</i>	146
<i>Three-dimensional data structures for geo-representation</i>	150
<i>Parametric approaches</i>	151
<i>B-rep approaches</i>	151
<i>Voxel approaches</i>	155
<i>Hybrid approaches</i>	156
<i>Databases for geo-representations</i>	157
<i>Three-dimensional spatial query and analysis</i>	158
<i>Multidimensional geo-representation</i>	160
<i>Spatio-temporal knowledge representation</i>	162
<i>Temporal GIS</i>	163
<i>Object-oriented spatio-temporal GIS</i>	165
<i>Time geography</i>	167
<i>Four-dimensional GIS</i>	168
<i>Multidimensional process modelling</i>	170
<i>The potential for multidimensional geo-representation</i>	171

5 Multidimensional geo-representations for exploration

173

<i>Introduction</i>	173
<i>Spatial multimedia and virtual reality architectures</i>	173
<i>Definitions</i>	173
<i>Multimedia data types as geo-representations</i>	175
<i>Virtual environments as geo-representations</i>	178
<i>Database storage of multimedia and virtual geo-representations</i>	182
<i>Multimedia development and standards</i>	184
<i>Hypermedia development environments</i>	185
<i>Spatial multimedia and virtual reality systems</i>	188
<i>Multimedia/hypermedia GIS</i>	189
<i>Web GIS</i>	190
<i>Virtual reality GIS</i>	191
<i>Real-time GIS</i>	192
<i>Geolibraries</i>	194
<i>Multidimensional exploration of geo-representations</i>	196
<i>Hypermedia spatial databases</i>	196
<i>Visualisation, data mining and animation of geo-representation</i>	199
<i>Conclusions</i>	201

PART II

203

<i>Introduction</i>	203
<i>The geography of the North Norfolk Coast</i>	204

6	Hypermedia geo-representations for coastal management	207
	<i>Context</i>	207
	<i>Experiments in hypermedia geo-representation</i>	208
	<i>Scolt Multimedia Project</i>	208
	<i>Hypermedia functions in GIS</i>	210
	<i>Panoramap hypermedia environment</i>	211
	<i>Potential</i>	212
7	Geo-representation of dynamic coastal geo-phenomena	213
	<i>Context</i>	213
	<i>Experiments in geo-representation of dynamic coastal phenomena</i>	213
	<i>Videometric measurement of processes</i>	214
	<i>Animating multidimensional landform behaviour</i>	215
	<i>Human spatio-temporal behaviour</i>	216
	<i>Potential</i>	217
8	Geo-representations of coastal change using virtual environments	219
	<i>Context</i>	219
	<i>Virtual geo-representation of coastal change</i>	219
	<i>Interfaces to virtual geo-representations</i>	220
	<i>Analysing coastal change using virtual worlds</i>	220
	<i>Time-dependent display of virtual worlds</i>	223
	<i>Potential</i>	224
9	Three-dimensional modelling of coastal landforms	225
	<i>Context</i>	225
	<i>Experiments in three-dimensional modelling of coastal landforms</i>	226
	<i>Minimum tension isosurface modelling</i>	228
	<i>Tetrahedron-based modelling</i>	230
	<i>Potential</i>	231
10	Multidimensional geo-representation in coastal environments	233
	<i>Context</i>	233
	<i>Multidimensional coastal geo-representation experiments</i>	234
	<i>Simulation of spit morphodynamic behaviour</i>	234
	<i>Multidimensional exploration of coastal change</i>	236
	<i>Potential</i>	237
	<i>References</i>	239
	<i>Index</i>	287
