

Microwaves: Theory and Application in Materials Processing V

Second World Congress on Microwave
and Radio Frequency Processing

"Bridging Science, Technology,
and Applications"

Edited by
David E. Clark
Jon G.P. Binner
David A. Lewis

Ceramic
Transactions
Volume III

Contents

Preface	xi

Review Board	xv
Poster Competition	xvi
Photos	xviii

Introduction

On Building Bridges: A Personal Viewpoint	xix
B. Krieger	

Fundamentals, Modeling, and Education

Microwave-Enhanced CVI Processing: A Moving Interface Model	3
B.S. Tilley and G.A. Kriegsmann	
Computer Simulation of Millimeter-Wave Sintering of Ceramic and Composite Materials	11
N.A. Zharova, K.I. Rybakov, V.E. Semenov, and S.V. Egorov	
Pattern Synthesis for Microwave Heating Applications	19
I. Meier and J.B. de Swardt	
Microwave Joining of Two Long Hollow Ceramic Tubes: A Combined Asymptotic and Numerical Analysis	27
G.A. Kriegsmann and J.H.C. Luke	
Analysis of the Interaction between a Layered Spherical Human Head Model and a Linear Antenna	35
K.S. Nikita, G.S. Stamatakos and N.K. Uzunoglu	
A Molecular Orbital Model for Absorption of Microwave Energy by Materials	43
J.K. West and D.E. Clark	
Resonant Excitation of Processes in a Solid by a Microwave Magnetic Field	57
V. Fleurov and M. Molotskii	

Microwave Energy Applications — Design, Development and Evaluation of a Computer-Based Course	65
G. De Corte, P.Yde, W. Van Loock, M. Machiels, and D. Van Dommelen	

Dielectric Measurements and Properties

Application of FTIR-Reflectance Spectroscopy to Estimate the Temperature-Dependent Dielectric Loss of Engineering Ceramics ...	75
R.S. Donnan, R.E.M. Vickers, and M. Samandi	
Dielectric Characterization of Human Breast Tissue and Breast Cancer Detection Algorithms for Confocal Microwave Imaging	85
S.C. Hagness, X. Li, K.M. Leininger, J.H. Booske, and M. Okoniewski	
The Use of Dielectric Property Measurements in the Selection of a Thermosetting Resin for the Microwave Cure of Filament Wound Composites	93
I. Youngs, T. Power, D. Robinson, T. Stickland, S.G. Appleton, and A. Howard	
Comparison of Measured and Calculated Powdered Mixture Permittivities	101
S.O. Nelson	
Measurements of the High-Temperature Microwave (400-3000MHz) Complex Dielectric Constants of Monomers ϵ-Caprolactam and ϵ-Caprolactone	109
R. Hutcheon, J. Mouris, X. Fang, and D.A. Scola	
The Use of Dielectric Properties in the Design of a Reactor Heated by Microwaves	119
F.J. Elvin	
Dielectric Measurement Using an Internally Calibrated Split-Stripline Fixture	129
M. Rimbi and H.C. Reader	
Dilatometric Measurements of Nanoscaled Ceramics in a 30GHz Millimeter Wave Field	137
S. Rhee, G. Link, and M. Thumm	
Measurement of Microwave Permittivity Using Ferrite Loaded Cavity Resonator	145
T. Nakamura, Y. Nikawa, and F. Okada	
From Dielectric Measurements to Applicators: Drying, Polymer Processing, Sintering	153
S. Lefeuvre, F. Azzouz, G.V. Salmoria, and M. Massoud	

Microwave Synthesis and Reactions

Solvent-Free Microwave Assisted Organic Synthesis	163
A. Loupy, L. Perreux, and A. Petit	
Microwave Synthesis of Calcium Tungstate	173
M. Cirakoglu, W.A. Prisbrey, J.R. Jokisaari, S. Bhaduri, and S.B. Bhaduri	
Auto Ignition Synthesis and Microwave Sintering of Nanocrystalline Ceramics	181
S.B. Bhaduri, W.R. Tinga, J.G. Huang, E.H. Zhou, and S.B. Bhaduri	
Microwave Combustion Synthesis of Al_2O_3/SiC Powders	189
R.H.G.A. Kiminami, M.R. Morelli, D.C. Folz, and D.E. Clark	
Microwave-Induced Combustion Synthesis of Al_2O_3-TiC Composite Powder	197
D. Atong and D.E. Clark	
Microwave Assisted Anatase-to-Rutile Phase Transition of TiO_2 -Anatase Gels	207
I. Plazi, D. Ravnjak, T. Koloini, and A. Lubej	
Microwave Catalysis and Plasma Processing	
Microwave Plasma Synthesis of Nanoparticles: Application of Microwaves to Produce New Materials	217
D.V. Szabó, D. Vollath, and W. Arnold	
Microwave-Assisted Heterogeneous Photocatalytic Oxidation	225
S. Kataoka, D.T. Tompkins, M.A. Anderson, M.E. Zorn, W.A. Zeltner, and J.H. Booske	
Progress in the <i>in situ</i> Control of Low-Temperature Plasma Processing	231
A. Lunk, A. Neuffer, P. Scheible, H. Schmidt, and I.P. Vinogradov	
The Potential of Microwave Induced Catalytic Process: A Recent Revisit	241
J.K.S. Wan and M.C. Depew	
Restoring of Catalytic Alumina Porous Spheres by Microwave Treatments	249
P. Veronesi, C. Leonelli, and A.B. Corradi	
Microwave Induced Catalytic Reactions in Liquid Phase	257
M. Hájek and M. Radoiu	

Microwave Processing of Ceramics

Microwave Behavior of Silicon Carbide/High Alumina Cement Composites	267
K.S. Leiser and D.E. Clark	
Insulation Blankets for Microwave Sintering of Traditional Ceramics	277
M. Sato, T. Mutoh, T. Shimotuma, S. Ito, K. Ida, T. Inoue, K. Esaki, O. Motojima, M. Fujiwara, S. Takayama, M. Mizuno, S. Obata, T. Shimada, and K. Satake	
Microwave Joining of Al₂O₃ and SiC with Glass Interlayer	287
S. Aravindan, J. Ramkumar, and R. Krishnamurthy	
Microwave Firing of Heavy Clay Bodies: The Examination of the Key Variables That Influence the Microwave Heating Process	295
G.V.A. Tayler, M. Anderson, and M.G. Hamlyn	
Sintering of Traditional Ceramics by Microwaves (84GHz and 2.45GHz)	305
S. Takayama, M. Mizuno, S. Obata, T. Shimada, K. Satake, M. Sato, T. Mutoh, T. Shimotuma, S. Ito, K. Ida, T. Inoue, K. Esaki, O. Motojima, and M. Fujiwara	
Analysis of Microwave Sintered Porcelain	313
M. Mizuno, T. Takayama, S. Obata, T. Hirai, T. Shimada, K. Satake, M. Sato, T. Mutoh, T. Shimotsuma, S. Ito, T. Inoue, K. Esaki, and O. Motojima	
Synthesis of Oxide Pigment Powders by Microwave Treatments	321
C. Leonelli, F. Bondioli, C. Siligardi, P. Veronesi, and G.C. Pellacani	
Annealing and Self-Healing of Microwaved Ceramics	329
M.S. Morrow, D.E. Schechter, P.A. Eggleston, H.E. Huey, and Q.S. Wang	
Study of Microwave-Enhanced Mass Transport in Nanostructured Alumina Membranes	335
Y.V. Bykov, S.V. Egorov, A.G. Eremeev, K.I. Rybakov, V.E. Semenov, A.A. Sorokin, and S.A. Gusev	
Process Control	
Controlled Microwave Heating of Thermal Runaway Materials	345
J.R. Thomas Jr., J.M. Curtis Jr., C.H. Stern, and W.A. Davis	
Fires in Microwave and RF Heating Systems: Causes and Prevention	355
R.F. Schiffmann	

A Critical Assessment of Thermometric Accuracy during Microwave Sintering of Engineering Ceramics	363
R.S. Donnan and M. Samandi	
Control Systems and Concepts of Control for Industrial Microwave Equipment	371
E. Brown, T. Tella, and M. Yonnone	
Dielectric Calibration Methods for Industrial Microwave Moisture Sensors	381
S. Trabelsi, A.W. Kraszewski, and S.O. Nelson	
Temperature Measurement in Microwave-Heated Silicon Wafers	391
K. Thompson, J.H. Booske, R.F. Cooper, Y.B. Gianchandani, and S. Ge	

Emerging Applications

Microwave Remediation of Emissions Resulting from Treatment of Electronic Components	401
R.L. Schulz, G.G. Wicks, and D.E. Clark	
Microwave Remediation of Hazardous and Radioactive Wastes	411
G.G. Wicks, R.L. Schulz, and D.E. Clark	
Synthesis of n-TiO₂ for Photovoltaic Applications by Colloidal Microwave Processing	419
T. Schubert and M. Willert-Porada	
Multicomponent Desorption of Fixed-Bed-Adsorbers by Microwaves	427
J. Reuß, D. Bathen, H. Schmidt-Traub, M. Hoffmeister, and A. Binder	
Application of Microwaves to Dental Caries Treatment	435
Y. Nikawa, K. Kawai, and S. Ebisu	
Microwave Treatment of Germinated Yellow Pea	443
P. Kadlec, A. Rubecova, A. Hinkova, and J. Kaasova	
Laser Assisted Microwave Plasma (LAMP)—A New Tool in Ceramic Processing	451
C. Gerk and M. Willert-Porada	
Heating and Sintering of Steel Powders with Microwaves at 2.45GHz Frequency—Relation between Heating Behavior and Electrical Conductivity	459
M. Willert-Porada and H.-S. Park	
New First Principles of Microwave-Material Interaction: Discovering the Role of the H Field and Anisothermal Reactions	471
R. Roy, D.K. Agrawal, and J.P. Cheng	

Scale-Up and Commercialization

Microwave-Assisted Processing—From Laboratory to Production	489
S.M. Bond	
A Simple Basis for Decision to Use Microwave and Radio Frequency Energy for Industrial Processing	497
W. Van Loock	
Two Successful Industrial Microwave Recycling Applications	503
V.N. Tran	
Radio Frequency and Microwave Solutions for Industrial Processing	513
P.L. Roberts and M.V. Vasilik	
An Industrial Application of Microwave Heating: Continuous Drying of Inorganic Salts	521
J.I. Ortigosa	
Microwave Heating of Glass	527
U. Kolberg and H. Roemer	
A Vertical Radio Frequency Design as a Unit Operation for the Continuous Processing of Free-Flowing, Bulk Granular or Particulate Products	535
J.W. Cresko, N.L. Brown, and L.M. Phipps	
Developing Microwave Solutions for Industry: A Case Study	543
S.M. Bradshaw, D. Jordaan, H.C. Reader, J.W. Gerber, J.B. De Swardt, and T.V. Chow Ting Chan	
Comparative Analysis of Contemporary Electromagnetic Software for Microwave Power Industry	551
V.V. Yakovlev	
Waveguide Components and Configurations for Optimal Performance	559
J.F. Gerling	
Variable Frequency Microwave Moisture Leveling of Mouth Swabs	567
M. Hamann	
Panel Discussion	
Microwave and RF—Application, Engineering, and Social Issues	577
W.R. Tinga	
Index	587
