

VOLUME 2

AUTOMOTIVE POLYURETHANES

ADVANCES IN PLASTICS RECYCLING

**WERNER RABHOFER
ECKEHARD WEIGAND**

Table of Contents

Series Editors' Preface vii

1. FRAMEWORK, GENERAL OUTLINES AND CONDITIONS IN THE EUROPEAN AUTOMOTIVE INDUSTRY	1
Germany	1
EU ELV Regulation: Directive of the European Parliament and of the Council on End-of-Life Vehicles	3
References	7
2. COOPERATIVE EUROPEAN AUTOMOTIVE INDUSTRY PROJECTS	9
National Projects	9
European Projects	42
References	55
3. APPLICATIONS: PU RECYCLATES IN THE EUROPEAN AUTOMOTIVE INDUSTRY	57
Polyurethanes: Special Properties/Special Separation Techniques	57
Application of Rebonded Foam in the European Automotive Industry	65
Applications of Glycolysis in the European Automotive Industry	66
Recycling of PU Paints	129
Compression Molding of RIM and RRIM Polyurethanes for Reuse in the Automotive Industry	140

Powder/Regrind Technology	146
Adhesive Pressing of Polyurethanes, PU	
Composites and Commingled Polyurethanes	162
Cast-Pressing of PU and PU Composite	
Materials	178
Injection Molding of PU Integral Skin Foam	184
References	186
Bibliography	192

<i>Afterword</i>	193
