

A scanning electron micrograph (SEM) showing a cluster of cells, likely bacteria or fungi, with a textured, somewhat spherical appearance. The cells are arranged in a dense, overlapping pattern, and the image is rendered in shades of blue and white against a dark background.

Antimicrobial Chemotherapy

Fourth edition

Edited by
David Greenwood

Contents

List of contributors		xiii
Historical introduction		1
<i>D. Greenwood</i>		
PART I: GENERAL PROPERTIES OF ANTIMICROBIAL AGENTS		9
1	Inhibitors of bacterial cell wall synthesis	11
	<i>D. Greenwood</i>	
2	Inhibitors of bacterial protein synthesis	29
	<i>D. Greenwood</i>	
3	Synthetic antibacterial agents and miscellaneous antibiotics	46
	<i>D. Greenwood</i>	
4	Antifungal agents	59
	<i>D. Greenwood</i>	
5	Antiprotozoal and anthelmintic agents	66
	<i>D. Greenwood</i>	
6	Antiviral agents	77
	<i>W. L. Irving</i>	
7	Antiretroviral agents	93
	<i>W. L. Irving</i>	
PART II: LABORATORY ASPECTS OF ANTIMICROBIAL THERAPY		99
8	Antibiotic sensitivity testing and assay	101
	<i>D. Greenwood and R. C. B. Slack</i>	
9	Antibiotic interactions	118
	<i>D. Greenwood</i>	

10	Use of the laboratory <i>R. C. B. Slack</i>	126
----	--	-----

**PART III: RESISTANCE TO
ANTIMICROBIAL AGENTS**

		135
11	The problem of resistance <i>K. J. Towner</i>	137
12	Mechanisms of acquired resistance <i>K. J. Towner</i>	145
13	The genetics of resistance <i>K. J. Towner</i>	156
14	Control of the spread of resistance <i>A. M. Emmerson</i>	164

**PART IV: GENERAL PRINCIPLES OF USAGE OF
ANTIMICROBIAL AGENTS**

		173
15	General principles of the treatment of infection <i>R. G. Finch</i>	175
16	Pharmacokinetics <i>D. Greenwood</i>	183
17	Prescribing for children and the elderly <i>R. G. Finch</i>	193
18	Adverse reactions to antibiotics <i>R. G. Finch</i>	200
19	Chemoprophylaxis <i>R. C. B. Slack</i>	212

**PART V: THE THERAPEUTIC USE OF
ANTIMICROBIAL AGENTS**

		223
20	Respiratory tract infections <i>A. M. Emmerson</i>	225
21	Urinary infections <i>R. C. B. Slack</i>	235

22	Gastrointestinal infections <i>R. G. Finch</i>	242
23	Bacteraemia and endocarditis <i>R. G. Finch</i>	253
24	Skin and soft-tissue infections <i>P. J. Wilkinson</i>	272
25	Bone and joint infections <i>P. J. Wilkinson</i>	280
26	Mycobacterial disease <i>A. M. Emmerson</i>	287
27	Meningitis and brain abscess <i>R. G. Finch</i>	301
28	Viral infections <i>W. L. Irving</i>	318
29	Infection in immunocompromised patients <i>R. G. Finch</i>	335
30	Sexually transmitted infections <i>R. C. B. Slack</i>	345
31	Parasitic diseases <i>R. C. B. Slack</i>	354
32	Topical use of antimicrobial agents <i>R. C. B. Slack</i>	368
33	Postscript: The development and marketing of antimicrobial drugs <i>D. Greenwood</i>	376
	Recommendations for further reading	387
