

The book cover features a dark blue background with a light blue vertical band on the left. The left band contains faint, light blue mathematical symbols: a circle, the expression $(2,3)$, a circle, and the expression $(,1)$. The right side of the cover is decorated with yellow geometric shapes: a triangle at the top right, a circle below it, a large '2)' symbol on the right side, another circle below that, a triangle at the bottom right, and a solid yellow circle at the bottom right. A central yellow rectangle contains the title text in dark blue.

CHAPMAN & HALL/CRC MATHEMATICS

Contents

1	What is Maple?	1
2	Integers and rationals	5
2.1	Integers	5
2.2	Arithmetical expressions	8
2.3	Some Maple	12
2.4	Divisibility	20
2.5	Rationals	25
2.6	Primes	32
2.7	Standard library functions	37
3	Sets and functions	39
3.1	Sets	39
3.2	Sets with Maple	45
3.3	Functions	48
3.4	User-defined functions	50
4	Sequences	59
4.1	Basics	59
4.2	Sequences with Maple	61
4.3	Plotting the elements of a sequence	64
4.4	Periodic and eventually periodic sequences	67
4.5	Some non-periodic sequences	70
4.6	Basic counting sequences	77
4.7	Sequences defined recursively	82
5	Real and complex numbers	89
5.1	Digits of rationals	89
5.2	Real numbers	96
5.3	Random and pseudo-random digits*	99
5.4	Complex numbers	102
5.5	Standard library functions	108

6	Structure of expressions	113
6.1	Analysis of an expression	113
6.2	More on substitutions	117
6.3	Functions acting on operands of expressions	119
7	Polynomials and rational functions	127
7.1	Polynomials	127
7.2	Polynomial arithmetic	128
7.3	Rational functions	138
7.4	Basic manipulations	139
7.5	Partial fractions decomposition*	142
8	Finite sums and products	147
8.1	Basics	147
8.2	Sums and products with Maple	149
8.3	Symbolic evaluation of sums and products	152
8.4	Double sums and products	154
8.5	Sums and products as recursive sequences	160
9	Elements of programming	163
9.1	Iteration	163
9.2	Study of an eventually periodic sequence	173
9.3	Conditional execution*	177
9.4	Procedures*	179
10	Vector spaces	185
10.1	Cartesian product of sets	185
10.2	Vector spaces	186
10.3	Vectors with Maple	188
10.4	Matrices	191
10.5	Matrices with Maple	192
11	Modular arithmetic*	201
11.1	A modular system	201
11.2	Arithmetic of equivalence classes	204
11.3	Some arithmetical constructions in \mathbb{F}_p	206
12	Some abstract structures*	213
12.1	The axioms of arithmetic	213
12.2	Metric spaces	214
12.3	Rings and fields	214
12.4	Vector spaces	215
