

The McGraw-Hill

**PE EXAM
DEPTH Guide**

Civil
Engineering

Geotechnical Engineering

***More Subject Material
for the PE EXAM***

- Everything you need to pass
- Questions designed around the new design format
- Time-saving power-study techniques
- Expert exam tips

S. JOSEPH SPIGOLON, Ph.D., PE

CONTENTS

Preface xii

About the Author xiii

| | |
|--|------------|
| CHAPTER 1: WHAT IS GEOTECHNICAL ENGINEERING? | 1.1 |
| Scope of This Quick-Study Guide | 1.2 |
| CHAPTER 2: IDENTIFICATION AND CLASSIFICATION OF SOIL AND ROCK | 2.1 |
| Definition of Soil and Rock | 2.1 |
| Soil Identification | 2.1 |
| Grain Size Distribution | 2.1 |
| Atterberg Limits | 2.4 |
| Soil Classification Systems | 2.6 |
| Unified Soil Classification System | 2.7 |
| AASHTO Soil Classification System | 2.10 |
| USDA Soil Taxonomy | 2.10 |
| Rock Identification and Classification | 2.12 |
| Intact Character | 2.12 |
| In Situ Character | 2.12 |
| Weight-Volume (Phase) Relationships | 2.15 |
| Example Problems | 2.16 |
| Grain Size Distribution | 2.16 |
| Atterberg Limits | 2.18 |
| Soil Classification | 2.18 |
| Rock Description and Classification | 2.20 |
| Weight-Volume (phase) Relationships | 2.22 |
| CHAPTER 3: HYDRAULIC PROPERTIES OF SOIL AND ROCK | 3.1 |
| Coefficient of Permeability | 3.1 |
| Laboratory Tests for the Coefficient of Permeability | 3.3 |
| Equivalent Permeability of Stratified Deposits | 3.4 |

| | |
|---|------|
| Empirical Estimates for Coefficient of Permeability | 3.6 |
| Permeability of Rock | 3.7 |
| Field Tests for Permeability by Pumping from Wells | 3.8 |
| Effective Stress and Seepage Pressure | 3.11 |
| Principle of Effective Stress | 3.12 |
| Seepage Pressures and the Critical Hydraulic Gradient | 3.13 |
| Seepage of Water Through Soils | 3.15 |
| Flow Net in Isotropic Soil | 3.15 |
| Drawing a Flow Net | 3.17 |
| Flow Net in Anisotropic Soil | 3.17 |
| Seepage Line—Phreatic surface | 3.18 |
| Heaving of Soil at Exit Point | 3.19 |
| Example Problems | 3.20 |
| Constant Head Permeability Test | 3.20 |
| Falling Head Permeability test | 3.20 |
| Equivalent Horizontal Permeability | 3.20 |
| Equivalent Vertical Permeability | 3.21 |
| Estimating the Coefficient of Permeability | 3.21 |
| Well Pumping Test—Fully Penetrating Artesian Flow | 3.21 |
| Well Pumping Test—Partially Penetrating Artesian Flow | 3.22 |
| Well Pumping Test—Fully Penetrating Gravity Flow | 3.22 |
| Well Pumping Test—Partially Penetrating Gravity Flow | 3.23 |
| Effective Stress | 3.23 |
| Seepage Pressures and Critical Hydraulic Gradient | 3.24 |
| Flow Net in Isotropic Soil | 3.25 |
| Heaving of Soil at Exit Point | 3.26 |

CHAPTER 4: COMPRESSIBILITY OF SOIL AND ROCK

4.1

Compressibility 4.1

| | |
|--|------|
| One-Dimensional Compression | 4.2 |
| Laboratory Oedometer Test | 4.4 |
| Determining Preconsolidation Pressure | 4.5 |
| Determining the field void Ratio-Pressure Relationship | 4.7 |
| Calculation of Settlement Due to One-Dimensional Primary Consolidation | 4.9 |
| Vertical Stresses Due to Surface Loads | 4.10 |
| Boussinesq Equations | 4.10 |
| Stresses Under Rigid Footings | 4.15 |
| Consolidation Settlement of Structures | 4.18 |

| | |
|--|------|
| Foundation Settlement in Cohesionless Soil | 4.18 |
| Time Rate of Consolidation | 4.18 |
| Theoretical development | 4.18 |
| Laboratory Consolidation Test | 4.20 |
| Example Problems | 4.24 |
| One-Dimensional Compression | 4.24 |
| Vertical Stresses Due to Surface Loads | 4.25 |
| Foundation Settlement in Cohesive Soil | 4.28 |
| Time Rate of Consolidation | 4.30 |

CHAPTER 5: STRENGTH OF SOIL AND ROCK

5.1

| | |
|--|------|
| Combined Stresses | 5.1 |
| Mohr's Circle of Stress | 5.2 |
| Mohr-Coulomb Failure Criteria | 5.3 |
| Tests for Shear Strength of Soils | 5.5 |
| Direct Shear Test | 5.5 |
| Triaxial Shear Test | 5.5 |
| Types of Laboratory Shear Tests | 5.6 |
| Pore-Water Pressure Resulting from Stress | 5.8 |
| Relative Density | 5.9 |
| Definitions | 5.9 |
| Laboratory Relative Density Tests | 5.9 |
| Effect of Initial Relative Density on Shear Strength | 5.10 |
| Negative Pore-Water Pressure Due to Partial Saturation | 5.11 |
| Shear Strength Relationships | 5.12 |
| Consolidated-Drained (S-Test) Shear of Saturated Soils | 5.12 |
| Consolidated-Undrained (R-Test) of Saturated Soils | 5.15 |
| Unconsolidated-Undrained (Q-Test) Shear of Saturated Soils | 5.16 |
| Shear Strength of Partially Saturated Soils | 5.17 |
| Sensitivity of Clays to Disturbance | 5.18 |
| Selection of Shear Strength for Design | 5.19 |
| Example Problems | 5.20 |

CHAPTER 6: ENGINEERING GEOLOGY OF ROCKS AND SOILS

6.1

| | |
|---------------------------|-----|
| Origin of Rocks and Soils | 6.1 |
| Igneous Rocks | 6.1 |
| Sedimentary Rocks | 6.1 |

| | |
|------------------------|------|
| Metamorphic Rocks | 6.1 |
| Soil Forming Processes | 6.2 |
| Weathering Processes | 6.2 |
| Natural Soil Deposits | 6.4 |
| Residual Soils | 6.4 |
| Transported Soils | 6.5 |
| Soil Structures | 6.11 |
| Cohesionless Soil | 6.11 |
| Cohesive Soil | 6.11 |
| Mixed Grain Soil | 6.12 |
| Example Problems | 6.13 |

CHAPTER 7: ENGINEERING SUBSURFACE INVESTIGATIONS

7.1

| | |
|---|------|
| Plan for a Subsurface Investigation | 7.1 |
| Sources for Pre-Existing Information | 7.2 |
| Geologic Data Sources | 7.2 |
| Project Records | 7.3 |
| Remote Imaging | 7.3 |
| General Sources | 7.3 |
| Engineering Geophysical Methods | 7.4 |
| Electrical Resistivity Surveys | 7.4 |
| Seismic Refraction Surveys | 7.4 |
| Subsurface Access Methods | 7.6 |
| Pits and Trenches | 7.6 |
| Borings | 7.7 |
| Sampling of Soils and Rocks | 7.10 |
| Thick-Wall Split-Barrel Drive Samplers | 7.10 |
| Vibrating tube Sampler | 7.11 |
| Thin-Wall Tube Samplers | 7.11 |
| Diamond-Core Sampler | 7.13 |
| In Situ Testing of Soils and Rocks | 7.14 |
| Plate Load Test | 7.14 |
| Field Vane Shear Test | 7.16 |
| Borehole Shear Test | 7.16 |
| Unconfined Compression test of Undisturbed Cohesive Sample | 7.17 |
| Handheld Devices: Penetrometer and/or Torvane Test of Cohesive Sample | 7.18 |
| Standard Penetration Test | 7.19 |
| Dynamic Penetrometer Test, Thick-Wall Tube or Solid Cone | 7.21 |
| Handheld Sounding Rod Test | 7.23 |

Analysis of Penetration Test Data 7.23**Estimating Unconfined Compressive Strength from SPT Data 7.23****Estimating Relative Density and Friction Angle from SPT Data 7.24****Estimating Unconfined Compressive Strength from CPT Data 7.25****Estimating Pre-consolidation Pressure 7.27****Estimation of Liquefaction Potential 7.29****Planning for a Subsurface Investigation 7.32****Factors Affecting the Plan for an Investigation 7.32****How Many Borings, Where, and How Deep? 7.32****Example Problems 7.36****CHAPTER 8: SHALLOW FOUNDATIONS—FOOTINGS AND RAFTS****8.1****Bearing Capacity 8.1****Settlement 8.1****Shear Failure Modes 8.2****General Shear Failure 8.2****Punching Shear Failure 8.2****Local Shear Failure 8.2****Theoretical Bearing Capacity Equations 8.3****Footings of Finite Length 8.4****Footings with Inclined Load 8.4****Shallow Footings on or Near Slope 8.4****Bearing Capacity of Cohesive Soils 8.8****Settlement Limitations 8.8****Bearing Capacity from In Situ Tests 8.11****Footings on Sand and Nonplastic Silt 8.11****Rafts on Sand and Nonplastic Silt 8.12****Footings on Clay and Plastic Silt 8.13****Rafts on Clay and Plastic Silt 8.13****Earthquake Loading of Foundations 8.14****Modulus of Subgrade Reaction 8.14****Example Problems 8.16****CHAPTER 9: DEEP FOUNDATIONS—PILES AND PIERS****9.1****Types of Deep Foundations 9.1****Deep Foundation Failure Modes 9.2****Deep Foundation Capacity from Load Tests 9.3**

| | |
|--|------|
| Field Loading Tests in Axial Compression | 9.4 |
| Tension and Lateral Loading Tests | 9.4 |
| Test Loading and Time Relationship | 9.5 |
| Interpretation of Pile Load Tests | 9.5 |
| Deep Foundation Capacity from Static Analysis | 9.7 |
| Load Carrying Capacity of a Single Pile or Pier in Granular Soil | 9.8 |
| Load Carrying Capacity of a Single Pile or Pier in Cohesive Soil | 9.10 |
| Lateral Loading of Piles and Piers | 9.12 |
| Bearing Capacity of Pile Groups | 9.12 |
| Settlement of Pile Groups | 9.13 |
| Pile Capacity from Driving Data | 9.14 |
| Engineering News Formula | 9.14 |
| Danish Formula | 9.14 |
| Use of Pile Driving Formulae | 9.14 |
| Example Problems | 9.15 |

CHAPTER 10: RETAINING STRUCTURES

10.1

| | |
|--|-------|
| Types of Retaining Structures | 10.1 |
| Gravity Retaining Walls | 10.1 |
| Structural Retaining Walls | 10.2 |
| Flexible Retaining Walls | 10.2 |
| Lateral Earth Pressure | 10.2 |
| Active Earth Pressure | 10.3 |
| Rankine's Theory | 10.5 |
| Cohesive Soils | 10.6 |
| Surcharge Loading | 10.6 |
| Active Lateral Pressure Due to Earthquake Forces | 10.7 |
| Passive Earth Pressure | 10.8 |
| Design of Rigid Retaining Walls | 10.9 |
| Design of MSE Retaining Walls | 10.10 |
| Design of Flexible Retaining Walls | 10.12 |
| Design of Braced Excavations | 10.18 |
| Example Problems | 10.19 |

CHAPTER 11: SLOPE STABILITY

11.1

| | |
|-------------------------|------|
| Types of Slope Failures | 11.1 |
| Sliding Wedge Analysis | 11.2 |

| | |
|---|-------|
| Infinite Slope Analysis | 11.5 |
| Slope Stability Charts for Homogeneous Slopes | 11.6 |
| Method of Slices | 11.8 |
| Seismic Slope Stability Analysis | 11.10 |
| Example Problems | 11.10 |

CHAPTER 12: COMPACTED FILL

12.1

| | |
|--|-------|
| Purpose of Compaction | 12.1 |
| Basic Concepts | 12.2 |
| Zero Air Voids Curve | 12.2 |
| Pressure Distribution with Depth | 12.2 |
| Compaction of Cohesionless Soils | 12.2 |
| Factors Affecting Field Compaction of Cohesionless Soils | 12.3 |
| Effect of Soil Gradation | 12.3 |
| Effect of Water Content | 12.4 |
| Effect of Lift Thickness and Magnitude of Effort | 12.4 |
| Effect of Characteristics of the Compaction Equipment | 12.5 |
| Compaction of Cohesive Soils | 12.6 |
| Example of a Test Fill | 12.7 |
| Effect of Soil Texture | 12.8 |
| Effect of Lift Thickness | 12.9 |
| Effect of Field Compaction Equipment | 12.9 |
| Effect of Compacting Moisture on Engineering Properties | 12.9 |
| Modifying Compactibility with Chemicals | 12.12 |
| Quality Assurance Testing | 12.12 |
| Quality Assurance Definitions | 12.12 |
| The Proctor Compaction Test for Cohesive Soil | 12.13 |
| Field Density and Water Content Test Methods | 12.14 |
| Laboratory and Field California Bearing Ratio Test | 12.16 |
| Specifying Soil Compaction | 12.17 |
| Acceptable Soil Types | 12.17 |
| Compactive Effort Requirement | 12.18 |
| Types of Compaction Equipment | 12.18 |
| Lift Thickness | 12.19 |
| Example Problems | 12.20 |
