

**DIAGNOSING
PLANT DISEASES
CAUSED BY
NEMATODES**

Malcolm C. Shurtleff
and
Charles W. Averre III

Contents

CHAPTER 1

Introduction to Plant-Parasitic Nematodes 1

Survival of Nematodes • Nematodes and Soil Ecology • Symptoms of Plant Injury Caused by Nematodes • Feeding Habits of Plant-Parasitic Nematodes • General Description of Plant-Parasitic Nematodes • Generalized Life Cycles of Nematodes • Diagnosing Plant Diseases Caused by Nematodes • de Man's Measurement Code • References

CHAPTER 2

Methods 21

Collection and Submission of Soil and Plant Samples for Nematode Analysis • Laboratory Methods • Mailing and Shipping Nematode Specimens • Inoculating Plants to Demonstrate Pathogenicity • References

CHAPTER 3

Classification and Descriptions of Plant-Parasitic Nematodes 49

Abbreviated Taxonomic Classification of Important Plant-Parasitic Nematodes • Descriptions of Plant-Parasitic Nematodes

Anguina • *Aphelenchoides* • *Aphelenchus* • *Belonolaimus* • *Bursaphelenchus* • *Criconemella*, *Criconemoides*, and *Mesocriconema* • *Ditylenchus* • *Dolichodorus* • *Globodera* • *Helicotylenchus* • *Hemicycliophora* • *Heterodera* • *Hirschmanniella* • *Hoplolaimus* • *Longidorus* • *Macrotrophurus* • *Meloidodera* • *Meloidogyne* • *Nacobbus* • *Paratrichodorus* and *Trichodorus* • *Paratylenchus* • *Pratylenchus* • *Radopholus* • *Rhadinaphelenchus cocophilus* • *Rotylenchulus* • *Rotylenchus* • *Scutellonema* • *Sphaeronema* • *Tylenchorhynchus* • *Tylenchulus* • *Xiphinema*
