

OMG PRESS

Enterprise JavaTM *with* UMLTM

CT Arrington

OMG Press Advisory Board	xvii
OMG Press Books in Print	xix
About the OMG	xxi
Chapter 1 Introduction to Modeling Java with the UML	1
What Is Modeling?	2
Simplification	3
Varying Perspectives	3
Common Notation	4
UML	4
The Basics	4
Modeling Software Systems with the UML	13
The Customer's Perspective	13
The Developer's Perspective	14
Modeling Process	14
Requirements Gathering	15
Analysis	15
Technology Selection	15
Architecture	15
Design and Implementation	16
The Next Step	16
Chapter 2 Gathering Requirements with UML	17
Are You Ready?	18
What Are Good Requirements?	18
Find the Right People	19
Listen to the Stakeholders	20
Develop Accessible Requirements	21
Describe Detailed and Complete Requirements	24

Refactor the Use Case Model	27
Guidelines for Gathering Requirements	34
Focus on the Problem	34
Don't Give Up	35
Don't Go Too Far	35
Believe in the Process	36
How to Detect Poor Requirements	37
Path 1: Excessive Schedule Pressure	38
Path 2: No Clear Vision	39
Path 3: Premature Architecture and Design	40
The Next Step	40
Chapter 3 Gathering Requirements for the Timecard Application	41
Listen to the Stakeholders	42
Build a Use Case Diagram	44
Find the Actors	44
Find the Use Cases	45
Determine the Actor-to-Use-Case Relationships	47
Describe the Details	48
Guidelines for Describing the Details	48
Gathering More Requirements	58
Revising the Use Case Model	61
Revise the Use Case Diagram	61
Revising the Use Case Documentation	63
The Next Step	75
Chapter 4 A Brief Introduction to Object-Oriented Analysis with the UML	77
Are You Ready?	78
Solid Requirements	78
Prioritizing Use Cases	78
What Is Object-Oriented Analysis?	80
The Analysis Model	80
Relationship to Use Case Model	80
Steps for Object-Oriented Analysis	81
Discover Candidate Objects	81
Guidelines for Discovering Objects	81
Process for Discovering Objects	83
Describe Behavior	90
Guidelines for Finding Behavior	90

A Process for Describing Behavior	92
Describe the Classes	95
Guidelines for Describing Classes	95
Process for Describing Classes	97
The Next Step	101
Chapter 5 Analysis Model for the Timecard Application	103
Prioritizing the Use Cases	103
The Ranking System	104
Evaluation of the Export Time Entries Use Case	107
Evaluation of the Create Charge Code Use Case	108
Evaluation of the Change Password Use Case	109
Evaluation of the Login Use Case	109
Evaluation of the Record Time Use Case	110
Evaluation of the Create Employee Use Case	111
Select Use Cases for the First Iteration	112
Discover Candidate Objects	112
Discover Entity Objects	113
Discover Boundary Objects	116
Discover Control Classes	118
Discover Lifecycle Classes	118
Describe Object Interactions	118
Add Tentative Behavior for Login	119
Build Sequence Diagrams for Login	119
Validate Sequences for Login	122
Sequence Diagrams and Class Diagrams for the Remaining Use Cases	124
Describe Classes	126
Find Relationships for Login	127
Find Relationships for Export Time Entries	128
Find Relationships for Record Time	129
The Next Step	131
Chapter 6 Describing the System for Technology Selection	133
Are You Ready?	134
Group Analysis Classes	134
Boundary (User Interface)	134
Boundary (System Interface)	136
Control, Entity, and Lifecycle	136
Describe Each Group	136
User Interface Complexity	137

Deployment Constraints for User Interfaces	138
Number and Type of Users	140
Available Bandwidth	141
Types of System Interfaces	142
Performance and Scalability	143
Technology Requirements for the Timecard Application	144
Find Groups of Analysis Classes	144
User Interface Complexity	144
Deployment Constraints for User Interfaces	146
Number and Type of Users	147
Available Bandwidth	148
Types of System Interfaces	148
Performance and Scalability	148
The Next Step	152
Chapter 7 Evaluating Candidate Technologies for Boundary Classes	153
Technology Template	153
Swing	154
Gory Details	155
Strengths	165
Weaknesses	165
Compatible Technologies	165
Cost of Adoption	166
Suitability	167
Java Servlets	168
Gory Details	170
Strengths	172
Weaknesses	172
Compatible Technologies	172
Cost of Adoption	172
Suitability	173
XML	175
Gory Details	176
Strengths	178
Weaknesses	178
Compatible Technologies	178
Cost of Adoption	178
Suitability	179

Technology Selections for the Timecard System	180
User Interface Classes	180
Conclusion	181
The Next Step	182
Chapter 8 Evaluating Candidate Technologies for Control and Entity Classes	183
RMI	183
Gory Details	184
Common Uses of RMI	188
Strengths	192
Weaknesses	192
Compatible Technologies	192
Cost of Adoption	192
JDBC	193
Gory Details	193
Strengths	196
Weaknesses	197
Compatible Technologies	198
Cost of Adoption	198
Suitability of RMI and JDBC	198
EJB 1.1	199
Gory Details	202
Strengths	205
Weaknesses	206
Compatible Technologies	206
Cost of Adoption	206
Suitability	207
Sample Technology Selection	208
Technology Requirements	208
The Next Step	210
Chapter 9 Software Architecture	211
Are You Ready?	212
Clear Understanding of the Problem	212
Clear Understanding of the Technology	212
Goals for Software Architecture	213
Extensibility	213
Maintainability	213

Reliability	214
Scalability	214
UML and Architecture	214
Packages	214
Package Dependency	217
Subsystems	219
Guidelines for Software Architecture	221
Cohesion	222
Coupling	222
Creating a Software Architecture	222
The Architect	222
A Process	223
Sample Architecture for the Timecard System	225
Set Goals	225
Group and Evaluate Classes	226
Show Technologies	233
Extract Subsystems	233
Evaluate against Guidelines and Goals	233
The Next Step	237
Chapter 10 Introduction to Design	239
What Is Design?	239
Are You Ready?	240
The Need for Design	240
Productivity and Morale	240
A Malleable Medium	241
Scheduling and Delegation	241
Design Patterns	241
Benefits	242
Use	243
Planning for Design	243
Establish Goals for the Entire Design	244
Establish Design Guidelines	245
Find Independent Design Efforts	246
Designing Packages or Subsystems	246
Design Efforts for the Timecard Application	247
The Next Step	248
Chapter 11 Design for the TimecardDomain and TimecardWorkflow	249

Establish Goals for the Effort	250
Performance and Reliability	250
Reuse	250
Extensibility	250
Review Prior Steps	251
Review of the Analysis Model	251
Review Architectural Constraints	257
Design for Goals	258
Apply Design for Each Use Case	262
Design for the Login Use Case	262
Design for the Record Time Use Case	266
Design for the Export Time Entries Use Case	271
Evaluate the Design	273
Implementation	277
User Entity Bean	277
Timecard Entity Bean	283
LoginWorkflow Stateless Session Bean	292
RecordTimeWorkflow Stateful Session Bean	296
Supporting Classes	301
ChargeCodeHome	308
ChargeCodeWrapper.java	319
Node.java	320
The Next Step	321

Chapter 12 Design for HTML Production	323
Design Goals	324
Goal 1: Support Modular Construction of Views	324
Goal 2: Keep HTML Production Simple	324
Goal 3: Support Preferences	326
Goal 4: Extensibility and Encapsulation	326
Design to Goals	327
Design for Goal 1: Support Modular Construction of Views	327
Design for Goal 2: Keep HTML Production Simple	330
Design for Goal 3: Support Preferences	335
Design for Goal 4: Extensibility and Encapsulation	338
Filling in the Details	339
Implementation	346
IHtmlProducer.java	346
ComboBoxProducer.java	347

FormProducer.java	348
PageProducer.java	350
SubmitButtonProducer	351
TableProducer.java	352
TabularInputFormProducer.java	354
TextFieldProducer.java	356
TextProducer.java	358
ICConcreteProducer.java	359
ProducerFactory.java	360
FormProducerGeneric.java	364
PageProducerGeneric.java	366
TableProducerGeneric.java	368
TabularInputFormProducerGeneric.java	369
The Next Step	371
Chapter 13 Design for the TimecardUI Package	373
Establish Design Goals	373
Extensibility	373
Testability	374
Review Prior Steps	374
Review Architectural Constraints	374
Review Analysis Model	375
Design to Goals	379
Design for Each Use Case	381
Create Design for the Login Use Case	381
Create Design for the Record Time Use Case	383
Implementation	387
LoginServlet.java	387
RecordTimeServlet.java	392
BasicServlet.java	397
The Next Step	399
Chapter 14 Design for BillingSystemInterface	401
Identify Goals	401
Clarity	402
Performance and Reliability	402
Extensibility	402
Reuse Potential	402
Review of Analysis Model	402
Review of Architecture	402

Design	403
Sequence Diagram for Export Specific Users	406
Sequence Diagram for Export All Users	406
Participating Classes	406
Implementation	407
ExportCriteria.java	407
ExportFile.java	412
ExportTimeEntriesApplication.java	414
Conclusion	417
Appendix A Visual Glossary	419
Appendix B Additional Resources	435
Appendix C The CD-ROM	439
Index	441
